First question you should ask before buying any line of goods, is: —"Is it of good quality — will it bring back customers asking for it again—can I put my own reputation back of it?"

Paint quality proved by the guarantee on "English" Liquid Paint.

You know there is a recognized standard in paint making.

Therefore, the only guarantee that guarantees quality to you is the one that shows the formula and tells you not only that standard raw materials were used in its manufacture, but that these standard materials were used in the right and proper proportions.

The guarantee on **"English" Liquid Paint** shows that the white base is 70% pure White Lead (Brandram's B.B. Genuine) and 30% pure Zinc White; that the liquid is pure Linseed Oil, pure Turpentine and Dryer; that the various colors that can be made on a white base are arrived at by adding pure tinting colors.

You know exactly what you are buying — you know you are buying the highest grade paint in the market.

Just send us a postal card for prices and selling plans.

MURESCO

The Sanitary, Artistic, Wall Covering

According to the hosts of painters and decorators who use it exclusively, Muresco is the best water color wall finish on the market. You can safely recommend it to your painter customers as the most economical. It takes 30 per cent. more water than any other preparation, and covers more wall surface, pound for pound, than kalsomine or any similar article. It is warranted not to rub off, crack or peel. In most cases, one coat only makes an entirely satisfactory job. One of our customers in Winnipeg tells us that he has found one coat of Muresco better on new plaster walls than two coats of kalsomine.

all will come in due time. I wish to dwell for a moment only on a means by which all that ought to be demanded in the way of safeguarding the consumer can be obtained without sacrificing all chance of progress and improvement in the paint industry and compelling a reluctant trade to combine in trusts.

There is no excuse except antiquity to offer for misrepresentation, false descriptions or misleading labels. There is no defense except trade custom to be offered for the short weight or short measure package. A law, carefully and sincerely drawn, forbidding these two abuses, under severe penalties, would accomplish for the paint consumer all he has a right to ask and would save to the manufacturer the knowledge on which his industry is founded.

Paint and Oil Markets

MONTREAL.

Montreal, Feb. 5.—This week has been characterized by a good flow of orders, chiefly from the West. Stocks must have been severely depleted in some localities, for a number of the orders are for immediate delivery, which is somewhat unusual for this time of the year. Prices are unchanged, and the markets continue firm with an improving tendency.

TURPENTINE—The demand is on the quiet side for turpentine. The market, however, is firm, and there is no change in prices. We continue to quote 58c for single barrels.

LINSEED OIL—A fair amount of linseed oil is being booked for early delivery, but a cautious spirit seems to pervade the market for good round lots. The market is firm and prices are unchanged. We quote: Raw, 1 to 4 barrels, 59c; 5 to 9 barrels, 58c; boiled, 1 to 4 barrels, 62c; 5 to 9 barrels, 61c.

GROUND WHITE LEAD—Some good sized orders have been received, and the market is much firmer. It is evident that despite the demand for liquid paints ground white lead is still in good use. There is no change in prices, and we quote: Strictly pure, $5.50 to $6, according to brand, and No. 1, $5 to $5.50 f.o.b. Montreal.

RED LEAD—Stocks which were piled up before the close of navigation have not had serious inroads made upon them, and in the absence of a better demand prices are unchanged. We quote: Genuine red lead in casks, $4.50; in 100-lb. kegs, $5; in less quantities, at $6 per 100 lbs.; No. 1 red lead, casks, $4; kegs, $4.50, and smaller quantities. $5.50.

COLORS—Ready mixed paints continue in strong demand. Dry colors, such as Venetian reds, oxides, golden ochres, versilians and Indian reds are beginning to experience the spring movement, and good orders are coming.

PARIS GREEN—Jobbers and dealers seem to be pretty active in making sales, and a good movement has set in. Published lists are being maintained, and we quote: 1-lb. packets, 100 lbs. in case, 21c; 1-lb packets 50 lbs. in case, 21½c; ½-lb. packets, 100 lbs. in case, 23c; 1-lb. tins, 100 lbs. in case, 22c.

WHITE ZINC—There is a little better movement in white zinc to western and southern Ontario, where weather conditions are more favorable for decorative work than in this province. We quote: Dry V.M. Red Seal, 7½c; Red Seal, 7c; French V.M., 6c; Lehigh, 5c; white zinc, ground in oil, pure, 8½c; No. 1, 7c; No. 2, 5¾c.

TORONTO.

February 5.—The only change in price this week is the advance of two cents per gallon for turpentine. The general trend of trade is shaping itself for betterment, and while the orders for futures are still conservative, the feeling among jobbers and manufacturers is satisfactory. Immediate demands are not calling for great quantities of stock, but slow as some regarded January's business, a great advance is noted over the same month a year ago.

Because of the sharp upsurge in price for linseed oil in the United States, come crushers in that country, according to report, will import a great quantity of flaxseed from Canada. Although there is a duty of 25 cents a bushel on this seed, the U.S. mills importing say it will pay them to buy Canadian seed. What effect this will have on our own trade can well be imagined, especially if our crop is not above a normal one.

Another feature of the paint trade is the change in discounts made by brush manufacturers. Instead of net 60 days and 1 per cent. 30 days the terms are now net 30 days and 1 per cent. 10 days.

TURPENTINE—An advance of two cents is noted this week. Single barrels are 62c; 2 to 4 barrels, 61c; and 5 gallon lots, 67c.

LINSEED OIL—The advanced figures of last week rule, and prices are firm. Raw is 59c for 1 to 4 barrel lots, and 58 for 5 to 9 barrels. Boiled is 3c higher than these figures.

GLASS AND PUTTY—Glass is an interesting line just now and prices, which are unchanged from several weeks ago, are about as low as they will get this season. Manufacturers say they made no money last year owing to the low prices prevailing. Putty is a fair seller at last week's quotations.

GROUND WHITE LEAD — Normal trading is being done at unchanged quotations: No. 1 is at $5.40 to $5.65; pure white, from $5.80 to $6, and a superior line is at $6.25. Genuine red lead is at $4.50 in casks and $4.75 to $4.80 in 100 lbs.

STAINS AND VARNISHES—No advance is yet noted among stains and varnishes, although the basic materials have increased in price. Sales are a little on the slow side.

PETROLEUM—Quiet, steady selling lines are the various grades of petroleum. Quotations are unchanged. Prime white is 13½c; water white, 15½c, and Pratt's astral, 17½c.

ELASTICA Floor Finish

ONE PRICE TO ALL

Elastica Floor Finish is an exceptionally fine preservative that retains its lustre and protects wood under the severest wear and washing. It does not mar, scratch, white or spot; is very elastic, yielding with the wood under heel-blows. Works easily, dries free from dust in four to six hours, hardens over night and can be rubbed. On painted or old floors, linoleum and oil cloth, one coat is sufficient.

Why is Alabastine

The Most Popular and Most Saleable

Wall Coating?

Because it is Sanitary. It is a cement that sets and hardens on the wall and improves with age. Ready for use with cold water. Simple and easy of application. Any one can brush it on. No one can rub it off.

For many years, and now, the only wall coating advertised to the general public extensively. A well-assorted stock assures good sales.

Order direct or through your nearest jobber.

Read a Few of the Comments of the Leading London Dailies on the Supremacy of the Ross Rifle at the 1908 Bisley Meet.

"Long range Champion, breaks all records, a rifle of wondrous precision." *London Morning Post, July 16th.*

"Records broken at Bisley. A fine Canadian rifle." *London Daily Express, July 16th.*

"Record scoring with the Ross rifle." *London Daily Telegraph, July 15th.*

"Champion of the year." *New York Herald, July 16th.*

"Performance phenomenal by the Ross rifle." *London Field, July 18th.*

"The new Canadian rifle has made an unexpected and altogether successful appearance." *London Daily Mail, July 15th.*

"Great triumph for the Ross rifle which has beaten all the world's rifles." *London Standard, July 15th.*

"Many experts declare that Ross rifle better than new U.S. Rifle." *Nottingham Guardian, July 17th.*

"An individual triumph, the Lee-Enfield hopelessly beaten." *London Morning Post, July 15th.*

"The Ross rifle achievements were truly remarkable." *London Evening Standard, July 15th.*

"Great victory for the Ross rifle from Canada." *London Daily Express, July 15th.*

"The rifle of the future is the Ross rifle." *London Times, July 16th.*

"A'plague of possibles' with the Ross rifle." *London Sphere, July 15th.*

THE ROSS RIFLE CO., - QUEBEC

You May Become a Practical Window Dresser for $2.50

This is the first book ever written devoted exclusively to Hardware Display, and has been off the press only a few weeks. It is a practical, up-to-date collection of ideas of the most expert window dressers in the world. There are hundreds of displays in the book that can be put in at practically no expense—anyone of them will bring enough extra trade to the store to pay for the book many times.

256 Pages **8x11 Inches** **300 Illustrations**

Price $2.50. (Payable in Advance)

Technical Books, 10 Front St. East, Toronto

"The Latest and Best"—"DOMINION SPECIAL" FIELD FENCE

MADE FROM SPECIAL GALVANIZED HIGH CARBON WIRE
Drawn at Our Own Mill — Galvanized at Our Own Mill — Woven at Our Own Mill
FROM THE WIRE ROD TO THE FINISHED FENCE.

ENTIRELY "A CANADIAN PRODUCT"

JOBBERS should not fail to get into line at once and handle this fencing, your customers throughout the country will specify some fencing to complete their spring shipment of heavy goods. *IT HELPS YOU IN MAKING UP A CAR.*

RETAILERS will find this a profitable line to stock. Ask your jobber for "Dominion Special"

CONSUMERS who want the best value in fencing should insist on their dealer supplying "Dominion Special"

DESIGN No. 1155

Our facilities for shipping in "MIXED CAR LOTS" are unexcelled. Some dealers being unable to take into stock a straight car of any one product can take advantage of this by placing their order for a carload containing Barb Wire, Galvanized Wire, Oiled Annealed Wire, Coiled Spring Wire, Fence Staples, Wire Nails, and "Dominion Special" Field Fencing.

WE ARE NOT AFRAID OF COMPETITION

Why? Because we have every confidence in the general, all round superiority of our lawn mowers and are prepared to back up our contention by positive guarantees.

We will warrant our machines to outwear and the blades to retain their keenness of edge longer than those of any imported machine. The bearings, wheels and checks are made heavier than formerly and the mower is subjected to so many severe tests, that we know it is all right before it leaves the factory.

OTTAWA TORONTO **MONTREAL** CALGARY VANCOUVER

Do you stock

HAND POWER HORSE CLIPPERS?

If not write us at once for prices, as the season will soon be on when this line will be in great demand. The styles shown below are regarded by the trade as the best sellers.

Working with the New Stewart

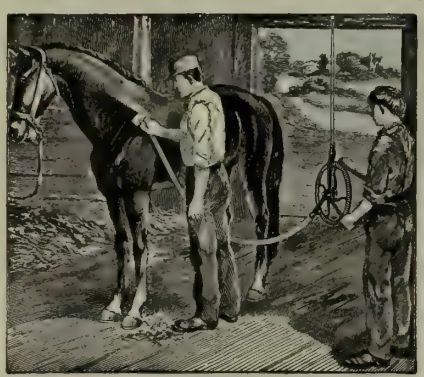
"New Stewart"

Wherever horses are used by civilized man the New Stewart Clipping Machine is recognized as the best, and has proved a great success.

It is by far the best seller in the clipping machine line. All steel cut gears, file hard, and every one securely shut in from dust and dirt in a metal case.

Complete with 6 1-2 ft. flexible shaft. Weight, each, boxed, 36 lbs.

"New Stewart."



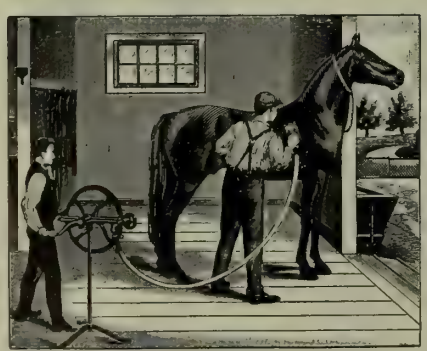
20th Century in Use.

"20th Century"

The 20th Century Clipper does 100 times as much work as the old-fashioned hand-clipper. Cuts easy and fast and is one of the most perfect clipping machines ever made. Needs no experience to operate.

Complete with 4 1-2 ft. flexible shaft. Weight, each, boxed, 20 lbs.

"20th Century."



1902 Chicago in Use.

"1902 Chicago"

The 1902 Chicago Clipper will clip a horse in thirty minutes, and is considered one of the best clipping machines in the world. Operated by right or left hand. It is simple, strong and durable, and is light-running and noiseless. All parts are hardened tool steel.

Complete with 6 1-2 ft. flexible shaft. Weight, each, boxed, 56 lbs.

Ask Our Travelers About Them.

"1902 Chicago."

Send us a trial order, it will convince you of what we say

FROTHINGHAM & WORKMAN, Ltd.

Wholesale Hardware and Iron Merchants

Montreal, ... Canada

"Stielweld"

TAILOR SHEARS

WITH

Simplex Shear Bolt

The peculiar construction of the Wiss Shear Blades makes the cutting edges come together in a perfectly straight line, and the blades thus meet one another without the usual "gnawing and grinding" of the one edge upon the other.

The Simplex Bolt enables the operator to quickly adjust the shears to work looser or tighter by the use of an ordinary small screw-driver and a slight turn of the nut.

The shears can be easily taken apart.

The bolt when taken out of the shear consists of only two parts and can only be replaced correctly.

No springs, no levers or other parts to be lost or become out of order.

The bolt is so simple and practical in construction that it at once receives the endorsement of all mechanics and tailors who see it. This improved bolt and the "Stielweld" process, which give Wiss Shears and Scissors their wonderful cutting properties, make them the most popular with tailors throughout the world.

Wiss Shears are no higher in price than the ordinary shears of the same size and general appearance.

Alundum Wheels Cut

THEY DO NOT TEAR OFF THE STOCK

¶ Alundum is one of the sharpest abrasives on the market. A thorough series of tests have proven that each particle acts as a cutting tool removing the chips as in a lathe.

¶ Increased efficiency is the aim of modern factory organization. The high efficiency of ***Norton Wheels*** in grinding, over all other methods of removing stock is well known.

¶ There are hundreds of different grades of material and uses for all of which there is an ***Alundum Wheel*** suited to the purpose.

¶ Why not get some of this business. Do you stock grinding wheels? We can make you a profitable proposition to carry this line.

Canada Screw Co., Limited

Toronto **Hamilton** **Montreal**

A Modern Labor Saver

The **Ideal Power Washer** is a machine that runs itself. The motor is propelled by water pressure, such as is maintained in any water works system, and is connected to the faucet by an ordinary rubber hose. The water, after passing through the motor, is as clean as when it comes from the faucet, and may be used for rinsing or any other purpose.

All working parts that come in contact with water are made of best quality brass; the rack and pinion are cut from the solid bar, and a roller-bearing on back of rack eliminates friction, insuring smooth and noiseless running. Valves and springs are the simplest and best that good materials and expert mechanics can produce.

The tub is made of the very best materials, thoroughly water tight and strongly bound with steel hoops. All fittings are of steel and malleable iron, thoroughly rust-proof and handsomely finished.

You should have the **Ideal** in your stock. It will be a great seller.

Write us for prices, or ask our travellers.

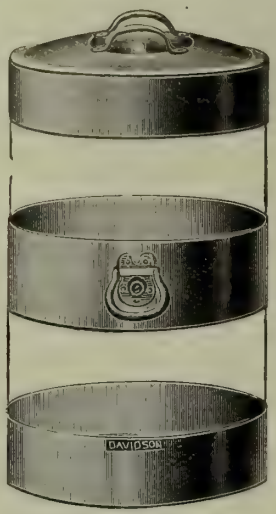
Davidson's Broad Hoop Roll Rim Bottom

Milk Can Trimmings



IN COMPLETE SETS

"Broad Hoop" Pattern—Composed of the following: 1 Broad Hoop Bottom, 1 Cover, 1 Centre Hoop 6 inches wide, 20 gauge, 1 Broad Top Hoop, 1 pair Cover Handles, 1 pair Side Handles.

A combination of strength and durability

Our bottoms have HEAVY ROUND ROLLED EDGES which make them doubly durable, and saves all wear and tear to Factory Floors and Waggons.

BOTTOMS ARE CONCAVE and drain to the centre, and are therefore easy to wash out.

THEY DO NOT CORRODE like those which drain to the side.

OUR MILK CAN TRIMMINGS ARE UNEXCELLED for ease of making up, and our Patent Roll Rim Bottom makes a strong, neat and fitting completion to any milk can.

We also carry in stock Tinned Iron, cut to size for milk can bodies, which we can supply promptly.

Diagram showing how strongly our Roll Rim Bottoms are constructed

SEE HOW THE OUTER AND INNER RIMS ARE ROLLED IN AND THEN RIVETTED TO BOTTOM HOOP.

William Bartlett & Son
20 Adelaide St. W. Toronto

DOUBLE THE WEAR

that's the argument that will enable you to sell SHIRREFF'S DIVIDED WRINGER before all others. A dividing bar in the centre causes the rubber rollers to wear evenly along their entire length. In ordinary wringers they wear in the centre only, and become useless in a short time. In Shirreff's Divided Wringer the rollers can't help lasting double the time.

THE SHIRREFF MANUFACTURING COMPANY
Limited

MONEY FOR HARDWARE HUSTLERS

The hustling hardwareman who gets out among the building trade and books orders for structural steel can pick up some neat profits. We will quote you the closest prices for all kinds of structural steel and give you any information you need to help you to close business. There is money waiting for the hardware hustler in your town.

THE HAMILTON BRIDGE WORKS CO., Limited, HAMILTON, Ontario

The Burners Must Be Right

Every "Caloric" lower burner cup besides being deep, is made with an air-mixer, which latter section has nickel-plated cover for air adjustment. Upper face of burner, being corrugated, causes a current of air to pass between the corrugation and intermix with the gas. The air and gas are thus thoroughly blended before ignition takes place, which prevents the escape of gas.

Every burner automatically drilled, hence the uniform flame. The "Caloric" system stands for rigid gas economy, great velocity of flame, and safety of operation.

Save gas, save time, save anxiety for your customers—Get "Caloric."

—

You cannot afford to risk your reputation by risking your customers' investments.

They look to you for reliability, and you can look to us for the same.

"Caloric" Burners have been tested in every conceivable way, and there can now be no doubt that they are as near perfect as human hands can make them.

The Durability of the Oven was Point No. 1 in favor of your selling "Caloric" Gas Range.

The Reliability of the Burners is Point No. 2.

Successful Convention of Hardwaremen

Nearly Three Hundred Men Connected With the Hardware Trade Attend the Fourth Annual Convention of the Ontario Retail Hardware Association—Convention, Banquet, Exhibits and Factory Visits all Splendid Features.

Enthusiasm, earnestness, harmony and mutual confidence to a marked degree were characteristic of the fourth annual convention of the Ontario Retail Hardware and Stove Dealers' Association, which was held on Tuesday, Wednesday and Thursday of this week in Hamilton. The headquarters of the association were at the Waldorf Hotel, where every effort was made to make comfortable the large assemblage of retailers and representatives of manufacturing and jobbing concerns.

D. BROCKLEBANK, Arthur,

Elected President.

The attendance was large and representative, about 175 hardware dealers being present from all parts of the Province. The discussions were brief, spirited and helpful, being participated in by nearly all present.

The proceedings were never allowed to drag or become monotonous and the interest was sustained from the beginning until the close of the assembly. The keynote of the gathering was that retail hardware men should have more trust and confidence in one another and evince a less jealousy and fault finding with their competitors. The proposition to form either local or county associations, which have resulted in much good and prevented ruinous price cutting among dealers was heartily endorsed. From Ottawa, Barrie, Tillsonburg, and other towns, many evidences of the splendid effect and substantial benefits of such organizations were furnished. The growing strength and increase of membership of the Ontario association were forcibly brought out in the encouraging reports of the officers and the executive committee.

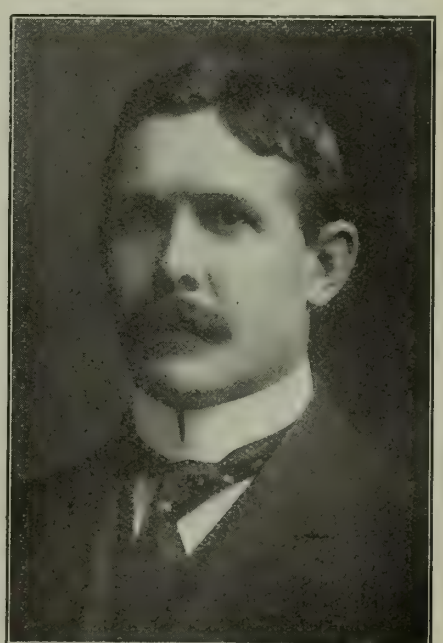
In a word, the convention was voted the most edifying and educative yet held. The feeling of confidence in its usefulness and upbuild was never as strong as it is to-day, nor the work which is ted by the trade. There have been large additions to the membership; the finances are in admirable shape; while the dealers themselves are demonstrating an esprit de corp and co-operative spirit that demonstrates the worth and stability of the association.

Among the features of the convention were the inspiring and stirring addresses of F. C. Lariviere, of Montreal, who was also in charge of the Question Box Department, of which full advantage was taken by the members.

DELEGATES PRESENT.

The following list of those in a tendance is as complete as it was possible to secure it, the crush making it difficult for all the members to enroll :

J. R. Hambly, Barrie, Ont.
W. G. Scott, Mount Forest.
A. Ballantyne, Brantford.
R. C. Chown, Belleville.
D. Brocklebank, Arthur.
Weston Wrigley, Toronto.
John Caslor, Toronto.
Chas. W. Conn, Tillsonburg.
Frank A. Taylor, Carleton Place.
F. C. Bishop, Norwich.
Fred W. Otton, Barrie.
D. A. Husband, Wallaceburg.
A. D. Armstrong, Bridgen.
J. W. Rork, Norwood.
W. F. MacPherson, Prescott.
S. B. McClung, Trenton.
W. G. Pow, Tillsonburg.
M. Zimmerman, Smithville.
J. R. Zimmerman, Smithville.
J. R. Folsetter, Ayr.
D. Mistele, Rodney.
M. McKillop, West Lorne.
J. W. Willoughby, Cookstown.
Albert Akitt, Creemore.
Jas. S. Allen, Burlington.
J. W. McDonald, North Bay.
Roy E. Carscallen, Dresden.
C. E. Wells, Dresden.
S. L. Adolph, Listowel.
Wm. House, Lindsay.
B. F. Ahrens, Hanover.
Peter D. Leisemer, Mildmay.
F. A. Hoar, Barrie.
H. D. Walker, Cobalt.
Herbert J. Penfold, Guelph.
S. R. Peart, Rockwood.
J. E. Harrison, Parkhill.
C. R. Bailes, Oshawa.
G. W. Lander & Co., Oshawa.
C. B. Miner, Cobden.
H. W. Bennett, Gananoque.
W. S. Parrish, Port Perry.
James D. Smith, Baysville.
G. B. VanBlaricom, Toronto.
V. D. McPherson, Woodville.
Adolph Henry, Orono.
Gerald McKeen, Orono.
W. J. McAllister, Kincardine.
D. A. Rankin, Ottawa.
James McGregor, Caledonia.
L. J. Hunt, Thorold.
G. F. Clark, Niagara Falls.
W. D. Dewar, Pembroke.
T. V. Ryan, Pembroke.
E. Brocklebank, Arthur.
W. J. Bell, Beeton.
R. J. Walkem, Tottenham.
John Douglas, Wroxeter.
W. H. Turnbull, Brantford.
Fred G. McBrien, Toronto.
Henry Yeigh, Brantford.
W. H. Richardson, Essex.
W. A. May, Creemore.
D. A. MacNab, Orillia.
W. McBrien, Toronto.
E. H. Sproule, Orangeville.
Albert Wideman, Markham.
W. A. Silvester, Stouffville.
A. E. Bottum, Bobcaygeon.
John Turnbull, Scotland.
J. E. Westcott, Ailsa Craig.
A. W. Humphries, Parkhill.
M. W. Howell, Goderich.
N. E. Eade, Aurora.
R. Phillips, Havelock.
Jos. Chalmers, Palmerston.
J. W. Peacock, Toronto.
John Rothaermal, Milverton.
J. W. Zavitz, Wallaceburg.
D. McGregor, Caledonia.
J. R. Myers, Stratford.
D. J. Hunter, Wiarton.
J. Dandie, Streetsville.
A. R. Dundas, Cobourg.
M. S. Madole, Napanee.



A. BALLANTYNE, Brantford,

1st Vice-President for 1909.

D. Cinnamon, Lindsay.
O. B. Henry, Drayton.
H. Lendon, Leamington.
W. J. Geddes, Embro.
Prince & Co., Toronto.
Geo. Matheson, Toronto.
H. J. Conn, St. Catharines.
W. B. Clifton, Alliston.
W. R. Carr, St. Marys.
Chas. W. Turnbull, Brantford.

R. M. Clements, Milton.
F. E. Coy, St. Catharines.
F. McPherson, Blyth.
J. S. Weichel, Elmira.
A. H. Gingerich, Woodstock.
H. L. Myers, Stratford.
M. E. Nixon, Milton.
J. H. Rowe, Dunnville.
W. Holborn, Sutton.
R. J. Bruce, West Toronto.

WESTON WRIGLEY, Toronto.

Re-elected Secretary.

C. E. Noble, Dundalk.
S. M. Burt, Toronto.
G. M. Chesney, Seaforth.
A. R. Bernhardt, Preston.
A. H. Blackmore, St. Catharines.
A. Hobbs, Elora.
F. W. Jeffery, Midland.
Ed. Jeffrey, Midland.
W. S. James, Niagara-on-Lake.
G. B. Robertson, Toronto.
E. Morgan, Delhi.
J. J. Metcalfe, Sherburne.
Jas. Sinclair, Paris.
N. M. Craig, Hamilton.
G. A. Binns, Newmarket.
F. A. Noden, West Toronto.
G. Hallitt, West Toronto.
W. H. Jones, Ingersoll.
D. Beeker, New Hamburg.
Robert Smith, Bolton.
E. W. Chard, Toronto.

TUESDAY AFTERNOON.

The gathering was called to order at 2.30 o'clock on Tuesday afternoon by President J. R. Hambly, of Barrie. He briefly stated the object, and expressed his pleasure that so large a number had made it a point to be present, and trusted that the deliberations of the association would be of great assistance to the members.

S. H. Alexander, representing the entertainment committee of Hamilton hardware jobbers and manufacturers was asked by the president to deliver a few words of welcome. "I am not extending anything like a formal welcome," said Mr. Alexander, "we will do that at the banquet on Wednesday evening. We are glad to have you here and feel highly honored that you accepted our invitation. We hope that you will have a good time, and that your gathering may be the most successful and instructive of any yet held. We also trust that when you go you will depart with the feeling that you were glad you came, and in conclusion allow me to say that we hope you will stay as long as possible, and that your visit may prove most enjoyable."

After the roll call and the adoption of the minutes of the last annual meeting the president read his report, which was referred to the committee on resolution.

PRESIDENT'S ADDRESS.

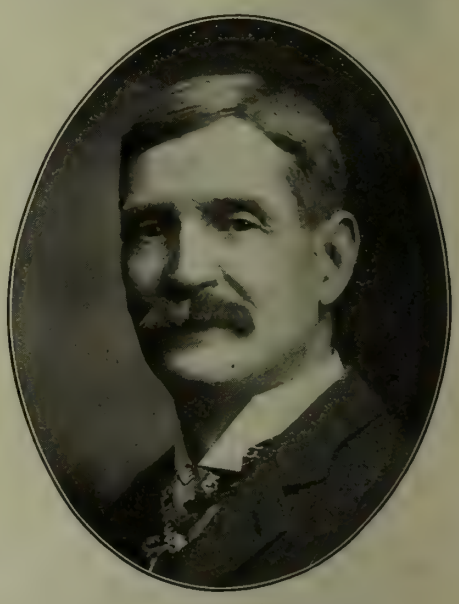
One cannot help but feel it an honor to be a member and preside over an organization that has made the advancement our association has. To be honored thus by honorable men proves a double honor. Realizing, therefore, the expression of your high esteem in making me your president last year, I resolved at that time to do my best. The time has passed quickly, and looking back over the past year I must acknowledge I feel I have done but little. Our association does not depend upon one man to run its affairs, and while a great deal is expected from our secretary, the officers will appreciate advice and suggestions from any of the members. You will always find the secretary well informed on everything pertaining to the association. As we look back to less than three years ago when a few of the retail merchants of Ontario met for the first time to consider organization, and realize the extent to which it has grown since then, it goes to prove that they are deriving direct benefits. I am sure it is very gratifying to the officers, and especially to our secretary, who has done so much to make this convention a success, but we must remember no two beings have been endowed or created alike; no two minds act or respond alike. If we could get every hardwareman in Ontario to realize this he would be anxious to become a member of this organization. Every retail hardwareman has received a benefit from the association's work, and if he is not a member he is getting something that he has not paid for.

During the past year the representatives of the jobbers have become very much interested in our association. They, along with the jobbers and the manufacturers, realize we are here to stay in order to look after our own rights. I do not hesitate to state, on account of the existence of our association, that a more friendly feeling exists to-day between the retailer, and the jobbers and manufacturers. They realize the fact that meeting together and exchanging ideas makes us better business men and better qualified to conduct our businesses on a proper basis. The more carefully we study our business and endeavor to conduct it on a proper basis, the more we are impressed not only with the dignity it bears but its tendency to educate and elevate.

There is no sense in the theory that two men in the same line of business should be unfriendly; there are many sound reasons why they should be friendly, and our association has been the means of creating a friendship between our fellow hardwaremen that could not have been brought about in any other way. The good will of our fellow business associates should be just as desirable as the good will of our customers and friends. We will always find some who believe that competition must be a war of hatred between man and man. We, as members of this association, know differently and in meeting from time to time and becoming better acquainted, we learn that the other fellow is just as good as we are, and he will learn that you are just the same, but that both of you have been a long time in finding it out in some cases.

Among the many dealers in merchandise, the hardwareman is the most honorable in many respects, as he is the last one to encroach upon other lines. We see to-day dry goods stores, grocery stores and others with hardware upon their shelves; we often find wholesale dry goods stores offering certain lines of hardware for sale. Only a few days ago I was in a clothing store and was surprised to see on sale a line of safety razors, shaving soaps and brushes, enclosed in a silent salesman surmounted with collars, cuffs and ties. Just imagine what a dress suit would look like in a hardware store surrounded with chisels, saws, planes and other tools. Our competition would think we were fit subjects for an asylum. Have we not just as good a right to think the same of them?

How are we to overcome this competition? By becoming better acquainted with one another and working together; hardware merchants in the same town buying goods together, and if possible find out where the goods are manufactured and supplied to merchants outside



JOHN CASLOR, Toronto,

Re-elected Treasurer.

the hardware trade. I care not who the manufacturer or wholesale house is that will cater to this class of trade. Should not we, as hardware merchants, be true to the jobbers and manufacturers that are true to us? We must not try to meet this class of trade with cheap goods, but talk quality, emphasize worth, cut loose from cheap, trashy goods. Profit lies in selling good goods, and it will

J. R. HAMBLY, Barrie,

Retiring President.

build up a reputation that will be lasting, and will have a tendency to show to the community in which we reside, that we are above selling goods that will not give value for the amount invested. This class of trade will be remembered and appreciated by the better class of customers.

Your treasurer and myself had the pleasure of visiting the Michigan Retail Hardware Association at Detroit last August when we were received very kindly by the officers and members of that association, especially by Mr. Porter A. Wright, the gentleman who attended our convention last year. They gave us a good time and we feel that we were benefitted by the visit. They had a number of excellent addresses from members of other hardware associations on such topics as "Financing, Salesmanship, Stocktaking, Advertising, Insurance," and a number of other subjects. The one in which we were the most interested was the Mutual Insurance, but of this you will hear more during this convention.

Ninety per cent. of the representatives of the jobbers and manufacturers are honorary members of the Hardware Association in the United States and take an active interest in helping to make the association a success. Under no consideration would they think of shutting the association doors against these gentlemen. I hope, before this convention closes, you will decide to accept as honorary members any hardware travelers who may desire to become members. These gentlemen, from the very nature of their duties, should be a prolific source of increasing our membership, and I therefore trust you will decide to admit them.

I hope that all who attend our convention this year will be repaid, not only for the enjoyment of what will be provided by the wholesale merchants and manufacturers, but also that they will derive such benefits that will enable them to be better fitted for their calling in life.

Let us not forget the exhibits of the different manufacturers and jobbers. No doubt they have been an inducement to many who are not members to attend this convention. We must not overlook the fact that we are deriving benefits from these exhibits, but the manufacturers and jobbers have gone to considerable trouble and expense to display their wares, and I hope that we, as members of this association, will show our appreciation of their efforts by examining their displays and expressing our sympathy with their undertaking by purchasing from them when requiring anything in their lines.

Secretary Wrigley then read the report of the executive committee, which was also referred to the committee on resolutions.

EXECUTIVE COMMITTEE'S REPORT.

Your Executive Committee report as follows regarding the various matters receiving their attention during the past year.

Collection Department.

About 110 members are now using the letters supplied by this department of our Association and it is doing much towards making the Association strong with the trade throughout the Province. During the year the form letters have been strengthened, arrangements having been made with a prominent firm of lawyers to allow the use of their name on the letters as well as to agree to send a third letter on their legal letter-head for a fee of 25c per letter.

Mutual Fire Insurance.

A proposition made by a firm of insurance brokers was considered unfavorably by your committee. Later on an offer was received from the Wisconsin Retail Hardware Mutual Fire Insurance Co., that our secretary act as their agent in Ontario, insurance to be accepted at regular tariff rates and a rebate of from 40 to 50 per cent. of the premium to be paid each insurer through the secretary. Legal advice was taken and it was found to be illegal for secretary or anyone to act as agent for or assist in any way a foreign Mutual Fire Insurance Co.

We recommend that the Executive for 1909 be instructed to ask G. C. Wilson, M.P.P., Dundas, to introduce an amendment to the Ontario Insurance Act in the Ontario Legislature, making it possible for our Association to form a Mutual Fire Insurance Co. along the same lines as the successful hardware mutual companies in the United States.

Cartage Charges.

Early last year this matter was placed in the hands of J. W. Curry, K.C., Toronto, to bring before the Railway Commission. Later on a sub-committee of your Executive interviewed the wholesale Hardware Association on the subject. The wholesalers passed a resolution instructing a committee to work in harmony with our Association in asking the Railway Commission to include all cartage in freight charges.

Mr. Curry was then instructed to ask the Railway Commission to (1) abolish the special charge for cartage and include it in the freight rate or failing that to (2) issue an order instructing shippers to pay cartage at point of shipment. Mr. Curry replied that in his opinion the Railway Commission would not consider either proposition but would rule the matter as outside their jurisdiction as a matter to be settled between buyer and seller.

Your Committee recommend that the matter be laid on the table until such time as the Association deems itself strong enough to take the matter up and carry it to a successful issue.

Legislation.

Our request that the Division Court Act be amended to allow for the collection of accounts under $25.00 by garnishment was considered by Attorney-General Foy and the Ontario Govern-

R. C. CHOWN, Belleville,

Re-elected to Executive.

ment, but the influence of a deputation representing hundreds of bailiffs, etc., protesting against any change, caused the Government to withhold action. It is hoped that the amendment will be adopted during the coming session of the legislature.

Protest was entered against the passage of the Co-operative Act by the Dominion Parliament. The Retail Merchants Association also made a fight against this legislation, and largely as a result of their protest the Senate killed the bill.

Your executive held a conference with the Executive of the Retail Merchants' Association last September to consider

J. W. PEACOCK, Toronto,

Re-elected Auditor.

means of working together on matters of legislation, but it was found impossible to reach any agreement.

White Lead Marking.

The manufacturers of White Lead have considered our request that the marking of second grade lead as "No. 1" be discontinued but they have taken no action. We recommend the passage of a strong resolution by the convention, the incoming executive to pass the same on to the White Lead section of the Manufacturers' Association.

Trade Grievances.

A number of complaints received from members against jobbers and manufacturers selling to consumers without protecting the trade, were received and acted upon by your committee.

Organization.

The Association is steadily growing in membership and prestige but the bulk of the work falls upon the secretary. We urge therefore that the members endeavor to interest their neighboring hardwaremen in the Association and recommend that two handsome suit-cases be presented at the next convention to the member and the traveling salesman who secure the most members during the coming year.

We recommend that the new executive outline a plan of organizing local and district Associations throughout the province. Mr. Rankin, of Ottawa, and Mr. Howell of Goderich, might explain their experiences with district Associations.

We also recommend the adoption of an amendment of the constitution admitting traveling salesmen as honorary members in our Association for an annual fee of one dollar ($1.00).

Convention Programme.

Your Executive Committee recommend the adoption of the regular order of business with the following addition:

"Under unfinished business."

A resolution committee of five be named to deal with the recommendations in this report, and

A nomination committee of five be named to make recommendations regarding the officers to be elected for the coming year.

We also recommend the adoption of the draft programme published in Hardware and Metal with the following additions:

That a group photo be taken in front of the Waldorf Hotel at 12 o'clock Wednesday.

That Fred Lariviere, Montreal, take charge of the "question box" on Tuesday night and Thursday afternoon.

That the invitation of Stanley Mills to visit his "Made in Hamilton" show, be accepted, the members to go at their convenience.

And that the Thursday afternoon session be devoted to addresses, etc., up to 3 p.m. with the "Question Box" taking up the balance of the afternoon.

The next statement presented was that of the treasurer, which was read by John Caslor, Toronto.

FINANCIAL STATEMENT FOR 1908

Secretary's Report.

Receipts—

	$138.11
Liabilities—	
None.	

Audited and found correct, Jan. 25, 1909.

C. F. MOORHOUSE,
J. W. PEACOCK,
Auditors.

Following up the financial statement the secretary gave the information that up to Feb. 8, the opening of the convention, the receipts had amounted to $430, about $25 over the total receipts for all of 1908. And it was likely that the receipts at the convention would amount to between $200 or $300 more.

The secretary's report was also submitted by Weston Wrigley, and was as follows:

SECRETARY'S REPORT.

As time will be limited the secretary will endeavor to make his report brief and to the point. The best proof that the association is growing in membership and prestige is the greatly increased attendance at this convention and the affiliation of an increasing number of successful firms in the larger towns and cities.

In spite of a year of depression and with absolutely no money spent for organization purposes, we are able to report a satisfactory increase in membership and an increased balance in the association's treasury. The membership too, seems well satisfied and there is undoubtedly a better feeling existing amongst the retail trade in Ontario than ever before as a result of the work of our association.

The collection department has proven very useful to a large number of our members and our annual conventions are becoming deservedly popular, and intelligent men in the trade realizing the advantage of meeting together annually to discuss trade problems with the men

J. W. PEART, St. Mary's,

Re-elected on Executive.

in their own line of activity. Only a beginning has been made, however, as in other directions there is important work the association can do.

What is good provincially is good locally and the success of the fine local

associations in Ottawa, Barrie and other places should encourage the formation of other local and district associations, particularly in New Ontario. Apart from price arrangements, which the laws prevent our association from touching, much valuable work can be done in local organizations.

The coming year ought to see something accomplished as a result of our

D. Cinnamon, Lindsay,

Re-elected to Executive.

investigations of the problem of mutual fire insurance. Present provincial laws allow the formation of farm mutual companies, but prevent "mercantile and manufacturing" companies from being formed except upon a payment of a $10,000 deposit. Your secretary has been assured that if our association approaches the Legislature with the request that the words "mercantile and manufacturing" be struck out of Section 4, Chapter 36, of the Ontario Insurance Act, that we can count upon the active support of the mutual insurance companies organized by the Canadian Manufacturers' Association.

Action should be taken at this convention to recognize the action of the Canadian Wholesale Hardware Association in appointing a standing committee to deal with matters concerning both jobbers and retailers. Such a joint committee has done valuable work for the trade as a whole in the United States, and if the step is approved and a joint committee permanently appointed by both associations, similar good results should be obtained for the trade in Canada.

Your treasurer and secretary attended the New York State Retail Hardware Association convention at Buffalo last February and were treated courteously by the officers of that association. Some valuable information was gathered regarding the exhibit feature at conventions as well as on other subjects of interest to our association.

The increased confidence shown in our association by all branches of the trade is making easier the work of your executive officers, though the work of the secretary's office is necessarily increasing in volume. The ready cooperation given by the other officers, the friendly assistance of the travelers in saying kind words of our association and the larger number of members who are endeavoring to bring other firms into the fold are all appreciated by the secretary, helping, as they do, to make his work more pleasant.

WESTON WRIGLEY.

DISCUSSION ON REPORTS.

After the reference of the reports to the resolutions committee a general discussion followed on some matters referred to in them, particularly the question of forming local associations in order to bring about a better feeling among dealers in the various towns of the Province, and to guard against price cutting. President Hambly said that they had a good local organization in Barrie, of which all the hardware dealers in that town were members. Two of his competitors were present, and he would like to hear from them on what they thought of the organization.

F. A. Hoar, Barrie, said the four retailers in that town were on friendly terms and that through their local association there was no price cutting. They met from time to time and discussed matters of mutual interest. The local association was doing a good work and the relation of the dealers was in every way satisfactory.

F. W. Otton remarked that the Barrie hardwaremen got along peacefully and held an annual meeting to arrange several matters of interest. They had kept together and were the best of friends. By means of the association they were enabled to sell goods at a fair profit, and they had confidence in one another. Reports were often brought to their ears by customers about a competitor selling cheaper, but on investigation these rumors were found not to be true.

Mr. Wrigley said that there were 19 hardware stores in Ottawa and that in August last, when he visited that city. 16 were in the local association. A traveler had told him that the Ottawa dealers carried over fewer lines from season to season than in any other place that he knew of. If a retailer was short on one line he sounded a retailer near him before placing an order and by this means stocks were kept well in hand. He would like to hear from W. A. Rankin, who was instrumental in forming the association.

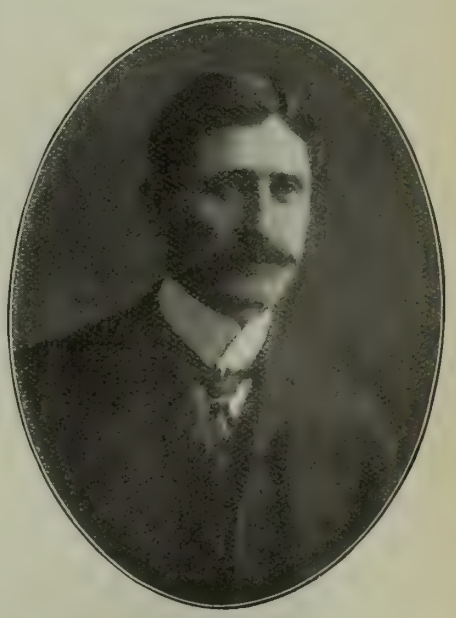
Mr. Rankin told of the work of the Ottawa association, and how it originated. The contractors had formed an association composed of carpenters and builders to whom mill owners gave three per cent. for cash, as well as five per cent. to those who were members of the association. The hardware dealers had received a letter of the secretary of the Contractors' Association, asking for a special rebate of five per cent. to the members of their association only. The result had been that a meeting of the hardware men had been called and it was decided to discuss the question of a discount with the builders, which request was refused. The outcome was the formation of the Ottawa Retail Hardware Association, which had got along very well. A little price cutting prevailed, but it did not amount to a great deal. "If a customer comes in the store and says that he can buy an article for less from another dealer we tell them they had better go there," observed Mr. Rankin. The result has been very little loss. Prices on nails and paper had also been arranged. The association got along very well and had resulted in stocks being kept down to a reasonable limit. If one dealer was out of a certain line he would go to another and would be accommodated, and by this feeling of friendship much benefit had resulted.

Another member said that he would like to see the hardware dealers in his town get together. "Personally," he remarked, "I have a good word for every one, no matter whether he is a negro or a Newfoundland dog. If he wags his tail I will give him a welcome. Strange to say, when I meet some of the dealers in my own town I do not know them, nor do they know me, although two of them live on the same street as I do, and I have been in business for several years."

Mr. Rankin thought that the member should make the first move toward speaking to his competitor.

W. F. McPherson, of Prescott, said it was pretty hard to make the advance which might be regarded as an offence or a sign of weakness. It was difficult for a local dealer to equalize matters, especially if one man was a much larger dealer than the other.

A. D. Armstrong, of Brigden, said that if the dealers in his town formed



W. G. SCOTT, Mt. Forest,

Retiring from the Executive.

an association customers would think they had got together to boost prices, which was, of course, a mistaken idea. A local association to be successful must embrace every dealer. He favored the formation of county associations

which, if properly managed, could not help but be a benefit to all concerned.

Mr. Smith, of Bolton, thought it a good thing to form local associations. Generally it was not the larger dealers who cut prices, but the little fellows.

Fred. G. McBrien, Toronto, told of his experience when he opened a business in builders' hardware. He believed the association should direct its ener-

J. R. McMILLAN, Guelph,
Retiring from Executive.

gies toward making wholesalers adhere strictly to their own line and the retailer do the same. If a jobbing house was running a retail business and selling to the consumer in competition with the retail trade, it should not be allowed.

John Caslor, Toronto, expressed the opinion that it was pretty hard for one merchant to go to another and urge the formation of a local association as he might be told by the opposition dealer to mind his own business. He said that an outsider could bring together local dealers much better than anyone else, and he instanced Galt as an example, where he thought an association might be formed by an officer of the Ontario association, but no local dealer cared to take the initiative.

F. C. Lariviere thought that it would be a good idea if an officer of the Ontario association came to the town and after inviting all the local hardware men to dinner and getting them in a friendly spirit then launch the proposition of a local organization.

A. Ballantyne, Brantford, said there were two ways to increase the membership; one by raising the fee and employing a man who would devote his whole time to the work and go out among the trade; the other by means of the travelers of the wholesale houses. The question at present was whether it was advisable to raise the present fee.

A. W. Humphries, Parkhill, said there was three hardware stores in his town and if they found a customer trying to bother them about prices they used the telephone to ascertain if the story told them was true. The result was that they generally found out the farmer was not telling the truth. The Parkhill dealers had a friendly feeling among them. Their experience had been that more confidence should be placed in a competitor and less in a farmer, who would often tell a lie for a very few cents. "Trust your own people and believe the men in your line before you take the word of an average customer," was the concluding remarks of Mr. Humphries.

J. W. Harrison, Parkhill, endorsed what Mr. Humphries had said. He believed that dealers did not have faith enough in their own people. It was far more profitable to be on a friendly footing. Competition from outside stores had affected them very little last year. His experience had been that a hardwareman might better attend to his own customers and his own business rather than looking around to find fault with his competitors. Those wholesalers and manufacturers who sold to builders, farmers and others, when found out by the retail trade should be brought to time and made to understand that if they wanted business through the retailer they must stick by him.

Mr. Humphries told of a builder in his town who had the words "hardware dealer" placed on his letter paper in order to obtain wholesale prices for what hardware he used in construction work. The result was that they had cut him out altogether.

W. G. Scott, Mount Forest, said that he had done all he could to increase the membership of the association, but he thought any efforts along that line could be more effectively done so far as forming local associations was concerned by a permanently paid employee of the association which he hoped would so grow in strength and membership that it would bring wholesalers, who did not stick by the retail trade, to account. If jobbers were convinced that if they desired to do business with retailers they must stick by the retailers or else would receive no business, they would soon cease the practice.

S. L. Adolph, Listowel, said the hardware stores in his town were all on friendly terms and so far as price cutting was concerned there was no trouble. More trouble was experienced from little stores outside, who paid small rents, than from competition at home. He related his experience in relation to a roofing contract which he had almost closed when a traveler came along, cut the price to the farmer, and yet turned around and wanted to sell the speaker some goods.

A. E. Bottom, of Bobcaygeon, said he was the only dealer in his line in that village and, owing to the lack of confidence on the part of outside dealers, especially in Lindsay, he found that they had been slashing prices. They were selling rifles for instance on which they were not making a cent.

Charles W. Conn, Tillsonburg, stated they had formed an association there, and prices had been fairly well maintained. A hardware dealer should have more confidence in the other fellow and his honesty.

J. W. Rork, Norwood, referred to his experience in the line of metal roofing selling which had not been very satisfactory from his standpoint.

M. Zimmerman, Smithville, believed that he found the manufacturers allowed the dealer too little profit to bother with it. The makers sold almost as cheap to any consumer as to the dealer.

D. Brocklebank, Arthur, declared that metal roofing, oil, nails, glass, etc., were all being cut into by outsiders and the retail trade should bring some of the jobbers to time. The hardware men had lost the blacksmith trade and they would lose the builders' and glass trade the same way if they did not make an effort to hold them. He favored the admission of travelers as members of the association, and supported the plan of a mutual insurance company.

M. W. Howell, Goderich, found that dealers had not as much faith in one another as they should.

D. Mistele, Rodney, related how a competitor had made arrangements as to fair prices on goods and then had broken the agreement. At first he would not believe it but investigation proved it to be true. Since then the speaker said he had sold at what prices that he thought was right, uninfluenced by his competitor.

F. W. Jeffery, Midland, strongly believed in organization and the strength of the association should be increased. If the dealers did not look out the builders' trade was going to leave them. It was getting harder every year to secure this trade.

After this general expression of opinion under the head of unfinished business the convention went on with the election of the resolutions committee.

Committees Elected.

Nominations for the resolutions committee resulted in the following being elected: D. A. Rankin, Ottawa; E. Brocklebank, junior, Arthur; S. L. Adolph, Listowel, Frank Taylor, Carleton Place, and Mr. Bailes, Oshawa.

FRED. C. LARIVIERE, Montreal,
Who Handled the "Question Box."

The nominations committee selected were: J. S. Willoughby, Cookstown; W. D. McPherson, Prescott; F. A. Hoar, Barrie; J. E. Westcott, Ailsa Craig; F. W. Jeffery, Midland, and H. W. Bennett, Gananoque.

It was suggested that the Nominating Committee in making its report distri-

bute the officers in such a way that all parts of the province be represented and that in the interests of economy the executive officers be selected from places within easy reach of Toronto. The convention adjourned at 5.30 p.m.

TUESDAY EVENING.

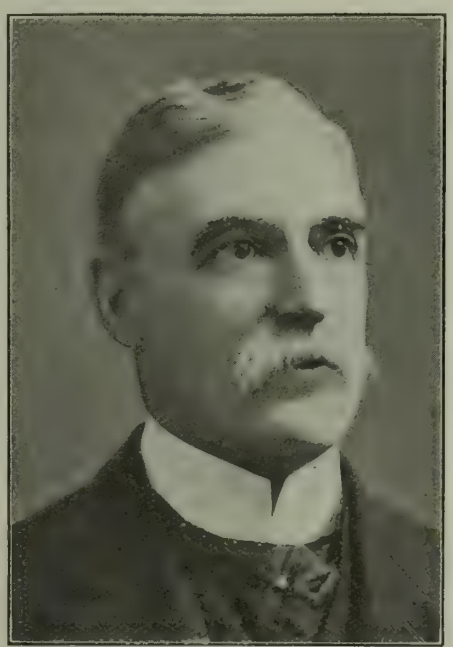
At the evening meeting two excellent addresses were delivered and the question box was a profitable part of the proceedings. This was in charge of F. C. Lariviere, and the views of many members were expressed.

Mr. Munro's Address.

The first speaker was Robert Munro, Montreal, managing director of the Canada Paint Co. He thanked the gathering for the honor conferred upon him in asking him to address them. He was pleased to see so many present. Conventions were useful from the standpoint of good fellowship and uniformity of action along certain lines. He had been asked to speak on "Why mixed paints were more profitable to handle than lead and oil." Both lines were profitable, but mixed paints were the more so. He referred to the time when mixed paints were made only by the painter and the dealer, and it was because the people wanted this kind of paint that the manufacture of them had been started. The prejudice was slow to overcome, but no dealer would think of doing what would take ten mniutes when it could now be done in ten seconds. Mr. Munro recalled the time in 1876 when he introduced the iron keg which was used in thousands in the white lead business now instead of wooden kegs. There was more tonnage of mixed paints sold in Canada than the tonnage of white lead, and the increase was growing rapidly. The industry is not now confined to one or two metals—zinc and lead. He spoke of the demonstration in favor of the pure article, and the legislation that had been secured to that end. No mechanical process would be laid down definitely. There were different processes. He preferred the Dutch. His firm had six different processes. Chalking leads were often said not to be pure, but there was more durability in some than in others. This was due to the coloring matter. Conditions required study in detail to determine results—moisture, the sun, resinousness, etc. The chief reason mixed paints are a success is of the value of the vehicles and the great skill with which the vehicles are used. The vehicle has to be hard and dry and elastic. Taken as a whole, mixed paints had been a success. In Canada we have good vehicles —nothing cheap or trashy. Canada grows the best flax seed in the world, that in the Northwest being unsurpassed. Canada, too, is now growing all the flax that was required, and any crusher had a right to give an oil clean and bright and strong, such as did not come from the English markets. Canadian makers gave a good article on the whole. Paint was used here universally and Canadians were able to use them because the manufacturers supplied them with a good, reliable article that was useful, and thus the business admitted of much extension. Artists might feel that makers are discounting their skill, and, therefore, did not readily adopt mixed paints. The painting trade was, however, adopting them, and the prejudice was being broken down. With every confidence the dealers could look forward to handling mixed paints with greater profit than lead and oil, because the people wanted them and the manufacturers were endeavoring to meet those wants and the growing demand.

Discussion on Paint.

A member asked why certain floor paints washed off the kitchen floor. It was stated in reply that a woman often used lye and oil in washing the floor. It was also stated that better results would be brought out if the contents were shaken in the can and not stirred by a stick. Turpentine and oil should not be added as the paints, generally speaking, were all right when prepared by the manufacturers. One reason why paints pealed was because the floor was often not sufficiently dry. In thinning paints it was stated by a member that oil should be used in preference to turpentine, but another dealer declared that turpentine was preferable. The concensus of opinion appeared to be that mixed paints should not be tampered with in any way.



ROBT. HOBSON, HAMILTON,

General Manager Hamilton Steel & Iron Co., and President Canadian Manufacturers' Assn., who made an Ideal Toastmaster at the Banquet.

Mr. Lariviere's Address.

Mr. Lariviere then read an excellent paper on "How to Conduct a Retail Hardware Business," which was thoroughly appreciated by the members. The paper, owing to lack of space, is held over until next week, when it will be published by Hardware and Metal in full.

The question box conducted by Mr. Lariviere concluded a profitable session. The various queries and answers will appear in the next issue.

WEDNESDAY MORNING.

The members of the association spent the morning in visiting the extensive plants of the B. Greening Co., the Canada Screw Company, and the wholesale warehouse of Wood, Vallance & Co. Special cars were provided for all and at the various places visited the hardwaremen were shown every courtesy and attention. Their trip proved to be of much benefit and instruction. The practical acquaintance with the making of all kinds of wire products which they handled afforded an object lesson not soon to be forgotten.

WEDNESDAY AFTERNOON.

At the afternoon session the various committees on resolutions reported.

The clauses referring to the collection of accounts and Mutual Fire Insurance Co., were adopted.

Cartage Charges Again.

The clause referring to cartage charges was not concurred in a substitute being adopted by a standing vote that the Association collectively, and the members individually, continue to demand the discontinuance of charging cartage at shipping end, the secretary to notify the Wholesale Hardware Association and secure a supply of rubber stamps with the wording, "We will pay the cartage at this end and we will hold you responsible at your end," the stamp to be used on all order forms or letters, in which orders are enclosed. This discussion brought forth an animated discussion.

M. S. Madole, of Napanee, said that cartage had cost him $100 a year, and if the convention accomplished no more than banishing this unjust charge they would have done a great deal.

President Hambly said that the dealer having to pay cartage at both ends was unjust; if the Association ceased playing with this question, and were backed up by the trade they could succeed in abolishing the charge.

Another member thought a letter should be sent by each dealer. This would prepare the way for the rubber stamp and still another thought they should act individually with the jobbers before taking up the matter collectively.

A. W. Humphries, Parkhill, hoped the agitation would be successful. He favored the rubber stamp idea.

D. Cinnamon, of Lindsay, suggested that rather than an individual taking it up the secretary on behalf of the Association should first notify all the jobbers.

Another member believed they would in the end have to pay the cartage as it would be added on to the freight by the wholesalers. Still another said he had printed "we do not pay cartage at

the point of shipping" and the wholesalers had granted it.

The committee recommended that the executive take steps to secure a reduction of the cost of collecting small accounts under $10. An amendment being suggested that such accounts be collectable before magistrates.

The clauses referring to white lead marking and the increase of membership were adopted.

Travelers as Members.

The recommendation as to including travelers in the membership of the Association at a fee of $1 per year, the travelers being permitted to attend only the open sessions, also called forth a lively debate.

President Hambly said that the travelers were the best friends that the dealers had. If a dealer secured any favors it was through the travelers and not from the house. He never went to the cities to buy goods as he could do better through the travelers who could often place a hardware man next to a good thing.

Another member declared the proposal was simply holding up the traveler in asking him for $1. The traveler would regard the request the same as a dealer did a person calling at his store to sell tickets at twenty-five cents each.

A western member said the retailer's truest friend was the traveler, and the Association should extend him all the privileges possible,, so long as the dealers did not have to pay for it.

The resolution was finally adopted by a standing vote.

The New Officers.

The report of the nominating committee was next read by the chairman, J. S. Willoughby.

President, D. Brocklebank, Arthur.

First Vice-President, A. Ballantyne, Brantford.

Second Vice-President, M. S. Madole, Napanee.

Treasurer, John Caslor, Toronto.

Secretary, Weston Wrigley, Toronto.

Executive, J. R. Hambly, Barrie, J. W. Peart, St. Mary's, R. C. Chown, Belleville, D. Cinnamon, Lindsay, H. A. Morgan, Peterboro, and W. Weichel, Elmira.

Auditors, J. W. Peacock, Toronto, and W. J. Bruce, West Toronto.

The report was adopted.

The retiring president, Mr. Hambly, then thanked the members for their kindness and appreciation of his labors during the past year. He would never forget the assistance given him by the members.

The new President, Mr. Brocklebank, was cordially greeted on taking the chair. He paid a warm tribute to his predecessor. He was deeply appreciative of the honor and asked for the co-operation of all. Everyone could assist in many ways. The retail hardware men were the best educating medium to the farmer of this country. The latter had confidence in the hardware dealer and, as great deal was expected of trade he hoped the members would give every help to the executive officers. The past year had been the best in the history of the association and there had been an able executive. He trusted that at the end of his year of office they could show the same satisfactory results as the retiring president and executive had brought about.

Next Year's Meeting.

During the afternoon session a telegram was read from Robert Munro, Managing Director of the Canada Paint Co., inviting the Association to meet in Montreal in 1910, and conveying assurance of a cordial welcome.

F. H. Whitton, of the Canada Screw Co., and Arthur Hatch, of Wood, Vallance & Co., entered and gave a hearty invitation for the convention to assemble in Hamilton next year, when they promised to entertain the visitors and show them more things worth seeing than they had on the present occasion.

Harry Morgan tendered a hearty invitation from Peterborough for the hardwaremen to assemble there next year.

Later it was decided by the Association that the place for the next convention should be left in the hands of the new executive committee to select.

The question box was again opened and several members spoke on the topics introduced. Mr. Lariviere had charge of this department.

It was decided that an effort should be made by the executive to see if the

ROBERT MUNRO, Montreal,

Who Gave a Fine Address on the Paint Question.

railways would not grant a rate to the members of the convention of single fare return. This matter will be taken up and reported on later.

Col. J. B. MacLean was asked to address the gathering, and was given a cordial reception. He said that he had hoped not to be called upon but had failed to escape. He congratulated the Association on its magnificent success. The attendance was large and most representative in character, when it was considered that all present were connected with one trade only—that of hardware. The number was indeed encouraging and far outshadowed a recent gathering, which represented all lines of mercantile trade and had several organizers at work. When that convention was held only about 22 or 23 were in attendance. In reference to a movement made some years ago, an organization in the hardware interest had failed. It was proposed to run it on too narrow lines. Selfish motives had cropped up and through the organization the members thought they would have some advantage in buying over their neighbors in the same town. The present association had been built on broader and more generous lines. It was a case of fighting for the best interests of all and the success, that the organization had achieved, was very gratifying. In answer to a recent query from a hardware merchant who had asked about the investment of certain funds, Col. MacLean said that he had replied pointing out four substantial investments, and strongly advising him against putting his money in a proposition of which the dealer evidently knew but little and which was not generally regarded as sound. One way in which the speaker had advised the hardware man to invest a very small portion of his money was by joining the Ontario Retail Hardware Dealers' Association. He also advised him to attend the meetings from which he would get the best results. Col. MacLean referred to the days, when as a junior reporter on a city daily, he had reported the gatherings of the country publishers and drank in every word of the discussion. The result had been of inestimable value and benefit to him in building up his publishing business in later years. The biggest hardware man could get many valuable pointers from the Association meetings, just as well as the smaller dealer. True, some men were mean and tricky. This applied to members in all trades. This applied to was exercised and perseverance practised, these men were in time overcome and they would be delivered into the hands of the majority.

"Take it as a fact," added the speaker, "that good salesmanship will overcome the cutting of prices and, as one of the previous speakers has said, if a competitor bothers you on one side, make another move. Set him thinking and wondering what you will do next. You will thus be able to outdo and outclass him in whatever you undertake."

In conclusion Col. MacLean expressed a desire to help the Association in every way. This would be done, in a measure, by making additions to the editorial staff of Hardware and Metal, thus relieving Mr. Wrigley, the editor, of part of his duties so that he would be able to devote more time and attention to the organization work of the Association. By some plan such as this which he hoped to carry out, he desired to further the good of the Association. There might be local reasons for certain men not belonging to this important body but he thought that he was safe in saying the majority who did not attend were among the smaller minded and less progressive business men.

After some routine business the afternoon session was brought to a close.

AT THE BANQUET TABLE.

The menu card was a feast in itself—an eight page edition, a double covered affair on the face of which a red bow of ribbon in a circle of maple leaves.

The toastmaster, Robert Hobson, of the Hamilton Steel and Iron Co., is the

general manager of the Canadian Manufacturers' Association.

When Mr. Madole, Napanee, the Association's baby member, waved "the flag of our union," enthusiasm was at its highest pitch.

Cyrus Birge, president of the Canada Screw Co., Hamilton, told a good story on poor old John McCullough, who was blessed by a beggar woman who said: "May every hair of your head be a candle light toward heaven." John took off his hat and said: "There'll not be a very big torch light procession."

The Canadian Shovel and Tool Company, Hamilton, and the Gillette Razor Company, Montreal, adopted a practical plan of distributing neat little souvenirs, placing one at each plate and thus making certain that every retailer would secure the reminders. The Canadian Shovel and Tool Company gave out a beautiful little gold tie pin, a bull dog on a shovel, enclosed in a handsome plush case. The Gillette Company were also very thoughtful in supplying a metal match box.

"I sell iron and steel for a living."—Robert Hobson, the toastmaster.

"The iron industry is the foundation of Hamilton's properity."—The menu card.

"Hardware and Metal is the Canadian hardwareman's bible."—Robert Hodson, the toastmaster.

EXHIBITS.

The exhibit feature was an innovation at this year's convention, but it was so successful that it was safe to say another year this idea will be still further developed and more manufacturers will take the opportunity of showing their complete line to the members of the association who are for the most part the most progressive retail hardware men in Ontario.

The majority of manufacturers are continually adding to their lines and it is very important for the manufacturer to acquaint the trade with these new lines. The remark was frequently made by some retailer, either at the exhibits in the Waldorf Hotel, or during the visit to the various manufacturers "I did not know you made this line," or "wholesale hardware travellers never told me about this line. I believe I could sell a lot of these articles in my town."

Of course these manufacturers do not advertise their lines in Hardware and Metal, otherwise the trade would have known of them, for it is a significant fact that every retailer at the convention was a subscriber to Hardware and Metal.

These exhibits back up the advertising. Week by week manufacturers tell the trade about some of the talking points for the lines they are placing on the market. They create more or less interest in these lines, and when the retail dealer has taken the goods up in his hands and examined them and talked personally with the men who make them, he is in a much better position to buy intelligently, and what is of more importance, to sell intelligently.

Taylor Forbes' exhibit was very neatly arranged in a large room on the first floor near the convention hall, and showed very attractively the large number of specialties which they manufacture. One side of the room was given over to Builders' Hardware, store and door latches, and a large bell was placed in the middle of the room. The delegates were given ample opportunity day and night of judging the tone. The consensus of opinion seemed to be that it was quite suitable for either church or school, but that it would never supplant the bell boy for calling guests at 6 a.m.

Of course Taylor Forbes exhibit would not be complete without lawn mowers, and they had on exhibition all sizes and grades.

An extremely interesting casting was placed over the grate showing Christ and the twelve Apostles seated at the table the night of the last supper. This work was done by J. M. Taylor, Jr., who is only nineteen years old, and who had only studied the art of moulding for a short time. One had only to look at the life like figures to be convinced that moulding was in reality an art. The casting was electroplated with oxidized finish.

The Gillette Safety Razor Co., Montreal showed a complete line of their safety razors, and took the opportunity of impressing on the trade ways in which business could be created for their line, and showed samples of literature which would be distributed to any dealer, and which if properly distributed would tend to create business for their line. One of the interesting features of their exhibit was a roll of steel from which blades are made. After the blades are stamped out the steel goes through 17 processes before it is ready for the market.

"The Toronto Globe is the Scotchman's Bible, but the Bible of every hardware and metal man in Canada is Hardware and Metal, and we all swear by it."—Robt. Hobson, General Manager, Hamilton Steel & Iron Co.

The Canada Wire Goods Mfg. Co., Hamilton, had an exhibition of their wire cloth, grill work for offices, wire for concrete reinforcements, steel wire floor mats, foundry supplies and sanitary clothes lockers. An interesting feature of this exhibit was jail cell work of which they are making quite a specialty.

The Gurney Tilden Co., Hamilton, had a very attractive exhibit showing their builders' hardware. This firm also had another exhibit showing their stoves and ranges.

David Maxwell Co., St. Mary's, exhibit consisted of wringers, churns, washing machines, trucks and other hardware specialties.

The Canadian Hart Wheels, Hamilton, gave a practical demonstration of the effectiveness of their new "Beaver" Oil Stones. A small stone in a very neat box was presented to each of the delegates, and they were good enough to intimate that they would be pleased to send one of these samples to any hardwareman who was unable to attend the convention. This firm also manufactures razor hones and wheels and had a number of these prominently displayed.

The Lufkin Rule Co., Windsor, are known to the trade as manufacturers of measuring tapes and rules. There are probably few dealers, therefore, who are not surprised at the various styles of rules and tapes made by this firm and the uses of which were explained to each of the delegates visiting the booth. Another line in which the trade seemed to be greatly interested in was a glass board and tinners' pattern rule.

The Dover Manufacturing Co., Canal Dover, Ohio, in their exhibit paid particular attention to the "New Unit." This firm have figured out a splendid assortment of their asbestos sad irons, and with every order placed for the "New Unit" they will send large window trim which should make very effective advertising and create considerable business for their line. The Dover Manufacturing Co. have paid particular attention to plans for helping the dealer, and these were explained in detail by their representative.

E. C. Atkins & Co., Hamilton, had room adjoining convention hall in which they made very attractive display of their saws.

AutoStrop Safety Razor Co., Montreal, had a neat exhibit showing various styles in which their razors are sold.

Brantford Roofing Co., Brantford, were on hand with supply of their roofing, which was given a fair test the second night of the convention. A number of the rolls were handled rather roughly by some of the more jovial spirits attending the convention, but the representative claimed it did not hurt it in the least.

The Metallic Roofing Co., Toronto, had a few samples of their metal shingles on display, and their travellers discussed with the trade the question of how hardware dealers can keep this business in their hands and make it a profitable one.

National Cash Register Co., Toronto, displayed large number of their machines and gave some very interesting and instructive information to the delegates as to the advantages to be gained by installing them, and straightened out a number of difficulties which dealers who had already purchased machines had been unable to work out themselves.

A number of other firms had attractive exhibits, among which might be noted the Carborundum Co., Niagara Falls, N. Y.; Pittsburg Perfect Fence Co., Hamilton; Frost Wire Fence Co., Hamilton; Canadian Wire Fence Co., Hamilton; Banwell Hoxie Wire Fence Co., Hamilton; S. F. Bowser & Co., Toronto; H. W. Johns Manville Co., Toronto; Dowswell Manufacturing Co., Hamilton; Standard Paint Co., Montreal; F. W. Bird & Son, Hamilton; Jones Register Co., Toronto; Supreme Heating Co., Welland; Canada Paint Co., Montreal; Moffat Stove Co., Weston; Allith Manufacturing Co., Hamilton, and Hamilton and Toronto Sewer Pipe Co., Hamilton.

Colonel Samuel M. Nicholson, head of the Nicholson File Works, Providence, R.I., the largest plant of the kind in America, was painfully injured in that city a few days ago, in a collision between his road machine and a street car.

THE CONVENTION REPORT.

The report of the Ontario Retail Hardware Association Convention in this issue is complete up to Wednesday afternoon. It was planned to report the entire convention, but its magnitude and the enormous amount of work entailed made it necessary to hold the report of the banquet, the Thursday events, the "Question Box" discussion, the report of Mr. Lariviere's address, the list of souvenirs, the convention notes, the invitations received for next year's convention, and other features until next week in order to have the paper in the hands of its readers at the usual time.

Watch for next week's report, therefore, and realize that the convention was the greatest event in the history of the hardware trade in Canada as was evidenced by the scramble for next year's convention, Montreal, Peterboro, Toronto and London sending invitations with Hamilton using every possible influence with the delegates to induce them to decide to visit Hamilton again next year. The Hamilton jobbers recognized a good thing and did not lose an opportunity of pushing it along.

"The Ontario Retail Hardware and Stove Dealers' Association." Here's to its health and prosperity. May it continue to prosper and always retain the confidence of the trade which it has won in three short years of existence.

WHAT FORESIGHT CAN DO.

Vigilance and foresight are elements which enter materially into the success of any business. The merchant who is alert and active, always keeping his eyes and ears open, is the one who in the long run is going to distance his competitor. Call the quality shrewdness if you prefer the term, but no matter what name you bestow upon it, the exercise of watchfulness and keen insight are most important. This is seen in all lines of trade and a few examples serve to bring home the point.

The auctioneer scans the papers to learn who have sold their farms, knowing full well that a sale of effects will likely follow, and then he goes after the business of handling the sale. Being first on the spot he often secures the engagement. The furniture dealer watches the society and nuptial columns, knowing that the participants will soon go in for housekeeping; then he gets in communication with the parties with a view of selling them goods with which to furnish their home. The monument and marble dealer reads the obituary announcements and seeks to sell the surviving relatives some suitable memorial to mark the last resting place of the departed. The transfer man scrutinizes the "houses wanted" and sends the persons advertising a card that he is prepared to cater to their wants in the line of conveyance or removal of household goods. The plumbers and heating contractors peruse the building permits, knowing full well that they may secure business by getting in connection with those who are about to build. Other instances might be furnished of the line of action adopted by different merchants to learn in advance the wants and undertakings of those in their community.

A hardware man can put his time to good advantage, or open up the way for increased trade by attending an auction sale in the country whenever an opportunity presents itself. In the smaller towns and cities he deals largely with the farmer, and by being present at sales not only becomes better acquainted with his customers but gains a personal touch that he cannot do by always remaining behind the counter.

In a recent issue Hardware and Metal told how an enterprising dealer in a Western Ontario city had worked up a big business in the farm implement line. This firm keeps a man constantly on the road interviewing prospects. The names of these are secured in a variety of diplomatic and tactful ways. A representative attends many of the auction sales in the country, these sales being caused by farmers selling out or removing to other localities. This representative watches each particular implement that a farmer bids on. Then, in case the would-be purchaser of a mower, a binder, a seeder or a cultivator loses his bid, it is taken for granted that the bidder is in need of such a machine or otherwise he would not be bidding on it. Later the representative calls upon the man and if he does not want a new machine an effort is made to sell him a second hand one which the firm has taken in exchange in some previous transaction.

Another benefit derived from attending the sale is that the hardware dealer frequently comes in contact with several customers with whom he has a deal pending, thereby saving considerable time and long driving which it would require to visit various probable patrons. At an auction sale a hardware dealer can develop other lines of business even if he does not handle agricultural implements. If he is the selling agent of a metallic roofing firm, in conversation with the farmers he learns who are going to build and has, therefore, an opportunity of conferring with builders in reference to roofing contracts. Perhaps the hardware man handles cream separators, washing machines, churns, and dairy utensils. He can watch who are the bidders on these goods and if they fail to purchase he has a good idea of those who are thinking of replenishing their equipment. In various ways the time spent in the country attending gatherings at which farmers assemble in large numbers is not lost. It may be hours well invested and result in connection and the acquisition of pointers which will yield considerable business in the building, implement, roofing or tinsmithing trade.

TRUSTS CANNOT COLLECT THROUGH COURTS.

An interesting and far-reaching decision has just been rendered by the Supreme Court of the United States in the case of the Continental Wall Paper Co., against Louis Voight & Sons Co., of Cincinnati. The decision in effect means that combinations held to be in restraint of trade cannot enforce payment of claims, at least the courts will not aid such combinations or trusts to collect accounts.

The case in question was one in which the Continental Co. (commonly called the wall paper trust) sued the Cincinnati concern for a debt of $57,000 for goods supplied. Payment was resisted on the ground that the paper company is a trust. It was represented that the Voight Company had bought $200,000 worth of paper on which they had paid 50 per cent. more than they would have had to pay if there had been competition; and that the Voight Company had been compelled to sign an agreement on the threat that no paper would be sold them, and that it would be impossible for them to continue in business. The Voight Company also contended that they had paid full value for the goods, and that the amount sued for was an excess balance exacted under an illegal agreement. The Continental Company on their part admitted it was a trust, but contended that it could properly collect its debts. On this showing the case was dismissed by the trial court and that decision has now been confirmed by the United States Court of Appeals.

The judgment which was rendered under the Sherman Anti-Trust law is one of the most important pronouncements ever made by the Supreme Court of the United States.

Kitchen Utensils—Active.

MONTREAL HARDWARE MARKETS

February 12.—Trade has steadily improved this week, although there has been a falling off in eastern business, due to the bad roads. Sleighing has been very difficult and farmers have been disinclined to move about. Buying in the West, has, however, greatly improved, and the increased business has more than made up for the local falling off. Western travelers report most encouraging conditions and there is a hopeful feeling all the way round that gives a firmness to the markets. With the Montreal carnival now in full swing it is expected that local trade will be greatly improved as merchants and consumers will be in town and able to do their buying while here. Booking ahead continues on the quiet side, orders for immediate delivery constituting the bulk of the business.

Lumbering tools are now going well, and so are the sugaring supplies. Extensive sugaring operations are conducted in the Eastern Townships, and the revenue derived is very great. Builders' hardware is improving, and although the number of spring lines moving has not increased to any great extent, orders for those already in demand have developed strength. Harvest tools are beginning to swing well, while there is an improvement in lawn mowers, hose, gardeners' tools, and other lines.

BUILDERS' HARDWARE — There is a better call for builders' hardware, some good sorting orders for immediate delivery coming in. The spring movement has not yet developed. We continue to quote: Discounts on door sets, 50 and 10; escutcheons, 50 and 10; escutcheon pins, steel, 50, brass, 55. Spring hinges, per gross, No. 20, $9.

SPRING LINES—A promising movement in harvest tools is developing, and forks, hoes, and rakes are being steadily called for. An improvement is noticed in the bookings for lawn mowers, hose, hose nozzles, lawn sprinklers, gardeners' tools, ice cream freezers, green wire cloth and poultry netting. Shipping has already taken place in some cases, but the bulk will move later on. We quote: Screen doors, stained, $7.80; grained, $8.10; poultry netting, 60 and 2½; green wire cloth, $1.70 in 100 ft. rolls.

SPORTING GOODS—Guns and ammunition for spring shooting are showing movement. Fishing tackle is also being booked. Orders for baseball outfits have been placed, but the movement in sporting lines generally is still quiet. We quote: Dominion rim cartridges and C.B. caps, 50 and 2½ per cent.; B.B. caps, 50, 10, 2½ per cent.; Crown black powder, 18 per cent.

HOUSEHOLD UTENSILS — Lines necessary for spring cleaning are gathering strength, and a good movement is noticeable in carpet sweepers, wash tubs, washing machines, wringers, brooms, baskets, pails and polishes. Sad irons, graniteware and tinware are also showing better strength. We quote: Carpet sweepers, $2 and up; sad irons, Mrs. Potts', No. 55, 75c; No. 50, 80c per set; asbestos, $1.50; cake makers, $17.25 per dozen; bread makers, $18 per dozen and upwards.

LUMBERMEN'S SUPPLIES — There is a strong movement in lumbermen's supplies, and good business is now doing in boot calks, cant hooks, peavies, and binder chains. We quote: Boot calks, $4 to $4.25 per 1,000; wing calks, $6.50; cant hooks, $12 to $16 per dozen; axe handles, $1 upwards; axes, $6 upwards.

SUGARING SUPPLIES—A promising call has developed in sap spouts, sap pails, bits and kettles, and the demand promises to be above the average. Sap bits are quoted at 50 off.

BOLTS AND NUTS—The demand continues to show improvement, and evidently construction work is developing. We continue to quote: Discounts on carriage bolts, ⅝ and smaller, 70; machine bolts, ⅝ and less, 60, 10 and 10; coach screws, 75; stove bolts, 80 and 7½. Wire nails are still quoted at $2.30.

SCREWS—A better demand is noticed in screws, and good trade is opening up. We quote: Discounts at 85 and 10 off for flat head bright; 80 and 10 off for round head bright; 75 and 10 for flat head brass, and 70 and 10 for round head brass.

WIRE—Orders continue to show the progress noted last week, and the spring prospects look most encouraging. We continue to quote: Plain wire, $2.30 base; barb wire, $2.65 in straight and mixed car lots, and $2.70 in small lots. Galvanized wire, No. 9, $2.35 in straight and mixed car lots, and $2.40 small lots, f.o.b. Montreal. Coiled spring fencing, $2.65 straight and mixed car lots, and $2.75 small lots.

BRIGHT GOODS—Trade in these lines show an improvement, but in order to stimulate trade, discounts on gate hooks and eyes and screw hooks have been increased from 60 to 60 and 20 per cent. The discount on stove pipe eyes, screw eyes and square hooks will remain as before, 60 per cent.

TORONTO HARDWARE MARKETS.

February 12.—A very quiet week is the present one for the hardware business. In fact February is perhaps the quietest month of the year. One house, however, reports better orders for future delivery than were placed last month, aad all houses say inquiries are more frequent. The hardware conventions at Hamilton and Toronto are the chief topics, though these events do not interfere at all with business.

Graniteware, tinware and kitchen utensils generally are the goods most called for just now, showing that the housecleaning season is near at hand and that the hardware man is preparing for it. Stable tools and implements, too, are going out in many orders, and there is a fair call for spring goods generally. The existing conditions, however, seem to indicate that consumption is going on more rapidly than the replenishing of stocks by hardwaremen. This shows that entire confidence has not yet been restored. But there is a good feeling growing, due largely to the prosperous condition of the agricultural sections and the improving condition in industrial centres. Prices continue unchanged.

SEASONABLE LINES—The mild weather has hindered the selling of winter lines, and skates, snow shovels, ash sifters and articles of like nature are not going out as freely as one would wish, nor as often as was anticipated, some retailers, according to outside reports, are cutting a little on these goods, but this is hardly wise. Toronto hardware men are keeping better together.

SPRING GOODS — Increasing inquiries are received daily, but the actual business at present being done is not up to the standard set in January. The bookings are for future delivery and include household granite and tinware, and implements used in stable and on farm. Summer lines, refrigerators, screen doors, lawn mowers, etc., are much sought after.

BUILDERS' HARDWARE — General building trimmings, lock sets, bolts, and things of that class figure largely in orders and are going out more freely than at this time a year ago. Reports from all over the country indicate that 1909 will be a good building year and this accounts for the larger size of the orders. Cement, tar and building paper are increasing in sales.

ROPE AND TWINE—Though prices are still low, 11½c for pure Manilla twine, orders are light. Evidently buyers stocked up as much as they cared earlier in the season and do not wish to invest more until the hardware market gets a little more active.

WIRE—Eastern market reports indicate a slightly easier feeling in wire. Toronto prices, however, are at last week's figures. Galvanized barb is $2.90, and plain twist $3.20. Coiled spring wire continues at $2.75 for No. 9. Galvanized wire is quoted at Pittsburg, base sizes 6 to 9, $2.25. Less than car lots, 10c higher. Wire nails are unchanged at $2.30; poultry netting at 60 and 2½, and green wire cloth at $1, $6 in 100-ft. rolls.

HOUSEHOLD UTENSILS — Probably the most active line at present. Enamelware and tinware are going out with almost every order. Lanterns and lamps continue to figure in sorting orders, though not to the extent of a few weeks ago.

HEAVY GOODS—Bar iron is unchanged at $1.95. Stove bolts are 80 and 7½. Bright and steel wood screws,

flat, 85 and 10, and round head, 80 and 10 per cent. Brass screws are, flat, 75 and 10, and round, 70 and 10. Business is not more than fair.

MONTREAL METAL MARKET.

Montreal, Feb. 12.—The jobbing trade has been very good this week. Users state that orders are coming along freely with the result that they are buying in larger quantities, although keeping well within their immediate wants. As one jobber said : "we are doing very nicely, and if the rate of improvement is maintained we shall be satisfied." Inquiries are good, and there is no doubt that consumers are watching the markets closely. So far as large contracts are concerned business is inclined to be quiet. Specifications are now being received on contracts placed some time back, and shipping is becoming more frequent. There is no change in prices, the stiffening in the primary markets this week keeping prices firm here.

PIG IRON—The pig iron situation remains much about the same. Prospects look very favorable for a good season in imported iron. Canadian furnaces are apparently holding to prices firmly. We continue to quote Middlesboro No. 3, $19.50; Summerlee No. 1, $21 to $21.50; No. 2, $20.50.

Cleveland warrants are now quoted at 48 shillings, a decline on last figures of threepence. Trade is reported on the dull side with nothing out of the ordinary to chronicle. Pig iron and steel in the States continue on the dull side with plenty of rumors as to price cutting in both markets, but nothing very definite appears as to the extent of this cutting.

TIN—Prices are unchanged this week, the improvement in the primary markets stiffening things here. The jobbing trade has been satisfactory considering conditions, and a fair amount of metal is being used. Nothing is being bought that is not wanted, and stocks are kept very low. We continue to quote jobbing prices at 31½. Following low figures an improvement has taken place in the English market this week, and there has been much better activity. As a matter of fact the markets should be showing much greater strength at this time, but the heavy stocks are acting against this. New York continues to sway English prices.

COPPER—As in the case of tin jobbing prices are unchanged this week, the betterment in New York being reflected here. We continue to quote, therefore, 15c. Trade is still showing an improving tendency, and there is plenty of confidence as to the future. Inquiries are good.

The strong movement in New York to bring about lower prices is for the time being nullified by the brighter tone of the English market and a slight rally in home consumption.

SPELTER—Prices in spelter are unchanged, and we continue to quote $5.50 for jobbing lots. Steady trade is doing. Spelter both in London and St. Louis has been fairly firm this week, but taking figures for some time back the markets show declining strength.

LEAD—Lead remains unchanged, and the price of imported pig is $3.70 with Trail at $3.60. Prices in the English markets have ranged below the £13 mark. and the situation appears weak.

OLD METAL—There is no change in the situation, and we quote : Heavy copper and wire, 11½c; light copper, 10c; heavy red brass, 10c; light brass, 6¼c; heavy lead, 2½c; wrought iron, $11; No. 1 cast, $13.50.

TORONTO METAL MARKETS.

Toronto, Feb. 5.—An unusually quiet week in metals has been this passing one. Copper is again quiet; tin is erratic and dull; lead is very quiet, and sheets and plates are normal. It was generally anticipated that the new year would see a stimulation in business, but, unfortunately, this has not as yet materialized. Buying is still being done on the hand-to-mouth order, and manufacturers are not making great efforts to stock up.

PIG IRON—Still dull. The cutting going on in some of the U. S. centres has not at all affected the Canadian market, and though orders are quiet the quotations remain at the old figures. Canada Foundry is $18.50; No. 3 Middlesboro, $21; and Cleveland, $22. Work at Sydney continues unabated, and while the output for January was not so large as December, the two months taken together constitute a record. January's output of iron and steel was 44,000 tons and shipments were about half this amount. It may not be uninteresting to note that the German output of raw iron has increased threefold during the past 25 years.

COPPER—Again on the quiet side is this metal. Very little trading is being done at present. Prices are unsteady and buyers do not care to place orders until a firm basis is reached. There are people who believe that prices cannot give way any further, but the question of over-production is uppermost, and this tends to restrict buying. Local quotations are still at 15c.

TIN—Dull trading is passing and prices are very erratic. Stocks continue heavy. Owing to speculation it is uncertain to predict the future. Fluctuations are the feature, and this has put little confidence into the market, buyers consequently being shy. The local price is yet at $30.

LEAD—After being rather brisk, considerable quantities having been absorbed by dealers, the market has now changed to quietness. Imported pigs are at $3.80, the same quotation as last week.

SPELTER—This metal has been less active this week. $5.50 is still the price quotation. Sellers show no inclination to make concessions. Supplies are somewhat restricted.

SHEETS AND PLATES—Normal business continues to be done at unchanged prices. In the U. S. the business is nearing the boom mark of 1906, and many of the factories are running continuously with three shifts of men. Sheet iron has increased in the last decade by 100 per cent.

OLD MATERIALS—Practically unchanged in situation and price is the old metal market this week, and the quotations for the past fortnight continue to hold good.

CANNOT COLLECT DEBTS IN B.C.

It has been ruled by the highest court in British Columbia that any company incorporated or registered in any other province, and not holding a license in British Columbia, cannot take action against their creditors in that province. Furthermore, it is against the law for any such company to do business there without either a license or a B.C. charter.

N. L. Martin & Co., chartered accountants, Toronto, are sending a letter all over Canada warning business houses that they must have a license in B.C. even to sell goods through a traveler, if they expect to have legal redress. In order to register or obtain this license, formal application must be made to the registrar of joint stock companies. The fee, where over 50 per cent. of the capital stock is invested outside of the province, is $250.

DOMINION STEEL CO. WINS.

The Privy Council has rendered judgment in the appeal of the Dominion Coal Co. from the decision of Judge Longley in September, 1907, upholding the Dominion Steel Co.'s contentions and confirming the judgment of the Supreme Court of Nova Scotia, and remitting the case to that court to have the damages assessed.

The case involves nearly $3,000,000 and is the biggest lawsuit ever entered in Canada.

DEATH OF JAMES VALLANCE.

James Vallance, brother of Wm. and Geo. Vallance, of Wood, Vallance & Co., wholesale hardwaremen, of Hamilton and Toronto, died on January 8th, at Vancouver, where he had been living for some time past. Mr. Vallance was a building contractor in the coast city and his death was a shock to his friends in the east.

END OF METALLIC ROOFING CASE.

The long-drawn out suit of the Metallic Roofing Co. against the Metal Workers Union, has been settled by mutual consent. It will be remembered that the company got judgment for $7,000 against the union for boycotting the company and that the case was appealed from court to court until it reached the Supreme Court, where on account of a technicality the case was ordered to be re-tried.

A. W. Moore, hardware merchant, St. Catharines, accompanied by Mrs. Moore, sailed on Saturday last on a trip to England and Scotland.

William F. Lewis, who many years ago amassed a fortune in the hardware trade in Montreal, died suddenly in Montreal this week at the age of 80 years.

Trade News From Atlantic to Pacific

Eastern Canada

Unrest in Wire Nail Business at Halifax —Steam Engine Invented by St. John Man.

HALIFAX.

February 8.—Business conditions are not coming up to the prediction made at the opening of the new year. At the present time trade is very dull, and there is no immediate prospects of any great revival. Of course the unfavorable weather conditions may have something to do with the backwardness of trade, but the outlook just at present is not any too bright. Jobbers, however, are living in hope, and with the opening of spring things may brighten up.

The demand for canners' supplies is not coming up to expectations, and so far there is not any heavy call for fishing supplies. Jobbers are looking for an advance in heavy lines of hardware, but so far there has been no material change in the price list, and many hardwaremen are taking advantage of the ruling prices and placing their orders. Collections are somewhat backward, much more so than many of the jobbers had anticipated earlier in the season.

Many of the country merchants have still considerable quantities of fish unsold, but it is hoped that the situation in this respect will be relieved soon, which will have a tendency to put more money in circulation.

There is, unfortunately, considerable unrest with regard to the wire nail business. Manufacturers appear to be over anxious to dispose of this product. At the present time dealers are not in a position to quote on this commodity as prices have not been finally settled. If a break occurs in prices, however, it will likely be only temporary, as manufacturers are not doing business for pleasure.

A building permit has been taken out by Walter Mitchell for the erection of an ice skating rink. The contract price is $14,000, and the S. M. Brookfield Company will erect the new building.

During the recent cold snap the plumbers have been kept pretty busy, thawing and repairing water pipes. In plumbing lines generally business has been fairly brisk.—A. C. F.

ST. JOHN.

Feb. 10.—The report of the building inspector for 1908 was submitted to the common council last week. It shows that permits for 101 buildings were issued last year, or three less than in 1907, and that the total cost was $270,-150. There were eighty-seven wooden buildings, valued at $159,900, and fourteen of brick, valued at $110,250. The inspector points out that in 1907 the buildings were more expensive and instances the cold storage, the Y.M.C.A., the I.C.R. flour warehouse, and the military stores addition as among those for which permits were issued in 1907, and completed in the year which closed last December.

There has been an increase of about 10 per cent. in rents here this season, the landlords giving as the principal reason the probable increase in the tax rate for 1909.

A fire which occurred in King street early Sunday morning did about $20,-000 damage to the stores of Reid Bros., dealers in wall paper, etc., A. O. Skinner, carpets and Dunlop, Cooke Co., furs.

A two-horse power rotary steam engine, the invention of William Minue, Gibson, N.B., after years of patient work, is in operation at the machine shops of W. C. Burtt and is attracting much attention. It does the work formerly performed by the six-horse power reciprocating engine and possesses many advantages over the old type. The idea of a rotary engine is not a new one, but Mr. Minue claims to be the first man to complete one ready for practical use. He has applied for patent rights in Canada, the United States and several foreign countries.

The general store conducted by Clifford Atkinson at Kouchibougnac was entered by burglars on Thursday, Jan. 28, and a quantity of goods stolen.

During the month of January there was a total of about 4,000 men and 800 horses employed on the construction work of the G.T.P. in New Brunswick. —W. E. H.

Province of Ontario

Kingston Hardwaremen Get Civic Contracts—Graniteware Selling Well at Brantford—Two Ingersoll Hardwaremen Take to the Road—Tilbury Merchant's Scheme for Booming February Business—Galt Hardwaremen in Civic Politics.

OTTAWA.

Ottawa, February 9.—The Ottawa Retail Hardware Association's annual meeting, which was called for Friday evening, February 5, was, on account of smallness of attendance, postponed until February 16. On Tuesday evening next, therefore, some interesting reports are expected.

H. A. Fraser and A. W. Newlands, of the Capital Hardware Co., have dissolved partnership, the business being carried on by A. W. Newlands.

McFarlane & Douglas have a full staff employed and are working but one hour short time. This firm has just designed a new plaster head which is recommended by plasterers and architects. The key is of such a pattern as to facilitate the plastering, and holds it solidly. A new galvanized shingle is also in course of manufacture, and business is very promising. It may be interesting to note, in view of the recent articles in Hardware and Metal, anent the roofing business, that McFarlane & Douglas trade only with the retailers and in cases where enquiries are received, owing to advertisements, the same are referred to the dealers nearest the party interested. In this way perfect harmony and complete satisfaction characterizes all business transactions.

There is every evidence that cement is rapidly gaining the favor of builders, as is verified by the expansion of business and growth in manufacturing area of the International Portland Cement Co. since its inception but a few years ago. The plant at present is shut down for repairs, which will require about six weeks. This is necessary, owing to the high tension of the machinery day and night. In December, 1907, the output of the plant was in the neighborhood of three thousand barrels, whereas in December, 1908, the output was over fifteen thousand barrels, an increase of more than four hundred per cent.—G.E.W.H.

KINGSTON.

February 9.—The by-law, placed before the ratepayers for a second time, asking that a bonus of $10,000 be granted the Wormwith Company, to rebuild the piano factory, was carried by a majority of 641, and this means that Kingston will not lose this industry, although many outside places were eager for the factory, offering good inducements, and had the bonus not been granted, the company would certainly have started up in a new field. Building operations will be commenced in the spring, and in the meantime another building is being used.

The hardware clerks are still paying a good deal of attention to sport in their spare time. This week two games were played, the staff of Simmons Bros. defeating the Edward Chown Co. by 9 to 5, and a picked team from the hardware trade being defeated by a team representing the post office by 1 to 0.

Nearly all the work on the new City Hall dome has been completed, with the exception of the metal work, and this will be proceeded with during the mild weather.

Feb. 12.—All the hardware merchants report business this week to be good. The sleighing is fine in the country again, and there is a strong demand for winter supplies from that quarter.

The contracts for remodelling the interior of the store of J. H. Sutherland & Co. have been awarded. The metal work will be done by Elliott Bros., and the painting by T. Robinson & Co.

It is the intention of the Canadian Locomotive Co. to further increase their capacity this summer, by the building of an up-to-date erecting shop. The only available space now left for the company is at the northerly side of the boiler shop, and extending over and covering the extension of Earl street. The company have asked the city for a lease of the land.

Your correspondent asked several contractors about the building prospects this summer, and the general opinion was that there would be quite a number of buildings erected. At present a dozen concrete houses are being planned. The members of the Presbyterian church at Portsmouth will erect a new edifice.

John Corbett was awarded the contract for hardware supplies required by the board of works this year. Simmons Bros., hardware merchants, were given the contract for sewer pipe.

City Engineer Craig's report to council shows that during last year 396 building permits were issued. The total cost of building construction amounted to $170,600.—E. G. B.

HAMILTON.

February 9.—The Fire and Water Committee of the City Council last week awarded contracts for supplies for the department. Those for pipes and castings were: Tallman Brothers, lead pipe at $4.40 a hundredweight; Gartshore-Thomson Pipe Foundry, cast iron pipe at $32.50 a ton, castings at $1.95 a hundredweight; Fairbanks Company, valves at $39.29 a hundred for 12-inch, $9.45 for 6-inch, and $6.18 for 4-inch; Smart-Turner Company, hydrants at $44.70 a ton; Alexander Hardware Company, jute packing at 7½c.

The Human Horse Collar Co., of Omaha, Neb., is starting a Canadian branch in this city. It has taken over the building formerly occupied by Gompf's Brewery Company, at the foot of John Street.

Extensive building operations are planned for the near future. The Meriden Britannia Company, through its architect, A. W. Peene, is calling for tenders for the erection of an addition 73x43 feet. The Imperial Bank is contemplating the erection of a large office building on South James Street, between King and Main, on which it is thought work will be started early in the spring while the Mills Hardware Company is planning the erection of a new store on their present premises on South John Street. The plans have not matured as yet, but when they have it is promised that they will call for one of the most up-to-date, complete and most commodious hardware stores in Canada. The Stanley Mills Company is about to build a stable for its numerous delivery outfits. It will be 200x50 feet. Another prospective building is a new Grand Trunk station. The present structure of that company is an eye-sore and one of the worst advertisements the city could have. Many travelers going through seeing little else but the station, judge Hamilton by it, and for years efforts have been made to stir the company into activity in that regard. However, it has been known for a long time that the Grand Trunk wants to get an up-town station in Hamilton, and the fact that it has been purchasing property in the vicinity of Cannon and John Streets is taken as an indication that it is laying plans for a private right-of-way. It is thought that if the company does build it will choose as a site the present King Street Station, used by the old Port Dover line, or the site of the city jail at the corner of Barton Street and Ferguson Avenue. Hendrie & Co., cartage agents for the Grand Trunk Railway, will vacate their present office premises on East King Street, it is thought, within the next few months, as the firm will erect a new building nearer its freight sheds.

The commercial travelers of this city will hold a ball in the Hotel Royal on February 26.

It is rumored that in the event of Hamilton entering into the Hydro-Electric project this city will be made the central distributing point for the power supply. The prospects for such a big undertaking for the city are much brighter since the City Council on Monday night revoked the contract made with the Cataract Power Company and decided to leave it to the ratepayers to say whether a new contract should be made with the above power company or with the Government power corporation. Should Hamilton be made the headquarters for the building of transmission lines and the distribution of power, it will be of vast importance to the merchants and manufacturers. It would mean the building of power stations and the employment of many men who would naturally spend their earnings in this city.—D. L.

GALT.

February 9.—Times in Galt are good. Of course they have never been really bad, the town is too solid for that, but just at present they are exceptionally good. All our factories are working full time, and money is much more plentiful than for some time past.

J. D. Allen is proving a welcome member to the Library Board. The firm of Allan & McKenzie is certainly doing its duty in a civic sense, with Mr. Allan on the Board of Health and Mr. McKenzie on the Parks Commission.

The Hammond Potato Machinery Co. are rushing to completion their new factory in Galt.

J. W. McMurtry has returned from a visit to his St. Thomas store. The Railroad City is a good place, he says, but his preference is for Galt.

Building prospects for the coming season are exceptionally bright in Galt.

The plumbers and tinsmiths are all busy, and a visit to the different establishments demonstrated the fact that there was no lack of work.—A.C.

GUELPH.

February 9.—In spite of the fact that the weather man has been acting in a most frivolous and unbusinesslike manner and not at all in favor of a good trade in sporting goods and other winter necessities, the local hardwaremen when interviewed by your correspondent all seemed fairly well satisfied with the general trend of business activities. A good many of them admit that they have quite a stock of skates, snow shovels, and such winter articles on hand, and cut prices in such seem general, but, on the whole, they claim that they have not fared badly, despite the weather, and very few of them complain that they are very badly overstocked with holiday goods.

At a meeting of those interested in the cause here last Thursday, the Guelph Anti-Tuberculosis Society was formed and a number of prominent citizens were elected officers of the society, the intention of which is to raise a fund for the purpose of building in or near Guelph a big sanitarium for the treatment of Wellington County consumptives.

Last Thursday Bond's hockey team won another victory, defeating the team from McMillan's hardware store by 11 to 1; while a new team composed of the younger element of Armstrong's carriage works defeated the old team by way of settling a dispute as to which of the two teams should be the standard-bearers for the whole factory.

There is a good deal of increased activity in Guelph's civic circles over the question of the extension to the Winter Fair Buildings. The plans call for a $40,000 building, while the city has only offered $10,000 and the Government $20,000. The markets and public buildings committee, which met last week to discuss the question, will have a deputation wait upon the Minister of Public Works and other dignitaries this week to try to get the Government grant increased by $10,000.

J. W. Oakes, a prominent builder and contractor of this city, who is also license inspector, returned last week from a trip to the West.

The new Separate School building, an imposing white stone structure on the hill and in close proximity to the Church of Our Lady, is now almost completed.

Though recent sudden changes in weather have caused a number of "freeze ups" and have kept Guelph plumbers busy making money, Harry Mahoney has found time enough to indulge in his favorite pastime, curling. He was skip of the team that won District No. 7 for the Ontario tankard the other day, in the big tourney at Stratford.

Mr. McPherson, while in the city last Saturday morning, stated that he had bought up all the right-of-way between Hamilton and Guelph for the Guelph & Hamilton Electric Railway. He visited Mayor Hastings and told his Worship that the company are ready now to commence building operations as soon as they can make their final arrangement with the city council and can arrange with Radial Railway Commission to enter the city on their street railway line. Mr. McPherson, in showing the plans for the new electric road to the Mayor, pointed out what a very few lots along the right-of-way there were still to buy

up, and showed also how the company's engineers had managed to get over the difficulty of crossing the rear part of the Morriston Fair Ground, which the directors claimed would keep them from making a much-needed extension. The line now passes through the front part of the grounds, which is more satisfactory to all parties concerned. The line skirts the Dundas Road all the way from Guelph to Morriston, where it crosses it for the first time.—H. S. N.

BRANTFORD.

Feb. 9.—The annual meeting of the Board of Trade was held in the council chamber on Tuesday evening last, when reports for the year were submitted. There are now 209 members, and there is a balance on hand of $1,094.09. The officers elected were: president, George Hately; vice-president, Joseph Ruddy; secretary-treasurer, J. S. Dowling. A Dominion Board of Trade was advocated, though it was pointed out that the Canadian Manufacturer's Association does a great deal of the work that would otherwise be done by such a board.

The junior partner of the hardware firm of Watt & Squire, in speaking with your correspondent a day or so ago, stated that, in spite of the general depression in trade last year, the Christmas business of the firm had been a very large increase over the previous year. He attributes it to the extensive advertising campaign carried on through local mediums. The space used was considerably increased, and the returns more so.

Granite and kitchen-ware are moving out rapidly now, many housekeepers taking stock and refurnishing their kitchens. A number of the local firms are conducting sales of these timely articles.

The question of better market facilities here is one that demands the earliest attention. Merchants are united in their demand for better protection from the inclemency of the weather for the farmers, knowing that many of the country people take their produce to other centers, and also spend the proceeds of their sales there, to the detriment of the Brantford merchants. Active steps will likely be taken by the present city council, who are now considering the erection of a building that will serve both market and civic purposes.

The excursion of the Grand Valley Radial Railway on Saturday last was a very successful one. A large number of citizens of neighboring towns took advantage of the cheap rates. Local hardware merchants reaped a good share of the benefits. The excursions will continue during the month.

The Sunbeam Incandescent Lamp Co. will remain in St. Catharines, despite the rumors that it is intending to remove to Toronto. The company employ 125 hands and have an annual wage sheet of $35,000.

Two hundred and fifty members of the C.S.C.E. visited the plant of the Plymouth Cordage Works, Welland, last week.

A new registry office will be built at Welland.

The Welland Portland Cement Co., Welland, employees have organized an athetic club.

The members of the Collegiate Board paid a visit to the Collegiate on Monday, and decided that it would be a waste of money to try to renovate the building. They will again advocate that a new Collegiate be built, and will submit plans to the city council.

The police have been notified of some extensive thieving operations from a local foundry. A large number of brass castings have been missing.

Taylor & Taylor, architects, are drawing up plans for the proposed changes at the county court house. A large amount of money will be spent in re-arranging the heating system, etc.

INGERSOLL.

February 9.—Clarence Gaynor, who has been with Wilson Bros. since they engaged in the hardware business, has accepted a position as traveling salesman for McCall Bros., Toronto. Clarence has had a wide experience in dealing with the public, which fact, coupled with his genial personality, ought to win him success in his new field.

It is expected that the work of constructing a new school in Ward One to cost in the neighborhood of $10,000, will be commenced as soon as the frost is out of the ground in the spring. The matter has been receiving the attention of the Board of Education for some time, and an appropriation has been obtained from the Council. Architect Taylor, of Brantford, will visit Ingersoll shortly to furnish plans in accordance with the revised specifications.

J. T. Norton, who was engaged in the hardware business here for upwards of three years, has become a "knight of the grip." He is representing the Erie Iron Works, of St. Thomas.—E. A. J.

LONDON.

Feb. 9.—Seasonable quiet characterizes the hardware trade, but dealers are looking for a distinct revival of activity early in the spring. This optimism is largely accounted for by a substantial increase in real estate transfers and building permits issued last month, both being far in excess of those for January last year. Indeed, there is reason to look for something in the nature of a building boom with the return of spring.

The Trades and Labor Council has decided to open a factory at 114 Clarence street for giving employment to some of the unemployed union men of the city. The manufacture of toys and small articles such as almost any mechanic can make will be engaged in, and it is thought there will be no difficulty in finding a market for the goods turned out.

The Mitchell Cooperage, of Chelsea Green, a suburb of this city, the directors of which control a large basket factory in Ridgetown, intends establishing a basket industry here on a large scale. The Cooperage has done a good business during the past year, having supplied local firms alone with 36,500 barrels. Basket manufacturing is not at present represented among London's industries, and it is felt there is an excellent field here for such a concern.

The City Council is to be asked to aid the North Midland Railway Company by an exchange of lands. The North Midland is the trolley line which it is intended to build between this city and points north, including St. Mary's, Stratford, Lucan, Granton, possibly Mitchell and the intervening villages. Promoters of the new railway state that they have the guarantee of English financial men to put $800,000 into the railway, provided $200,000 can be raised in Canada for the project.

CHATHAM.

February 9.—The newly-constituted Board of Water Commissioners, of which Mayor Westman is chairman, last week enacted a new ruling relative to meters, which will be of considerable interest to the plumbing fraternity. All factories, hotels, livery and feed stables and laundries must, on or before June 1, be put on a meter basis. The move was opposed by ex-Chairman Sheldon, the sole surviving member of last year's board. Manufacturers will, as a result, pay according to water used; while factories now enjoying free water to a certain amount will be charged meter rates for all that is used above the specified amount. Manufacturers are talking of holding a meeting to protest against the new ruling, which will in some cases involve, it is said, the expenditure of $200 on meters. It is claimed by the Commissioners that bad plumbing is to blame for many high water bills. Commissioner Sheldon thought that an inspector should be appointed to inspect and pass upon every new job.

Wesley Robb, formerly traveler for the Acme White Lead Works, Detroit, passed away recently at the home of his parents in Tilbury West. He was 38 years of age.

R. J. Bailey, Simcoe, representing the Rod Iron Range Co., last week paid a business visit to this section, also visiting his parents in Wallaceburg.

G. A. Bradshaw, Clinton, general agent for the Frost & Wood Co., visited this section last week.

The Property Committee of the new City Council have taken a step long urged by local retailers, and particularly of interest to hardwaremen. At their meeting last evening a clause recommending the raising of the annual fees for auctioneer's spaces on the market from $15 to $50, was put through. Retail merchants have in the past charged that the auctioneers sell, not only second-hand goods, but new goods, particularly tinware and other lines handled by hardwaremen; and that these goods compete unfairly with those handled by merchants. Last year the merchants asked the council to put a stop to the practice. This, apparently, cannot legally, be done. The increase in the license fee, however, will tend to put the auctioneers and the retailers more nearly on the same level.

W. C. Crawford, the Tilbury general merchant, has an aggressive scheme for

booming business in quiet February. He announces a combined slaughter sale and prize contest, lasting from Feb. 6 to Feb. 27, with price reductions ranging from 15 to 50 per cent. Twenty prizes, the first of $100, and the second $50, the remainder being in goods, are offered to stimulate business. For every even dollar spent in cash purchases, the purchaser receives a numbered coupon. On the last night of the sale the "lucky numbers" receive the prizes. Furthermore, to those paying up their accounts, a coupon is given for every $3 paid. The sale is being widely advertised in local papers within hailing distance of Tilbury, the firm also issuing four-page circulars containing full particulars and sample prices in the various lines. A feature in the latter is a list of articles purchasable for exactly $1. A similar scheme, though not so extensive, was tried last year, and proved very successful.—V. L.

FORT WILLIAM.

Feb. 8.—The quiet season has come upon the retail hardware business since Christmas, but all the merchants are looking forward to one of the most active summers that has been known here. There is a large amount of construction work in view for next season, including the building of the new station by the C.P.R. and G.T.P. on Syndicate Ave. With the station on this site and the bridge across to the island about half a mile west of it, it looks as if an impetus will be given to that portion of the city as a business location, and Mr. Coslett, of the Coslett Hardware store, who has built a block in the centre of this district believes that he has struck the right place, in spite of the fact that it seemed at first as if he were forcing business into the residential part of the city.

Winter has proved no bar to building operations. Work has been carried on uninterruptedly on the Cuthbertson block and the Graham & Horne block on Victoria Avenue, and since Christmas J. C. Murray has started work on a residence for himself, and a business block adjoining the Marks block on the corner of Syndicate and Victoria Aves. It was a novelty to see brick being laid in the beginning of February, the bricklayers in many instances being at work with bare hands.

The Roman Catholic Church has just purchased, through Ray, Street & Co., a site in the west ward of the city, consisting of 375 feet frontage on both Mary and Christina Streets, with a depth, from street to street, of 330 feet. Here will be erected a church and separate school for the western portion of the city.

The G.T.P. is running regular trains from Fort William west to Superior Junction and it is expected that through connection with Winnipeg will be established from Fort William some time in May.

Better progress has been made recently on the tunnel which will convey the water from Loch Lomond to the city, a distance of six miles, from an elevation of 350 feet. At the end of January out of a total length of tunnel of over 5,000 feet, only 540 feet remained to be completed, and the work is progressing at the rate of about 110 feet per month, with air-drills working at both ends.—W.H.L.

Western Canada

Revival of Mining Industry Helps Hardware Trade at the Coast—New Immigration Hall for Saskatoon.

SASKATOON.

February 5.—A. J. Burton has arrived from Chicago to take a position as manager in the J. F. Cairns store.

B. A. Archibald & Co. have now moved into their new premises on Broadway.

W. H. Rowley, president and general manager of the E. B. Eddy Co., Hull, was in town this week. He was accompanied by J. Persse, of Tees & Persse, Winnipeg, the Western agents of the company.

W. H. Youhill was the winner of the Hopkins trophy at the curling rink. The cup was put up by W. Hopkins, of the West End Hardware Store, and was keenly competed for. D. M. Leyden is taking more than usual interest in the bonspiel this year.

F. M. Sclanders has been re-engaged for another year as Commissioner of the

F. M. SCLANDERS,

Re-appointed Commissioner by Saskatoon Board of Trade.

Board of Trade at a salary of $2,500. Mr. Sclanders has done some splendid work and is at present trying to form associated Boards of Trade for Central Saskatchewan. The convention of the Associated Boards of Trade of Manitoba, Saskatchewan and Alberta will be held here in June, this year.

The Saskatoon branch of the Independent Lumber Co., as well as other branches in Saskatchewan, have been taken over by the Coast Lumber Co., with headquarters at Moose Jaw, B. A. Brainerd will remain here as manager.

A new electric engine and generator have been installed at the city power house, which has tended to greatly improve the lighting system. It is expected that this summer there will be quite a demand for electric power for running elevators and machinery.

The contract for the erection of a new land titles office on 21st Street has been let to Smith Bros. & Wilson, of Moose Jaw. The contract price was $26,700. Work will commence early this year.

It is probable that a new immigration hall will be built here this year. When J. Bruce Walker, Commissioner of Immigration, was in town a few days ago, the dilapidated state of the present building was pointed out to him by Mayor Hopkins and Commissioner Sclanders, of the Board of Trade. The result was that Mr. Walker promised to recommend a new hall.—D. G. R.

British Columbia.

Brisk Building Continues at Vancouver —Vernon Man Invents Fruit Spray— Interesting Items From the Coast.

VANCOUVER.

February 6.—With the coming of spring there is a movement among the mining men, and soon operations on many properties on the coast and in the interior will have been resumed. With this activity comes business for the trades. F. T. Hamshaw, a large operator in Atlin, was in the city on his way north this week, and is taking with him a considerable quantity of machinery. D. A. Matheson, general manager of the Yukon Basin Gold Dredging Company, and the Stewart River Gold Dredging Company, was also here, and closed a deal for the construction of a large dredge, which will be shipped north. On Thursday night, the first lot of men for the Portland Canal district left for the north. So with work going on in all these places, quite a bit of trade will come this way.

"You're mighty busy here," was the remark of a Calgary man yesterday, referring to the building operations. "You are certainly doing something," he said to Hardware and Metal. In January, the figure was $363,630, and last week the total of the permits was $108,485. W. A. Clark is building a two-storey apartment house, with stores in the basement on the northwest corner of Seventh Avenue and Bridge Street, the cost of which will be $20,000. Arthur J. Bird is the architect.

M. C. Burr and H. B. Ferguson have opened up as civil, hydraulic and mining engineers. Mr. Burr has been with the Arrowhead Reservoir & Power Company, of California, and the Union Construction Company, of New York, and after the earthquake in San Francisco was engineer for the water committee. Mr. Ferguson has also had considerable experience, having latterly been with the Guggenheims in Cariboo.—R. B. B.

NANAIMO.

February 6.—J. E. McFerran, of the Parker Electric Company, has installed a 30-light dynamo for W. H. May, recently of Strathclair, Man., who has remodelled the residence on his farm at Cowichan. A Fairbanks-Morse gasoline engine was put in to supply the dynamo, and the combination has given one of the most satisfactory private lighting plants in the district.

REVELSTOKE.

February 6.—R. Armstrong and J. Armstrong, two well-known mechanics of this city, will leave shortly for Vancouver to open a machine and repair shop.

Tenders are being called by the Provincial Government for the completion of a traffic bridge over the Columbia River at this point. Separate tenders are being called for the iron work.

KAMLOOPS.

February 6.—W. J. Ellis, late of Rogers & Ellis, Vernon, B.C., has arranged to start a machine shop in this city. His outfit will cost about $2,000. He will carry a stock of engineer's supplies, and will handle bicycles and bicycle repairing. Mr. Ellis has had 23 years' experience in some of the largest shops in the United States and Canada.

VERNON.

February 6.—Clement Vacher, of Bear Creek, in the Okanagan district, has invented a new rotary spray for use by fruit growers, which is receiving considerable favorable comment. He has been experimenting since last May.

THE FIRST SHEET ZINC.

Zinc was first rolled into sheets and drawn into wire by Charles Sylvester and Charles Hobson, two Englishmen, in about the year 1800. For their discovery they were allowed a patent and in it they state that their process is as follows: "Zinc is made malleable, and may be drawn into wire and rolled into sheet by working it at a proper heat and by annealing it. The zinc is cast into ingots or cylinders and heated to a temperature of from 210 to 300 degrees F. for rolling or drawing." The feature of the invention was in the discovery that the zinc can be rolled or drawn when heated to the right temperature.

WIRE DOOR MATS.

The B. Greening Wire Co., Hamilton and Montreal, have now on the market three reversible wire door mats, viz.: The Standard Iron Framed, the Interlocked Wire Bordered, which is flexible, and the Regalvanized Interlocked Wire Bordered, which is rigid, strong and indestructible. The sale of these mats has been very satisfactory to the company.

The Interlocked Wire Bordered Mat was put out to meet the demand for a cheaper mat. It is flexible, and the larger sizes can be rolled up for shipment. This mat can be regalvanized, making it rigid thereby.

Cutting Power of British Steel

Quadruple That of Any Now Known—Prof. Arnold Replies to Carnegie's Prophecy.

(From the New York Herald.)

London, Saturday.—"As to Mr. Andrew Carnegie's prophecy on the decadence of British steel metallurgy, this exists only in the imagination of that gentleman. So far as quality is concerned, Great Britain is still first in the race for supremacy. I am strongly of the opinion that in a very short time the best high speed steel will be a back number. It is probable that a year hence there will be on the market British steel with a quadruple cutting power of any known metallurgy."

In these bold words, uttered at the Royal Institution just ten days ago, Professor Arnold, of Sheffield University, challenged the expert prophet and himself uttered a prophecy so remarkable that it has aroused the keenest interest in the engineering world. The professor wasn't bragging, either. He knew what he was talking about.

Seldom indeed has a forecast been so quickly fulfilled. The Sheffield correspondent of the Daily Chronicle comes out with the interesting news that a new steel discovery of the utmost moment has been made by the big firm of Jonas & Clover, of the Continental Works, Sheffield, of which Sir Joseph Jonas is at the head.

After lengthened experiments they are reported to have placed on the market steel with from three to seven times the cutting power of the existing high speed steel and which, in contradistinction to the present material, can be hardened in water, oil or blast. This, of course, is the steel to which Professor Arnold referred. The professor now expresses himself as intensely interested from a scientific point of view at the phenomena exhibited by this steel.

It is, he says, an absolute departure in metallurgy to have obtained water-quenched steel which will work for a considerable time on the hardest material with the cutting edge of the tool at a bright red glow. He further prophesies that a few years hence, when the secret of the manufacture is out, this steel will be made by very high speed steel manufacturers in the country.

The new steel will not call for any alteration in the present machinery, but it puts immense power in the hands of the British engineer. This steel will at least quadruple the efficiency of the existing steel of a similar type.

Experiments were in progress in the United States at the same time that Messrs. Jonas and Colver were ready to place their product on the market, says the Sheffield Independent in giving some details of the discovery, but as litigation was threatened the details were withheld. Now that it has been decided that the American manufacturers have no special claim, Messrs. Jonas and Colver have placed upon the market the result of their own researches. Mr. B. W. Winder, director and works manager of the firm, in an interview explained to the Daily Chronicle's correspondent some interesting points. He assumed a very modest demeanor about the discovery. He didn't, he said, make any sensational claims for the steel beyond the fact that it is the first high speed steel produced that can be hardened in cold water without danger. He added:

"The great advantage of the new steel is that it will work very much longer at high heat than the old. We don't claim for a moment that it is going to work four times faster than present high speed steel. What we do claim is that it is very superior to any steel that has been produced yet. It will go on working much longer without requiring regrinding."

The new steel isn't much dearer than the old high speed steel, so that in proportion to its capacity it works out much cheaper.

In common with all engineering firms, the Thorneycrofts, the well known torpedo boat builders, at Chiswick, are very much interested in the new discovery.

"Assuming that this new high speed steel is all that it is claimed to be, it will be valuable to the makers of big guns and of heavy shafting for marine engines," said Mr. Leeson, the works manager.

"As far as we are concerned," he continued, "the steel in use at present is if anything rather ahead of the capacity of our machine. To use the new variety with much greater cutting power we should require heavier and more powerful machinery; but my own experience shows that British steel will hold its own against the world."

Mr. Houseley, London manager of Cammell, Laird & Co., said: "I have not heard anything about this particular invention, but we have all been working at the idea for the last six or seven years. Our own new machine tools were shown at the Franco-British Exhibition and we can take off a strip of steel an inch in thickness as quickly as the tool car can move."

Then the interviewer inquired, "You don't agree with Mr. Carnegie's opinions on the British steel industry?"

"I can safely say," was the reply, "that we are well ahead of the Americans in every department of the steel trade."

For the year ended January 26, the National Transcontinental Railway Commission ordered 15,752 gross tons of steel rails for the G.T.P. from the Algoma Steel Co., Sault Ste. Marie.

Our Want Ads Are Read

By Retail Merchants in every province of the Dominion. Every week our want ads. are rendering important services to Hardware dealers who are anxious to buy or sell a business, or who want to secure a clerk or possibly have a set of tinner's tools or some other article they wish to dispose of.

By Manufacturers and Wholesalers a few weeks ago six large firms answered a condensed advertisement inserted by a firm who were anxious to secure Canadian representative.

By Hardware Clerks. A number of clerks have secured good positions through placing an advertisement in our paper. Clerks who wish to use our "want ad." columns but who do not wish their names divulged can use box number and have replies forwarded in plain envelope.

By Travelers. Many of whom are anxious to secure new position or possibly wish to settle down in some town or city and purchase Hardware business.

Have you any proposition in which any one in any of these classes would be interested?

RATES—2c. per word first insertion; 1c. per word subsequent insertion; 5c. additional each insertion when box number is required.

WRITE OR PHONE OUR NEAREST OFFICE

HARDWARE AND METAL

Montreal Toronto Winnipeg

CONDENSED OR "WANT" ADVERTISEMENTS.

RATES.

Two cents per word first insertion; one cent per word subsequent insertions.

Five cents additional each insertion where box number is desired.

Contractions count as one word, but five figures (as $1,000) are allowed as one word.

Cash remittances to cover cost must accompany all advertisements. In no case can this rule be overlooked. Advertisements received without remittance cannot be acknowledged.

RULES FOR COPY.

In addressing replies care of HARDWARE AND METAL don't fail to give box number.

Replies addressed to HARDWARE AND METAL boxes are re-mailed to advertisers every Monday, Wednesday and Friday.

Requests for classification will be followed where they do not conflict with established classified rules.

Orders should always clearly specify the number of times the advertisement is to run.

All "Want" advertisements are payable in advance.

AGENCIES WANTED

Manufacturers of hardware lines both at home and abroad watch our paper each week. If you want to secure the exclusive agency for any line for the whole Dominion, for a Province or for your own city or town you will find a Want Ad. will put you in touch with the right firm.

ADVERTISER, 31 years of age, 4 years with present employer, selling specialties to jobbers and retail hardware merchants, etc., in Ontario, Maritime Provinces and Newfoundland, intends establishing a manufacturers' agency at Toronto and invites correspondence from manufacturers, etc. Box 790, HARDWARE AND METAL, Toronto. [7]

BUTTER TUBS—Manufacturers' agent in Winnipeg, excellent connection with jobbing trade, desires to represent manufacturer of wooden butter tubs. Box 1, HARDWARE AND METAL, Winnipeg. (6)

AGENTS WANTED.

This is the problem of many manufacturers who are anxious to get a foothold in Western Canada. It will be easily solved if HARDWARE AND METAL is given the opportunity to solve it.

WANTED—Good live agent in Montreal, Toronto and Winnipeg to handle A1 line of hammocks which have been marketed successfully in Canada for some years. The line will be strongly advertised in Hardware and Metal. Apply, giving full information as to lines you now have, Box 796, HARDWARE AND METAL, Toronto. (10)

BUSINESS CHANCES.

A COMPANY opening a hardware store in the best paying section in Toronto, require the services of a competent hardware man who can invest one or two thousand dollars. An excellent proposition. Box 794, HARDWARE AND METAL, Toronto. (7)

SITUATIONS WANTED.

Travellers, clerks, or tinsmiths, wishing to secure new positions, can engage the attention of the largest number of employers in their respective lines, by giving full particulars as to qualifications, etc., under "Situations Vacant."

FIRST-CLASS Builders' and General Hardware Man open for engagement. Twelve years' experience. Box 783 HARDWARE AND METAL, Toronto. (8)

HARDWARE SALESMAN desires position, wholesale and retail, experienced. Would buy a first-class business. Box 788, HARDWARE AND METAL, Toronto. (8)

WANTED—Position as travelling salesman. Six years former experience as representative of paint company. Hardware or paints preferred. Past four years managing hardware business. Best references. Box 795, HARDWARE AND METAL, Toronto. (9)

WANTED—Position as salesman for retail hardware. Eight years experience with good preference. J. E. Thomas, 662 King St., London. (10)

BUSINESSES FOR SALE.

Somewhere in Canada is a man who is looking for just such a proposition as you have to offer. Our "For Sale" department brings together buyer and seller, and enables them to do business although they may be thousands of miles apart.

HARDWARE BUSINESS FOR SALE in one of the finest farming sections of Ontario. Two railways. Stock about $4,500. Good reasons for selling. Address Box 782, HARDWARE AND METAL, Toronto. (11)

HARDWARE, tinware and furniture for sale.—Stock between five and six thousand. Doing a good business. Good reason for selling. Apply Box 781, HARDWARE AND METAL, Toronto. (7)

HARDWARE, Stoves and Tinware Business for sale in a good manufacturing town, farming and dairying country, good business trade connections in store and workshop; stock about $8,000. Good reasons for selling. Address Box 784, HARDWARE AND METAL, Toronto. (8)

HARDWARE BUSINESS FOR SALE—In growing part of Toronto. Stock and fixtures about $2,000. Box789, HARDWARE AND METAL, Toronto (8)

WELL ESTABLISHED GENERAL HARDWARE BUSINESS in prosperous Manitoba town surrounded by excellent farming district. Stock about $8,000. A splendid opportunity. Apply Box 785, HARDWARE AND METAL, Toronto. (10)

HARDWARE, stoves and tinware in city of London. Stock new, $6,000. Splendid opportunity. Good reasons for selling. Apply 111, Dundas Street, London, Ont. (8)

MISCELLANEOUS

ADDING TYPEWRITERS write, add or subtract in one operation. Elliott Fisher, Limited, 129 Bay Street, Toronto.

A MARKET OF BUYERS, backed up by money to spend, is open to you in the Busy Man's Magazine. Every territory in Canada is represented. If you have something to sell, something you want to buy, a condensed advertisement in the Busy Man's Magazine will put you in touch with the classes you want to reach. Four cents per word will carry your message from Atlantic to Pacific. Send copy of your advertisement along with order to cover cost of insertion. Your announcement will appear under a special heading, BUSY MAN'S MAGAZINE, Montreal, Toronto, Winnipeg.

BETTER, CHEAPER, SAFER LIGHTING.—The Pitner System of gasoline lighting is the best system yet produced for lighting a store, hotel or public building. In cities and towns Pitner systems are used because of the superior quality and quantity of light obtained for small cost. They are just as successful in any village or country place. A small outlay secures a complete and independent Pitner lighting plant. Free illustrated booklet and full particulars on request. The Pitner Lighting Co., Limited, Toronto, Canada.

HIGH CLASS COLOR WORK; Commercial Stationery, Posters. The Hough Lithographing Co. Limited, Office—No. 3 Jarvis St., Toronto, Telephone, Main 1576. Art, Good Workmanship; Business Methods.

IF INTERESTED in a Duplicating Machine for getting out circular letters, reports, price-lists, etc., or for printing various office forms, write for booklet and samples of work. The "POLYGRAPH" is the newest, latest, and best, and sells for a lower price than the others. Is unexcelled by any similar device on the market. F. W. Tenney, Canadian Sales Agent, 123 Bay Street, Room 116 Stair Building, Toronto, Can. (tf)

THE RELIABLE LIGHT will light your store 100% better than gas, electricity or acetylene. 600 candle power light costs 1 cent per hour to operate. Thousands in use. A safe, reliable, pure white light of intense brilliancy. Write for booklet M. The Rice, Knight Mfg. Co., Limited, 40 Lombard Street, Toronto.

NATIONAL AID—An aid to every retail merchant in the world. Saves money, time, work and worry. The National Cash Register Co., F. E. Mutton, Canadian Manager, cor. Yonge St. and Wilton Ave., Toronto.

ARTICLES FOR SALE.

Don't keep any fixtures or tools around your store for which you have no further use. They are worth more to-day than they will a year hence. Don't keep money tied up which you could use to secure discounts from your wholesaler.

FOR SALE—Set Tinners' Tools—complete in good condition, break safe, etc; all good. Werner Bros., Mitchell. (8)

BUSINESSES WANTED.

TO PURCHASE Established Hardware Business in live town or city in Ontario, east of Toronto; or in Quebec, west or south of Montreal. Box 787, HARDWARE AND METAL, Toronto. (8)

WANTED—A hardware, stove and tin business. Stock from $4,000 to $6,000, in a good town or city. J. D. Murdoch, Simcoe, Ont. (8)

SITUATIONS VACANT.

You can secure a "five-thousand-a-year" manager, or a "five-hundred-a-year" clerk, by stating your wants under "Situations Vacant."

TRAVELER of experience in the Stove and Furnace Business for the Provinces of Quebec and New Brunswick. Must speak English and French. Address Box 786. HARDWARE AND METAL, Toronto, stating experience, salary, etc. (tf)

WANTED—Two good hardware stock and order clerks, with several years' experience, for Winnipeg. Good opening. Apply in own handwriting and state experience, Box 3, HARDWARE AND METAL, Winnipeg, Man. [7]

WANTED—Buyer and manager for cutlery and sporting goods department of wholesale hardware house. Apply, giving full particulars, H. 9, HARDWARE AND METAL, Montreal.

TINSMITH WANTED with two or three years experience. Good job for reliable workman. The Steel Trough and Machine Co., Ltd., Tweed, Ont. (7)

WANTED—Competent clerk for retail hardware business. Good salesman and window dresser. Apply, stating qualifications with references, to Box 799, HARDWARE AND METAL, Toronto. (9)

WESTERN jobbing house, handling hot water, steam heating and plumbing supplies, want an experienced travelling salesman of good address, able to make estimates and assist the trade in closing business. Applicants must state their experience as a salesman, age, references, etc. Address Box 797, HARDWARE AND METAL, Toronto. (7)

TRAVELLER for general hardware. Ground, Guelph and east, and north to and including part of New Ontario. Applications state salary, experience, and copy of references. All communications treated confidential. Box 798, HARDWARE AND METAL, Toronto. (7)

TECHNICAL BOOKS

HARDWARE WINDOW DRESSING—This book, just off the press, contains 256 pages (8x11 inches) and over 200 illustrations with full working descriptions. Every display is the work of an expert. It illustrates and explains how hardware windows may be dressed to sell goods. Price $2.50 post paid., The MacLean Publishing Co., Technical Book Dept. 10 Front St. East, Toronto.

Hardware Business For Sale

The old established hardware business of Reid & Wilson, at the town of Seaforth, being now in liquidation (the firm having been dissolved) the whole of the stock is offered for sale, together with coal warehouse and sheds.

The stock consists of:—

Blacksmith's Iron, shoes, nails etc.
Wagon and buggy wooden ware
General hardware stock
Wire fencing
Blacksmith's coal and domestic coal

The stock may be purchased in sections, or the business may be bought out as a going concern. The stock may be viewed at any time, and further particulars obtained from the undersigned:

ROBERT WILSON
WILLIAM HILLS
Liquidators for the firm of Reid & Wilson.

Salesmen Wanted!

Be a high grade Traveling Salesman and earn from $1,000 to $10,000 a year and expenses. We will prepare you by mail in eight weeks to be one and assist you to secure a good position. Hundreds of our graduates now holding good positions we secured for them, with reliable firms. Many who had no former experience now earn $100 to $500 monthly and expenses. If you want to secure a good position and increase your earnings our Free Book, "A Knight of the Grip" will show you how. Send for it today. Address nearest office. Dept. 283 NATIONAL SALESMEN'S TRAINING ASSOCIATION, Chicago, New York, Kansas City, Minneapolis, San Francisco.

WESTERN CANADA HARDWARE MARKETS

Corrected by telegraph up to 12 noon Friday, Room 511, Union Bank Bldg, Winnipeg.

Winnipeg, Feb. 10.—Winnipeg has been a sort of storm centre this week, and there has assuredly been no lack of subjects for discussion. The report of the Tax Commission, which has been sitting for a long period, was presented on Monday and was sufficiently radical in character to call for the many protests. The first recommendation of the report was the appointment of a Board of Valuation and Revision, the commission being of the opinion that such a board would ensure a sound basis for assessment values and a more satisfactory method for the consideration of questions arising from time to time in respect to assessment and taxation. This board, if established, would perform the duties now undertaken by the Court of Revision. In the case of appeals covering matters of law, recourse would be had to a judge of the Court of Queen's Bench.

Church Lands to Be Taxed.

In the matter of the much discussed business tax, the commission recommended that there be no exemptions and no discrimination as between the different classes of business, but that the basis of the assessment should be the rental value. The commission further suggested that the rate be 6 per cent. of the rental value. On the question of land and buildings, the recommendation was that land be assessed at its full value, and buildings at two-thirds of their value.

In the matter of churches it was recommended that the land be taxed and the buildings exempt. An increase in the controllable rate from 1 to 1¼c on the dollar was recommended. These are just a few of the recommendations in a report which had evidently been prepared with extreme care.

The Railway Commission.

The Railway Commission has been hard at work all week. There were no less than 51 cases on the list here for consideration. One of the cases of general interest was that of the Western Livestock Shippers' Association. They asked that both the C.P.R. and the C.N.R. be required to provide improved shipping facilities at many points; that there be a reduction of the freight rates on livestock, and a reduction of the minimum weight of cars from 20 to 16,000 pounds. Much evidence was heard on these matters. The question of weight of cars was left over, but Chairman Mabee condemned the railway companies as dilatory, and suggested that Mr. Dillinger, an official of the livestock association, and a railway company's inspector, visit all the points where livestock is shipped in the three Provinces and inquire into conditions on the spot; further, that railway companies supply this committee with complete lists of cattle shipments during the year.

Excessive Express Charges.

The complaint as to conditions at Winnipeg was fully met by the representations of the railways as to the erection and maintainence of the new Union Stockyards as soon as spring opens. There was a grand wrangle between the Canadian Northern and Dominion Express Companies on the question of division of express rates on joint hauls, and a great many complaints came from newspapers, jobbers' unions and others, of excessive express charges, failure to deliver at flag stations, and many other minor grievances. Much evidence was taken but final action was reserved for further consideration.

Decision was also reserved on the complaint of the Grain Growers' Association against the railways in the matter of bulkhead cars to Fort William and Port Arthur.

Judge Mabee has created a most favorable impression as chairman of the commission. He is doing one excellent thing in the matter of holding western people to time. Ample notice was given of the sitting and when a number of complainants failed to turn up at the appointed time they were simply struck off the list.

The Winnipeg Stock Exchange was duly opened Feb. 1st, and though there has been no large amount of trading there has been a decided increase in the number of western stocks listed. Those behind the scheme declare themselves as quite satisfied with the week's business and the outlook for the future.

Wheat Market Active.

After extreme dullness ever since the turn of the year the wheat market became decidedly active during the last three days of the week, and on Saturday, Feb. 6th had a record "short day" market over 2,000,000 bushels of May wheat being traded between 9.30 and 12 o'clock. The first day of the increased activity there was not lacking evidence that Paten of Chicago was buying on the Winnipeg market, but later the speculative gave place to really active export demand. The cause for the increase in export demand was twofold. The last report issued by the Northwest Grain Dealers' Association was very bullish, placing the total wheat crop of the Canadian West at 97,000,000, nearly 10,000,000 less than the report of the previous month. This report had been cabled to Great Britain and had additional weight in view of the light receipts for the past six weeks, and further, there was an increase in the rumors as to damage to the winter wheat crop of the United States.

There was quite as active a demand for cash wheat as there was for May, but practically no offerings, as all receipts are sold ahead. It is not generally accepted by dealers here that the report of 97,000,000 is correct, the discrepancy between the two reports is too extreme, but it is quite apparent that the farmers wno have wheat intend to hold on to it for higher prices. By the end of another week your correspondent will have more definite information on this matter in return to queries sent out.—H.

Hardware Markets.

The hardware trade is quiet at present, but not unusually so for this season of the year. Country collections are improving. Prospects are bright for the spring trade, especially in the line of builders' supplies.

"Bonspiel," which opened Wednesday, has brought many retailers into the city and this will probably mean an increased business during the next two weeks.

Prices show no important changes.

Price Quotations.

WIRE—Barbed wire, 100 lbs., $3.15; plain twist, $3.40; staples, $2.90; annealed wire, $2.90 base; oiled, 10c extra; bright iron, $3.10 base; brass spring wire, 29c base; plain galvanized, wire, 6, 7, and 8, $3.50; No. 9, $3.10; No. 10, $3.60; No. 11, $3.70; No. 12, $3.30; No. 13, $3.40; No. 14, $4.25; No. 15, $4.75; No. 16, $5.

TO ENTER WHOLESALE FIELD?

The Russill Hardware Co., of King Street East, Toronto, have purchased the building formerly occupied by the John Taylor Soap Co., at 77 Front Street East, paying for the same about $25,000. The building consists of three storeys, has a frontage of 33 feet and a depth of 165 feet.

In conversation with Hardware and Metal, Mr. Russill said the daily papers were somewhat premature in stating that the premises would be used as a wholesale hardware warehouse. No decision on that point had yet been reached, although it might be that a wholesale depot would be located in the Front Street premises and the retail business continued in the King Street store.

Hardware Letter Box

Any questions on trade subjects will be answered by the editor in this department. Do you want any address, any special line of goods, anything relating to the hardware trade? Ask us. Letters from manufacturers, jobbers, travelers, retailers or clerks are solicited. Suggestions for trade improvement or discussions on trade evils are invited.

Novelty Manufacturers.—Werner Bros., Mitchell, ask for the names of houses that could make at small cost novelties about as large as an oven thermometer.

The Ontario Novelty Co., Dominion Novelty Mfg. Co., Novelty Stamping Works, J. Thompson & Son, and the Worth-Martin Co., all of Toronto, are makers of all kinds of novelties and may be able to supply the article required.—Editor.

Floor Tiling.—J. R. Myers, Stratford, asks the names of manufacturers of tiling suitable for flooring, wainscoting, etc.

The Toronto Fire Brick Co., Toronto ; The Milton Pressed Brick Co., Milton ; Robt. Reid, Montreal ; R. Campbell Sons, Hamilton, are makers.—Editor.

MANUFACTURE OF WOOD ALCOHOL.

Wood alcohol is obtained by the dry distillation of wood. Hardwood cut into cordwood size is allowed to season thoroughly, in two years being dry enough to yield good results. The seasoned wood is placed in cast-iron retorts. A slow fire is built beneath and its intensity being gradually increased as the distillation progresses, and regulated so that at the end of from 12 to 18 hours nothing remains in the retort but charcoal. The distallate is passed through a condenser, by which a portion is condensed into a watery fluid, while another portion passes through in the form of a permanent non-condensable gas. The non-condensable part consists mainly of marsh gas, hydrogen, carbon-dioxide, etc. The portion that condenses consists largely of acetic acid and methyl alcohol, together with acetate of methyl and acetone and a quantity of tarry matter. The condensed distillate is passed into settling tanks, where it remains until the greater part of the tarry matter has subsided. The lighter part is then drawn off and saturated with slaked lime to fix the acetic acid. A second distillation expels the methyl alcohol, which is recovered by means of a condenser and shipped to the refineries in iron tanks being known to the trade as "wood spirit."

Good Window Trims.

Messrs. Barry & Butler,
Allentown, P. Q.

Gentlemen:-

I am sending you under separate cover one of our new Window Trims. I would be glad to have you write me your opinion of it. If you should desire extra sets of this trim, we shall be very glad to send them to you.

By the way, have you made use of any of the window displays illustrated in our Handbook on Advertising, sent you some time ago? Some of the ideas shown in this book are mighty good ones, which I know have proven very effective for our agents who have used them.

I would be very much interested in seeing photographs of any particularly good window you prepare, should you have photos taken, and if exceptionally good we may be able to publish it in our monthly magazine, The S.W.P., and furnish you with a few extra copies for distribution to your particular friends and best customers.

Yours very truly,

C. C. BALLANTYNE.

BUILDING AND INDUSTRIAL NEWS

For additional items see the correspondence pages. Information is solicited regarding building and industrial news, the incorporation of companies, establishment or enlargement of mills, factories or foundries, municipal waterworks and sewerage systems, railway or mining news, etc.

Municipal Undertakings.

Brantford will extend its sewerage system.

Plans for the proposed filtration plant at Toronto are now ready.

Etobicoke Township, Ontario, asks power to start a sewage disposal plant at New Toronto.

Prescott, Ont., ratepayers, will vote on February 15 on a by-law to raise $17,500 for extensions to the sewage system.

Construction work on the central section of Revelstoke's, B.C., sewerage system will be done by T. F. Sinclair. Work will commence on April 1.

The G.T.P. are installing a new water system in Prince Rupert, the old plant having been found inadequate. A reservoir of 50,000 gallons capacity will be erected.

Mr. Fellowes, Toronto's waterworks engineer, states that in order to provide proper water supply for East Toronto it will be necessary to extend the city's high level system.

Vancouver's waterworks construction work for 1909 includes the building of the Little Mountain reservoir and its connection with the city system by the construction of five miles of mains.

City Engineer Rust, of Toronto, has recommended that J. D. Watson, Birmingham, England, and Rudolph Hering, New York, be engaged to make a report on the whole problem of sewage disposal for Toronto.

Railway Development.

A G.T.P. branch line from Yorkton to Regina is proposed.

The Kootenay Central will build 200 miles of road the coming summer.

The Saskatchewan Central Railway is seeking a charter to build five branch lines in Saskatchewan, over 1,000 miles in length.

The Atlantic, Quebec and Western Ry. is proceeding with the construction of the line from Port Daniel to Gaspe, Que., 82 miles.

The Tillsonburg and Southern Counties Radial Electric Railway propose to build a line running from Tillsonburg to London, Woodstock and Ingersoll.

The extension of the Central Ontario Railway from Lake St. Peter to Whitney, a distance of about 20 miles, is under construction, and work will be proceeded with during the coming season.

The Morrisburg Electric Railway has plans under consideration for beginning construction on its projected line this spring. The road will be 70 miles in length and will extend from Morrisburg to Ottawa.

The Heaps Telephone Company, New Westminster, are planning to construct a railway, to be operated by either steam or electricity, for the logging of their timber limits, located along the west side of Stave River.

It is announced that both the Great Northern Railway and Northern Pacific Railway will operate in Manitoba under the charter of the Midland of Manitoba. The company has applied for permission to build a line from Portage la Prairie to Elkhorn, Man., on the Saskatchewan boundary.

Application will be made to the Dominion Parliament to incorporate the Arnprior & Pontiac Railway, to construct a line of railway from the Pontiac Pacific Junction Railway to Fitzroy Harbor, Ont., and High Falls, on the Kingston & Pembroke Railway, also from Fitzroy Harbor to Britannia, on the C.P.R., and to South March, on the G.T.R.

Location surveys have been made for an extension of the Quebec, Montreal & Southern Railway from Ste. Philomene, Que., to Quebec bridge, 41 miles, but that contracts will not be let until the completion of the Quebec bridge is an assured fact. Surveys also have been made for extensions to Levis, an additional seven miles; and for a branch from Becancourt to St. Lawrence River, four miles.

D. D. Mann, vice-president of the C. N.R., stated that at an early date a line would be constructed from Edmonton northwest to Fort Assiniboine, on the Athabasca River, and eventually to Lesser Slave Lake and the Peace River Crossing. It is also understood that the C.N.R. will build a line from a point near the eastern boundary to Edmonton, north of the Saskatchewan River. Another line will probably run from Strathcona to Calgary. Other important extensions are contemplated.

The Farmers Ry. is seeking power to construct a line or lines of railway from Regina to Humboldt, and thence to Melfort; from Melfort northerly along the Carrot River to the eastern side of the Province; from near the Carrot River west to Prince Albert; from near Humboldt to Saskatoon, and from Saskatoon northwesterly to the west side of the Province; from or near the south end of Last Mountain Lake to Moose Jaw, and from Moose Jaw south to the international boundary, and to extend the line from Regina southeasterly to the international boundary.

Public Buildings.

A new C.P.R. station is proposed for Yorkton, Sask.

A $6,000 public school will be built at Wilkie, Sask.

A new public school will be erected at Centreville, N.B.

The erection of a new Roman Catholic church in South London is contemplated.

A new Roman Catholic Church will be erected at Palmerston, Ont., in the spring.

The congregation of Murray Street Baptist Church, Peterborough, are considering the erection of a new building.

The Wentworth County council have been notified that a House of Refuge must be erected before January 1st next.

Dr. Sheard, the Medical Health Officer for Toronto, is asking for $60,000 for the enlargement of the Isolation Hospital.

The Corporation Ecole Hautes Etudes have taken out a permit for the erection of a school at Montreal, at a cost of $240,000.

It is rumored that the G.T.R. are purchasing property in Hamilton with the view to the erection of an up-town station.

The Toronto Exhibition directors have received plans for the construction of a new poultry building estimated to cost $26,000.

At a recent meeting of the Fernie, B.C., city council it was decided to take tenders at once for the erection of the new municipal buildings.

Plans for the erection of a two-storey brick school building to be erected at Paddon's, near St. Thomas, at a cost of $4,600, have been accepted.

It has been decided to erect a new school building in Chelsea Green, London South, early this spring. The building will cost in the neighborhood of $3,000.

Competitive plans are invited for a new Collegiate Institute to be erected in Port Arthur. The building will cost $60,000, allowing $15,000 for heating, plumbing, ventilation and equipment.

Dr. A. R. Perry, of Conn, has purchased the residence formerly owned by A. M. Martin, Mt. Forest, Ont., and will at once convert it into a private hospital, making considerable alterations.

It is reported that the Sparrow Company will rebuild the Academy of Music at Montreal on another site if their present building is razed for the proposed extension to the S. Carsley Co.'s building.

The contract for the erection of a Catholic seminary at St. Hyacinthe, Que., has been awarded to Andre Bonin. The building will be of fireproof terra cotta construction, and will cost $200,000.

General Building Notes.

J. Stevens & Son will erect a $10,000 warehouse at Toronto.

The Standard Chemical Works will erect a large office building at Toronto.

The I.O.O.F. contemplate the erection of a large solid brick building at Guelph.

The London Loan Co. have let a contract for the erection of a three-storey office building at London.

Among the buildings contemplated for erection at Halifax this season are a large hotel building, a new factory for the Anderson Furniture Co., a large boat house on the Arm, near the end of Jubilee Road, and a new hotel building at Bedford.

The building operations in Toronto for January were not as active as during the same month last year. The approximate value of permits granted was $380,025, as compared with $474,453 last year. The number of permits, however, shows an increase, there being 151, as compared with 109 last year. There were 220 new buildings involved in the permits, as compared with 128 last year.

The building operations at Montreal during January exceeded those for the corresponding month of 1908 by $41,470. There were 33 permits for new buildings, the estimated value of which was $99,745; and 17 for alterations and repairs, for an estimated value of $20,375, a total of $120,120. Last year the permits for new buildings in January numbered 27, for an estimated value of $55,650, and for alterations 9, of an estimated value of $23,000, or $78,650 in all.

Dealers Everywhere
find the Iver Johnson Truss Bridge frame a tremendous selling argument.
It means long life to the bicycle. A rigid frame preserves perfect alignments of all running parts. Saves wear and tear. Makes an easy running machine.

We Want Agents

to sell the

Manitoba Steel Plate Furnace

We want a good hardware man in every town to handle our furnace. It will burn Souris and other soft coals mined in the West, and it will burn them economically. It is the furnace Western people have been looking for. If you are from Missouri, so much the better. Ask us and we will show you.

The consumer saves 25 to 40 per cent. on fuel when he uses the Manitoba.

The Brandon Machine Works Co., Limited

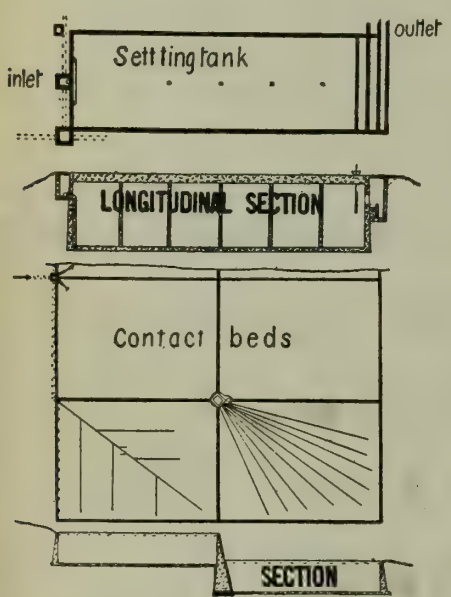
Brandon, Manitoba

Sewage Disposal System for a Small Town

Prof. H. N. Ogden in Domestic Engineering.

Balston Spa is a town of about 6,000 people situated on the Kayaderosseras creek about four miles from Saratoga lake. The domestic sewage for purposes of the design was estimated at 500,000 gallons, in addition to which 400,000 gallons of tannery wastes entered the sewers, possible filtration bringing the total estimated daily flow of sewage up to 1,000,000 gallons per day. The plant is of particular interest from the fact that nearly one-half of the daily flow of factory waste is of a kind usually considered difficult to handle.

The sewage is delivered from the village to a receiving tank on the outskirts, the capacity of the tank being one-quarter of the day's flow. It is 70 feet in diameter, 9 feet deep and divided into two equal compartments by a concrete wall extending from floor to



System at Balston Spa, N.Y.

roof. In this way either one or both compartments may be used at will. The suction pump is built on the side of a circular well and is 12 by 24 feet and 8 feet deep. A single-action plunger pump forces the sewage from this well to the settling tanks, which are 2,700 feet away and on the top of a hill about ten feet higher. The settling tanks are three in number, so arranged that they may be operated singly, in sets of two, or all at the same time. Each tank is 111 feet long, 35 feet wide and averages 7½ feet deep, containing 218,000 gallons.

Tanks Can Be Operated Singly.

The pump well, holding sewage about three hours, delivers the sewage to these tanks already partially septicized, and with only one of the tanks in action an eight-hour period is obtained, and with the three tanks in operation a detention period of not far from twenty-four hours can be counted on. The force main enters a concrete manhole at the tanks and from there is led by a twelve-inch pipe into the tanks, two openings being provided for each tank. No baffle walks are provided at the inlet end, but a movable baffle wall operated by screws is provided about four feet from the outlet end. Each tank is provided with a twelve-inch sludge valve and sludge pipe connection, opening out onto sludge tanks behind the tank. The outlet weir is of stone, eighteen inches wide and two inches thick, built into the end concrete wall with a slope of one inch outward. Just behind this outlet weir and following the outlet channel, which is two feet wide and two deep, is a deposit of coke breeze filter. This coke bed is intended to arrest the progress of particles in suspension which pass out from the settling tanks, and to that extent protect the contact beds from clogging. It is also stated that this coke bed will act as an aerator and start the exudation of the effluent.

From the settling tanks the sewage passes to the contact beds, of which there are four primary and four secondary. The effluent from the tanks flows directly to the gate chamber of the contact beds through a twelve-inch vitrified pipe sewer. The gate chamber is four feet square and has four bronze mounted valve gates which control the flow of sewage to the four primary contact beds. These beds are each 120 feet wide and 6 feet deep. The contact material is broken field stone of a hard and crystalline character like granite and very uniform. The depth of this material is five and one-half feet. The under-drainage of the beds is secured by a series of nine lines of fiveinch horseshoe tile underdrains laid on the concrete floor and radiating towards the centre, at which is the gatehouse. The gates of the valves, which control the emptying of the primary beds as well as the emptying and filling of the secondary beds, operate by hand. There is a float gauge with an indicator in the gatehouse which shows the level of the sewage in the bed. A twelve-inch gate valve opens and shuts to control the flow from the beds. It is estimated that each bed will hold 130,000 gallons of sewage independent of the contact material.

MEETING OF HARDWAREMEN.

A general meeting of the Canadian Wholesale Hardware Association was held at the offices of Jenkins & Hardy, Toronto, on February 9, at which representatives of the wholesale hardware trade from Montreal, Ottawa, Hamilton, London and Toronto were present. The meeting, which was a continuation of the adjourned Montreal meeting, held a couple of weeks ago, discussed a number of questions of interest to the trade, especially in regard to the matter of prices, but no action was decided on for the present.

The outstanding question was one with reference to shortening the terms of credit, reducing the discount limit from three to two months. A great deal of discussion was indulged in, but the consensus of opinion showed that while nearly all admitted the wisdom of getting closer to a cash basis the present was regarded as an inopportune time to make a radical change, owing principally to the depressed condition of industry and general trade during the past year.

President Stark was in the chair, and Secretary James Hardy took charge of the minutes. The meeting was successful and satisfactory in all respects. The annual meeting will be held in October.

ANNUAL MEETING CANADA PAINT CO.

The annual meeting of the Canada Paint Company, of Montreal, was held at their city offices in Toronto on Tuesday, Feb. 9 last. There was a large attendance of stockholders present. All the directors were present except the president, S. F. McKinnon, toward whom much good will was expressed in the present state of his health.

The statements submitted by the managing director, Robert Munro, of Montreal, were very gratifying to the shareholders notwithstanding the general depression of business in industrial centres during the past year.

The usual dividends were declared and all the old directors re-elected as follows:—

President—S. F. McKinnon, Toronto.
Vice-President—Thos. Walmsley, Toronto.
Managing Director—Robt. Munro, Montreal.
Secretary—Sir Henry M. Pellatt, Toronto.
Treasurer—H. W. Aird, Montreal.
Directors—Samuel Trees, Toronto; George H. Balfour, Quebec; and Charles H. Nelson, Montreal.

The company have recently erected an extensive branch in Winnipeg, and have purchased within the last few weeks property in Montreal for the purpose of enlarging their works at the head office.

The Toronto office of the Canada Paint Co. is being removed from 90 Bay Street to the Peterkin Block, on the same street, where commodious and attractive quarters have been secured. The offices will be under the same management as during the past nine years, H. Clucas being still city sales manager.

News of the Paint Trade

THE SPRING CAMPAIGN.

With the spring rapidly approaching the paint dealer should lose no time in preparing for his campaign. There is plenty of trade to be secured if he goes after it in the progressive way, and in good time. Many merchants seem blind to the fact that the paint demand needs cultivation just in the same way that the other hardware lines do, although the methods employed may vary a little. To delay preparations, to leave off the consideration of that campaign until the last moment, is as fatal as being without the goods when the demand does come. The best methods to adopt in pushing paints—the methods that will be most suitable for any particular districts—cannot be decided in a minute or the full force of their employment be felt within a day. The campaign must be an educative one, and education is a process of repeated knocks and not of one hard blow.

Therefore, the dealer in considering his circular or card scheme, should not limit himself to one issue, but should adopt a follow up policy. A single circular, no matter how strong it may be in itself, is soon forgotten. But another circular, and still another circular cannot fail to command the attention of the reader, until, when the time for painting does arrive another convert to the need of painting has been secured.

In these circulars, or announcements, the attempt should be made to focus the mind of the reader upon the fact that paint acts as a preservative, a beautifier, and a disinfectant, and that no house is so perfect that paint inside or outside is not needed. Enlarge upon the fact that painting is a necessity and not a luxury, and that the more cheery the house, the happier its inhabitants. Then when these circulars have been thoroughly disseminated in the district, send out a bold announcement as to the new spring stock, and the ability of the merchant to take care of any wants in the paint line.

In these dull days the hardware man also has time to look out the property owners in his district, to employ if possible a personal canvass, and to call in the aid of the manufacturer who will follow up any names given them with the strong arguments and literature that are at their command. By repeated knocks can the dealer give the best effect to his campaign, and therefore the sooner he starts on his first move, the better are his chances of success at the opening of the spring painting season.

BARGAIN SALES A MISTAKE.

Although bargain sales may be very useful in clearing off broken lines and somewhat dead hardware stock, it is not advisable for the merchant to have any bargain sales and reduced price day for his paint department. People only paint when they need it. If they do not need it and are not contemplating painting, you could hardly make them a present of it. A man can always make use of clothing and articles of food, but he will never store paint in his basement for use a couple of years later.

Then, again, while your sale is going on probably some of your old customers

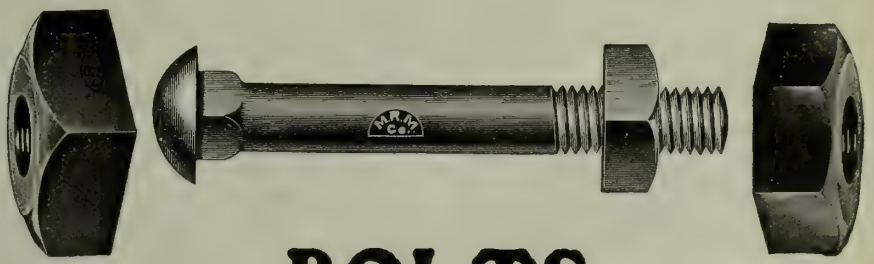
We'll help you sell them

When you stock Floorglaze Enamel, M.L. Paints, or anything else we make, our interest in you doesn't lapse till it's time for your next order. Not much! We keep busy right along helping you to sell the goods—moving that stock out in a hurry to make room for more. That's one reason why we keep friends with the trade. Another reason is found inside the cans. When you get ready to handle a really complete line of paints, varnishes, enamels, etc.,—and a line that sells and satisfies—this is the address to write to:

Imperial Varnish & Color Co., Ltd.
OF TORONTO

Please correspond with place nearest you.

All our lines carried in full assortment by Imperial Varnish & Color Co., Ltd., 542 Beatty St., Vancouver; Mason & Hickey, 108 Princess St., Winnipeg, Man.



BOLTS

The claim we make for our Bolts is that they are as good as any made.

Material in them is of the best; threading is full and true, and Nuts perfect fitting.

Their excellent qualities commend them to users of these goods.

Specify "M.R.M."; the brand that gives satisfaction.

The Montreal Rolling Mills Co.

contemplating painting will come in. Although not aware of the sale you were carrying on, yet they must be given advantage of the reduced prices and you must suffer the loss of the difference.

DISPLAY PAINT LINES.

"If the paint dealer would take a lesson from the big departmental stores," writes R. W. Evans in the American Paint and Oil Dealer, "he would have his paint line displayed on counters and shelves in a way to attract the attention of casual customers. It is perfectly practicable to prominently and attractively and impressively to display a mixed paint line on the counter; helped with proper cards, painted, perhaps by the local painter, which will catch the eyes of all comers.

House painting is often thought about during the winter and inside painting continues throughout the winter. I am not one of those who believe that a paint dealer should relegate his paint stock to the rear during unseasonable weather. I wouldn't recognize or encourage any "dull times" season by relaxing any efforts. Instead I would write short, crisp personal letters to the house-owners and the housewives of my town calling attention to my paint line in a way that would get them into my store. Before fly-time comes I would make them know that I had screen paint. When springtime comes I would make them understand that I had stove-pipe enamel, etc. Before house-cleaning time comes they would surely know that I had floor varnishes and paint for touching up porch floors and porch furniture. During the muddy season in spring I would make them understand that the old buggy needed painting and that I had the best buggy paint on earth. Whenever they thought of paint they should think of my store and when they thought of my store they couldn't help thinking of paint.

And I would not neglect the local painter. I do not believe that there is one paint dealer in twenty-five who really understands that the average painter can make more money by buying a first-class prepared paint than in buying materials which require a lot of time to break up and properly tint. The handy package of ready goods has come to stay. The man who first prepared to put up a first-grade prepared house paint was told that he was a fool, but to-day we see that every year about 100,000,000 gallons of ready paint is sold in tin packages. The "ready-to-use" idea has come to stay, and the painter finds that he cannot get along without goods put up in this manner even though he may frequently buy certain paste goods to enable him to compound for special purposes.

Paint and Oil Markets

MONTREAL.

Montreal, Feb. 12.—Orders have kept up well this week both for immediate and future delivery. It is evident that the opening of navigation will be marked with plenty of activity in the shipping departments. There is no change to note in the markets. The demand for turpentine is steady. Red lead is firm, with stocks showing signs of depletion. Varnishes are moving well, and altogether there is a good tone to the markets.

TURPENTINE—Stocks are said to be very large at the main shipping points, business in the United States not having developed very rapidly. However the spring crop is some distance off, and with a steady local demand quotations have been maintained. We quote 58c for single barrels.

LINSEED OIL—The cautious spirit which has been in evidence for some time past in regard to linseed oil still prevails, and the market is in consequence none too buoyant. There is no change in prices, and we quote: Raw, 1 to 4 barrels, 59c; 5 to 9 barrels, 58c; boiled, 1 to 4 barrels, 62c; 5 to 9 barrels, 61c.

GROUND WHITE LEAD—Shipments are more heavy than for some time past, and jobbers in consequence are beginning to overhaul their stocks. Prices are well maintained, and we quote: Strictly pure, $5.50 to $6, according to brand, and No. 1, $5 to $5.50 f.o.b. Montreal.

RED LEAD—Stocks received by open water are showing signs of depletion, and to keep up with the fair demand which now exists, shipments are arriving by way of Portland, Maine, and St. John, N.B. Freights are stiff, and consequently there is a firmness in prices. We quote: Genuine red lead in casks, $4.50; in 100-lb. kegs, $5; in less quantities, at $6 per 100 lbs.; No. 1 red lead, casks, $4; kegs, $4.50, and smaller quantities, $5.50.

VARNISHES—There is a good movement both to varnishes in tins and to the bulk form in barrels. Lower prices in shellacs have contributed in some small degree to stimulate sales, and prospects are bright for a good spring turnover.

PARIS GREEN—A fair quantity of Paris Green is moving, and while there is no great snap to the bookings as yet prices seem well maintained. We quote: 1-lb. packets, 100 lbs. in case, 21c; 1-lb. packets, 50 lbs. in case, 21½c; ½-lb. packets, 100 lbs. in case, 23c; 1-lb. tins, 100 lbs. in case, 22c.

WHITE ZINC—There has been an improvement in the demand, and fair orders are now moving out. Quotations are as follows: Dry V.M. Red Seal, 7½c; Red Seal, 7c; French V.M., 6c; Lehigh, 5c; white zinc, ground in oil, pure, 8½c; No. 1, 7c; No. 2, 5¾c.

PUTTY—The Putty demand seems to have fallen into a rut, and the bookings are light. We quote: Standard putty, 880-K. casks, $1.65; in 100-lb. drums, $1.90; bladder putty, 400lbs., in barrels, $1.90; in 100-lb. cases, $2.05; in 25-lb. drums, $2; 25-lb. tins, $2.05; 12½-lb. tins, $2.25 f.o.b. Montreal.

Second question you should ask about any line of goods is:—"Is it profitable to handle—is it a money maker?

"English" Liquid Paint Gives the Dealer a Good Margin of Profit.

Although "English" Liquid Paints are the highest grade on the market—70% pure White Lead—30% pure Zinc White—guaranteed pure, our price to you is moderate.

We have our own white lead works—the only paint makers in Canada that corrode white lead. All of the 70% pure lead used in "English" Liquid Paint is Brandram's B. B. Genuine Government Standard White Lead.

We have our own dry color works.

We have our own linseed oil refining plant.

You can maintain "top of the market" selling prices on "English" Liquid Paint because you are selling the highest grade paint in the field. You are largely independent of competition because no other dealer in your town can offer a paint up to the standard of 70% pure white lead—30% pure zinc white.

High quality means satisfaction and satisfaction brings your customers back to your store and sends their friends to you.

Just send us a postal card for prices and selling plans.

Pioneers of Pure Paint

MONTREAL
The Winnipeg Paint & Glass Co., Ltd., Winnipeg

CHICAGO
The Maritime Paint & Varnish Co., Ltd., Halifax, N. S.

TORONTO.

Feb. 12.—While continuing the old quotations there is a somewhat unsettled feeling with regard to turpentine and Paris green prices. Montreal is selling turps from two to three cents below the figure asked locally. The South reports an easier feeling and this to some extent has has had its effect here. Jobbers, though rather expected to see turpentine go up another cent and are surprised at the easy tendency. This has unsettled prices. One Toronto house is selling at 60 cents plus cost of barrel.

In Paris green while no lower price is quoted jobbing houses are reaching out after business and the market is easier with trading waiting for the outcome. All other lines are unchanged in condition and price.

TURPENTINE — Single barrels are still at 62c ; 2 to 4 barrels, 61c ; and 5 gallon lots 67c. The market shows an easier feeling. One Toronto house is selling turps at 60c per single barrel. Eastern markets are quoting lower prices than Toronto, and orders are light in consequence.

PARIS GREEN—With the jobbing houses reaching out for all the business they can get hold of it is no wonder that an easy feeling is abroad. Good business is being done and the orders are satisfactory, both in size and number. The market figures are unchanged from last week. Barrels are 20½c and 25-lb. drums 21¾c.

LINSEED OIL — While interesting abroad, locally the linseed oil situation is rather dull. Prices are unchanged and the market is firm. Raw is 59c for 1 to 4 barrel lots, and 58 for 5 to 9 barrels. Boiled is 3c higher than these figures.

GLASS AND PUTTY—Still good sellers are these two lines, though orders are not so heavy as a month ago. A little speculation regarding future glass prices is indulged and this to some extent has limited the number of orders. Unchanged prices prevail.

WHITE LEAD—The market is without quotable change, but firm despite the recent weakness in pig lead. Increased sales are reported and more satisfactory business is being done. No. 1 is at $5.40 to $5.65 ; pure white, from $5.80 to $6, and a superior line is at $6.25. In red lead the movement is chiefly of a jobbing order. Genuines is quoted at $4.50 for casks and $4.75 to $4.80 in 100 lbs., which are the quotations of last week.

STAINS AND VARNISHES—Quietly steady about describes the business done in these lines. No increase in price is yet noted.

PETROLEUM—With the lengthening days demand is expected to fall off somewhat, but as yet nothing of this sort has occurred. Prices are unchanged. Prime white is 13½c; water white, 15½c, and Pratt's astral, 17½c.

EVOLUTION OF READY-MIXED PAINTS.

A good idea of the development of the ready-mixed paint industry in the United States can be gleaned from an interesting article by A. M. Stringer, published in Hardware. "The beginning of the paint, oil and varnish industry," said Mr. Stringer, "was in 1715 when a mill was established in New York City for the manufacture of linseed oil. In 1718 John Prout, jr., erected a similar factory in Connecticut. In 1786 four oil mills were in operation in Lancaster County, Pa. This growth of the linseed oil industry had not been without its effects in stimulating the use of paints.

By 1795 the use of paint had become common. In the towns even the ordinary householder used paint about his dwelling. If an outside coat were beyond his means he painted the inside woodwork at least. The churches and public buildings were all decorated with paint. The white house with green blinds was then and for many years after, the sole type of perfect house decoration. The aesthetic colors and shades and the blending of more harmonious tints began in the nineteenth century, but were not used in general, particularly as seen in the modern house, until quite recently.

The first attempts to manufacture white lead in this country were made in Philadelphia by Samuel Wetherill in 1804. Red and white leads were made by him in as good a quality as could be imported.

In 1806 color-making was begun experimentally by Anthony Tieman, who regularly started in its manufacture in New York City in 1807. In 1820 chrome yellow was first made in America by William Guest, of Baltimore. Prior to 1828 all varnish consumed here was imported. The first establishment for making it was founded by P. B. Smith in New York in 1828. It was not very long after this when the manufacture of paint became more general and Philadelphia came in for a large share of credit, building up her fame in this line. The Wetherills, Schracks, Shoemakers, Lewises, Harrisons and others established themselves here. Contemporary with these came John Lucas, who, if he did not quite as soon establish the business in this country, had acquired a good knowledge of it in England. He was a fine chemist and knew how to apply his knowledge to the manufacture of paint. About the middle of the last century, say 1865, Averill introduced his ready-mixed paint and patented it shortly after; other firms very soon followed suit.

CANADA PAINT CO. REMOVE.

The premises occupied as offices by the Canada Paint Co., at 90 Bay St., Toronto, and owned by Robert McCausland, were sold this week to a party represented by E. Cronin, broker and real estate dealer, for $30,000. The present intention of the buyer is to remodel the building to accommodate a larger number of offices. The Canada Paint Co. will remove its offices before March 1 to the Peterkin Building, two blocks further up the street.

The Thornton-Smith Co., Toronto, have obtained a contract for the interior decoration of St. Mary's Church, Lindsay, recently damaged by fire.

SET B—Comprising 80 patterns, developed on a sheet of 24x68 inches, sizes ranging from 20 to 40 inches. Price, $1.50

SETS A and B together, 160 patterns, with chart showing all the angles and degrees of same. Price - - $3.00

Information regarding Skylight Patterns, Metal Window Patterns and Miscellaneous Patterns will be given on application to

TECHNICAL BOOKS
10 Front St. East Toronto

The FOUNTAIN Sprinkler

NOT merely a round box with holes punched in it to let the water out —BUT a perfect Lawn Sprinkler.

NOT merely a group of straight round streams working with mathematical precision—BUT a natural shower of spray.

The Sprinkler with the "MIST LIKE SPRAY."

No other Lawn Sprinkler can produce the beautiful—The perfect results like the "FOUNTAIN."

The name "FOUNTAIN" is plainly marked in raised letters on the bottom of every Genuine, Original FOUNTAIN Sprinkler.

When you think of Lawn Sprinklers — Think FOUNTAIN
When you buy Lawn Sprinklers — Buy FOUNTAIN
And insist on getting the FOUNTAIN
Stick to the Sprinkler you KNOW is right.

Do you want a sample for comparative test.
Post paid to any dealer at the wholesale price.

CURRENT MARKET QUOTATIONS.

February 13, 1909

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for larger quantities and prompt pay. Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate.

Amatite Roofing

Needs No Painting

If you had a sample of Amatite in your hand you would see in an instant why it needs no painting or coating to keep it waterproof.

It has a rough surface of *real mineral matter* on the weather side.

It is evident to anyone that it is no more necessary to paint such a surface than it is necessary to paint a stone wall. Stone needs no paint; neither does Amatite. It is strong enough in itself to bear the brunt of rain and wind and sun without a protective coat of paint.

To paint Amatite would be a waste of time and trouble.

Amatite will last for many years without any care whatever. It is made to be *trouble proof* as well as *weather proof.*

A roofing that consists of smooth materials, made to receive a heavy coating of paint, is not a roofing at all—the paint is the real roof. If you are told that certain roofings don't need painting when first laid, don't be deceived into thinking that they are like Amatite. The first coat of paint has been applied at the factory—that's all, and it will wear off in a little while and require renewal.

No paint is good enough to make a durable roof; a thick layer of pitch faced with a real mineral surface, is far better—and that means Amatite. **Free Sample and Booklet**—A Free Sample with Booklet will be sent on request to our nearest office.

Read a Few of the Comments of the Leading London Dailies on the Supremacy of the Ross Rifle at the 1908 Bisley Meet.

"Long range Champion, breaks all records, a rifle of wondrous precision." *London Morning Post, July 16th.*

"Records broken at Bisley. A fine Canadian rifle." *London Daily Express, July 16th.*

"Record scoring with the Ross rifle." *London Daily Telegraph, July 15th.*

"Champion of the year." *New York Herald, July 16th.*

"Performance phenomenal by the Ross rifle." *London Field, July 18th.*

"The new Canadian rifle has made an unexpected and altogether successful appearance." *London Daily Mail, July 15th.*

"Great triumph for the Ross rifle which has beaten all the world's rifles." *London Standard, July 15th.*

"Many experts declare that Ross rifle better than new U.S. Rifle." *Nottingham Guardian, July 17th.*

"An individual triumph, the Lee-Enfield hopelessly beaten." *London Morning Post, July 15th.*

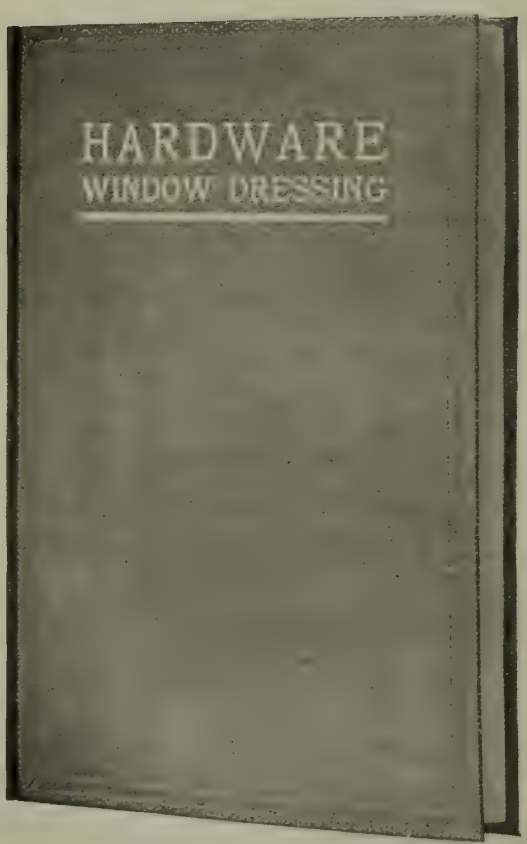
"The Ross rifle achievements were truly remarkable." *London Evening Standard, July 15th.*

"Great victory for the Ross rifle from Canada." *London Daily Express, July 15th.*

"The rifle of the future is the Ross rifle." *London Times, July 16th.*

"A'plague of possibles' with the Ross rifle." *London Sphere, July 15th.*

THE ROSS RIFLE CO., - QUEBEC



You May Become a Practical Window Dresser for $2.50

This is the first book ever written devoted exclusively to Hardware Display, and has been off the press only a few weeks. It is a practical, up-to-date collection of ideas of the most expert window dressers in the world. There are hundreds of displays in the book that can be put in at practically no expense—anyone of them will bring enough extra trade to the store to pay for the book many times.

256 Pages **8x11 Inches** **300 Illustrations**

Price $2.50. (Payable in Advance)

Taylor-Forbes 1909 Improvements

The high place occupied by our lawn mowers in the hardware trade, has been won by constant attention to possible improvements. Every machine we make demonstrates our claim that our machines are better than imported lines.

All our machines are self-sharpening—cross bars, girts and shafts being double the weight and strength of any imported machine. Steel plates for cylinders and knife-backs in all our machines are double the thickness of any imported machine. All cylinder wings are made of malleable iron—cast iron is used in imported machines. All Taylor-Forbes machines are made with loose half-boxes and permit of quick and easy adjustment, while American machines, being made solid, cannot be adjusted. All wheels on our machines are three times the weight of any imported machine. The highly carbonized flat steel pawls on our machines are vastly superior to the little wrought iron pins used on imported machines.

COVERTITE ROOFING

BUT YOU HAVE!

During the Spring months when the snow melts and rains are frequent there is a big opportunity for the dealer to sell a high-grade, durable and inexpensive prepared roofing that is easily put on.

Put in stock a few rolls of COVERTITE and see how readily it sells.

Spring will soon be here, so write at once for prices and samples.

Covertite Roofing is the best made.

Covertite has the new patent metal end which is a great improvement to the old cloth end. Impossible for these rolls to break or the contents inside the rolls to fall out. This is our patent—Infringers Beware!

Exclusive Canadian Distributors:

What About Willow Baskets

These useful baskets are in constant demand and a window display of them occasionally helps to move a lot of them. But get good baskets—Nelson's Baskets. Strongly made of the best material, light in weight and very neatly finished. They look like what they are—really good willow baskets.

Send for Price List—

Alundum Wheels Cut

THEY DO NOT TEAR OFF THE STOCK

¶ Alundum is one of the sharpest abrasives on the market. A thorough series of tests have proven that each particle acts as a cutting tool removing the chips as in a lathe.

¶ Increased efficiency is the aim of modern factory organization. The high efficiency of ***Norton Wheels*** in grinding, over all other methods of removing stock is well known.

¶ There are hundreds of different grades of material and uses for all of which there is an ***Alundum Wheel*** suited to the purpose.

¶ Why not get some of this business. Do you stock grinding wheels? We can make you a profitable proposition to carry this line.

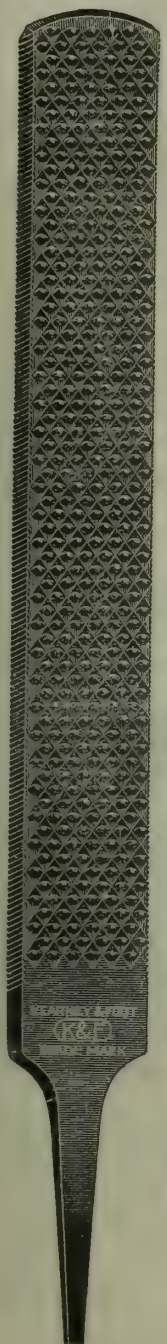
HORSE RASPS



are another excellent example of the completeness of the lines of goods we carry in our stock. We show here four of the best and most reliable makes of horse-rasps in the market. Our stock includes all of these four in both plain and tanged and in a large range of lengths. We have everything in that line you are likely to be asked for.

The completeness and the good selections of sizes and makers are characteristics of our stock. We choose the goods we will sell solely on their merits, and it will pay you to handle the goods we advertise. You can rely on their quality, which is backed up by the makers' names as well as by our own. You can make a good profit on them, too, because we sell right.

Order from us whenever you want hardware.

Are You Using Your Effort in Profitable Metal Roofing Business?

Some Hardwaremen have lost interest in this lucrative business and no longer give it the attention that it deserves.

They have become discouraged by the continual unbusinesslike and underhand dealings of certain manufacturers and instead of denouncing *them* and their products they have "thrown up the sponge."

They wouldn't do this in their stove business or their cutlery, or their paints, or any other profitable line belonging to the Hardware Trade. They would transfer their business to a firm with a reputation for fair and honest dealing and continue right along to make money.

Are you one of these men? Are you still neglecting this business or pursuing it in a half-hearted way because you think you can't meet unscrupulous competition?

Take our advice, *don't try to meet it.* Ignore it. If you are selling "Galt" Goods, you really haven't any competition. Competitors may slash prices, misrepresent their goods and use every underhand method of soliciting business, but they can't injure your business BECAUSE THEY CANNOT SUPPLY "GALT" GOODS.

"Galt" Shingles, "Classik" Ceilings, etc., sell on their intrinsic qualities—the *perfection* of their *designs and constructions*—not on the age of their makers or the cheap manner in which they can be produced.

If there are houses and barns being built or repaired in your vicinity this spring (if there are not you had better pull down the curtain and move out); if there are prospects for Roofing, Siding, Ceiling, etc., and you are willing to give "Galt" goods a show on these jobs drop us a card to-day for Catalogs and particulars of our "1909 Dealers' Proposition." We'll tell you how to bring this business in your locality back to a healthy, sane, profitable basis and help you to do it. This information costs you one cent. Do you want it?

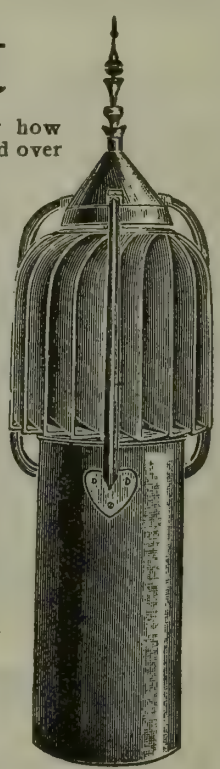
Double Profit

Mr. Hardwareman, you know how little profit there is in many lines sold over the counter.

We offer you a chance by a little missionary work to greatly increase this.

You know of a new building going up in your town and neighborhood. Get after the builder and show him the advantage of putting in one of our



Aeolian Ventilators

THE BEST MEANS FOR INSURING PURE AIR

One Testimony:

Montreal, June 12th, 1903
Canadian Pacific Railway Company.
Messrs. J. W. Harris Co., Limited,
7 St. Elizabeth St., Montreal, Que.

Gentlemen,—Answering yours of June 1st, I am not personally familiar with the merits of the "Aeolian" Ventilators but our Assistant Engineer, Mr. F. Crossley, reports that the Ventilators of this type manufactured by you and used by this Company at the Place Viger Hotel, Chateau Frontenac, Windsor Street Station and elsewhere, have proved satisfactory.

Yours truly,
E. H. McHENRY, Chief Engineer.

Write direct for booklet and catalogue to-day. Learn about our system of ventilating. A pleasure to send books.

The Safe Way of Lighting is the Safe Way to Recommend

All dangers attached to common ways of lighting gas ranges unknown in the experiences of a "CALORIC" user.

Why ?

"Caloric" equipped with a perfect safety lighter.

This lighter collects gas from each burner bar, then directs same to the burner holes in the bottom of the oven.

The moment the burner jet is turned on and the lighted match applied the gas is lit evenly.

No accumulation of gas, no puffing, no explosions.

Let CALORIC sell itself in your store.

Reason No. 1—The Durability of the oven.

Reason No. 2—The Reliability of the burners.

Reason No. 3—The Stability of the lighting arrangement.

Ontario Convention Report Continued

Report of the Thursday Session, the Banquet and Theatre Party—List of Souvenirs Distributed—What Some of the New Members Thought of the Convention.

OFFICERS FOR 1909.

President—D. Brocklebank, Arthur.
1st Vice-Pres.—A. Ballantyne, Brantford.
2nd Vice-Pres.—M. S. Madole, Napanee.
Treasurer—John Caslor, Toronto.
Secretary—Weston Wrigley.
Executive—R. C. Chown, Belleville; D. Cinnamon, Lindsay; J. R. Hambly, Barrie; J. Walton Peart, St. Mary's; H. P. Morgan, Peterboro; J. S. Weichel, Elmira.
Auditors—J. W. Peacock, Toronto; R. J. Bruce, West Toronto.

THURSDAY MORNING.

The morning was spent by the hardwaremen in visiting the factories of the Canadian Drawn Steel Co., the Canada Steel Goods Company, and the Canadian Shovel and Tool Company. The tour of inspection was a revelation to the visitors who were much impressed with what they saw and the industry and activity of the three establishments.

THURSDAY AFTERNOON.

The convention resumed at 2 o'clock, the session being an open one at which many travelers and manufacturers were in attendance.

The special railway committee, through R. C. Chown, Belleville, reported that, at the present time no rebate could be obtained, but the question would be taken up with Mr. Webster, Secretary of the Canadian Passenger Association, to see what could be done to secure a rebate.

Next Convention in a Hall.

The following motion was moved by W. A. Rankin, Ottawa, and W. J. McMurtry, Galt, and unanimously carried :

Whereas this convention has been more largely attended by retailers, jobbers and manufacturers than anticipated, and

Whereas, owing to the lack of adequate preparation, some annoying incidents have occurred, be it

Resolved that the new executive be instructed to consider the advisability of holding next year's convention in a hall rather than a hotel, and also that special committees be named to take charge of the arrangements regarding entertainment and the exhibition and be it further

Resolved that we thank the firms exhibiting at this convention and assure them that better arrangements will be made in their behalf next year, and be it still further

Resolved that we expressly thank Fred C. Lariviere, Montreal, for his attendance at this convention, and for his instructive addresses and advice, and assure him of our hearty appreciation of his efforts and his kindness in giving this assistance so freely without remuneration, and trust that he will overlook any involuntary or unforeseen annoyances, returning home with the assurance that the hardware trade in Ontario can have nothing but the warmest feelings of regard for him.

Retail Hardware Convention Group Taken at Hamilton, Thursday, Feb. 11, 1909, in a Snow and Wind Storm.

Hamilton Thanked.

M. S. Madole, Napanee, moved and O. B. Henry, Drayton, seconded the following resolution which was carried with hearty applause.

That the members of the association place on record their appreciation of

the kindness shown them during their session in Hamilton, for the very great pains taken by the manufacturers and wholesale trade to interest and instruct them in the facilities afforded by the city in the manufacture of lines suitable to the Hardware trade, that we shall go away with larger and broader ideas, and shall not soon forget our enjoyable stay in your midst.

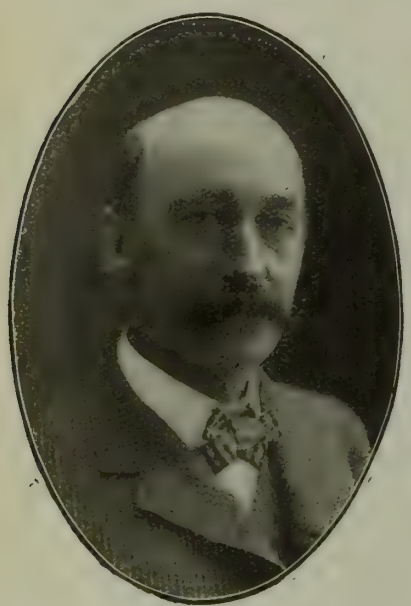
Messages of Sympathy.

A. W. Humphries, Parkhill, and John Caslor, Toronto, moved that the association send a telegram of sympathy to J. Walton Peart, St. Mary's, whose illness with typhoid fever prevented him from attending the convention.

The message was :

"We regret illness prevented your attendance at this most successful convention. Glad to learn you are rapidly recovering."

It was also decided on motion of D. Cinnamon, Lindsay, and J. R. Hambly, Barrie, that a message of condolence be forwarded to George and William Vallance, of Wood, Vallance & Co., Hamilton, in the death of their brother.



COL.-GARTSHORE, LONDON.

Wo Wants the 1910 Convention to go to London.

Invited to London.

Lt.-Col. Gartshore, of the McClary Manufacturing Co., London, expressed his pleasure at meeting the members. He referred to the necessity of keeping trade in regular channels which was a good thing for manufacturer and retailer and his firm had strictly lived up to this principle. Hardware dealers had to contend against the mail order business which was prejudical to the retail trade; and also the steel range peddlers, who, however, show good salesmanship and do not cut prices. The latter quality was what the dealers could well emulate. The real matter that he wished to speak of was a hearty invitation to hold the next convention in London. In this invitation the Board of Trade, the firm he represented and the hardware dealers all joined. The bid was further backed up by a telegram from Samuel Stevely, mayor of London, as follows : "Would be pleased to have your next annual convention held in London."

It was decided, on motion of Messrs. Madole and Chown, that the executive committee select the next place of meeting and announce their selection within three months.

Mr. Howell, in charge of the Dover Manufacturing Company's exhibit, and a charter member of the Minnesota Hardware Dealers, who had attended a score of state conventions, was asked to speak. He said it has been the experience of those on the other side that the more they made of the meetings a commercial and social success, the better the results ; therefore these gatherings are held in halls. The convention hall was better than a hotel and left the members free. He spoke of the advantage of having the ladies present and said at the last meeting of the Minnesota State convention 125 wives and daughters of the members were in attendance.

It was suggested that the president and one or two members of the executive attend the New York State convention at Rochester next week to which an invitation had been extended by that organization.

Welcome to the Travelers.

D. Cinnamon, of Lindsay, on behalf of the association, gave the travelers a hearty welcome, and said the retail dealers had no better friends than the men on the road.

C. C. Ballantyne, Montreal, Canadian manager of the Sherwin-Williams Paint Co., next addressed the gathering on "Why is prepared paint more advantageous for retail hardware merchants to handle than lead and oil."

Invitation to Montreal.

Mr. Ballantyne extended to the convention a hearty invitation to meet next time in Montreal, and promised the visitors a pleasant time in that city.

W. H. Gerke, of Martin-Senour Co., Montreal, also endorsed the invitation of Mr. Ballantyne to hold the next gathering in Montreal.

W. G. Francis, of Benj. Moore & Co., Toronto, referred appreciatively to the address of Mr. Ballantyne, and the advantage of handling ready-mixed paints in preference to lead and oil.

Talk on Advertising.

A. A. Briggs, advertising manager of the McClary Mfg. Co., spoke on "Advertising for the Retailer," summarizing his remarks under the following heads :

How to tell whether or not you need to advertise.

How long have you been established.

The territory you are located in.

How much business do you get within the radius in which you can fill orders at a profit.

What are the methods of your opposition.

Invest say $200 or $300 in a year's advertising.

Take the sharpest clerk in your employ and debit him with this amount of money.

Judge him by the results he can get from it.

Allow him freedom of action in the spending of it.

If he has gumption to write some of the manufacturers from whom you buy their advertising manager will be pleased to outline for him the relative values of newspaper, sign-board, circulars, programs, etc.

Have two files—on one place under a monthly index a copy of every ad. written with the date marked thereon. This will keep the clerks posted on season advertising. On another file keep memos or suggestions for ads. that come up at a time when they cannot be dealt with. Suggest to clerk that because weekly papers are usually issued on Thursday, he spend between 6 and 7 Tuesday evening fixing up the ad.

Suggest to him the keeping of a series of headings from which it is much simpler to work out a text than it is from a lot of unassimilated ideas.

Tell him to write in a space "ruled off" on a sheet.

Do not write as you talk.

No mention of the goods unless you have exclusive agency.

If reinforcing a national campaign use prices. Talk service and liability.

R. J. BRUCE, WEST TORONTO,

Elected One of the Auditors for 1909.

Prices in Ads.

Mr. Briggs was asked if he believed in giving prices in advertising, particularly in stove advertising, and if so, why. In reply he said this query gave birth to a great variety of opinions. If a maker of stoves was advertising nationally he would of course not quote prices, but in the case of a local dealer, Mr. Briggs thought prices should be mentioned, as it would help to complete sales quicker and surer. There were other advantages in showing the people the worth of a stove, having a standard figure, and adhering to that price. If men in the drapery and other lines could put on prices, he did not see why a stove dealer could not.

In aswer to another question re dodger vs. the newspaper, he asserted that the latter was preferable for holding attention. The ordinary free mediums such as blotters and other things thrown

around promiscuously were not very good, but circulars were if well prepared and carefully written. A newspaper was generally read by all while a blotter or dodger might be seen by comparatively few. The show window was also a good medium of advertising. He would not advise a dealer to adopt strongly the idea of putting the prices on all goods in the windows as it looked as if goods were being sold on price alone, whereas in newspaper publicity, quality, etc., could be talked, as well as price. As to calendar advertising it might be successful, but it was a departure. No man could put out calendars a dozen times successfully, unless he was a trained man. The records go to show that the majority of dealers, who had tried out newspapers, had adopted the safest and surest medium. He favored display ads. rather than readers.

NEVER SAW BETTER CONVENTION.

My impressions of the convention were of the most favorable kind. This being my first year in attendance, I unhesitatingly say I did not realize what I missed by not being there before. Circumstances, however, prevented my going.

My impressions of the retail hardware trade of the province will not be magnified when I say that I never saw a finer type of men and a better convention.

The questions discussed were helpful alike to manufacturer, wholesaler and retailer, as what is the interest of one is the interest of all and the central idea being the greatest good to the greatest number and that means no combination on prices.

Will the retail hardware of Ontario stop a minute and take the advice I am about to give: Before the close of 1909 become a member of this Association. Send in your name to the secretary asking for membership and next February when the Association meets sign the roll, pay your $3, and show by your enthusiasm that you are one of the live hardwaremen of this great province. Then after spending three days at the convention if you have not been fully repaid, the executive will refund you the $3 membership fee. This, in brief, is my faith in the Association that has been organized in the interests of the hardware trade of Ontario and this being my first year as a member.

M. S. MADOLE.

Napanee, Feb. 13.

How to Conduct a Tinshop.

J. H. Rowe, of Dunnville, followed in an address on "How to Conduct a Tinshop Profitably." He touched upon the necessity of the dealers treating well the travelers who were the salt of the earth. In the first place in the tinsmithing business, study economy in your back shop. Do not waste material. Put all pieces of tin in assorted bins. Do not cut into a whole sheet of tin to get a small piece for putting on a bottom of a pail. Keep your shop tidy and clean, and everything in its place. Have good tools and machines and keep them in shape. An emery wheel was also a necessity to sharpen tools. Have a time card on which to put down the material used on a job and the man's hour. Each shop should have a ten-foot brake which was more serviceable than a eight-foot one. There was good profit in fitting up old stoves, getting repairs for them. He told of one that he had bought for a dollar, had fitted up at no greater outlay, including the original cost, than $2.50. He was asking $10 for that stove now and would get it. A Noyes groover, a punching press and wire former saved money, as also did an eclipse elbow machine. Hardwaremen paid too little attention to their tinshop and ran it as a side line. This should not be the case. The tinshop was a profitable business if conducted with some tact and judgment as a hardware store. In putting up eavetroughs, 8 cents per foot of 10-inch girt was not enough. The price should be 10 cents a foot to make a fair profit. The labor problem was difficult, and only those men who did a fair day's work for a fair day's pay should be engaged. Extra should be charged of mitres and elbows. For the latter, he charged 15 cents and 25 cents was what should be realized for mitres. Although he did not charge for them in his section, in some other places they did.

Plate Glass Insurance.

W. G. Scott, Mount Forest, spoke on a plan of mutual plate glass insurance which prevailed in his town. Through insurance companies high rates were charged. The law placed certain restrictions on plate glass insurance. He did not wish to speak of this scheme as a local matter. In his own town the project had worked out splendidly and had first been discussed ten years ago at the Merchants' Club, which took up many mercantile matters. The measurement of all plate glass was taken in the town. The rate was 5 cents per square foot per annum, or 10 cents for three years, so far as the insurance companies were concerned. The Mount Forest Club had charged 2 cents per square foot to join. No merchant was allowed to come in for less than a dollar. It was expected that the money in the treasury would soon run out, but the club had gone on for five years before an assessment was necessary, and then the levy was only 25 per cent.; the next levy was 75 per cent. and the third was 25 per cent. There were only three special assessments in ten years. The result was that the insurance on plate glass per foot for that period had been only 4 cents—2 cents per foot to join and the three assessments makes up the 100 per cent. In other words, a merchant having 200 square feet of plate glass front would in ten years have paid in entrance fee and assessments $8. The plan had gone on admirably, and all the members of the club were satisfied with it.

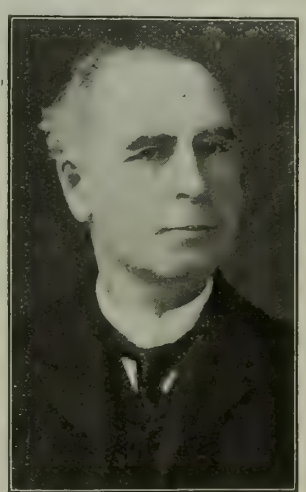
Discussion on Metal Roofing.

A general discussion followed on the matter of the metal roofing question, which was being considerably abused, according to some hardwaremen present. It was thought something should be done to stop the makers selling direct to the consumer.

J. R. Hambly said his experience with metal roofing and shingles was satisfactory. The fault was with the hardware trade if the makers had to go to the consumers. He had acted for one firm, and they had used him squarely, giving him a commission when they sold the consumer direct if he (the hardware merchant) failed to land the order.

A Napanee hardwareman said he had also been protected by the same firm, although an opposition manufacturer had appointed a livery man as their representative.

Mr. Dolph, of the Metal Shingle & Siding Co., Preston, and Mr. Gordon, of the Metallic Roofing Co., Toronto, spoke of the great future of the business. In ten years fifty per cent. of the barns would be covered with such roofing. Today, perhaps, not one barn in a thousand was covered with metal shingles.



M. S. MADOLE, NAPANEE,

The New Vice-President, Who was the "Silver-tongued Orator" at the Banquet.

They said it was up to the hardware trade to handle the business, as the farmer was now seeing the possibilities of their line. If the dealers pushed the goods the metal manufacturers would cooperate. They wanted to do business with the hardwaremen. It was cheaper, and the makers got their cash by cheque and did not have to go driving all over the country to collect their money. It was a profitable line for the hardware merchants to handle. If they would stick to the metal roofing men the latter would stick by them.

Another hardware dealer said if he did not handle the goods of certain makers they would go out and appoint a

farmer as agent. If the makers sold direct to the farmer they should do so at the retail price.

J. H. McRae, of the Gillette Safety Razor Co., Montreal, spoke. He asked the dealers to display Gillette advertis-

H. P. MORGAN, PETERBORO,

Who Says the Convention Will Help to Overcome Price-cutting.

ing more and to keep the company's goods clean and in a prominent place, as his firm protected the retail trade on the price in every case.

Question Box.

F. C. Lariviere, of Montreal, urged the convention to meet in Montreal next year. He would endeavor to answer in Hardware and Metal each week the 25 or more questions in the Question Box, as the hour was too late to do so now.

The President, Mr. Brocklebank, thanked Mr. Lariviere for his helpful addresses, which they all appreciated very much.

A. M. Cross, of AutoStrop Razor Co., Montreal, said hardware clerks do not study safety razors enough. They should do so in the interests of the sale of them.

The convention then adjourned, and so the fourth annual gathering of the Ontario Retail Hardware and Stove Dealers' Association, which was the most successful, enjoyable and profitable ever held, passed into history.

EXECUTIVE MEETING.

The 1908 executive met on Tuesday morning and reviewed their work during the past year, the result being the report made to the convention.

The 1909 executive met on Thursday evening, after the sessions had closed, they deciding that the place of holding the 1910 convention would be left over until the executive meets again in May. All the places nominated—Montreal, Peterboro, Toronto, Hamilton and London—will be considered in the meantime.

The secretary was instructed to secure information regarding the possibility of arranging a special summer meeting of the members of the association at Montreal next August, in response to the invitation extended by C. C. Ballantyne, Robert Munro, W. H. Gerke, F. C. Lariviere, Mr. Bittues, and other Montrealers who visited the convention. The proposal is that a special excursion rate be secured, that the members take their wives along, that one or two "Question Box" sessions be held, and that the balance of the time be spent in visiting some of Montreal's hardware manufactories and enjoying entertainment features such as the trip on the St. Lawrence River as suggested by Mr. Ballantyne.

The secretary was also instructed to write the Central Passenger Association asking for a rebate on the fares paid by the delegates to the convention at Hamilton this year, the attendance being far in excess of the number for which fare and one-third fare is allowed.

Messrs. Ballantyne, Cinnamon and Caslor were suggested as delegates to the New York State Retail Hardware Association convention at Rochester, Feb. 11, 12, 13 and 14, but none of the gentlemen could spare the time to accept the offer of hospitality from the New York hardware men.

THE GROUP PHOTO.

The large group photo reproduced this week is ample evidence of the success of the Hamilton convention and if it is compared with the first group taken in Toronto on May 16, 1906, and reproduced in Hardware and Metal at that time the growth of the association is emphasized in a striking light. It was intended to have the photo taken Wednesday noon, but the visit to Wood, Vallance & Co.'s warehouse made it necessary to postpone the event. As 30 or 40 members returned home Wednesday night or Thursday morning after the election of officers and banquet, the group is smaller than if it had been taken on Wednesday.

The photo was taken by one of the association's auditors, J. W. Peacock, who conducts a hardware store at 1026 Queen Street west, Toronto, and any who desire photos can secure them from him at 50 cents each.

CONVENTION NOTES.

"Montreal would give cordial welcome to next convention," telegraphed Robert Munro on Feb. 10.

"Would be pleased to have your next annual convention held in London," telegraphed Samuel Stevely, the stove merchant who is mayor of the Forest City.

Fred W. Karn, Woodstock, sent word that he could not come as his head clerk slipped on an icy step and suffered severe injuries.

"On behalf of the New York State Retail Hardware Association I send greetings and congratulations and hope your convention may be very successful. I extend to any of your members a most cordial welcome to our meeting at Rochester, Feb 16 to 19. J. H. Bradish, Batavia, N. Y., President of the New York State Retail Hardware Association.

The secretary knows whose badge the song and dance artist wore at the Bennett Theatre on Thursday night. But it wouldn't be fair to tell.

If anyone says the Gillette Razor people aren't keen advertisers ask one of the hardwaremen who attended the theatre party. As the toastmaster said at the banquet they "are as keen as a Gillette blade."

Thirty-three firms exhibited at the convention, netting $330 for the Association treasury—surely a satisfactory record for the first effort in running this feature. Better satisfaction all round however, will follow the holding of the exhibits in a hall rather than an over-crowded hotel.

The receipts during the convention amounted to about $250.

The photograph was taken Thursday at noon after many had left for home. Had it been taken Wednesday noon as first arranged there would have been half as many more in the group. It was certainly an eye-opener to see a procession of hardware men two or three deep and a full city block long.

Vice-President M. S. Madole, Napanee, said he had attended numerous church and society conventions but never had he seen better decorum exhibited by delegates. One or two hangers-on, not retailers or exhibitors, finding it impossible to become "tagged" got "jagged" (one of them having to be forced out of the convention room) but the compliment paid the delegates by Mr. Madole, the baby member, was deserved.

Porter A. Wright, President of the Michigan Retail Hardware Association, wrote: "I can assure you that it would afford me a great deal of pleasure to meet with you on this occasion but on account of the very unusual amount of work that I have to do just at this time it will be impossible for me to visit you this year. It is my wish that you extend to the members of your Association in convention my heartfelt thanks for the many courtesies extended to me at your last convention in Toronto and for the very royal manner that I was entertained as your guest during your 1908 convention and I can assure you that the memory of that convention will remain for a long time as one of the pleasant memories of my life and I hope that at some future

DO AWAY WITH PRICE-CUTTING.

The convention held at Hamilton was the first one of its kind that I have attended, and I was greatly taken up with it. There were many good points brought out that I am sure were very interesting to the hardware man.

The convention is a good thing, you get acquainted with the leading hardwaremen of our province, and it affords us an opportunity to learn more of our business and to be more friendly with our competitors which in the end will, no doubt, do away with a lot of the "price cutting."

H. P. MORGAN,
of the Peterboro Hardware Co.
Peterboro, Feb. 16.

time I may have the pleasure of meeting with you again. From your programme I know you will have the best and largest meeting that you have ever held and I trust that the same spirit of harmony will prevail as it did one year ago."

SURPRISE AND ASTONISHMENT.

Wasn't the convention a bumper meeting? This is the first time that I attended the convention and you can jot this down that if I am well and able to go next year, I'll be on hand. These meetings are bound to further the interests of every attending hardwareman.

To put it mildly, I was surprised at the magnitude of our Association and very much astonished that your Nominating Committee saw fit to put my humble self on the Executive, but I will try and merit this confidence and do all I can for the Association the coming year.

J. T. WEICHEL,
of M. Weichel & Sons, Elmira and Waterloo.

Elmira, Feb. 15.

A box for "complaints and suggestions regarding this and future conventions" was hung up at the convention door but few took advantage of the opportunity to express themselves. Evidently everybody was well satisfied.

An honorarium of $100 was voted the secretary by the convention at the close of the Wednesday afternoon session.

The Lufkin Rule Co. have offered to supply a novel badge for the delegates to next year's convention.

A rink of retailers composed of F. W. Otton, Barrie, C. R. Bailes, Oshawa, E. W. Brocklebank, Arthur, and G. A. Binns, Newmarket, curled a rink of Hamilton manufacturers on Thursday night, defeating them by 11 points to 8.

The delegates commenced to move away on Thursday morning but about four score remained to visit the Hamilton Steel and Iron Co's blast furnace on Friday morning. Another lot of about two dozen accepted an invitation from Col. Gartshore, of the McClary Mfg. Co., London, to spend Friday and Saturday at London as the guests of the McClary Co.

Taylor Forbes' bell was heard and seen everywhere. At six o'clock Wednesday morning it startled the Waldorf hotel guests, many of whom rushed into the corridors with their clothes in their arms. Then at the theatre party the belle rivalled the orchestra in occasioning before curtain applause.

The genial face of Secretary James Hardy, of the Canadian Wholesale Hardware Association was missed at the banquet, this being the first of the four dinners Mr. Hardy has not been present to add his word of advice and his appreciation of the value of trade organization.

J. H. Walker, general manager of the Dominion Belting Company, Hamilton, was a visitor at the convention on Thursday.

The Canadian Manufacturers' Association was represented at the convention by President Robert Hobson and Past Presidents C. C. Ballantyne and Cyrus Birge.

Brantford roofing was given a thorough test at the convention, rolls being spread on the floor and walked on, and given the roughest kind of usage. But as one bystander said: "You can walk on it, or jump on it, but you can't hurt Brantford roofing."

SOUVENIRS DISTRIBUTED.

Some very valuable souvenirs were distributed to the visiting members of the Association, the total value of these running into hundreds of dollars in the case of some firms. And coming as a complete surprise to the retailers the generosity of the manufacturers was all the more aapreciated.

Taylor, Forbes & Co., Guelph, were especially generous, giving out a beautiful pocket bill book in soft leather and containing no advertising whatever. Few delegates will forget, however, that it was given them by Adam Taylor, secretary of the well known Guelph firm during the Hamilton convention.

The Lufkin Rule Company of Canada, Windsor, were also to the front with several hundred five foot steel tapes, put up in neat boxes for distribution. The tape bears the "Made in Canada" motto which, in itself, is a reminder that this enterprising company has established on Canadian soil a thoroughly modern plant to supply the wants of Canadian hardwaremen and mechanics. J. A. Hossack, sales manager for Canada, also presented the members of the executive with special flasks in the form of 50 foot tapes.

The Gillette Razor Co., Montreal, distributed a gilt edge pack of cards with a special Gillette back, a second souvenir being a useful pocket looking glass with a calendar on the back and a third was a box of matches at each plate at the banquet table.

The Canadian Tool & Shovel Co., Hamilton, adopted the practical method of distributing their souvenir of a "bull dog shovel" tie pin in a neat case, by placing one at each guest's plate at the banquet.

The Standard Paint Company of Canada, Montreal, makers of "Ruberoid" and the F. W. Bird Company, Hamilton, manufacturers of "Paroid" roofing, handed out pocket change purses and loose leaf pocket note books respectively.

The Gurney Tilden Company, Hamilton, had a practical reminder in the form of a magazine lead pencil with a supply of lead, all in a neat box. The Hamilton Mirror Plate Company, Hamilton, and the Dominion Belting Company, Hamilton, also gave out souvenir lead pencils.

The Atkins Saw Company, Hamilton, supplied a neat coat pin and a hair comb in the form of a saw. The Ontario Lamp and Lantern Company, Hamilton, had souvenir lanterns hanging to a coat pin. Canadian Hart Wheels, Ltd., Hamilton presented each delegate with a "Beaver" oil stone; the Moffat Stove Company, Weston a paper knife; the Carborundum Company, Niagara Falls, N.Y., a carborundum tie pin; the Dover Manufacturing Company, Dover, N.H., calendars and sad irons; and the Martin Senour Co., Montreal, desk calendars.

VISIT TO STEEL PLANT.

Those who stayed over till Friday to accept the invitation of the Hamilton Steel and Iron Company to visit their blast furnaces and rolling mills were more than repaid for, as guests of Robert Hobson, the general manager of the company, every courtesy was shown them, a special run of metal being made for the benefit of the visitors and the complete process from smelting the ore to producing the finished product in the form of pig iron (foundry, basic and malleable), bar iron, bar steel, etc., was explained for the benefit of the visitors.

TRAVELERS ENROLLING.

Half a dozen hardware salesmen have already availed themselves of the opportunity given by last week's convention of enrolling as honorary members of the Ontario Retail Hardware and Stove Dealers Association.

All travelers calling on the hardware trade and selling hardware, stoves, paints or metals, etc., are eligible for honorary membership, the enrollment fee being $1 per year. Enrollment, however, must be voluntary as no canvass will be made to solicit travelers to join the Association.

Travelers' day at the convention next year will probably be the opening day, it having been suggested that this would be more satisfactory than the closing session as held this year.

As already announced, the Association has decided to offer the traveler sending in the most new members before the February, 1910 convention, will be presented with a handsome suit case suitably engraved. A minimum of ten members must be secured, however, by the traveler winning the prize.

A similar suit case is offered to the member bringing in the largest number the minimum being placed at five new members.

J. S. WEICHEL, ELMIRA,

Who Was "Surprised at the Magnitude of Our Association."

Retailers Banqueted by Hamilton Jobbers and Manufacturers

What was probably the greatest social gathering of retail merchants in Canadian history was the banquet at the Waldorf Hotel on Wednesday evening, tendered the members of the Retail Hardware Association by the hardware jobbers and manufacturers of Hamilton.

Two hundred and fifty hardwaremen—most of them retailers—sat down to as fine a spread as the money of the Hamilton hosts could buy.

A crowded and beautifully decorated room, a jolly company, a number of brief but meaty addresses, some well chosen entertainment, and an evening not too long drawn out, is the short story of the greatest night's fun participated in by Ontario hardwaremen since the organization of the association three years ago.

The hosts, the hardware jobbers and manufacturers of Hamilton, were unable to entertain the representatives of the manufacturers who by their trade exhibitions helped to make the convention a success. The largest banquet hall in Hamilton was secured, but it was barely capable of accommodating the visiting retail hardwaremen and the representatives of the local concerns who dug down into their jeans to provide the funds for the entertainment.

The enjoyableness of the convivial occasion was materially added to by the presence of the Musurgia Male Quartette, who contributed several admirable vocal selections.

The toast master was Robert Hobson, general manager of the Hamilton Steel & Iron Co., and the president of the Canadian Manufacturers' Association. He presided most acceptably and kept things in excellent running order, the proceedings never dragging or lacking energy.

The first toast, "The King," was enthusiastically honored by the singing of the National Anthem.

The chairman referred to the regretted absence of William and George Vallance, of Wood, Vallance & Co., owing to the death of their eldest brother, James Vallance, a Hamilton contractor. A toast was then drunk in silence in their honor.

J. I. McLaren, Mayor of Hamilton, in an appropriate way, welcomed the convention to Hamilton, and asked the convention to come back and visit Hamilton again.

C. R. McCullough, who some 16 years ago founded the Canadian Club movement, responded to the toast of "Canada." To-day there are forty Canadian Clubs throughout the Dominion. The toast was loyally honored by the great gathering singing the "Chant National."

Mr. McCullough said that the best response to the toast was the song just sung by the company, and Mr. Larivee, of Quebec, the author, had indeed been fortunate in composing such a song—the sentiment of which had won its way to the hearts of all. In an eloquent peroration the speaker referred to the growth and greatness of the Dominion and its brilliant future. Canada had the raw material to make her one of the greatest nations on earth.

The Retailers' Toasted.

"The Ontario Retail Hardware and Stove Dealers' Association" was next toasted by Mr. Hobson, who said the Association was composed of bright business men feeling the pulse of the country and its trade, and meeting the wants of the consumer. Canadians were beginning to realize their independence, and the nation to the south of us was now convinced that we had good right

CYRUS BIRGE, HAMILTON,

President of the Canada Screw Co. and one of the Speakers at the Banquet.

to realize that independence. We, in Canada, had no intention of cutting loose from Great Britain, and any talk of annexation to our neighbors over the border was dead. For a child three years old, the Retail Hardware Association was indeed a very sturdy youngster, and he wished it every success.

The retiring President, J. R. Hambly, spoke first, and was given a cordial reception. He referred to his pleasure at representing the Retail Hardware Association. He thanked Wood, Vallance & Co. for the invitation to meet again in Hamilton. They were a firm who knew how to do things right, and were one of the most reliable and truest to the retail trade. The Retail Hardware Association was young, but since the birth of the Association three years ago, good results had been accomplished and all had benefited by it whether retailer, jobber or manufacturer. They had had the time of their lives, and would never forget the kindness of the hardware jobbers and manufacturers in the Ambitious City.

Weston Wrigley, Secretary of the Association, said that the jobbers and manufacturers of Hamilton were entertaining the visitors nobly. The jobbers had apparently foreseen the large attendance and had called upon the manufacturers to assist, and they had responded generously. The gathering was assuredly a creditable one, considering the small beginning made three years ago. Mr. Wrigley dwelt upon the removal of all causes of jealousy brought about by the good work of the organization. Hardwaremen buy their goods from organized sellers, and receive their freight over organized railroads. Why not organize themselves, therefore, to see that their interests are protected. Organization was the watchword all along the line, and the keynote of the convention. It was to the advantage of every branch of the trade to have the retailers organize, reduce their stocks, adopt the cash system, and carry on business more profitably. All the discussions at the convention were such as to help in accomplishing this end.

F. C. Lariviere, Montreal, next gave a rollicking song.

The Baby Member.

M. S. Madole, Napanee, was the third speaker who responded to the toast. He was welcomed as "the baby member of the Association," and referred to the City of Hamilton as a wonderful manufacturing centre, where the amount of capital invested in local industries, by the 432 factories, was $28,000,000. Some 12,000 men were employed, while the manufactured output was $33,000,000 a year, and the total imports $12,000,000. Truly the place was entitled to be called the Ambitious City. He was glad to be present and was not sorry he had come and brought his membership fee with him. There was no conflict between the manufacturer and retailer so long as each confined themselves to legitimate channels of trade. He was merely throwing this out as a warning. He believed they had the utmost confidence in one another. The Retail Association stood for a better understanding among the members, as well as between the retailer and the wholesaler. The farming community stood for the best and brightest in Canada, and the retailers should give the farmer the fullest and freest information that they could.

Harold Hamilton then sang, the banqueters joining in the chorus of "Boys Will Be Boys."

Bay Hill, "the only unseated Senator of Hamilton," followed in a humorous speech, which aroused great merriment.

The Hardware Trade.

The next toast was "The Hardware and Metal Trade of Canada," coupled with the name of Cyrus Birge, Hamilton,

president of the Canada Screw Company, who congratulated the Retail Association on its great success. Organization to-day was necessary in all lines

ARTHUR HATCH, HAMILTON,

Representing the Canada Steel Goods Company on the Entertainment Committee.

of business, if a fair living trade, which was the due of all, was to be done. The Retail Association deserved success. Decide upon a fair profit and get it was his advice to the retailers. On behalf of the manufacturers he invited the Retail Hardware Association to meet again next year in Hamilton, and they would give them a better time than ever.

Strength in Unity.

F. C. Lariviere, of Montreal, spoke of the greatness of Canada and the good opinion held by the natives of Quebec for the people of Ontario. Those who raised the race cry did not represent the people at large. He congratulated the Association on the success of the convention.

"There are links," he said, "in the chain of every successful association which must be forged of nerve and perseverance. There are gaps which only nerve and persistence can bridge. Nerve to believe the things we think; nerve to do the things we plan. In visiting the Greening plant this morning you surely noticed when going through the mill, the 1½ or 2-inch wire rope which was being made. In looking at the numerous wires used the thought came to me that it was very easy to break one of these small wires, but when all were united it was impossible. Could we not apply the same principle to association work? If all the retail hardware merchants of the Province united and formed one solid body with good concentrated action you would very easily have redress in your just claims. What is impossible for one person alone to obtain is often feasible for an association. Every day proves the necessity for co-operation. In all association work we meet broad minded men interested in the general progress of commerce, and more especially in the trade we are engaged in. These men are precisely those who need least the benefit of the association and who regret the most the indifference of other dealers."

Continuing, Mr. Lariviere said that the hardware merchants get more out of conventions than anything else, as there were secrets which could only be communicated from mouth to ear. The members would learn that their competitors were not so mean and tricky and that they were all aiming at success. Mr. Lariviere was given three lusty cheers on concluding his broad minded address.

The Hardwaremen's Bible.

Col. J. B. MacLean was introduced as "the publisher of the Hardwaremen's Bible." It was, he said, an event in the history of the hardware trade of Ontario to have Mr. Lariviere, Montreal, at the banquet. Col. MacLean then told of the kindness he had received from the French-Canadians during his residence in Montreal. He referred to

S. H. ALEXANDER HAMILTON,

The Tireless Secretary of the Entertainment Committee, Representing Wood, Vallance & Co.

the bigness and broadness of the business men of Hamilton as compared with those of some other places. There was a tendency in some centres to hamper enterprise on the plea of safeguarding the public interest. In reality the cry was usually inspired by jealousy of those who would not risk their own capital, but who were afraid that those who did might make too great a success. The numerous important industries yet in their infancy, represented at the banquet and the others that must follow kept impressing these thoughts on his mind. A few years ago Hon. Robert Jaffray and certain other public-spirited Toronto men associated with some gentlemen across the line had sought to establish an iron and steel industry in Toronto. The civic authorities did not consider what a big assistance it would be to Toronto, many objections were made and the question was raised that Jaffray and his friends were going to make money out of the enterprise. A prejudice was thus created and owing to this the promoters located at Hamilton. Here the spirit and broad mindedness of the city were shown and the business interests grasped the situation. They did not care if money was to be made by some one so long as Hamilton landed the industry. This the city now had in the Hamilton Steel & Iron Works, of which the chairman, Robert Hobson, was at the head. But more important, still numerous other factories employing thousands of workmen had grown up about the steel plant. Col. MacLean endorsed fully the remarks of Mr. Madole in reference to the farmer. The most important question to-day to the retailers was how could they sell more goods. They could only dispose of additional goods by increasing the buying power of the farmer. The Ontario Agricultural College at Guelph was doing a work that meant much to the hardware trade. In Lindsay, for example, a branch agricultural school had been established, and Mr. Flavelle, of that town, had informed the speaker that the advantage of this school and the training in practical farming received there, meant that the farmers of the county would have three million dollars more to spend with the merchants in the various towns and villages of the ridings of North and South Victoria. The same would apply to all counties where such schools had been located. He told of a farmer on 32 acres who had made and expended in the last seven years $18,000 on his place, principally in new buildings. Nearly all this money had been spent with the retail hardware dealers in the town adjoining that farm. Whether they held the next convention in Ham-

F. H. WHITTON, HAMILTON,

Who Represented the Canada Screw Co. on the Entertainment Committee.

ilton or elsewhere, in order that the hardware men might witness the good work done at the Ontario Agricultural College and also to interest them in

increasing the buying power of their customers, Col. MacLean asked to be allowed to take the members, at the expense of Hardware and Metal, to see the model farm, and view the work being done there. What increased the earning power of the farmer brought prosperity to the merchant, and he felt that within ten years he would be repaid many times for any expense he might be put to in taking the hardware men to Guelph. The proposition was greeted with applause.

Mr. Hobson also spoke of the good work of the O.A.C. at Guelph, and what was being accomplished there.

D. Cinnamon, of Lindsay, who followed, said there were better days in store for the retail dealers of Ontario, and these meant better times for the wholesaler and manufacturer. He felt that it was a good thing to belong to the association and it was good to be here. He paid a warm compliment to the wholesalers and manufacturers of Hamilton. There were many in this city who did not realize what a great industrial centre it was, and there were people living in Canada who did not know their own country, yet traveled to the Old Country when they might better stay here and learn what a big and wealthy land they have.

"The Host" Toasted.

D. Brocklebank, the new president, said this was the greatest evening he had ever spent. The visit to the different factories was also much appreciated. He proposed a toast to the jobbers, the manufacturers, the travelers, and the City of Hamilton. In a word, "the hosts," was the toast.

A. W. Humphries, of Parkhill, past president, spoke briefly and referred to the early history of the association and its gratifying growth.

W. A. Rankin, of Ottawa, also made a few happy remarks and dwelt upon the success of the gathering.

Robert McCullough, of Hamilton, asked all to fill their glasses and drink to the health of the toastmaster, Robert Hobson. It was honored with great gusto and the recipient of the distinction pleasingly acknowledged the compliment paid him.

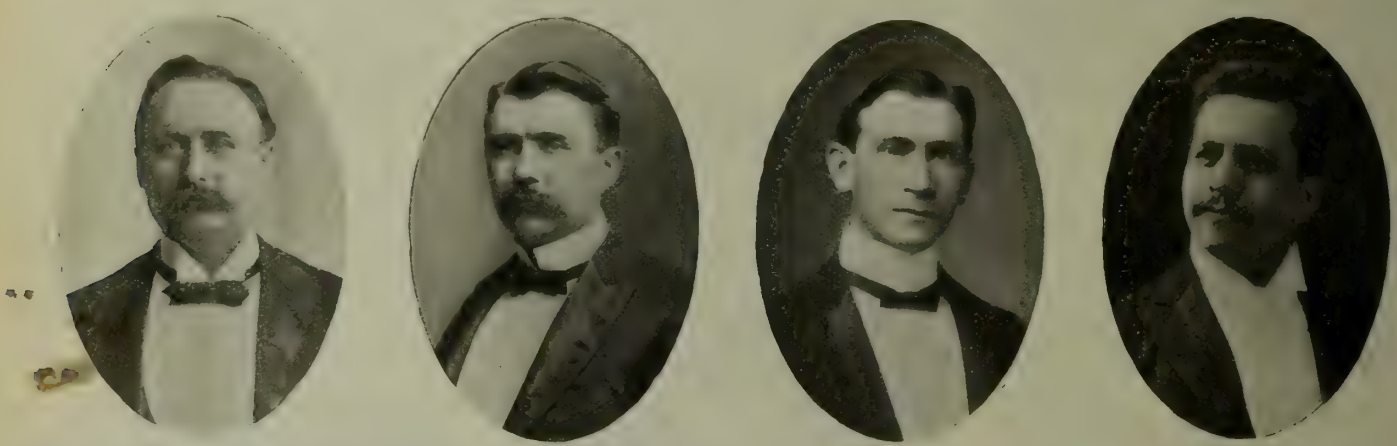
J. N. McGregor, Oakville, told a funny story, and the assembly closed a most enjoyable evening by singing with vim "Auld Lang Syne."

QUARTETTE SINGING AT BANQUET

A very interesting attraction at the hardware convention banquet, outside of the speeches was the singing of the Musurgia Quartette of Hamilton, made up as follows; Geo. Clark, first tenor; A. S. Devine, second tenor; Mr. Glassford, first bass; R. E. Devine, second bass. These four gentlemen have been singing for many years as a quartette and wherever they have sung have won unstinted praise. Such blending of voices is rarely heard. The selections they gave covered both classical and comical, and judging by the vociferous applause they received after each number, their singing was very much out of the ordinary. Mr. Glassford, who is to be found at the Meriden Britannia Co., looks after the business end of the organization.

THE THEATRE PARTY.

Retailers, jobbers and manufacturers celebrated the closing of the convention by adjourning to the Bennett Theatre on Thursday evening, where a programme of vaudeville was on the bill, some of the stunts, particularly the hand shadowing and the acrobatic exhibition will be long remembered. The feature seemed to be enjoyed by all.



The Masurgia Quartette Which Provided Excellent Music at the Banquet—From Left to Right, Geo. Clark, A. S. Devine, R. W. Glassford and R. E. Devine.

ANNUAL MEETING AT OTTAWA.

The annual meeting of the Ottawa Hardware Association was held on Tuesday night and was attended by a representative gathering, J. O. Richard presiding. A letter from the secretary of the Ontario Retail Hardware and Stove Dealers' Association, was read urging more members of the Ottawa association to affiliate with the Ontario association. The discussion of the letter was deferred until a later date. It was agreed to send letters of condolence to Mrs. W. Graham, and Mrs. C. A. Butterworth. It was decided to hold over for future consideration the question of the advisability of closing on Saturday afternoons during July and August.

J. G. Cowan, acting-treasurer, in the place of the late Mr. Graham, presented the accounts, and stated that their financial affairs, he was glad to say, were in a very satisfactory state. All members had paid up, and there was a clear balance of $76 odd. Mr. Cowan in reading his 7th annual report, referred to the proposition last year to close stores on Saturday afternoons during July and August. Each member was written to on the subject, but as the replies were not unanimous the matter was dropped. He had great pleasure in stating that no complaint had been reported officially with regard to any business transacted by the members. He regretted to report the death of two members on the same day. C. A. Butterworth and W. Graham, the latter having held office as treasurer since its organization. The reports were carried unanimously. In order to facilitate the attendance of members, it was decided to hold meetings on the first Tuesday in each month. A letter was read from G. N. Gray, of Lewis Bros., Montreal, offering the association the use of the sample room for their future meetings. The offer was received with thanks, and unanimously accepted.

The election of officers then took place. R. Mulhall was elected president; J. Kerr, vice-president; F. W. Mahon, second vice-president; W.A. Rankin, treasurer, while J. G. Cowan was re-elected secretary. Mr. Mulhall, in taking the chair, amid cheers, said that he would do all that he could to make their meetings successful, and he suggested bringing out the social end. W. Strachan, in speaking on the desirability of keeping the attendance up to the mark, referred to the good work done by the association, how it had brought the members together, and how they had been benefitted by the discussion of questions which affected all of them. Eventually it was decided that the officers be formed into a committee to devise some schedule of games to bring out the social end of the meetings. After business had been cleared off, cards were enjoyed.

AFTER THE CONVENTION.

"I am just in receipt of your favor advising me that your executive will later seriously consider holding a summer meeting in Montreal. By all means I would recommend as the most suitable time—during the summer months, say any time in August. I think it a capital idea that the members should bring their wives, daughters and lady friends, and I sincerely trust that the next meeting of your important Association will be held in this city."—C. C. Ballantyne, managing director, Sherwin Williams Company, Montreal.

"I cannot help but think all progressive hardwaremen in Ontario will desire to become members of the Association when they learn through Hardware and Metal the profitable and successful convention we had. I believe it's of more value to us from a business standpoint then we could gain in a year's experience in our business and I look forward to a larger increase in our membership during this year than we had in 1908."—J. R. Hambly, Barrie.

Display made by D. Maxwell & Sons, St. Mary's, in the Exhibition Room — Part of the AutoStrop Razor display to the Right.

One of the most enthusiastic exhibitors at the convention was J. A. Hossack, of the Lufkin Rule Company, of Canada. He found so many retailers who were surprised at the great variety of tapes and measuring devices made by his company at their factory, at Windsor, that he was delighted with the opportunity presented of showing his samples. As he says, the salesmen for the jobbing houses, have so many other lines to show that they must necessarily overlook or neglect some, and the comprehensive Lufkin line must frequently suffer. Mr. Hossack expects to receive a much greater demand for Lufkin goods from the jobbers as a result of the convention, and he says he'll be on hand next year with a better showing than he was able to make at Hamilton.

A. A. Bittues, managing director of the Gillette Safety Razor Company, Montreal, took a "keen" interest in the convention and on his return to Montreal, wrote the Association secretary: "My personal suggestion would be that next year you place your exhibits in some such edifice as the drill hall, allowing an equal amount of space to each exhibitor. This, it would be necessary to establish certain rules, which would hold the exhibitors in check. Hours could be established for the convention, and hours for exhibition. During convention hours, the exhibition should be closed and absolutely so. Thus the exhibits would, in no way, detract from the convention features. I quite appreciate the troubles of yourself and Mr. Hambly in trying to call the convention when each room of the hotel held from six to eight members of the Association. We, however, on our part, were always ready to close our doors, in order to eliminate this feature, and to assist. There is no doubt that there is no hotel in Ontario which can again take care of you, growing so large as your Association has grown."

Frank H. Brown, an old Ontario boy who had several years' experience as salesman for the John Lucas Company, Philadelphia, and is now Ontario sales representative for Brandram-Henderson, Limited, Montreal, was covering Western Ontario last week but found so many hardwaremen away at Hamilton, that he headed there himself, arriving on Wednesday and putting on a display of his company's advertising matter in the exhibit hall.

Mr. Brown's experience in the United States has taught him the value of retail hardware conventions and he says he hopes to be on the ground with a good display next year.

G. S. Dellinger, of Ford & Featherstone, Hamilton, who had an exhibit of Cary fire-proof safes at the convention, writes: "We formed some very pleasant business associations at last week's meeting and will be glad to have you keep us fully posted as to your next meeting, as the chances are that we would like to be represented. We trust that the business of the Association will run along smoothly during the present year, and that the convention next year will be the "best ever."

W. J. Shaw, with F. W. Bird & Son, Hamilton, writes:—"It is altogether likely we will be found among your list of exhibitors for next year. In this connection we might say that we hope you will give us timely warning of the place of convention, etc., so that we may make our arrangements accordingly. We think your idea regarding the selection of a large convention hall for next year, with proper facilities for arranging exhibits, is a good one. In any hotel, no matter how well conducted it may be, there is always to certain people a temptation in the hotel bar, which can largely be done away with by the use of a hall separate from the hotel. We think the idea of providing each member with a badge bearing his name and address is a very good one, as it enables the different firms interested to locate those with whom they do business, and yet who are not personally known to them. We hope this plan will be continued next year. Our representatives at the convention were Messrs. E. B. Wigle, H. F. Collins, G. S. Wakefield and W. J. Shaw, who all unite in thanking the officers of your Association for the courtesy shown them."

W. J. Telford, of the Supreme Heating Co., Welland, makes the suggestion that at next year's convention arrangements be made to allow stove manufacturers to set up and operate ranges. Facilities for this were not available at the Hamilton convention nor at the Toronto exhibition and Mr. Telford makes the point that with the ranges in operation hardwaremen will be better able to familiarize themselves with the construction and working of the ranges.

Fred Chalcraft, manager of the Brantford Roofing Company, Brantford, who with five other representatives of his company, attended the Hamilton convention, writes:—"We think the convention was a great success in the interest of the Hardware Dealers' Association, but as you have outlined in your circular letter of the 15th, it has outgrown hotel accommodation and if the convention is to be continued year after year, more suitable quarters should be obtained, where those who are desirable to exhibit may have better accommodation, and where the hotel bar influences will be entirely removed. At the same time as a manufaeturing firm, we think it is in the interest of the trade to meet all members of the Association once a year, and if there are any grievances, they can then be talked over, and a better understanding arrived at, as between manufacturer and dealer. We would also suggest that manufacturers have an opportunity during the convention to express their views as to the handling of goods and an improved method on the part of the retailer. If manufacturers had this opportunity, it occurs to me, some of the rough places could be smoothed out."

"I must compliment you on the success of your annual convention and upon getting the report published so promptly," writes Col. W. M. Gartshore, vice-president of the McClary Manufacturing Company, London.

The Question Box Discussion

Interesting Discussion at the Hamilton Convention Under the Leadership of Mr. Lariviere.

At the convention last week one of the most instructive and profitable features was the Question Box department, which was in charge of Fred. C. Lariviere, of Montreal. The members generally took part in the discussion, and some valuable pointers were brought out, Mr. Lariviere closing the debate on each topic.

The following are the queries, which were placed in the box, and attached to each is a summary of the views presented which cannot fail to be of interest and help to every dealer:

> Do you approve of "tagging" prices when making window displays?

Different opinions were expressed. One dealer thought it was not a good thing to do as it gave an opponent the opportunity of learning what goods you are pushing and the prices you are asking for them. For that reason he did not favor stating his prices. Another hardwareman said he never mentioned prices in his advertisement; that he talked of the quality and merit of the goods and he got excellent results from his advertising. Putting prices on articles in the windows might do for large city and departmental stores.

Mr. Lariviere did not agree with either speaker. He said: "In making your window display use price tags. As far as your competitor is concerned, change your display frequently and he cannot get ahead of you. You will thus lead the other fellow and keep him guessing as to what you will do next."

> What method have you for marking stoves and wire, and all heavy goods? Do you advise using a price book?

One delegate reported that he kept a price book with everything entered in it, including cost and selling price of all articles in the store.

Another dealer said he used the card system. All goods were marked in plain figures, the cost price, of course, being private. A third member said the same. Still another told of having small wire racks one on each counter, they being easily moved. Small cards or boards with the lists painted on were inserted in the racks.

Mr. Lariviere said that all goods which could be marked in plain figures should be. It was advisable to have all household articles so marked, but in the case of tools it was not. A man might be frightened away at seeing the price of a tool, but if its superiority was explained to him, he would doubtless purchase. On heavy goods linen tags were used in his store in Montreal, in addition to price books. A price book was kept in each department. A clerk should rarely, if ever, be called upon to consult the book, as not being able to give the figure asked promptly, as having to run around to consult some body or some book, caused uneasiness on the part of a buyer and made him or her feel as if they were being "done up."

> What remedy have we as retail merchants, where wholesale glass, oil and color dealers sell the consumer at the same price they sell us?

One man said: "We should not buy from such firms. I cannot suggest any other remedy. We should notify other retailers when we find wholesalers selling to consumers, at wholesale prices, thus showing to our fellow dealers that our interests are mutual.

A second speaker declared that the only thing they could do was to report offenders and allow the executive to deal with all transgressors. Each member should do his part and report every case to the Association.

A Western merchant objected to wholesale houses conducting a retail business.

A Northern delegate remarked: "I do not want to do business with a house that is selling to me and my customer at the same time."

Mr. Lariviere said: "Individually you should meet these cases, and collectively have the Secretary write the offenders, pointing out the harm being done to the retailer."

> Are jobbers who are both retailers and wholesalers responsible for large retailers getting there names on the jobber list? If the manufacturers confined their jobbing lists to exclusive wholesale concerns, would it not benefit the retailer in general?

Several members objected to retailers who are not jobbers being on the jobbers' list.

Mr. Lariviere said that if wholesalers stopped selling to consumers there would be no difficulty. Retailers should buy exclusively from wholesalers, and if any houses were found placing retailers on the jobbing list then go to the manufacturers as an Association and tell them what wholesalers should be on their list.

> What are the best colors to paint hardware store fronts? Also what inside colors would be best to use for store windows in order to show goods to the best effects?

The following suggestions were made: Front, black, and inside cherry; front, aluminum, inside, natural finish or cherry color. Another dealer said that black was bad and threw a shade so that articles in the windows did not appear to their best advantage. Still another hardwareman remarked that he covered his black store front with aluminum and afterwards finding that it was not suitable, changed to enamel white, and painted the inside a dead red, which combination was much admired.

Mr. Lariviere said that if a dealer was looking for an artistic effect, bottle green, cherry or white were suitable. The inside depended upon the nature of the wood. The natural finish looked very well, but much depended upon the light, etc.

> Is it not good policy for hardware merchants to take an active interest in movements tending to educate the farmers and help them to make their farms more productive? Will this not bring more business to the hardware store?

D. Cinnamon, of Lindsay, spoke of the good work being done by the Ontario Department of Agriculture and said different towns had been selected for agricultural schools where there were extended courses, and also short ones of four or five days, in judging seeds, stock, etc., which had been a great success. Mr. Cinnamon advised any town, which could get one of these branch schools, to do so. The more intelligent and progressive the farming community surrounding any place the more successful and profitable would be the trade done by the retailer. Any movement that tended to educate the farmer was of great benefit to the hardwaremen The more money people had to spend the greater would be the profit and business of the dealers, who should do all in their power to assist in this good work.

O. B. Henry, Drayton, who spoke both as a hardwareman and a farmer, asserted that the various Farmers' Institutes were doing a splendid work. The more enlightened the farmer, the better for the business man. Seed exhibits were also good.

W. H. Richardson, Essex, referred to the success of the branch school in his town. The district instructor had done good work. Anything in the direction of improving the farm and farm buildings meant additional business for the hardware merchant, and any county securing one of these schools would find it a decided advantage.

Mr. Lariviere fully concurred in all the views that had been expressed, and said that he could add nothing to the points already brought out in the interesting discussion.

> Which is the more explosive—benzine or gasolene?

The answer was that one was as explosive as the other. There was practically no difference.

> Does good buying depend most upon price or upon selection and quality?

Mr. Lariviere replied that this question had been fully answered in his paper on "How to Conduct a Retail Hardware Store."

Should we buy oil from a company who sells to hotel keepers, threshers, etc., direct, without giving any commission to any dealer?

Mr. Lariviere—It is a matter of judgment. If I could get oil elsewhere I would do so.

Could the association secure data from members as to the cost of doing business in order to help members in figuring their costs properly?

Mr. Lariviere replied that in September, 1907, he had suggested a means of securing this information in Hardware and Metal. If certain members desired fuller information they should write him and from the replies received he would be pleased to present definite data at a later date.

Does it pay to keep a retail store open after 7 p.m. on ordinary week days?

J. R. Hambly, Barrie, said it all depended on what the people had been educated to. In his town they closed every night except Saturday at six o'clock, and the found that they get the business just the same. They had educated their customers to early closing and believed in quitting at a regular hour, the same as mechanics and others.

A. W. Humphries, Parkhill, said in his town on three nights of the week they close at six o'clock, on two other nights at 6.30, and on Saturday at 10 o'clock. The plan had worked satisfactorily.

W. G. Scott, Mount Forest, said that they kept open evenings, but about the only thing they saw in the practice was that they burn a lot of fuel and electric light, and the hardware stores appeared to be a convenient place for the dry goods merchants and others to send parcels to so that customers could call for them. (Laughter.)

Mr. Lariviere said that their competitors kept open every night. His firm closed at six o'clock, except on Monday, when they kept open until nine, and on Saturday evenings at ten o'clock.

Is it advisable when making a sale of any large amount to get a signed order or to order the goods on the person's promise to accept them?

Mr. Lariviere—Writing is better than mere word of mouth. It perhaps does not make men more honest, but more careful and they only sign for what they want.

Is it advisable for a successful retail firm to establish a branch store in an adjoining town or village?

Mr. Lariviere—Not unless you have a good manager; or if you have a trusted, trained employe and your town is too small for your business to expand. In that case a branch store might help you, but generally it is better to devote your entire attention and energy to one store. Mr. Lariviere added that his firm always found the highest salaried men the cheapest. One good, alert, thoughtful, experienced clerk was worth two or three poor ones and would sell more goods.

A member stated in his opinion that no retail firm doing a business of less than $100,000 a year required two partners. Several dealers did not agree with this statement.

What is the best way to collect small accounts?

A dealer declared that he had found the collection forms supplied by the association were first-class, and had brought forth excellent results.

Mr. Lariviere remarked that a polite letter generally resulted fairly well. To flatter a debtor that he is honest and has evidently overlooked or neglected the matter of prompt settlement is better than insinuating that he is dishonest and that you are going to sue him because you do not believe he intends to pay. Do not threaten or press unfortunate people. When they recover from sickness, lack of employment, or other trouble, they will probably do you a good turn in many ways. "That has been our experience," concluded Mr. Lariviere, "in very many instances, that I could name, and they have spoken a good word for us on several occasions."

Do you do a cash business? Can a cash business be done in hardware?

This question was discussed at some length and will be fully gone into in a later issue of Hardware and Metal. The experiences of several hardware merchants who have recently introduced the cash system, telling how it works, the difficulties, etc., that had to be overcome will be dealt with.

What percentage of profit should a dealer add to the invoice price of general hardware?

Mr. Lariviere—The value of an article is measured by the man who wants it and, if he agrees to pay the price that is his business and not yours. I think I have answered the question regarding seventy-five per cent. of the things in the merit five per cent. of the things in the hardware business is no object in their sale. It depends on the class of goods, their superiority, value and what you can get for them.

As to percentage you have to average this over and above the cost of doing business. There is no other way. All expense should be put down in one book and all profit in another and, if you find you are not making a profit in certain departments, increase the price of the goods using, of course, good judgment. The cost price should not be considered so much as the value, and what makes value is, for the merchant looking at the goods, asking himself, "what can I get for them?" at the same time not considering the cost price. A stranger to the goods would pay the same and surely your judgment is as good as that of a stranger.

A Western Ontario hardwareman said that Mr. Lariviere was right. Any boy could get hold of an invoice and, by adding a certain percentage, mark up a selling price on the goods. The speaker knew a fancy goods dealer in Brantford who, on marking goods, paid no attention whatever to cost price, but based his figures by holding up the goods and saying to himself, "what can I get for this article?" The fancy goods merchant had proved a decided success in business.

Another representative said, "I put goods at as high a price as they can be sold for. We have, for instance two makes of razors both of which we can guarantee. One make costs us $4 a dozen and the other $9. Both give good satisfaction to the public and we get the same price for each razor—the $4 line is marked up as high as the $9 because we believe in selling goods for what we can get for them.

A visitor from the north asserted that never in checking off the goods from the invoice was the question of percentage taken into consideration. We mark all goods for what we think we can get for them. Where an article will stand a good margin we secure it. The best way to meet cheap competition is to get a distinct and separate line, talk quality and try to get the price.

What advantage can a retailer secure from his banker? Can a line of credit be arranged covering a year and can bank exchange be overcome? What is the best way to do your banking?

An Eastern Ontario dealer told how he had decided to take the bit in his teeth and submitted several questions to the managers of the two banks in his town. One manager had communicated with his head office and had received a prompt reply. The other had not sent the speaker a reply yet. The hardwareman secured the privilege of having cheques marked at par anywhere in Ontario or Quebec, whereas he used to reluctantly ask for such privilege when his paper was sent anywhere outside of Toronto, Ottawa or Montreal. "We used," he added "to have to forward express money orders and we now save the express charges or exchange. Getting money orders took up a lot of our bookkeeper's time but now we settle all amounts to any point by cheque payable at par and, since our new banking arrangements we have been able to reduce the staff by one clerk's time to go to the banker. Handle him firmly, he is in business the same as you are and you will find that, if your standing is good, you can get many of the rates cut in two. I suppose that I asked the two bankers eighteen or twenty questions each.

Another dealer said that he had to pay exchange at one time on nearly every cheque, but new banks had come into this town since then, and he found they were willing to give and take.

Another dealer added that in Cobourg where they had four banks any cheque of his for over $5 would go through at par and without any exchange. All ex-

change charge on drafts had been wiped out. Competition between the banks had done a great deal to bring about this state of affairs.

Another hardwareman declared that cheques in his town issued by him were payable at par at outside points.

Mr. Lariviere humorously observed that the best way of doing banking was to get all the money you could and deposit it as quickly as possible. Submit a statement of your affairs to your banker. If you show that you started with nothing and are now in comfortable circumstances you get better terms. A man's credit improves as he improves his business. It is much harder to get on in business with a large capital and make money than it is to start with nothing.

Does it pay to form a joint stock company?

Frank Taylor, Carleton Place, said that he might be prejudiced but he would not invest five cents with others in any business proposition that was not a joint stock company. Incorporation was so cheap now and its advantages so patent that the outlay, even with small companies amounted next to nothing. A company with $25,000 stock can obtain a charter for about $125, which would include all legal and other fees, while an organization with $75,000 could obtain letters patent, etc., for $225. Mr. Taylor described the necessary steps toward incorporation. Three provisional directors were required and application had to be made through an attorney to the Provincial Secretary to get the letters patent which provides for incorporators who could be given one share each.

But some one might ask, what better off are you after getting a charter? Well! for instance a partner might die and the friends of deceased widow might undertake to interfere in her behalf in the conduct of the business by the remaining partner, or tell her that she ought to get her money out. The result would be that new arrangements would have to be made, a sale called or the money raised somehow to pay off the interest of the deceased partner. The outcome was that, in getting the money out, the goodwill of the business would be impaired. Mr. Taylor considered that the goodwill should represent the amount of stock ordinarily carried. That meant a business with $20,000 stock should have or carry with it a goodwill of that amount.

In the case of a deceased partner's wife wishing to withdraw her interest suddenly, the remaining partner had to sell, probably at a very inopportune time, to raise the sum and satisfy the demand. This probably meant a sacrifice in many instances and, therefore, serious disturbance to the goodwill. In the case of children, their interests were protected in joint stock companies and the law acted as guardians of their interests. Dividends if earned, did not have to be paid on the whole stock, merely on what was paid up.

In going into partnership with another person should he perform something out of the way, you are jointly responsible to the full extent of all your worldly possessions. Under incorporation your financial responsibility is limited and you are liable for only the amount of stock that you hold. You can own your own home in your own name and do not have to seek refuge behind your wife. "I tell you what," declared Mr. Taylor, "I have not a great deal of respect for a man or his business ability when everything he should own himself is in his wife's name."

In taking on a new member or releasing an old one it can all be done quietly and without disturbing the business. This is all effected by selling or transferring old or by creating new stock whereas in a partnership arrangement one has to look around, if a new arrangement is desired, hunt up somebody who is willing to assume the interest, etc.

You can as an incorporated company get a letter of credit from manufacturers and jobbers, and also more considerations from the banks. As your responsibility is limited to the number of shares that you hold you can invest your surplus money in other industries or companies with perfect safety.

Mr. Lariviere endorsed all that had been said regarding the benefits and advantages of incorporation. Mr. Taylor had said that the goodwill of a business should represent the amount of stock ordinarily carried. Mr. Lariviere declared that, in his judgment, the goodwill of a business represented the net profits multiplied by ten. "That is what I regard the goodwill of our business worth," declared the speaker.

General Discussion.

During the discussion on various questions W. F. McPherson, Prescott, said there was a limit in every small town to the turnover of a man's business. As fast as one line developed prominently or profitably some other line fell off or was cut out. What was to be done to increase business? would the smaller dealer have to go to a larger town?

Mr. Lariviere said that, while certain stores did not increase their volume of business, they made greater profits and were content with them. The object should be to turn over stock frequently and not to carry too much stock. Four years ago the stock of his firm in Montreal was $140,000. This was regarded as too much and they had decided to reduce the bulk by $25,000, which was carried out and yet just as much business was done. It was not necessary in certain lines to have big quantities of goods on hand. Impress upon the customer who may be buying inside and outside door sets that he should get good sets and in his new house have the satisfaction of knowing that he would not have to apologize for the hardware used.

A member said that Mr. Lariviere was dealing with trade in a big city but in a country town conditions were different and a farmer would pay only so much for a door set and beyond that he would not go.

Mr. Lariviere still contended that conditions were largely the same and the hardware merchant should impress upon the builder that, if good hardware was used the building could be sold for a great deal more and the purchaser generally saw the force of such a reasonable argument.

O. B. Henry, Drayton, told how, along with his partner, he had developed a hardware business from a very small turnover. He believed, with Mr. Lariviere, that there was practically no limit to the trade which could be done even in a small place. Four years ago he quit the hardware business. His turnover that year had been $47,000 in cash while $16,000 in credit was on his books. He had run a mill and farm for a couple of years but had to go back to the hardware line as the man who bought him out had let the business dwindle to $18,000. Mr. Henry said last year he had brought it up to $35,000 and he hoped to have the business up to its old standard ere long.

A Toronto dealer said that he had been able to increase the volume of his business for the first five years, but of late had not been able to get the turnover any higher. The amount seemed to stay around $12,000 per year. He had done only $2,000 the first year and it had gone ahead rapidly until late. This ended the discussion.

A Practical Suggestion.

In closing the discussion, Mr. Lariviere said the exchange of ideas between members during the three days of our convention is productive of much good, but why not continue this intercourse by correspondence during the other 362 days of the year? He suggested that two members, far enough apart to have no conflicting interests, agree to correspond during the year, asking for and giving information to each other, for their mutual benefit. If one has any particular method of doing any special thing, in shop or office, which he thinks would interest his correspondent, tell him, and invite similar confidence. The same would apply to special lines of goods, which may prove ready and profitable sellers with one, and probably with the other if brought to his notice. Other matters could also be taken up in a similar way. It would pay every member present to pair off with some kindred spirit, and do each other good.

A number of questions left unanswered were taken by Mr. Lariviere, he promising to answer them on the Association page in future issues of Hardware and Metal.

LAYING COMPOSITION ROOFING.

H. H. Coward, of the Standard Paint Co., of Canada, Montreal, was asked to make some suggestions regarding the laying of roofing but the programme on Thursday afternoon was too long to reach this item before adjournment. The talk is an interesting one and is reproduced in full as follows:

The roofing question is absorbing the minds of every architect, builder, contractor and hardware house in the country to a greater extent than that of almost any other article in the line of house building, and the enormous demand for a first-class composition roofing has literally flashed the country with every possible description of roofings from the very cheapest and most worthless possible to produce, up to a first-class, reputable, dependable piece of goods. Every salesman who comes along sings you the same old song:

"I have the original,
I have the best,
Buy what I have,
Your sleep will be rest."

It may be true that all are good, but like the proverbial whiskey, "Some are better than the others." But the question now is, the best methods of obtaining the best results from the best of them all.

I find a diversity of opinion among the manufacturers of the various brands of composition roofings as to the best methods of applying same, and without going into detail on this point, would say that I think that depends greatly upon the goods to be used, as well as upon the building on which same is to be used. But I believe, if you will adhere strictly to the ideas which I am now going to suggest, the sweetness of your dreams shall not be disturbed by the night-mare of discontent among your customers.

In order to obtain the best results, the sheeting should be well seasoned, matched and laid close together. If the roofing is to be laid from the comb of the building to the eaves, as is generally recommended, cut the strips in the required lengths and if possible allow them to be exposed to the air twelve to twenty-four hours. Then begin by laying the goods from right to left, or vice-versa, taking pains to measure the laps both at the top and bottom of the roof in order to prevent having a two-inch lap in one instance and possibly a greater or less lap in the other. The lap should be uniform the full length of the building, to prevent buckling. Lay the first strip and apply ample cement, upon which you would lay the second strip, and so on, to a finish.

It is absolutely necessary and imperative that the cementing of the laps be perfect; and after the laps are made they should be pressed together with the hand or some instrument in order to make the cement adhere perfectly, under which circumstances scarcely a fear need be entertained as to satisfaction and service to be desired from the goods applied.

The flashing against chimneys, skylights, and coping walls should have a liberal allowance of cement, and be counter sunk at top of flashing, upon which, in order to protect yourself against any possibility of trouble, I would suggest the application of a clapboard securely fastened. You should no more expect satisfactory service from composition roofing, without properly laying and cementing it, than you should expect satisfactory service from tin or galvanized iron without crimping and soldering it at the seams. Take the same care in applying composition roofing that is taken in the application of tin, iron, shingles, and slate, and I do not fear contradiction when I assert that you will have a roofing of as great or greater durability and longevity than will be had in any other class of roofing material obtainable. But it is unreasonable, unjust and unfair to expect any roofing badly applied to give you the best results.

In behalf of the Standard Paint Co. of Canada I desire to express my sincere thanks to the executive committee of your association, for the courtesy paid us in asking a representative to make a talk upon the roofing question, and I hope I may have said something which will assist you in obtaining the best results from the best brands of the various composition roofings on the market to-day.

ADDITIONAL CONVENTION NOTES.

The Metallic Roofing Company was represented by five of its sales staff during the convention.

John M. Taylor, President of the Taylor-Forbes Co., Guelph, renewed many acquaintances at the convention on Friday.

Mr. Cross, in charge of the Auto-Strop Safety Razor display, had an interested group around his exhibit most of the time.

Mrs. J. W. Peart, St. Marys, writes the secretary, expressing her husband's appreciation of the thoughtfulness of the convention in sending a telegram hoping for his early recovery. "Mr. Peart enjoyed having read to him the report of the convention in last week's Hardware and Metal," adds Mrs. Peart.

HARDWARE TRADE GOSSIP.

Ontario.

H. E. Burgess, buyer for E. B. Davis, Cayuga, attended the funeral of his father at Thamesville last week.

E. A. Davey, of the firm Ingram & Davey, St. Thomas, will have charge of the cutlery and sporting goods departments in the new store.

T. Houghton, who for years has been with Rangvie Bros., of Sarnia, has become one of the traveling salesmen for the Hobbs Hardware Co., London.

T. Dodd, of Watford, who has for years successfully conducted a paying hardware business in that thriving little town, is now associated with the management of the Watford Wire Works, manufacturers of wire goods, as door mats, bed springs, hammocks and wire reinforcement for concrete floors, etc.

Mr. Brown, of Moore & Brown, hardwaremen, Sault Ste. Marie, visited Toronto last week to buy stock for the coming season. He stated that things at the Soo looked rosy for this year, and the construction of a new dry dock, the building of further additions to the steel plant and the extension of the railway would make that town hum industrially.

Quebec.

J. A. E. Plante, Montreal, has sold his hardware business.

Plans have been prepared by C. E. White, for the erection of a six storey warehouse for the Mitchell Hardware Co., Sherbrooke.

In the Montreal Wholesale Hardware Hockey League, Starke-Seybold, Montreal, defeated the Canadian Fairbanks Co. by 2 to 1. This makes the two teams even at the head of the league, both having lost only one match each. A cup to be donated by the honorary presidents of the league is now assured.

Thos L. Paton, Montreal, a well-known paint supplies importer, died suddenly at his home last week. Mr. Paton was very prominent in athletic circles. He was president of the Montreal Amateur Athletic Association, president of the Montreal Curling Club and vice-president of the Canadian Amateur Skating Association, and in his younger days he was a prominent lacrosse player.

A hockey match was played last week at the Dominion Rink, Lachine, between teams representing Caverhill, Learmont & Co., Montreal, and the Dominion Wire Mfg. Co., Montreal, and resulted in a victory for the latter team by a score of 2 goals to 0. This makes the fifth game the Wire Co. have won this season out of seven played, amongst those who suffered defeat at their hands are the Dominion Bridge Co. and the Allis-Chalmers-Bullock Co.

The West.

W. H. Dunlop, hardwareman, Regina, is succeeded by Dunlop & Marshall.

Ritz & Coblentz, hardware merchants, Lockwood, Sask., have dissolved.

Frank Reese, hardwaremen, Theodore, Sask., is succeeded in business by P. C. Larson.

E. Hale & Son, hardwaremen and implement dealers, Marshall, Sask., have assigned.

J. H. Medd, hardwareman, Carnduff, Sask., is succeeded in business by Rabeau & Glazier.

Thomas G. Dexter, of H. S. Howland, Sons & Co., Toronto, was a recent visitor to Calgary.

J. M. Hackney & Co., hardwaremen and implement dealers, Rosthern, Sask., are succeeded in business by Hackney & Tunnah.

The creditors of J. A. Carlton, hardware merchant, Lenore, Man., are asked to file claims with the Winnipeg Jobbers Credit Clearing House. The stock has been sold to W. H. Maher.

Mr. Lindenfield has sold his interest in the firm of Howard and Lindenfield sheet metal works, North Vancouver, to Mr. Kolonoski, and goes east where he has other and larger interests.

Fire originating in the basement of Walton & Cleave's hardware store at Carman, Man., seriously damaged the premises. The stock also is very badly damaged, the centre of the store being gutted and part of the stock falling through into the basement.

Maritime Provinces.

R. J. Turner & Son, hardware and crockery merchants, Truro, N. S., have dissolved.

PAINT NOTES.

The 1908 flaxseed crop of Canada is officially estimated at 1,546,241 bushels, valued at $1,457,000. The acreage was 139,300, which shows an average yield per acre of 11.1 bushels.

B. Vaillancourt, Quebec, has been awarded the contract for painting and glazing the new St. Sauveur Orphanage at St. Sauveur, a suburb of Quebec, at contract price of $2,000.

THE CONVENTION REPORT.

An accident in Hardware and Metal's pressroom has prevented the addition of a sufficient number of pages to include in this issue the able addresses of C. C. Ballantyne and Fred C. Lariviere at last week's Hamilton convention.

These addresses will appear in Hardware and Metal next week.

RAILWAY CERTIFICATES.

Had all the travelers and manufacturers' representatives attending the Hamilton convention joined with the retailers in securing "standard certificates" when buying one way tickets to the convention, there is no doubt but that everyone could have secured a single fare rate—that is, they would have paid three cents per mile to Hamilton and returned home free.

As it was there were not the required 300 to secure the return fare free and each delegate had to pay the 25 cents charged by the railways for the certificate and then a one cent per mile rate home.

Some delegates, however, misunderstood the certificates and failed to secure tickets before taking the train home. They, of course, then had to pay full single fare rate home but by handing to their local railway agent their certificate, along with the receipt given by the conductor, they will have no difficulty in securing a refund of two cents per mile for the return journey.

In addition to this the secretary is taking up with the Central Passenger Association the question of securing a rebate of the one third fare charged delegates for the return trip, it having been stated at the convention that other conventions, attended by fewer delegates than at Hamilton, had secured a single fare rate. Announcement of the outcome of this request will be announced on the Association page of Hardware and Metal in a future issue.

The large attendance at this year's convention practically assures the securing of a single fare rate to next year's gathering, and the executive will make every effort to make the railway arrangements for the next annual meeting as favorable as possible.

SOME CONVENTION LESSONS.

There were many lessons learned at the recent convention of retail hardware and stove dealers in Hamilton. The visitors carried away with them impressions and pointers which cannot fail to help them in the management and control of their stores. The spirit of co-operation and mutual assistance was manifested to a marked degree and the dealers were led to believe more in one another and the honest intentions and integrity of the other fellow who, before the formation of the Association three years ago, they had thought an enemy or a cut throat competitor. The lesson was firmly impressed that slashing prices was ruinous from every standpoint and resulted in great harm, not only to the man who began such tactics but to all members of the business in the same town. The disposition of trust, confidence and helpfulness was instanced in numerous cases whereby the dealer is enabled to make a living and some profit beside on his investment as well as to get rid of surplus stock and turn his goods over quickly.

Another point brought home was that there was practically no limit to the volume of business which a hardwareman might do if he studied carefully the wants of his customers and kept his eyes open for all that was new and progressive in his line. He must anticipate what will take with the public and not hang out for large margins on quick moving lines. Reduce stock was the watchword, turn over your goods quickly and be satisfied with a small return. In this way it was pointed out that much better results would be attained. It is not a question of what volume of business a man does during the year but how many times he can handle his stock. A $10,000 stock turned over half a dozen times is infinitely preferable to a $20,000 one turned over three times, and the profits are much larger. Do not overload yourself and be constantly harassed with obligations but keep a reasonable quantity of what is needed and make it move fast was sound advice. Another point urged upon the delegates was not to consider the buying price so much in the disposal of goods but to mark them at what the dealer thought he could get for them. To assume a hard and fixed principle that certain lines must carry so much margin was considered a mistake. The question was what the customer would be willing to pay when quality and worth are taken into consideration. It is not the fellow with the largest store, or shelves loaded down with an assortment of all and sundry, that makes the most money but the dealer who can keep things on the go.

Many a man left the convention determined to reduce a stock, which has been a positive burden to carry, by one half or one third, and at the same time was fully convinced that he would be able to do just as large a business by turning over a moderate amount of effects frequently. The effort to form local or county associations has resulted in much good being accomplished and by this means the spirit of organization and co-operation can be actively extended throughout the trade, a better understanding result and many difficulties and annoyances overcome. It was an inspiring sight to see dealer after dealer in the same town rise and tell how they and their competitors were all on a friendly footing and working with the utmost confidence and harmony. There is thus no room left for jealousies or back-biting. The honest, earnest hardwareman is too busy to bother about trivial affairs. He attends to his own business and his own customers and believes in the principle of living himself and letting others live at the same time. He thus shows that he is big and broad and recognizes that a competitor is not necessarily a stealthy, tricky opponent or mean antagonist anxious to knife him or steal his trade, but is simply catering to the same line of business with a perfect right to a fair share of it, animated by a strong, healthy and earnest desire to improve conditions generally and help along any good and useful move so long as it is in proper channels. All are striving to build up the commercial life and welfare of the community in the prosperity of which each is entitled to a just portion; thus the good of all is the good of each and the tone and standard of business are raised, confidence increased and the goal of happiness and success, to which port every man engaged in mercantile and other pursuits sets sail, is brought nearer and nearer with the onward march of time.

HANDLING METAL ROOFING.

The relations of hardwaremen and metal roofing manufacturers formed the subject of an interesting argument at the recent convention in Hamifton and, as a result of the discussion, which was taken part in by both dealers and representatives of the firms, a better understanding will doubtless result. Judging by the tone of the utterances there seems to have been considerable fault on both sides, and not a little unpleasantness in certain cases, arising out of several minor points. One thing seems certain, and that is, metal roofing and metal shingles are gaining in popular favor and the prediction was made that within the next decade, half of the barns in the country would be roofed with the material now being turned out by the makers of this fire and rain proof covering. Prejudice in any line is difficult and slow to overcome but the day is not far distant when wooden roofs will like wooden sidewalks and floors be a thing of the past now that concrete has supplanted planks.

With respect to the grievance of the hardwaremen Mr. Hambly, the retiring President of the Association, voiced the opinion of the majority of dealers when he said that the hardwaremen had been neglectful in taking up metal roofing in connection with their business. They had expected too large profits and were not content to give metal shingles enough attention and be satisfied with a small margin and a quick turnover. It was a natural line for the trade to handle being strictly a metal and they should not allow the opportunity to pass. He said that his dealings with the firm, which he represented, had been satisfactory and, where he had failed to land a contract and the firm had sold direct to the consumer, he had been given a regular commission on the business. No unfair advantage had been taken by the manufacturers whose goods he sold. Mr. Madole, of Napanee, bore like testimony to the advantage and profit in handling this class of goods although he complained that one firm had appointed a liveryman in his town as agent. Another merchant said that a hardwareman should have some backbone in undertaking work for metal roofing firms and not switch from one firm to the other and then expect to get business. The dealer should stick to one company and be known as its representative in his district.

The metal shingle men said that they were willing to stick by and protect the trade but the reason outsiders had been appointed in several instances as agents for their firms was because they had received little or no encouragement from the hardwaremen who were loath to take up this line of goods. Naturally they wanted to do all the business they could and desired an agent or representative at all important points. If the hardwaremen would stand by the manufacturers they would stand by the retailers.

No definite action was taken by the Association as a body but, as a result of the conference, a better understanding will prevail and the grievances, which have loomed up, largely disappear. New light was shed on the subject and good is likely to follow. Metal roofing is a line which naturally belongs to the hardware trade and, as there is a big field in this enterprise, thoughtful men will doubtless give the matter more attention and recognize that it affords a channel for opening a new connection with the farmer and the builder. The results, where dealers have gone extensively and earnestly into this proposition, seem to have been satisfactory in nearly every instance although a few complain that they have just cause for a kick. One strong reason advanced by a roofing representative as to why his firm would rather deal through the hardware interests than through outsiders, was because collections were more prompt and reliable, the hardware dealer meeting his bills satisfactorily, whereas, where manufacturers sold direct to the consumer, they often had to drive out into the country several times to get their pay which involved considerable expense and delay.

SMELTING BY ELECTRICITY.

According to the Iron Age the United States Steel Corporation has decided to introduce the Heroult electric furnace and steel process, after its engineers had made a close study of the mineral subject extending over two years, and have made a number of visits to the localities abroad where electric furnaces and methods are in operation. The outcome of these investigations is that it has been decided to put up one fifteen-ton Heroult furnace at the South Chicago works of the Illinois Steel Co., and one fifteen-ton furnace at the Washburn & Moon plant at Worcester of the American Steel & Wire Co.

"The United States Steel Corporation will, therefore," says the Iron Age, "be the pioneer in introducing electric refining both in the manufacture of tonnage products like rails and special steels for the wire industry."

The quality of rails has been a burning subject in recent years, and the plan of producing what will be equivalent to tool steel quality is one which raises high hopes for the future.

Canada has not been behind hand in the treatment of metal ores by electricity. Dr. Eugene Haanel was appointed several years ago by the Dominion Government to make just such experiments, and was given the office of Director of Mines. He returned lately from a visit to Dumnarfvet, Sweden, where he has been inspecting a new electric smelting process. As a result he is confident that the new method is a commercial success. What this means for Ontario and Quebec particularly, with their enormous supplies of iron ore, abundant water powers and lack of metallurgical fuel, can be seen at once.

In his first reports on the experiments at Sault Ste. Marie in 1905-6 Dr. Haanel stated that the new furnace installed there needed certain modifications to make it commercially practicable. His report awakened a lively interest in Sweden, as well as in other parts of the world where conditions are similar to those of central Canada. A Swedish company was organized to exploit the new process and work was carried on for a year and a half in eight new furnaces, constructed according to the results of the Canadian experiments described in Dr. Haanel's report. As soon as the company had their plant properly established and in complete working order Dr. Haanel was invited to inspect and pronounce upon it.

The new furnace is very similar to a blast furnace in which the "tuyers," that is, the apparatus for introducing the blast, are replaced by electrodes. A three-phased current is employed and about seven hundred horse-power delivered to the furnace, which is large enough to employ fifteen hundred horse-power.

Dr. Haanel assured himself that the furnace in every way met his expectations as a solution of the problem of electric smelting on a profitable commercial scale. The furnace worked well. The electrodes required no regulation, and the instruments showed that the current was steady and without fluctuation.

The Department of Mines will conduct this year a number of experiments in connection with gas producer engines which are becoming of increasing importance in the industrial life of the European continent. A model plant is being built in Ottawa on an acre of ground in the southern part of the city, and the machinery is now en route from Europe. Reports of the experiment will be issued from time to time in bulletin form.

It is the intention of the Mines Department to conduct experiments in the use of peat as fuel in this new plant.

Hardware and Metal Markets

(For detailed prices see Current Market Quotations, page 82.)

MARKETS IN BRIEF.

Montreal.

Tin—Stronger.
Copper—Weak.
Lead—Advanced 10c.

Toronto.

Wire Nails—Cutting, now $2.20.
Tinware—Easier.

MONTREAL HARDWARE MARKETS.

Montreal, Feb. 19.—Judging from the way in which trade has improved this week, and the brisker tone noticed all the way round, it would appear as if a strong spring movement was commencing to take effect. Booking for spring lines have greatly increased, and lawn mowers, gardening tools, poultry netting, etc., are now in good demand. Travelers report the existence of a much more confident feeling, and dealers seem to be wakening up to the fact that good spring trade is promising and that no time must now be lost in getting ready for the demand. The eastern trade has greatly improved this last week, and with the Montreal carnival drawing large crowds local business has been much better.

Immediate delivery orders are likewise improving. Lumbermen's tools are moving well, as are builders' hardware and household utensils. The markets keep firm, and there is a growing feeling of assurance all the way round.

BUILDERS' HARDWARE—Builders' hardware continues to show improvement, and some good orders for immediate delivery have been taken. Some heavy assorted orders for later delivery have also come in. We continue to quote: Discounts on door sets, 50 and 10; escutcheons, 50 and 10; escutcheon pins, steel, 50; brass, 55. Spring hinges, per gross, No. 20, $9.

SPRING LINES—Booking for spring lines are showing much better strength and it is evident that the real spring movement is now commencing to show. The general assorted character of the orders show the lightness of stocks all the way round. Harvest tools, lawn mowers, hose, hose nozzles, lawn sprinklers, gardeners' tools, ice cream freezers, screen doors, green wire cloth and poultry netting are now in improved demand, and shipping is commencing to get heavy. We quote: Screen doors, stained, $7.80; grained, $8.10; poultry netting, 60 and 2½; green wire cloth, $1.70 in 100 ft. rolls.

SPORTING GOODS—Generalsporting lines are still on the quiet side, but the movement in guns, ammunition and fishing tackle is showing better strength. We quote; Donimion rim cartridges and C. B. caps. 50 and 2½ per cent; B.B. caps, 50, 10, 2½ per cent.; Crown black powder, 18 per cent.

HOUSEHOLD UTENSILS — The stronger movement noticed in carpet sweepers, wash tubs, washing machines, wringers, brooms, baskets, pails and polishes continues, and satisfactory trade is opening up. Granite ware and tinware are also in strong request. We quote: Carpet sweepers, $2 and up; sad irons, Mrs. Potts', No. 55, 75c; No. 50, 80c per set; asbestos, $1.50; cake makers, $17.25 per dozen; bread makers, $18 per dozen and upwards.

LUMBERMEN'S SUPPLIES — Boot calks, cant hooks, peavies and binder chains are in good demand for immediate delivery. We quote: Boot calks, $4 to $4.25 per 1,000; wing calks, $6.50; cant hooks. $12 to $16 per dozen; axe handles, $1 upwards; axes, $6 upwards.

SUGARING SUPPLIES—As the sugaring season draws near, the movement in sap spouts, sap pails, bits and kettles becomes stronger. Trade up to now has been satisfactory. Sap bits are quoted at 50 off.

BOLTS AND NUTS—The demand continues to show better strength each week and good trade is opening up. We quote; Discounts on carriage bolts, ⅜ and smaller, 70; machine bolts, ⅜ and less, 60, 10 and 10; coach screws, 75; stove bolts, 80 and 7½. Wire nails are still quoted at $2.30.

SCREWS—The demand is improving in all sizes. We continue to quote: Discounts at 85 and 10 off for flat head bright; 80 and 10 off for round head bright; 75 and 10 for flat head brass, and 70 and 10 for round head brass.

WIRE — Orders show increasing strength, and trade is developing most satisfactorily. We continue to quote: Plain wire, $2.30 base; barb wire, $2.65 in straight and mixed car lots, and $2.70 in small lots. Galvanized wire, No. 9, $2.35 in straight and mixed car lots, and $2.40 small lots, f.o.b. Montreal. Coiled spring fencing, $2.65 straight and mixed car lots, and $2.75 small lots.

BRIGHT WIRE GOODS—Trade is showing better movement, and the recent change in discounts on gate hooks and eyes and screw hooks seems to be having a good effect. We quote; Gate hooks and eyes, and screw hooks at 60 and 20 per cent.; stove pipe eyes. screw eyes, and square hooks, 60 per cent.

TORONTO HARDWARE MARKETS.

Toronto, Feb. 19.—As was predicted in Hardware and Metal a couple of weeks ago, some cutting among jobbers is going on. At present wire nails are affected, but it is not unlikely that the cutting will touch other lines unless jobbers come together and have an understanding. Wire cloth is one line that may be affected. This cutting to some extent is responsible for the dullness of trade. Buyers hold off when the market is unsteady.

Tinware lines are slightly easier, though no specific change in prices is reported. General hardware lines are moving slowly. In fact, trading on the whole is quiet. Were it not that spring and summer orders for northern mining centres are being filled and shipped out now there would be a decided dullness to trade. The modern hardwareman, away from railway lines, is dependent on the weather to a great extent, and he can get in his goods while snow is on the ground much better than at any other season of the year. Tinware, builders' hardware and tools are the articles going out. Lanterns are about off. Inquiries still come in but they do not exactly presage future business.

SEASONABLE LINES—Snow shovels are moving better than last week and ashsifters, too, are fairly active. Skates and winter sporting goods are easing off and are not much in demand. Prices remain at the old figures, The season's business is hardly up to expectations.

WIRE NAILS—Some cutting has been indulged in, although individual jobbers repudiate the suggestion. The straight $2.30 quotation has come down through the tacking on of a rebate of 10 cents to a straight price of $2.20. Rumors are abroad regarding wire cloth, although it must be said nothing is unchanged from last quotation, and conditions may not get beyond the rumor stage. It is to be hoped so at all events.

SPRING GOODS—Orders are not coming in so rapidly as was anticipated a month ago, and while no disappointment is expressed the feeling in the trade could be much improved. Tinware and enamelware are the sought-after lines moving and lawn mowers from the manufacturers are shown by all jobbers.

BUILDERS' HARDWARE — Pretty active is this line when compared with other hardware lines. Hinges, lock sets, bolts and articles of that nature are going out, and not a few tools of various kinds are moving. Prospects are good.

ROPE AND TWINE — Unchanged conditions and prices prevail. Pure manilla twine is 11½c and orders are light.

WIRE—Galvanized barb is $2.90, and plain twist, $3.20. Coiled spring wire continues at $2.75 for Number 9. Galvanized wire is quoted at Pittsburg, base sizes 6 to 9, $2.25. Less than car lots 10c higher. Wire nails are unchanged at $2.30; poultry netting at 60 and 2½, and green wire cloth at $1, $6 in 100 ft. rolls.

HOUSEHOLD UTENSILS—This line is going out with spring orders and is

the bright feature of the hardware trade. Tinware is again sought after at the easier prices prevailing.

HEAVY GOODS—Bar iron is unchanged at $1.95. Stove bolts are 80 and 7½. Bright and steel wood screws, flat, 85 and 10 and round head, 80 and 10 per cent. Brass screws are, flat, 75 and 10, and round, 70 and 10. Business is not more than fair.

MONTREAL METAL MARKET.

February 19.—Trade maintains its promising tendency and a fair aggregation of orders is reported. Users of metals continue busy, although there is as yet no rush. The firmer feeling in tin this week brought in a lot of inquiries, and there is no doubt that good business will result if the market is kept firm. There is still but little desire to increase stocks, but the fact that metal is steadily wanted shows that industrial activity is progressing as well as could be expected. Lead has been advanced 10c, but tin, although it gave a strong jump during the week, has not been generally marked up. If the price continues to increase in London there should be a general advance next week.

As we have said, tin in the primary markets advanced strongly during the week. The bulls in the London market dropped into the lead again after a long spell of inactivity. Inquiry in New York is reported more general and increased interest is being taken in the metal. This is only to be expected with a bulling movement on. Copper is still in rough water. The English market has not been strong, and the movement in New York to bring about lower prices is still very active. Lead made a strong spurt during the week, and reached figures which were obtaining at the commencement of the year. Spelter continues steady in London, although there is an easier tone at St. Louis. Cleveland warrants are about steady, with nothing important to chronicle as to the English situation. The tone of the iron and steel markets in the States is still weak. The cutting in iron and steel plates and structural material outside the Steel Corporation has rendered the markets uneasy, although the cutting seems to have brought in some extra business.

PIG IRON—There is very little change in the pig iron situation. Local furnaces seem to be holding to prices. Imported pig is unchanged. There will be very little doing until the opening of navigation. We continue to quote: Middlesboro, No. 3, $19.50; Summerlee, No. 1, $21 to $21.50; No. 2, $20.50. Cleveland warrants are quoted at 48s., which is the same as our last week's figures. The situation in the Old Country remains about the same, although there is a more buoyant feeling owing to the rise in Consols and the growing opinion that trade is on the mend. The United States markets are quiet, with cutting going on in several directions by the independents. Rails do not seem to be touched, but many kinds of manufactured articles are being affected. Business seems to have been stimulated a little, but the markets are far from showing confidence.

TIN—Fair business has been done in a jobbing way. Large orders are, however, quiet. The improvement in the primary markets stiffened the markets, but we continue to quote 31½c. The state of the markets in London will be watched with interest. The bulls once again have been taking a hand, and as a result prices leaped up during the week. The legitimate demand either in London or New York cannot be considered very strong, although the advance naturally brought in many inquiries. There is undoubtedly good business waiting a steady market.

COPPER—With fair business showing there is little change in the copper situation, although the weak state of the primary markets has induced shading, and prices will be generally affected unless improvement takes place. We continue to quote 15c for small jobbing lots, the price being shaded for fair-sized orders. The London market showed further signs of weakness during the week, and as a result more cutting was noticed in New York. There is no strength to buying and the market seems at a standstill. The movement in operation for some time to bring about lower prices is developing in strength and consumers by keeping out of the market are helping things along.

LEAD—Fair business has been offering in lead and with the stiffening in the English market prices have been marked up 10c and we now quote imported pig $3.80, with Trail at about $3.70. The advance in the English market has been steady for the last two weeks, and the markets seem to be going back to the stronger figures around the commencement of the year.

SPELTER—Spelter is steady and orders are coming in quietly and well. There is no change in prices, and we continue to quote $5.50. The London market has been firm during the week, and on the whole the tendency of the metal is to improve. St. Louis, however, is somewhat weaker, although the decline is very slow.

TORONTO METAL MARKETS.

Toronto, February 19.—Still very quiet with not a single change in price. Were it not for the weekly fluctuations, up and down, every other day, the metal men might go asleep and wait for business. As it is they are waiting for business, but not going asleep. Uncertainty is abroad and until a common base is reached upon which to build up prices confidence will not be restored.

In the U.S. trade is but drifting along and existing on orders placed last November and December. Railway buying continues light across the line, but the three big Canadian lines have placed good orders for rails and rolling stock with Canadian industrial concerns.

A canvass of leading independent iron and steel companies in the U.S. has elicited statements that a cut in the price of many kinds of manufactured products, except rails, is contemplated. From a representative of the United States Steel Corporation, however, it was learned that no reduction is contemplated by that company, which well stand by its revised schedule of Jan., 1908 unless the attitude of the independents become sufficiently menacing to warrant further reductions. It was stated that cuts to be made by the independents are likely to range from $3 to $5 a ton, and will be made chiefly in the hope of stimulating business.

The production of iron and steel in Canada in 1908 was 563,672 tons, against 581,146 tons in 1907, a decrease of 17,474 tons, or about 3 per cent. In the first half of 1908 the production amounted to 307,074 tons, and in the second half to 256,598 tons, a decrease of 50,476 tons.

COPPER—Erratic but much more active than a week ago. Locally the price is yet 15c. The electrification of railways in Canada and the U. S. will take quite large quantities of copper. At present more than half the world's copper consumption is in small factories, and it is the little fellows who pay the high prices. Modern building construction takes—and will take more—large quantities of copper, and there are many new uses to which copper may be put arising from day to day.

TIN—More active is this metal, but the unfortunate irregularity continues. The price is yet at $30.

LEAD—Quiet but firm is lead this week Imported pigs are $3.80.

SPELTER—The quotation is still at $5.50. with conditions unchanged. Supplies are none too heavy.

SHEETS AND PLATES—Stock business still holds fair at unchanged prices.

OLD MATERIALS—Quiet business has ben done in old materials this week. Quotations unchanged.

U. S. IRON TRADE.

Cleveland, O., Feb. 17.—The Iron Trade Review says:—While it does not appear upon close observation that the trade in iron and steel products has reached the serious straits which some current reports indicate, it is evident that the general situation is being greatly retarded by certain influences present. Running orders, although of steady volume as in the recent past, are not increasing, and the attitude of the buyer continues that of closely guarding himself against obligations into the extended future.

The lack of faith in anticipating requirements is held to be due largely to a doubt over the stability of present iron and steel prices, upon which the unsettled tariff question is having a strong bearing. Similarly, the concessions which some independent companies are making is having the effect of arousing caution of consumers.

In this respect, the industry at present is apparently suffering from the ills of the market which date back a number of months. In some quarters at least, the practice has been pursued for a considerable time and there are buyers who declare that they are now able to obtain no better inducements that it was possible to command on attractive business months ago. The difference may be stated that, under present conditions, there is probably less disposition to cover tracks from those upholding the market. The past week has shown no special developments in finished lines. Pig iron, coke and old material continue dull and weak.

News of the Trade.

Ontario.

W. W. Cadman, tinsmith, St. Thomas, has sold his business to W. E. Meecham & Co.

Geo. A. Philips, stove and hardware merchant, King City, is advertising his business for sale.

William Scott, inventor and brass manufacturer, who died at an advanced age in Detroit, was known in Toronto, having lived in that city for some time.

Plans are being drawn for a new two-storey brick structure at Sarnia for Frank Martin, dealer in stoves, furniture, etc., to replace the present frame building. The plans call for a substantial and handsome building, with plate glass front.

White Bros., hardwaremen, Huntsville, have changed their firm name to the Huntsville Hardware, Ltd. J. W. White is president of the company. White Bros. is the oldest, save one, mercantile business in Huntsville. They were established twenty-one years ago, and have continuously operated their business during the intervening years.

The retail department of the Rice Lewis & Son building, corner of King and Victoria Streets, Toronto, is being renovated and brightened up. The charred wood and twisted metal fixings have been removed and replaced, and a thick coat of lime and whitewash applied, which has taken away the burnt odor and given a fresh appearance to the store.

The annual meeting of the shareholders of the National Hardware Co., Orillia, was held some days ago. Considering the unfavorable year for manufacturing, the year's business has been very satisfactory, and the report of the directors was unanimously adopted by the shareholders. The plant and buildings were in much better shape than the year precious, some long outstanding liabilities had been discharged, and cost of production had been reduced. It was considered not wise to declare a dividend, but the outlook for the coming year was exceedingly bright. The old Board of Directors was re-elected with H. A. Croxall as manager, and the appointment of Joseph Dunn as superintendent was approved.

Quebec.

The assets of J. H. Perrault, hardware merchant, Montreal, have been sold.

James Brodie, manufacturers' agent, Montreal, is on a trip to Great Britain.

A. J. Teakle, of H. & J. Young, Quebec, recently visited Montreal.

N. Lemieux & Fils, Quebec, have been registered as wholesale hardware merchants.

J. A. Paquin, St. Eustache, Que., was a recent visitor to Montreal hardware circles.

W. B. Snowball, first vice-president of the Maritime Board of Trade, has been visiting Montreal.

Allen Dods, who was in charge of the Vancouver branch of P. D. Dods Co., Montreal, is now at the headquarters of the firm, St. Patrick Street, Montreal, as secretary-treasurer.

J. Arthur Lapres will shortly join the traveling staff of the Wm. G. Hartranft Cement Company, Montreal, and will cover territory in Eastern Canada. Mr. Lapres has been connected with the R. G. Dun Mercantile Agency for the past few years.

Thos. Reid, identified as sales manager of the John Bertram & Sons Co., Dundas, for many years past, has moved his headquarters to Montreal where he will be associated with the Canadian Fairbanks Co., the general sales agents of the Bertram Co. On account of the importance of the Montreal machine tool market this move is evidently an advantageous one to both the Bertram Co. and the Canadian Fairbanks Co.

Andrew John Wood, the sales manager of the export department of the Montreal Rolling Mills, was married recently to Miss Maude Russell Baillie, daughter of James Baillie, Westmount, at St. Andrew's Church, Westmount, Montreal. The ceremony was performed by the Rev. W. J. Clark. The honeymoon was spent in Toronto, Chicago and Omaha. The staff of the Rolling Mills presented Mr. Woods with a solid silver tea set.

Western Canada.

Badger & Martin, Hardware merchants, Asquith, Sask., are succeeded by Badger & Son.

S. H. Abramovitch, hardware and furniture dealer, Winnipeg, has assigned and a meeting of creditors has been called.

Geo. Ashdown & Co., Morden, Man., have sold their hardware business to W. Allison Atkin and John Beattie. The new firm will be known as Atkins & Beattie. The business is one of the largest and most flourishing in town, and Ashdown & Co. have carried on the same for a number of years. Mr. Atkins is a practical tinsmith and has been a resident of Morden almost all his life, and is one of our most industrious young men. Mr. Beattie has been in the employ of Mr. Ashdown for about four years and is an expert hardware salesman and is most popular.

Maritime Notes.

Wm. Shepperd's tinsmith shop at Berwick, N.S., was burned recently.

Frank A. Wing has taken over the hardware business conducted by his father, W. J. Wing, at Westport, N.S.

MONTREAL HARDWARE HOCKEY MATCHES.

Two matches were played last week in the Montreal Wholesale Hockey League. In the first game the Canadian Fairbanks Co. defeated Caverhill, Learment Co. by 6 to 3.

Two matches were played recently

In the second game Starke-Seybold defeated Frothinham & Workman by 5 to 2.

TRACE CHAIN.

The B. Greening Wire Co., Hamilton, is calling attention to their new process trace chain, an interesting feature of which is the illustration of the chain after being subjected to a strain of 2,-315 lbs. without breaking. For a single team this would mean that a pair of traces would stand a strain of over two tons, which is far more than any horse could exert. Since the new process has been used not a single report has been received of a chain breaking.

A READY ROOFING GUIDE.

The great favor into which ready roofings have sprung within the last few years, and the volume of business which has developed as the result of their popularity, are wonders capable of being accomplished only in this era of great achievements.

The large demand has opened a field for the manufacture and exploitation of all sorts of roofings—good, bad and indifferent.

There is one roofing whose makers waive so-called secrets regarding its composition, and boldly proclaim that it is made of Trinidad Lake asphalt—that material which everybody knows is the perfect natural waterproofer and withstands every weather condition known. This is Genasco Ready Roofing, manufactured by a Philadelphia concern—the Barber Asphalt Paving Company. They are the largest producers of asphalt and largest manufacturers of ready roofing in the world, having used asphalt and experimented with it for more than a quarter of a century. This frank, open method of letting the public know what the roofing is made of enables people to judge its durability, and has greater selling effect than any secret methods possibly could have.

Genasco Ready Roofing has had a phenomenal sale, and this is due to the progressive methods of the concern, backed by the unquestioned quality of the roofing, and the definite written guarantee of this thirty-two-million-dollar organization. Dealers have been making a good thing out of this proposition. The field is growing, and the opportunities are enlarging every day.

Carry yourself with a self-confident air, an air of self-assurance, and you will not only inspire others with a belief in your strength, but you will come to believe in it yourself.

Trade News From Atlantic to Pacific

Maritime Provinces

Bathurst, N.B., Likely to Be Port of Shipment for Canadian Iron Corporation—Old Foundryman Dead.

HALIFAX.

February 15.—John Starr, the senior member of the electrical engineering and contracting firm of John Starr, Son & Co., died to-day. Mr. Starr was one of the best-known business men in Nova Scotia. His early life was spent in the hardware trade, and he and his brother David carried on business in that line for many years, but as electricity came into general use electrical supplies were largely handled by the firm, and in 1883 the firm of John Starr, Son & Co., electrical contractors, was founded by Mr. Starr. It is now the oldest established electrical supply house in Canada. The business expanded and some years ago became John Starr, Son & Co., Limited. John Starr introduced the American system of arc lighting in Halifax, Charlottetown, Moncton, St. John's, Nfld., and other places. He spent two or three years in London, Paris and Marseilles, where he also introduced the street electric lighting system.

Mr. Starr was in his eighty-first year. He leaves two sons, C. C. Starr, associated in business with his father, and David Starr, manager of the Electric Power Company in Glasgow, and four daughters.

There is very little improvement in business since last report. Stock-taking has been completed, and new goods are now commencing to come in. Some small sales have been made of ice tools, the season for ice-cutting being an unusually good one. The lumbering industry has also helped business some but the demand is only slight. There appears to be a general improvement in the price of lumber. Collections are only about an average.

The Acadia Cold Storage Co., which is composed of local business men, proposes to erect a plant in this city that will cost $300,000. The building will be five storeys, and it will have a frontage on three streets, and near the terminals where the ocean-going steamers stock. The building will be constructed of reinforced concrete, faced with buff brick, manufactured by the Mayhew Brick Co. of England. The outside walls and partitions will be insulated with granulated cork, manufactured by the Armstrong Cork Co., Montreal. The mechanical refrigerating plant will be installed by the Lindey British Refrigerating Co. of Canada. The company will install its own electrical plant, furnishing power and light, and the building will be fitted throughout with its own telephone system. Two large electric elevators will be installed, also a spiral chute running from the top to the bottom of the building. There is only one chute of this description east of San Francisco, and it is in one of the New York plants, it being a modern invention. The plant will be a modern one, and the capacity will be very large. The site has already been bonded.

ST. JOHN.

February 17.—Business with the hardware trade, both wholesale and retail is commencing to pick up and the prospects look bright for the future. There have been no changes in prices of any note.

With the general advance in rents this year it is expected that the number of families changing their residences will be very large and the hardware men expect to be kept busy supplying house cleaning materials, paints, etc.

Tenders for the new brick automobile garage which J. A. Pugsley proposes to build, were opened on Monday by architect G. Ernest Fairweather, but no award has yet been made.

Contracts for internal work on the new Seaman's Institute have been awarded as follows :—A. E. Hamilton, carpenter work ; B. Mooney & Sons, masonry ; J. E. Wilson, sheet metal work ; G. & E. Blake, plumbing.

Fifty steamers which have made returns to the customs house up to Feb. 13, have taken away goods valued at $10,417,553, of which $7,547,501 was Canadian goods and $2,870,052 foreign products.

The Fawcett Manufacturing Co., of Sackville, has just completed the fitting up of a large bathroom for the use of the employes.

The death occurred on February 14, of Samuel Myers, for many years a prominent foundryman and machinist. He was 85 years of age. He was for some years employed in the Harris & Alton foundry and later became a member of the firm of Myers, Masters & Myers. In 1843 he started business for himself on Waterloo street in the premises where the same trade is still carried on. He retired from business some years ago and was succeeded by his sons. He is survived by two sons, J. W., of Boston, and F. W., of this city.

W. E. H.

Province of Ontario

Hamilton Delighted With Hardware Convention Last Week—Trade Organization at Chatham—Price-Cutting at St. Thomas—Ottawa Hardwareman's Narrow Escape—Brantford Merchants Organizing—London Hardware and Stove Men May Get Together.

OTTAWA.

February 15.—Business in Ottawa at the present time is not very brisk, although there is no serious complaint being made as to the lack of trade. Advantage is being taken of the lull to take stock and re-arrange store cases and displays.

Wholesale houses report a good trade in lumber camp supplies, greatly in excess of last winter, a fact which rather augurs well for the approaching spring.

The Butterworth foundry is working overtime on rush orders for shanty heaters and shanty ranges. A bright outlook is presented for a good household range business by this firm towards spring.

Thomas McFarlane, of McFarlane & Douglas, had a rather unpleasant experience on Saturday afternoon. He was sitting in a cutter at the corner of Slater and Elgin Streets, when his horse took fright at a car coming down the hill and backed the cutter right onto the tracks. The sleigh was demolished and Mr. McFarlane thrown to the road, rolling down until he struck the bar connecting the front and rear wheels of the car. Caught in this position he was dragged several feet. He cannot clearly describe the occurrence from the time he left the sleigh, but he was conscious of his position beneath the car. All this time he maintained a grip on the reins, and so prevented the horse from getting away. There were no further ill-effects than a feeling of stiffness, when your correspondent was speaking to him to-day.

D. A. Rankin attended the convention at Hamilton last week.

Some dissatisfaction has been expressed with the action of certain hardware travelers, in taking orders from others than hardware men, for very small quantities of goods. The hardwaremen feel that the wholesale houses should deal with them only and not permit the jobbing of goods to those outside the trade, thereby losing possible business to the hardware retailer. The houses complained of are said to be Montreal firms, and the retailers hope they will not continue the practice.

Plans are in preparation for the alteration of the Howick Pavilion at the Central Canada Exhibition Grounds, into a Process Building. It is the intention of the directors to solicit the attendance of manufacturers generally, so that visitors to the Exhibition can observe the process of production of various marketed articles.

The Imperial Realty Co. will this summer erect one of the largest apartment houses in Canada. The structure will be eight storeys high, built of Indiana sandstone, steel and terra cotta, rendering it thus fireproof. It will be similar to the Linton Apartments in Montreal. H. C. Stone, of Montreal, has charge of the plans, and associated with him is James Mather, of Ottawa.—G. E. M. H.

BELLEVILLE.

February 16.—Nearly all of the local retail hardware dealers report business quite satisfactory. The very mild winter caused a decrease in sales in some lines, but all are optimistic of a splendid spring trade. Plumbers also report business dull, the mild weather being held responsible.

The Belleville Hardware Company, one of the leading industries of this city, is in a most prosperous condition. It is said that T. S. Carman, proprietor of the Belleville Ontario newspaper, and one of the shrewdest business men in the city, will soon have the controlling interest in this concern. The annual meeting of the shareholders was held last week when the following directors were elected: T. S. Carman, ex-Mayor Allan McFee, W. Springer, S. E. Carman, F. E. O'Flynn, D. R. Leemens and E. G. Sills, ex-M.P.P. At a subsequent meeting of the directors the following officers were appointed: President, T. S. Carman; Vice-President, ex-Mayor McFee; Managing Director, W. Springer.

The annual meeting of the Brass & Steel Goods, Ltd., our youngest industry, took place recently at their office on Coleman Street. This was well attended, and much interest was evinced by those present in the reading of the directors' and financial reports. Considering the general setback in trade and the financial panic through which the country has passed during the establishment of this industry, and its gaining a selling connection for its output, it has indeed made splendid progress. Orders for present requirements are on the books from among the best firms in the Dominion, and owing to most of the goods manufactured having been previously imported, a ready sale is insured for an increased output. About 50 hands are already in the employment of the company, who, by the way, are to be congratulated in working in such commodious and pleasant surroundings. Many a citizen expresses satisfaction on looking over the river and seeing the well-lighted factory, as it appears after dark, and wishes well those connected with it. The following directors were elected: J. F. Wills, P. C. Jones, C. I. White, H. Pringle, H. C. Hunt. At a subsequent meeting of the directors the following officers were elected: J. F. Wills, President; P. C. Jones, Vice-President and Treasurer; H. C. Hunt, Managing Director and Secretary.—F. J. M.

PETERBORO.

February 14.—Knox Presbyterian congregation has decided to build a new church which will cost in the neighborhood of $30,000. The work of erecting the All Saints' (Anglican) Church has been begun, and will be completed, if possible, this year. The stonecutters are preparing the granite for the trimmings. A large supply has been imported from Quebec and will prove an adornment to the exterior.

Best's hardware store is showing a fine window of enamelled ware, the Peterboro Hardware miscellaneous goods, and the Kingan Hardware has a window of knives arranged in a neat and attractive manner.

Harry Morgan, of the Peterboro Hardware Co. attended the convention of the Retail Hardware Merchants' Association and was one of those appointed to the executive.

The trade is not unusually active, but there is every expectation that in a short time business will open up briskly.

Alexander & Miller, electrical contractors, have just completed the wiring of the new store which Knox Co. will open up in a week or so on George St. They have also finished the wiring of the new Bank of Montreal building, in Sterling, and the building of the same bank at Trenton. They were also responsible for the wiring of the new St. James Methodist Church, which will be opened this summer.

MacGregor & Reid, electricians, entertained their staff of employes to a banquet at Coleman's restaurant last Wednesday night. A hearty vote of thanks was passed to the employers at the conclusion of the banquet, which proved an enjoyable affair.

The chief of police has issued a warning that sleighs and cutters must have bells or a fine will be imposed according to the law.

The Otonabee Navigation Co. have decided to build a new steel steamer for use on the Kawartha waters, probably sailing between Rice Lake and Lake Simcoe. They have also purchased two of the steamers of the Trent Valley Navigation Co.'s fleet and now have a formidable line for their summer work.

A. B. Cunningham has disposed of his interests with the Collier-Cunningham Co. and has accepted the position of superintendent of the new Peterboro Metre Co. He has been a partner of the Collier-Cunningham Co. since its inception.

Weatherstone & Sons, manufacturers of door mats, etc., have completed the foundation for a new factory, which was found necessary owing to their business having outgrown the present premises.—H. T.

BEAVERTON.

Feb. 16.—Trade is rather quiet at the present time, but the merchants of the town have a hopeful feeling prevailing amongst them, that business looks brighter for the spring trade, though at the present time, with sleighing all gone and mild weather with us, leaves a lot of winter stock on hand, which would have moved out had sleighing continued.

Quite an interest is taken in our town over "Gowganda" the new silver country, on account of A. C. McKenzie living in town, who is in partnership with Mr. Cowan, of Cannington in running the Gowanda Transportation Company from Sellwood to Gowanda. Mr. McKenzie has about sixty men from town working for him, among them is H. S. Cameron, of the firm of Cameron & Cameron, hardware merchants, who is looking after the freight and business end at Gowanda.

Our town is to take a vote on a by-law for a new town hall to be built this year and if it carries, the hall will consists of an opera house, court house, fire hall, offices, market and jail.

Contracts are let for eighteen new summer cottages at the lake front for tourists, which should make things lively in the building line this spring.

The R. C. people are building a large brick church and manse this spring. Both buildings will be of red brick.

Don McKay is drawing out the timber for a large bank barn, 85 x 50, to be erected on his farm this summer.

Louis Farrell is to erect a large modern house on his farm this summer to cost about $4,500.

W. C.

NEWCASTLE.

February 16.—John J. Drummond, of the Canada Iron Corporation, and his civil engineer, Mr. Parsons, have lately examined Newcastle, Chatham and Campbellton as possible sites for the shipment of ore from the mines near Bathurst. The general opinion, however, is that Bathurst or Newcastle will get the plum. Bathurst is making great efforts to convince the company to ship from that port. Bathurst harbor will have to be dredged at a cost of nearly a million dollars before it will admit large vessels.

The Canadian Antimony Co., of Lake George, York Co., intend re-opening their antimony mine and build a smelter at Lake George and branch railway to Harvey Station on the C.P.R. Ore was once mined there in paying quantities. The company asks exemption from royalties for twenty years.

H. H. S.

HAMILTON.

Feb. 16.—Your correspondent this week interviewed a number of hardwaremen and manufacturers as to the impressions and hints which they received from the convention of the Ontario Hardware and Stove Dealers' Association held here last week. Everyone of them spoken to seemed to be imbued with very pleasant recollections of the convention, seemed to portray in fact that they felt as though a long looked for treat had come and gone. And yet again this feeling seemed to be supplemented by the hope that the convention would be held here again. Looks may be deceiving but from the unhesitating manner in which these gentlemen all expressed the hope that Hamilton would be successful in again landing the convention proved their sincerity beyond the question of a doubt.

"It was a dandy convention," said Stanley Mills, head of the big department store of which the separate hardware store is one of the chief departments. He went on to say that the convention was very instrumental in bringing together the local as well as the outside dealers and manufacturers, cementing them in a bond of union and fellowship which did not exist before. Mr. Mills expressed regret that owing to having to devote his time almost solely to the "Made in Hamilton" exhibit which was in progress in his store at the time, that he was unable to attend any of the business sessions

where he understood there was a wide and learned exchange of ideas, but he had great pleasure in attending the banquet. Many of the delegates to the convention attended the exhibition given by his firm and he was deeply impressed by the friendly manner in wkich they made his acquaintance. Nearly all of them asked about some particular feature of the exhibition as well as the system of advertising adopted by the firm. At the banquet he was very much pleased by the very friendly feeling expressed by all the speakers.

"The convention to my mind had the effect of bringing the hardware trade more into prominence than it has ever been before. In the past the general public, I think has looked upon dry goods as the leading line in trade but this convention has brought the hardware business more to the front. Further I think the delegates were convinced that no better place could have entertained them. I hope that we will be successful in getting the convention again next year," said Mr. Mills.

"I was not able to attend any of the meetings owing to a cold but our travelers were all there and they told me that the convention was a great success," said W. Jamieson, of Bowes, Jamieson & Company, stove manufacturers. "I think much good will come of it and I sincerely hope the convention will come back next year."

A. Donald, manager of the Canada Wire Goods Company, said there was no question of the idea of the convention being in the right direction from the hardwareman's standpoint. The manufacturers who exhibited also found it a good thing to enable them to get in touch with the men with whom they wanted to do business. He thought the idea a splendid one and one which should be encouraged. He was enthusiastic in favor of the convention being held here next year again.

Ald. A. J. Wright, who is a member of the firm of Wright Brothers, retail hardware dealers, said the movement, meaning the association, was one of those things which should have been brought to a head before. From the addresses he heard at the convention he was surprised to learn of the good work the Association was doing in bringing the different competitors together and in protecting the retailers from unscrupulous manufacturers and wholesalers. It also results in the trade being better informed all round.

Stanley D. Robinson, of the D. Moore Company, said : "The convention was a great meeting for all hardwaremen, as it not only cemented the friendship of those that attended but will undoubtedly be the means of bettering the situation of the hardwareman by being in touch with his confrere to his ultimate interest financially and otherwise. The convention just held will, we believe be a fore-runner of an annual affair to be looked forward to, and we believe it was such a success that every hardwareman and stoveman within reasonable distance will become members of the Association, and attend the conventions to their ultimate profit. The wholesalers as well as the manufacturers have very much appreciated the opportunity afforded to them in coming in touch with so many dealers, which we might say have now become their friends by meeting them under such favorable conditions, and this firm extends their best wishes for the prosperity of the Retail Hardware Association.

Hamilton has landed another new industry in the Canadian branch of the McCaskey Register Company, of Alliance, Ohio. This promises to be one of the best concerns which have been secured in some time. The firm manufactures account registers which are a sort of writing system for keeping accounts and which eliminate the bookkeeper, sales book, cash book, day book and ledger. The article has met with a large sale in the United States and the firm has secured the Canadian patents on it. The firm has secured an option on a building at the corner of Hughson and Rebecca streets and will start to manufacture right away so that its product will be on the market about March.

The "Made in Hamilton" exhibit of the Stanley Mills company, was visited by 60,000 people who saw the display during the two weeks it was in progress and judging by the questions which were asked about it the probability is that before long firms in many other cities, or the municipal corporations themselves will undertake such a show. The exhibit received official recognition from the mayor and many of the public officials and they suggested that the city take the show over and enlarge on it. Another suggestion made was that the local manufacturers should combine for the purpose of securing a separate building at the Toronto exhibition each year for the sole display of Hamilton made goods.

This city is to have an exhibition of its own this year which it is intended to make an annual affair. It will be held early in the spring for a couple of weeks in connection with the opening of a new summer park in the eastern limits of the city. Merchants, manufacturers and other business men are going into the scheme with the object of booming the manufacturing and mercantile interests of the city.

The annual conference between the stove manufacturers and the molders' union is on again. There is no strike and both parties are trying to reach an amicable arrangement of the wages for this year so as to guard against any interruption in work. The international union officers are here conferring with the bosses.

Among those whose names have been suggested as members of the proposed civic industrial committee to act with the aldermen are P. J. Myler of the Canadian Westinghouse Company; Arthur Hatch, of the Canadian Steel Goods Company; Robert Hobson, president of the Canadian Manufacturers' Association and manager of the Hamilton Steel & Iron Company, and W. B. Champ, of the Hamilton Bridge Works Company.

The Canada Wire Goods Company is working on a contract for the city municipality of Fernie, B.C., in supplying the cells for the new prison there. The firm is making a specialty of this work now and has just completed the cells in one of Montreal's new police stations and has received the contract for similar work on another one. The firm has also got orders for cells in a number of smaller towns.

The D. Moore Company, Limited, Hamilton, will be making a change in their traveling staff this year which will be no doubt regretted by a great many of their customers as well as by the company. Colin Munro, who has traveled for the above company for the greater portion of his life-time, is leaving the company's services, much to their regret, and he will be succeeded in his district by A. L. Robinson, who has been in the company's employ for about four years; therefore in Mr. Robinson the company will have representing them a young man who is thoroughly familiar with their lines and construction, and his genial manner will no doubt bring him many friends.

BRANTFORD.

Feb. 16.—A representative meeting of local merchants was held in the Y.M.C.A. rooms on Wednesday last to discuss the advisability of the formation of an organization among the retail body for protective purposes, and for the carrying out of plans that would prove helpful and profitable in the matter of bringing retail trade to the city. Nothing definite was arrived at. A committee, consisting of J. M. Young, W. R. Turnbull, C. F. Ramsay, Hugh Howie and F. J. Colbeck, was appointed to look into the matter. The alternative of either co-operating with the Board of Trade or forming a retail merchants' club will be considered, and a report will be submitted at a general meeting at a later date. The next meeting may take the form of a banquet or luncheon. Speaking of the proposed organization to your correspondent, a prominent dealer here said that the object of organizing was to boost Brantford, secure better railroad facilities, better radial rates, and a rural telephone exchange throughout the county. These matters would redound greatly to the benefit of local retail trade, and such an organization will fill a long felt want.

Stove peddlers are meeting with good success in the neighborhood, according to reports received here.

The matter of appointing a publicity commissioner is being pushed ahead. local papers are advocating such an appointment, and the matter will be discussed at the next meeting of the city council. The success of Welland and Peterborough are pointed out as examples to follow.

Efforts are being made by local hardware merchants to have the convention of the Ontario Hardware Association here next year. With a fine array of hardware stores, and numerous factories connected with the hardware trade, the city of Brantford should prove an ideal place for the holding of the convention. The hotels and railroad facilities are excellent.

J. H. Crow was the successful tenderer for the plumbing of four houses to be built at Welland, by B. J. McCormick.

It is rumored that the city of Stratford is endeavoring to secure the Sanderson-Harold Co., manufacturers of screen doors and refrigerators, Paris. Should they remove, another factory on the same lines will be commenced in Paris, by local men.

The Dunnville, Wellandport, and Beamsville electric railway will apply at the next session of the Legislature for an act extending its line from Beamsville to Jordan Harbor.

Brantford hardware merchants note with satisfaction that they are represented on the officers' list of the Ontario Hardware Association, A. Ballantyne having been elected vice-president. The local merchants who were at the convention report a splendid session, and an enjoyable and profitable time spent.

It has been decided not to hold an Old Home Week here this year, and it has been postponed until 1910. The merchants here have promised their heartiest support, but as there will be so many new streets and sidewalks laid it was thought better to wait for a year, when more ample provisions will be made for a gala time. The merchants expect to reap a harvest.

S. R. Maneer, Port Dover, has begun the manufacture of ladders of all kinds.

The Haldimand County Council has decided to build an industrial home at Dunnville, this summer.

S. J. Rendle, Paris, has opened up a tinsmithing shop over the office of the Dominion Gas Co., Paris.

Schultz Bros., manufacturers of brick and general building contractors, have purchased several lots adjacent to their present factory, and will build an extensive addition.

Fire chief Lewis is recommending that a new heating system be installed in the fire hall, and that other improvements and additions be made, including the purchase of a new fire steamer.

A. W.

ST. THOMAS.

Feb.16.—S. A Crawford has a good window display, showing saws, axes, etc. In the center is a big log with a x cut saw in cut. On the floor is strewn dried leaves which makes a very realistic scene.

W. W. Cadman has sold his tinsmith business to Meecham Bros., who have been doing a plumbing business. This is a young firm, who have great prospects before them.

The Board of Education have under advisement the changing of the heating system of the Wellington St. school to the same as installed in the Balaklara St. school by Jas. Smart & Co., of Brockville.

Ingram & Darey will open for business their new store on Wednesday, but will have a formal opening later.

Ingram & Darey secured the contract for the Street Railway supplies for 1909.

J. A. Bell, City Engineer, one of the best authorities on current bridge construction has been asked by the Kent County Council to make plans for a swing bridge over the Thames, below Chatham.

A proposition is on foot for R. H. Blackmore to move his hardware business to the store lately occupied by Ingram & Darey, so that his building may be occupied by an auto garage. Mr. Blackmore attended the convention at Hamilton last week.

The prospects for a cut in wire prices is looming up. A party in Furgal is quoting $2.75 on barb and the same on crimped wire. This is one of the evils the St. Thomas merchants are up against, that is small dealers near the city making cut prices although some are to blame themselves as one merchant is selling glass at 60c for small lots. Your correspondent expects in the near future to go more fully into an argument for an understanding among the trade for a fair margin on sales.

G. F.

LONDON.

Feb. 16.—Local retailers report business in the hardware line which of late has been rather quiet to be brightening up, last week showing considerable improvement. The outlook is regarded as bright.

Westman's hardware has occupied the old stand on Dundas street which was gutted by fire last summer. The store as now fitted up presents an attractive appearance.

The possibility that the Retail Hardware Merchants' Association of Ontario may accept the invitation to hold its next meeting in this city revives the question of the advisability of organization of the trade here. At present we have no such organization, what delegates from London that attended the Hamilton convention having been invited as individual dealers. A Dundas St. hardware man discussing the subject this morning said :—"There is no use organizing the hardware men if store dealers are left out, as has been the case in the past, for most of these men carry certain lines of hardware. I would ask what is the use of taking in hardware men who carry stoves as a side line and leaving out stove dealers who carry hardware on the side? My idea of organization is not a hardware dealers' association simply, but a hardware and metal association. Only from organization of that kind can any good be expected."

Londoners who attended the Hamilton hardware convention are loud in their praise of the hospitality of the people of the ambitious city. That is probably why the London men are so anxious to get the next convention here.

It is reported that the Ontario Asphalt Block Company will establish a branch in London and make a bid for the paving work of this city. A representative of the company was here recently and discussed the matter with a number of interested citizens.

It is not at all unlikely that the coming summer will see the extension of the South Western Traction Company's electric line, which now runs from London, through St. Thomas, to Port Stanley, extended eastward to Aylmer and westward to Delaware. Mayor Geddes of St. Thomas would like the company to take over the municipality owned street railway of that city, which at present is far from a paying proposition, but the company's officials declare it would take about $15,000 to properly equip the road. The cost of the proposed extension to Aylmer would be in the neighborhood of $300,000, and it is believed the municipalities interested would be willing to guarantee an issue of bonds to that amount.

The decision of the City Council to campaign for industries is already beginning to bear fruit. A few days ago Mayor Stenly received a communication from a large manufacturing concern in Pittsburg, Pa., asking for information about the city, its inducements, shipping facilities, etc. The company is one of the largest in Pittsburg, being engaged in the manufacture of machinery. In its communication the company states that its Canadian trade is growing so rapidly that it is necessary to establish a branch on this side of the border. Last year alone it found it necessary to sublet $300,000 worth of orders on this side, as it could not manufacture the goods over there. The mayor is getting in closer touch with these people and has written for further information as to the goods they manufacture, etc. From what he has thus far learned, the mayor is convinced that the company's plant is a large one and that its financial position is of the best.

F. T. Y.

CHATHAM.

February 16.—Business so far this year has been quite encouraging, though the open winter and the very changeable weather have handicapped hardwaremen a great deal. Last Saturday was a good day ; and when the present heavy snow fall is beaten down, a couple of weeks cold weather is all that is needed to ensure "good times."

On Friday and Saturday of last week Jas. E. Grey of the Ark, had a special "Hospital Sale," in aid of the public general hospital. The hospital received a percentage on goods sold, and the members of the Ladies Assisting Society helped out with refreshments, hot dinner between 11.30 and 2.30, tea between 3 and 5 and hot coffee between 7.30 and 9.30 proving attractions.

Westman Bros. last week featured "gas irons" in their window display. Though for some time past the Chatham Gas Co. has been booming the electric iron for home use, this is the first time that the gas appliance has been featured to any extent. The gas iron should make a hit, since gas as a fuel is cheaper than electricity, and there is no difference in the initial cost of the contrivance.

The Chatham Gas Company has announced a decrease in its rates for electricity, to take effect at the end of the present month. The new schedule will make the price 10c net per kilowatt.

Mayor Westman, of Westman Bros., was in Toronto the latter part of last week on business.

T. W. Norman Clements, who has been conducting a tinsmithing shop at 48 Union St., is leaving for Prince Rupert, B. C., where he expects to do a thriving trade.

Ed. Mackness, plumber and gasfitter, has opened a shop in the premises at 48 Union St., formerly occupied by Mr. Clements. Mr. Mackness has been in business for a year or more, but this is his first down town office.

A noticeable and regrettable feature of the report of the Ontario Retail Hardware Association in last week's issue of Hardware and Metal was the entire absence of Chathamites from the list of delegates. The surrounding towns were well represented, those present from this section including D. A. Husband, Wallaceburg ; A. D. Armstrong, Brigden ; Roy E. Carscallen and C. E. Wells, Dresden ; J. W. Zavitz, Wallaceburg ; Harry Lendon, Leamington and Garnet Hubbell, of Thamesville. But, though other cities similar in size to Chatham have their delegates Chatham is unrepresented.

The general feeling among local hardwaremen—or, at least, among those in-

terested in organization—is that for a city of this size, a local merchants' organization is the correct thing. So far the local branch of the Retail Merchants' Association has more or less filled the bill. Latterly, difficulty has been experienced in holding meetings. There are enough hardwaremen here to form a nice little organization of their own. Fortunately, even without any organization there is a very sensible understanding among members of the trade with reference to such matters as early closing - but a trade organization could scarcely help but do good.

D. H. Douglas, of Stephens & Douglas, was in Campbellford last week attending the funeral of his brother in law.

Harry Shillington, for the past year a member of the hardware staff of J. C. Wanless, left last week for Saskatoon, Sask., where he will locate.

H. M. Sweggles, the Comber hardwareman, was called last week to the bedside of his father, in Detroit, who is suffering from a paralytic stroke.

John Graham of this city has joined the hardware staff of W. A. Barr & Co., Merlin.

Leamington business men are arranging to heat their stores with exhaust steam from the electric light plant.

The Tillbury Telephone Co., has been granted a 20 year franchise by the council, the price of phones not to exceed $12. About 35 miles of rural line will be constructed in the spring.

The Dresden hardware and tinsmithing firm of Wells & Wells, comprising Harry E., Alfred R. and Garnet M. Wells, was dissolved by mutual consent on Feb. 3. The business will be continued by Harry E. and Alfred R. Wells under the old firm name.

E Tripp, who recently returned to Florence from the west, has purchased Mr. Cragg's interest in the hardware firm of Cragg & Sinclair. The new firm will be known as Tripp & Sinclair.

G. A. Trudell, of Prairie Siding, has sold his hardware and general store to Mr. Curtis, of Norwood. The building of a new bridge across the Thames at Prairie Siding is expected to have a "boom" effect on the vicinity. Engineer Bell, of St. Thomas is now preparing plans for the bridge.

The Western Bridge & Equipment Co., of this city, has received the contract for a new steel bridge in Harwich township, work on which is now in progress, the materials going forward today.

Western Canada

A Big Building Year in Prospect Throughout the West—Booked Orders Far Heavier Than a Year Ago.

WINNIPEG.

February 16.—Orders for delivery during the spring and early summer already booked with the wholesale houses are greatly in excess of the business done last year and every indication points to a record turnover of goods. In Winnipeg the building permits to date are five times as great as the permits issued up to this date last year; and it is the same story throughout the West. Brandon, Regina Saskatoon, Prince Albert, Moose Jaw, Medicine Hat, Lethbridge, Calgary, Edmonton and a score of other towns that might be mentioned seem likely to have the biggest building year in their history, while the new towns on the new lines of railway will require large supplies of builders' hardware.

EDMONTON.

February 13.—Hardware jobbers report increased business for January over the same month in 1908, although business was very quiet during the first week of this year, owing to cold weather. Booking orders for spring goods are much heavier than last year, especially nails and wire, which would indicate more building throughout the country.

Coal mining which is one of Edmonton's principal industries, has been very active during the past month, consequently powder and mining tools have been going out quite freely.

T. Whyte, of Whyte & Orr, who have hardware stores at Daysland and Hardisty, was a visitor in the city last week.

J. H. H.

British Columbia.

New Industries for Vancouver—Death of James Vallance at Vernon—Building Trade Active at Victoria.

VICTORIA.

February 11. — J. C. Converce, of Wisconsin, and J. H. Brown, of Tacoma, have completed arrangements for the construction of a shingle mill at Barzan Bay, about twelve miles from Victoria, on the V. and S. Ry. Two shingle machines have been bought and the firm are looking for a suitable engine and boiler.

The School Board has appropriated $9,000 to put complete heating apparatus in all of the city schools not already supplied.

J. C. M. Keith, architect, has been asked to prepare plans for a new school to cost about $45,000.

Mr. Cameron, representing Caverhill, Learmont & Co., Montreal, is in town this week.

The month of January has opened up the year very well as far as building is concerned. Up to January 31, the total value for which permits had been taken out was $77,200. This is a good deal in advance of permits taken out for the same month last year which totalled $54,725. None of the permits are for large buildings, mostly dwelling houses ranging from $1,000 to $8,000, a total of 37 in all.

E. G. Prior & Co. have put in a very attractive window display of carpenters' tools this week.—W.B.C.

NANAIMO.

February 13.—R. J. Wenborn, proprietor of the Nanaimo Machine Works, has moved his machinery and shop equipment into new and more commodious quarters on Chapel street. This plant has won an enviable reputation for the work turned out, which is evidenced in the necessity to have more accommodation.

VANCOUVER.

February 13. — If Vancouver assisted industries with tax or water exemption, it is very probable that quite a number might be induced to establish here. On different occasions in the past, requests have been made of the city council to grant bonus, but the principle was adopted by the city council that this city has so far advanced that there should be inducement enough for industries to locate here or in this vicinity. The fact that industries constantly are locating here is vindication of this action. This week, the matter was again brought up, by Mr. Webber, of Webber & Chandler, of this city, calling on Mayor Douglas to see if some assistance in the way of tax exemption would not be granted to H. Mooers & Company, of Ontario, to build an elevator here. This is the prime topic just now, and if ever the city was approached at the right time, this firm has struck it. The stand the city has taken was referred to, however, and it is exceedingly unlikely that even an elevator proposition will receive material aid, though it will have the hearty support and co-operation of business men and civic officials.

The B. C. Electric Railway Company is testing a two-pronged spike for railway uses, which is said to save thirty per cent. of expenditure along this line. The inventor is John W. Balfour, a New Zealander, Albert F. Griffiths having acquired the patent rights, which were held by the Balfour Spike & Manufacturing Company, of Tacoma, Wash. In the local tests made, it was proven that the two prongs of the spike, as they were driven in, spread and curved as they proceeded, giving a very tight and reliable hold. A company to manufacture in the province is being organized.

R. Bowman is getting out plans for a new concrete warehouse which will cost $30,000. It will be five storeys in height, with electric elevators. G. C. Coulson is the contractor.

Wm. M. Rolston, a hardware man of Ladysmith, was in the city last week, en route for St. John, whence he will leave for the Old Country to spend three months.

The Hinton Electric Company, of this city, is installing a new electric lighting plant in the sawmill at Chemainus. The generator will be of 115 kilowatts, carrying 2,000 volts. It is an important point that this company now uses the product of the Nootka Marble Company, which has a plant on the west coast of Vancouver Island, for its switchboards, finding it equal to any of the quarries in Vermont.

Trade this spring promises to be much better than during the last year. There is activity on all sides, and though the lumber mills have not yet got back to their old time activity, the prospects are better than for twelve months past. At the beginning of last year there were 170,000,000 feet of logs in the water, but on this first of January the amount was only 70,000,000, so that once mills start cutting full time there will be a big demand for logs. Building is even better than last year, when all records were surpassed, railway construction is more general, mining is looking up, and altogether, the merchants of the coast province anticipate a successful year.

Where would you look

for information regarding a Hardware business for sale?

Surely in the one paper in Canada which is read by Hardware Merchants in every province of the Dominion.

There are thousands of other hardwaremen who are of the same opinion and who consult our want ad columns when they want to find the man who is hunting the very opportunity you have to offer.

When people want to buy locks, saws, nails, etc., you expect them to go to a hardware store and when you want anything which can be supplied by some other hardware dealer in Canada, then employ some medium which reaches the Hardware trade.

There is no other way in which your proposition can be placed before Hardwaremen, Clerks, and Travellers for so little money as through our want ad columns.

Rates :

2c per word for first insertion.
1c per word for subsequent insertions.
5c additional each insertion when box number is required.

Hardware and Metal

Montreal **Toronto** **Winnipeg**

CONDENSED OR "WANT" ADVERTISEMENTS.

RATES.

Two cents per word first insertion; one cent per word subsequent insertions.

Five cents additional each insertion where box number is desired.

Contractions count as one word, but five figures (as $1,000) are allowed as one word.

Cash remittances to cover cost must accompany all advertisements. In no case can this rule be overlooked. Advertisements received without remittance cannot be acknowledged.

RULES FOR COPY.

In addressing replies care of HARDWARE AND METAL don't fail to give box number.

Replies addressed to HARDWARE AND METAL boxes are re-mailed to advertisers every Monday, Wednesday and Friday.

Requests for classification will be followed where they do not conflict with established classified rules.

Orders should always clearly specify the number of times the advertisement is to run.

All "Want" advertisements are payable in advance.

AGENTS WANTED.

This is the problem of many manufacturers who are anxious to get a foothold in Western Canada. It will be easily solved if HARDWARE AND METAL is given the opportunity to solve it.

WANTED—Good live agent in Montreal, Toronto and Winnipeg to handle A1 line of hammocks which have been marketed successfully in Canada for some years. The line will be strongly advertised in Hardware and Metal. Apply, giving full information as to lines you now have, Box 796, HARDWARE AND METAL, Toronto. (10)

BUSINESS CHANCES.

FOR SALE—Half interest in a hustling stove, furnace and plumbing business in western Ontario. Capital required, 2 to 4 thousand. None but sober and good mechanics need apply. Box 805, HARDWARE AND METAL, Toronto. (8)

MECHANIC with twenty-five years' experience in tin, plumbing and hardware wishes an opportunity to invest thousand dollars and become manager of that branch in good hardware business. Address Box 806, HARDWARE AND METAL, Toronto. (8)

WANTED—Responsible partner or manufacturer to take interest in patented article for builders' hardware trade. Can be made and sold at good profit. Address, The Rowland Manufacturing Co., Denver, Colo. (9)

SITUATIONS WANTED.

Travellers, clerks, or tinsmiths, wishing to secure new positions, can engage the attention of the largest number of employers in their respective lines, by giving full particulars as to qualifications, etc., under "Situations Vacant."

FIRST-CLASS Builders' and General Hardware Man open for engagement. Twelve years' experience. Box 783 HARDWARE AND METAL, Toronto. (8)

HARDWARE SALESMAN desires position, wholesale and retail, experienced. Would buy a first-class business. Box 788, HARDWARE AND METAL, Toronto. (8)

POSITION of responsibility, indoors or traveling, with wholesale or jobbing house, by man of ability, good address and twelve years experience as indoor and traveling salesman. Box 804, HARDWARE AND METAL, Toronto. (8)

SITUATION wanted by practical tinsmith as salesman for stoves, furnaces, hardware, tinware, roofing, or paints and oils. Have been in the retail business. References. Box 803, HARDWARE AND METAL, Toronto. (10)

WANTED—Position as travelling salesman. Six years former experience as representative of paint company. Hardware or paints preferred. Past four years managing hardware business. Best references. Box 795, HARDWARE AND METAL, Toronto. (9)

WANTED—Position as salesman for retail hardware. Eight years experience with good preference. J. E. Thomas, 662 King St., London. (10)

BUSINESSES FOR SALE.

Somewhere in Canada is a man who is looking for just such a proposition as you have to offer. Our "For Sale" department brings together buyer and seller, and enables them to do business although they may be thousands of miles apart.

HARDWARE BUSINESS FOR SALE in one of the finest farming sections of Ontario. Two railways. Stock about $4,500. Good reasons for selling. Address Box 782, HARDWARE AND METAL, Toronto. (11)

HARDWARE, Stoves and Tinware Business for sale in a good manufacturing town, farming and dairying country, good business trade connections in store and workshop; stock about $8,000. Good reasons for selling. Address Box 784, HARDWARE AND METAL, Toronto. (8)

HARDWARE BUSINESS FOR SALE—In growing part of Toronto. Stock and fixtures about $2,000. Box 789, HARDWARE AND METAL, Toronto (8)

HARDWARE, stoves and tinware in city of London. Stock new, $6,000. Splendid opportunity. Good reasons for selling. Apply 111, Dundas Street, London, Ont. (8)

HARDWARE, Stove and Tinware business for sale in one of the best towns in New Ontario. Snap for good live man. Premises either for sale or to rent. Apply Box 801, HARDWARE AND METAL, Toronto. (9)

MACHINE SHOP and manufacturing business in city of Ottawa for sale or partnership. Apply to A. H. Edwards, Ottawa. (10)

WELL ESTABLISHED GENERAL HARDWARE BUSINESS in prosperous Manitoba town surrounded by excellent farming district. Stock about $8,000. A splendid opportunity. Apply Box 785, HARDWARE AND METAL, Toronto. (10)

SITUATIONS VACANT.

You can secure a "five-thousand-a-year" manager, or a "five-hundred-a-year" clerk, by stating your wants under "Situations Vacant."

SMART young boy wanted to learn the hardware business. W. Walker, 1228 Yonge St., Toronto. (10f)

TRAVELER of experience in the Stove and Furnace Business for the Provinces of Quebec and New Brunswick. Must speak English and French. Address Box 786, HARDWARE AND METAL, Toronto, stating experience, salary, etc. (tf)

WANTED—Buyer and manager for cutlery and sporting goods department of wholesale hardware house. Apply, giving full particulars, H. 9, HARDWARE AND METAL, Montreal. (tf)

WANTED—Competent clerk for retail hardware business. Good salesman and window dresser. Apply, stating qualifications with references, to Box 799, HARDWARE AND METAL, Toronto. (9)

TECHNICAL BOOKS

HARDWARE WINDOW DRESSING—This book, just off the press, contains 256 pages (8x11 inches) and over 200 illustrations with full working descriptions. Every display is the work of an expert. It illustrates and explains how hardware windows may be dressed to sell goods. Price $2.50 post paid., The MacLean Publishing Co., Technical Book Dept. 10 Front St. East, Toronto.

MENSURATION FOR SHEET METAL WORKERS, by Wm. Neubecker.—This new book gives the principles of the art of measure, showing its practical application in solving problems, in finding the areas, dimensions or capacities of the diverse sizes and shapes of sheet metal products. It is of infinite value to all sheet metal workers. 72 subjects and 70 figures. Price 50 cents, postpaid. The MacLean Publishing Co., Technical Book Dept., 10 Front St. East, Toronto.

NEW METAL WORKER PATTERN BOOK, by G. W. Kittredge.—Most elaborate and complete work ever published for sheet metal pattern cutters. Principal contents are Terms and Definitions, Drawing Instruments and Materials, Linear Drawing, Geometrical Problems, Principles of Pattern Cutting. 430 pages (10 x 13 inches), 744 illustrations. Price $5.00, postpaid. MacLean Publishing Co., Technical Book Dept., 10 Front St. East, Toronto.

BUSINESSES WANTED.

TO PURCHASE Established Hardware Business in live town or city in Ontario, east of Toronto; or in Quebec, west or south of Montreal. Box 787, HARDWARE AND METAL, Toronto. (8)

WANTED—A hardware, stove and tin business. Stock from $4,000 to $6,000, in a good town or city. J. D. Murdoch, Simcoe, Ont. (8)

MISCELLANEOUS

ADDING TYPEWRITERS write, add or subtract in one operation. Elliott Fisher, Limited, 129 Bay Street, Toronto.

A MARKET OF BUYERS, backed up by money to spend, is open to you in the Busy Man's Magazine. Every territory in Canada is represented. If you have something to sell, something you want to buy, a condensed advertisement in the Busy Man's Magazine will put you in touch with the classes you want to reach. Four cents per word will carry your message from Atlantic to Pacific. Send copy of your advertisement along with order to cover cost of insertion. Your announcement will appear under a special heading. BUSY MAN'S MAGAZINE, Montreal, Toronto, Winnipeg.

HIGH CLASS COLOR WORK; Commercial Stationery, Posters. The Hough Lithographing Co. Limited, Office—No. 3 Jarvis St., Toronto, Telephone, Main 1576. Art, Good Workmanship; Business Methods.

IF INTERESTED in a Duplicating Machine for getting out circular letters, reports, price-lists, etc., or for printing various office forms, write for booklet and samples of work. The "POLYGRAPH" is the newest, latest, and best, and sells for a lower price than the others. Is unexcelled by any similar device on the market. F. W. Tenney, Canadian Sales Agent, 123 Bay Street, Room 116 Stair Building, Toronto, Can. (tf)

IF YOU are looking for a side line to add to your business there is none better than COLUMBIA GRAPHOPHONES. Double Disc Records (which means two records for a single price) and Indestructible Records (that will not break or wear out no matter how much you abuse them). The Columbia Phonograph Company is the only firm that manufactures both Disc and Cylinder Machines and Records, therefore, a Columbia dealer has the advantage over all others, as he can furnish his customers with what they want, while his competitor has to sell them what he has or lose the sale, which he generally does where there is a Columbia dealer. Are Columbia goods sold in your town? If not, why not? Do you want the exclusive agency? (remember exclusive). You had better write to-day or someone else in your town will read this advertisement and beat you to it. A postal will bring catalogues and full information free. Write to-day. Do it now. Toronto Phonograph Company, Limited, Exclusive Columbia Jobbers, 40 Melinda St., Toronto, Canada.

NOTICE—Users of Pitner Gasoline Lamps are warned against being induced to purchase parts of other makes of lamps to be used on the Pitner. The most vital part of any lamp is its generator, and the Pitner generator has been granted a patent in Canada, the United States and other countries, on the principle of its improved method of generating gasoline vapour. Supplies and parts for the Pitner lamps can be received by return mail by applying to our representatives or direct to THE PITNER LIGHTING CO., Limited, 36-38 Lombard St., Toronto, Ontario.

THE RELIABLE LIGHT will light your store 100% better than gas, electricity or acetylene. 600 candle power light costs 1 cent per hour to operate. Thousands in use. A safe, reliable, pure white light of intense brilliancy. Write for booklet M. The Rice, Knight Mfg. Co., Limited, 40 Lombard Street, Toronto.

650,000—Not one of the 650,000 retail merchants who have bought a National Cash Register would think of doing business without it. The National Cash Register Co., F. E. Mutton, Canadian Manager, cor. Yonge Street and Wilton Avenue, Toronto.

WESTERN CANADA HARDWARE MARKETS

Corrected by telegraph up to 12 noon Friday, Room 511, Union Bank Bldg, Winnipeg.

Winnipeg, Feb. 16.—The wheat market has been a centre of interest this week: prices have ruled high, and trading has been extremely active. Receipts have been very light all week, with a keen demand for cash wheat and few offerings, indeed almost every car that comes in has been sold ahead. Eastern millers have been after contract wheat, and there has been some speculative trading, but the bulk of the business has been straight export. May wheat sold at $1.07¼ with $1.07⅜ asked on Thursday. Friday being a holiday in all the American markets trading was somewhat dull in Winnipeg, and there was a slight reaction, but it made a strong close. As the weeks pass and Patten continues to hold on to his long line the interest certainly deepens. It now seems pretty well assured that the farmers who have wheat are holding it for higher prices. Of course, in view of the price of Chicago, Winnipeg wheat looks cheap. That Argentine surplus will be less than expected and that there is serious damage to American winter wheat seems now pretty well assured. There is one thing about the Patten corner and it is this: it must be a phenomenal price that will pull him through with a profit, as much of his wheat has been bought at such high figures that there is practically no profit in it at the present time.

One feature of the week has been the steady increase of interest in oats. For months oats have been dead as a door nail, but suddenly interest has awakened and a demand from Ontario for feed, and also an export demand has sprung up. Some of the strength is no doubt due to the reported damage to the Argentine corn crop by locusts, which sent the American corn market up with a jump. Flax continues very strong, and there are rumors to the effect that considerable Western Canadian flax has been shipped to or bought for shipment to Duluth.

Wholesalers report all lines of business very quiet at present, excepting spring goods, but with one accord they predict an exceptionally heavy spring trade.

Judge Mabee Firm.

The Railway Commission has completed its work in Winnipeg for the present and departed westward after one of the most successful sittings in its history. It is the first lengthened sitting held here by Judge Mabee, and he has certainly created a most favorable impression. The smoothest of corporation lawyers have found it quite impossible to cloud the issue before him, and he left none in doubt as to his sympathy with the farmers in many of their grievances. He was especially strong on the loss suffered by farmers on account of the railway companies not fencing their tracks.

The jobbers and business men generally are still "chewing the cud" over the "standardization of freight rates" according to Hartwell's schedule, which has been printed in all the papers here. The question comes up for final adjustment later, but it is evident Chairman Mabee favors the Hartwell plan.

Calgary is to have, during February or the first week in March, the monster lumber convention of the age. Delegates will be there from the Atlantic to the Pacific, and the object of the convention, in plain terms, is to pool interests and advance the price of lumber. Of course, the lumbermen deny loudly anything in the nature of a combine, and declare, with their hands upon their hearts, that the present cutting system is ruining trade and driving them out of business. They assert loudly that though the price of lumber will jump, the unanimity that will follow will greatly benefit business in general. The men who have already tendered on large building contracts are watching the result of this convention with anxious eyes. There is no manner of doubt that any heavy advance in lumber will at once curtail building operations, which up to the present time have promised to exceed the past two seasons.

There threatens to be a suspension of the letting of building contracts where much lumber is involved until this convention is over.

Wheat Rate to Liverpool.

Another thing that will no doubt be discussed at this convention will be the movement of wheat west to the Pacific, and the movement of lumber east. The Canadian Pacific have made a rate from Alberta to Liverpool of 45c on wheat, but dealers say that at this figure they cannot do business as the additional cost of sacking, the additional interest on money for the longer perior in transit and the additional insurance for the more dangerous passage round the Horn does away with all profit. The railway company have not announced publicly, but some of their prominent officials have stated privately that could they be assured of lumber to fill their cars on the return trip they could make a still lower rate. This question of wheat to Britain via Vancouver is certainly making quite a stir, and several exporting houses have had bids and inquiries from the Old Country firms for wheat shipped that way. So far as I can ascertain no shipments of importance have been made up to date.—H.

Hardware Markets.

Stocks in the hands of the retail trade are very low because of the cautious buying of last year, and there can be no doubt that the wholesale hardware business in the West will be exceptionally heavy this year.

Values are steady throughout almost the entire list. The only change of note is an increase to 75 per cent. of the discount on white enamel hollow ware such as water buckets, pitchers, cups, bowls, etc.

Price Quotations.

WIRE—Barbed wire, 100 lbs., $3.15; plain twist, $3.40; staples, $2.90; annealed wire, $2.90 base; oiled, 10c extra; bright iron, $3.10 base; brass spring wire, 29c base; plain galvanized, wire, 6, 7, and 8, $3.50; No. 9, $3.10; No. 10, $3.60; No. 11, $3.70; No. 12, $3.30; No. 13, $3.40; No. 14, $4.25; No. 15, $4.75; No. 16, $5.

POULTRY NETTING—57½ per cent.

HORSESHOES—Iron, No. 0 to No. 1, $4.50; No. 2 and larger, $4.25, snowshoes, No. 0 to No. 1, $4.75, No. 2 and larger, $4.50; steel, No. 0 to No. 1, $4.85, No. 2 and larger, $4.60; featherweight, $6.00.

HORSENAILS—MRM, cold process—No. 3, $4.30; 4, $3.80; 5, $3.55; 6, $3.30; 7, $3.05; 8, $2.85; 9, $2.75; 10, 11 and 12, $2.65 in 25-lb. boxes.

WIRE NAILS—$2.70 Winnipeg, and $2.25 Fort William.

CUT NAILS—Now $2.90 per keg base.

PRESSED SPIKES—¼x5 and 6, $4.60; 5-6x5, 6 and 7 $4.25, ⅜x6, 7 and 8, $4.10, 7-16x7 and 9, $4.00, ½ x 8, 9 10 and 12, $3.90, ⅝x10 and 12, $3.75. All other lengths, 25c extra, net.

SCREWS—Flat head, iron, 80, 10, 10, and 10 per cent.; brass, 75 per cent.; round head, iron, 80 per cent; brass, 70 per cent.; coach, 67½ per cent.

BOLTS—Carriage ⅜ and smaller, 65 per cent.; 7-16 and larger, 55; machine, ⅜ and under, 60 and 5; 7-16 and over, 55 per cent. copper; No. 7, 29c; 8 29½c; and over, 45; machine set screws, 65; plough bolts, 50; square and hexagon nuts, cases, 3½; small lots, 3; stove bolts, 77½.

RIVETS AND BURRS—Iron rivets, 55 per cent. copper; No. 7, 29c; 3, 29½c; 9, 30½c; 10, 31¼c; 12, 34c. Copper burrs, No. 7, 39c; 8, 40c; 10, 43c; 12, 46c. Copper rivets and burrs: No. 8, 30½c; 10, 33c per lb.

SHOVELS—40 and 5 p.c.

HARVEST TOOLS—50, 10 and 5 p.c.

R. F. Hay, of the Moose Mountain Lumber & Hardware Co., is on a short visit to their several branches in Arcola, Sask., this week.

NEW STOVE RADIATOR.

T. W. Dennis, 70 Victoria Square, Montreal, has placed on the market a radiator which is claimed to be a great fuel and heat saver. It is a steel drum with tubes running through it, and so arranged that a constant flow of air circulates round the tubes. These tubes become intensely hot, and heat the air, which, in turn, warms the room. Three-quarters of the heat from a stove goes up through the chimney and is lost, but Mr. Dennis claims that by using his radiator this heat is utilized in the house, thereby saving a considerable amount of expense. The radiator is especially useful in heating another room by simply running the stove pipe into the room and connecting the radiator.

VALUABLE MINING REPORT.

A report on the mining and metallurgical industries of Canada has been issued from the Department of Mines, Ottawa, and probably no more interesting publication has ever emanated from Government sources. In fact the report is the first attempt to collect and publish full statistics of the mineral production, and of the mining and metallurgical industries of Canada ; and illustrated as the volume is by many photographs and plans and sections of the various mines, every man who is directly or indirectly concerned with the metal industry of Canada should not fail to have the number in his office or home.

According to the introductory remarks of Dr. Eugene Haanel, Director of Mines, from whose office the publication was issued, a special staff of investigators was appointed to gather reliable data and information in the respective provinces, and moreover with a view of making the specific descriptions as reliable and as practical as possible the services of geologists and engineers, having special knowledge of particular districts, were sought.

Thus the report has been given attractive features not customary in such volumes. With a variety of information, from statistical tables and descriptions of equipment, down to historical notes and analyses. Nothing seems to be lacking ; and every one desiring to have authentic data, compiled in most interesting form, and helped out by many valuable illustrations, of the importance and magnitude of Canada's mining industry should not fail to secure a copy. It is realized, by looking through the volume how great have been the strides made in the mining industry, and what vast prospects yet lie before the country.

The report on the whole is comprehensive and, as Dr Haanel says, will meet the great demand made on the mines branch during the last year or two, while the eminently practical character of the data furnished will enable the capitalist, manufacturer, and general reader to make deductions which should be invaluable when looking for profitable investments. The work is published at $1 to insure it getting into the hands of the right class of readers.

Money's Worth Paint vs. Cheap Paint.

Messrs. Barry & Butler,
Allentown, P. Q.

Gentlemen:-

I have read with a great deal of interest your letter advising that you are being confronted with considerable competition in the shape of cheap paints offered for sale at a lower price than S.W.P.

I fully realize that competition of this kind is hard to meet, but it is competition that will surely give way to high quality goods in time. High quality goods like Diston's saws, Rogers' knives or Sherwin-Williams Paints will always command a higher price than other goods in their line, just as soon as people find from experience that they can always be sure of getting their money's worth when buying these standard products. When your store gets to be known as a place where everything sold can be depended upon, you will have a trade that will know no competition from cheap merchandise. Keep up the fight, and we will give you every assistance possible through our strong system of advertising in showing your customers that the value is really in Sherwin-Williams Products.

Hoping to hear from you soon that the cheap competition is giving way to S-W. quality and your energetic efforts, I remain

Yours very truly,

C. C. BALLANTYNE.

BUILDING AND INDUSTRIAL NEWS

For additional items see the correspondence pages. Information is solicited regarding building and industrial news, the incorporation of companies, establishment or enlargement of mills, factories or foundries, municipal waterworks and sewerage systems, railway or mining news, etc.

Municipal Undertakings.

Montreal is considering establishing a filtration plant.

Hamilton is buying land for its west end sewage disposal works.

Exeter, Ont., is thinking of constructing a waterworks system.

Wetaskiwin, Alta., will instal a waterworks and sewerage system this year.

Winnipeg's proposed new sewerage system is estimated to cost $7,000,000.

Tenders are asked for supplies of cement and sewer pipe required by Brantford for 1909.

Verdun's $50,000 water supply system is being rapidly pushed and is expected to be finished by June.

Point Grey, a suburb of Vancouver, will have to be drained by trunk sewers running through Vancouver.

The Gartshore-Thomson Company received the contract for supplying the iron castings required by the Hamilton sewers department, at $1.95 a hundred pounds.

A. Mercer, Hamilton, was given the contract at $2175 of laying an iron pipe down the side of the mountain at Hamilton to connect the mountain and city sewer systems.

Tenders are asked for materials for Saskatoon's waterworks and sewerage works as follows: Cast iron pipe and specials, 280 tons; fire hydrants, gate valves, etc.; sewer pipe, 20,000 feet; pumping machines.

Dominion, C.B., ratepayers authorized the town council to borrow $20,000 for the instalation of a permanent water supply. The water will be supplied by the town of Glace Bay from their standpipe at Cadegan's brook.

Arrangements have been concluded between Revelstoke, B.C., and T. F. Sinclair for the construction of the central section of the sewerage system in that city. The question of what material will be used for pipes and other matters relating to filter beds, septic tanks, etc., will be taken up immediately. Work will be commenced about the middle of April.

Industrial Developments.

The Ontario Dock Co. will erect a $14,000 iron freight shed at Toronto.

The Carnegie Milling Company are erecting a sawmill at Port Perry, Ont.

T. R. Brigham, Vancouver, will erect a large sawmill at Port Essington, B.C.

A new pulp mill will be erected at East Angus, Que., in the spring at a cost of $250,000.

The McMaster Lumber Company, Kemptville, Ont., will erect a large sawmill this season.

The Toronto Show Case Company are preparing plans for the erection of a large factory there.

The Colonial Cement Company, of Wiarton, which was to be wound up, is to be re-organized.

The Copp-Clark Company have bought a site in Toronto and will build a new warehouse and bindery.

A shingle mill will be built at Esquimalt, by H. Bacus, Seattle, who has already selected the site.

It is stated that a factory will be erected at Trenholmville, Que., by Sherbrooke men in the spring.

Chas. Bernier, Montreal, has prepared plans for a factory to be erected for the Campbell Clothing Co.

J. S. Emerson, Vancouver, is building a planing mill and sawmill at Eburne, on the Fraser River.

C. A. McGilivray, Bellingham, Wash., has purchased a site at Vancouver, for the erection of a large sawmill.

Construction will shortly commence upon a large new factory for the Oxford Knitting Co. at Woodstock, Ont.

The Halifax Board of Trade are considering a proposition for the establishment of a large cold storage warehouse.

The Canadian Industrial Company, Vancouver, will erect a large paper and pulp mill at a site on the Powell river.

A company is being organized for the erection of a new building for the Northwood cheese factory at Kingsmill, Ont.

The Slater Shoe Company, Montreal, are negotiating for a site at Milltown, N.B., on which to erect a large shoe factory.

The Vancouver Pipe & Foundry Co. are contemplating the construction of larger quarters in the southern part of Hastings townsite.

The Canadian Northern have given the Crossen Car Company, Cobourg, a contract for the construction of four hundred freight cars.

Pratt & Lambert, Varnish Manufacturers, Buffalo, have purchased a site at Bridgeburg, Ont., where they will build a Canadian factory this summer.

The Packard Electric Co.'s automobile works, at St. Catharines, which were closed down some time ago owing to trade depression, are starting up again.

The Converce & Brown Shingle Co. have completed arrangements for the construction and operation of a shingle mill at Bazan Bay, just south of Sidney, B.C.

A company of New York capitalists are negotiating with the Lachine, Que., council for the erection of a large paper factory. If matters are arranged, work on the building will be commenced this spring.

Pennsylvania and Chicago capitalists have been inspecting 117 square miles of timber on Moresby Island, B.C., owned by Wallace, McMillan & Murray, Queen Charlotte. A sawmill will be erected.

Henry Disston & Sons, saw makers, Philadelphia and Toronto, have bought for $50,000 a four-acre block of land in Toronto, on which they will erect a new $80,000 factory in the spring, to employ 300 or 400 men.

The Canada Chemical & Wood Distilling Company, Chilliwack, B.C., capitalized at $20,000, are applying for incorporation. Arrangements are now being made for the erection of a building and the installation of machinery.

The Western Canada Wood Pulp & Paper Co. are said to have acquired the entire pulp limits, foreshore rights and water privileges from the Quatsino Power & Pulp Co., and will at once erect a large mill on Marble Bay, Quatsino Sound, B.C.

The Manitoba Iron Works are planning an addition to their buildings at Winnipeg, at an initial cost of over $150,000. T. R. Deacon, manager of the company, states that when the addition is completed the capacity of the work will be at least 20,000 tons of steel a year, enabling the construction of the largest bridge spans required.

Railway Development.

The Northern Pacific Railway propose to lay 90-lb. rails on the entire system.

Thomas Malcolm, contractor for the railway being built from Campbelton, N.B., south to the St. John River, at St. Leonards, a distance of 112 miles, reports that he had 1,400 men at work all last summer, and that while 62 miles of track have been laid from the Campbelton end, 30 additional miles are graded. Seventeen miles are graded out of St. Leonards, and Mr. Malcolm states that the road will be completed and ready for traffic by the middle of

The Canadian Northern proposes to build a main line in British Columbia running in a southwesterly direction from the Yellowhead Pass to tidewater on Burrard Inlet. The route is by a system of waterways almost a hundred miles long, to the North Thompson River, aad thence down that river to its junction with the South Thompson River at Kamloops. The line will follow the main Thompson River, taking the opposite bank to that occupied by the Canadian Pacific Railway, to its confluence with the Fraser River at Lytton. From there the road will parallel the Canadian Pacific on the same side of the Fraser for a considerable distance before proceeding to Vancouver via the Lillooet country.

Public Buildings.

A new school will be built at Runnymede, Ont.

St. Mathias Presbyterians, Montreal, may erect a new church.

A new court house will be erected at Woodstock, N.B., this summer.

The British-American Trust Co. will erect a fine office building at Victoria.

The T.&N.O. Railway station at Temagami, recently burned, will be rebuilt.

A new two-storey opera house will be erected at Leamington in the spring by J. M. Henry.

A Roman Catholic church and school, to cost about $65,000, will be built at Lacombe, Alta.

Land has been purchased at Waterloo, Ont., on which will be erected a new public building.

T. Clark King, Lacombe, Alta., has prepared plans for the erection of an

We Want Agents

to sell the

Manitoba Steel Plate Furnace

We want a good hardware man in every town to handle our furnace. It will burn Souris and other soft coals mined in the West, and it will burn them economically. It is the furnace Western people have been looking for. If you are from Missouri, so much the better. Ask us and we will show you.

The consumer saves 25 to 40 per cent. on fuel when he uses the Manitoba.

The Brandon Machine Works Co., Limited

Brandon, Manitoba

opera house and hall at Stettler, Alta., for the Woodmen of America. Estimated cost, $9,000.

The establishment of a Normal School for nuns is under consideration at St. Thomas.

It is stated that the C.P.R. will extensively remodel the Place Viger passenger and freight sheds.

The C.P.R. will proceed with the enlarging of the Windsor station, Montreal, this summer. The extension will cost $1,000,000.

Andrew Carnegie has offered to erect a public library building at Preston, provided that the town gives the site and maintains the building.

The New Westminster school board are contemplating the erection of a school building at Sapperton.

A reinforced concrete grand stand will be erected on the grounds of the Central Canada Exhibition at Ottawa.

Tenders will be called immediately for the erection of a new building at Rockliffe Park, Ottawa, for Ashbury College.

St. Mary's, Ont., ratepayers will be asked to vote on a by-law to raise $40,000 for the erection of a modern school building.

At the annual meeting of the St. Augustine Presbyterian Church, Winnipeg, it was decided to erect a new Sunday school building, at a cost of $18,000.

The matter of enlarging the Ottawa court house was brought before the Carleton County council recently. Mr. Gorman stated that estimates had already been prepared, placing the total cost of the required addition at about $20,000.

At a joint meeting of the councils of Aldborough Township and Rodney, D. McLean, reeve of Aldborough, and J. J. Mistele, reeve of Rodney, were appointed to secure plans and estimates for the erection of a new town hall at Rodney, Ont.

The Dominion Government are building a post office at Parkhill this year. A. W. Humphries & Son have the contract for the galvanized cornice roofing and for galvanized iron work on the building, as well as for the plumbing throughout the structure.

EXPLOSION AT SARNIA.

Four hundred barrels of oil in one of the huge agitator tanks at the Imperial Oil Co., at Sarnia, exploded some few days ago, and, catching fire, caused a spectacular conflagration, which, however, was confined to the tank. The loss will be about $2,000.

A NEW METAL POLISH.

Royal Polishes Company, 7 St. Nicholas St., Montreal, is the name of a new Canadian metal polish company which has recently started manufacturing. G. P. Johnston is at the head of the new firm, which is entirely Canadian. Royal metal polishes are on the market in liquid and paste form, in tins ranging in size from quarter-pint to gallon.

A Special Sporting Goods Department

There is no doubt that the hardwareman who makes a separate department of his sporting goods gets the best results. Not only is he better able to judge of the success of his lines, but he can deal with this branch of his store in a more comprehensive way. Included in the business as a whole, the sporting goods are influenced by the success or non-success of other lines. That is to say if trade generally has not been good, and the dealer is inclined to buy less heavily, then the sporting side suffers along with the rest, despite the fact that taken by itself it may have shown most gratifying results.

By making a separate department of his sporting goods, with a special ledger account the hardwareman can deal with these lines on their own merits, and with his fingers more directly on the pulse can better judge of the treatment that will best encourage and develop this part of his business.

Clerk Must Know Goods.

In these days of recreation and of facilities for easily indulging in all kinds of pastimes, very few hardwaremen lack a demand for sporting goods, and, however small this demand may be, the dealer who manages his sporting lines as a special department is closer to the trade and can cultivate it the most thoroughly. Furthermore the placing of a clerk in charge, if it is possible to do so, is a great factor in developing the sporting side of hardware. Encourage the clerk to pick up all the technical points of the different lines, so that he can direct a customer's attention to various parts which add strength, or resiliency, or whatever it may be, to the articles under discussion. If the clerk is not a sportsman himself, he can, by keeping his eyes open, secure information that is interesting to an enthusiast. A sale is more than half clinched when a clerk meets his customer on mutual grounds, and can tell the latter something new and interesting about the article or sport in question. A salesman who is perforce compelled to be an automaton because of his lack of knowledge is bad enough in any line, he is fatal where sporting goods are concerned.

Talk Quality, Not Price.

In another way the value of a well-informed salesman is apparent. In selling goods where rival merits play so great a part, the question of quality and not of price must be the great selling factor. To the average sportsman price is a minor consideration. He only wants to be assured that he is buying the finest article, and the one that will suit his particular needs the best. The salesman, therefore, should be in the position of being able to make an assertion that a particular article is the best on the market and to back up the statement by cold hard facts. It is the matter of superiority, and not of price, which usually determines a sporting goods sale. Placing a man in charge of the sporting department creates a responsibility that is of the utmost value to this branch of the store, and gives the head of the firm an authority upon which to rely when the purchasing is being made, or development or retrenchment considered.

In the columns of this paper we have many times pointed out the field that is opening up to hardware men situate on or near a main road by the development of automobiling, especially in repairing tools. Plyers, wrenches, hammers, chisels, copper wire, screw drivers, etc., are all necessary articles when a breakdown occurs, or a slackening of parts is observable, and very few automobilists carry a complete tool kit with them. They are like the cyclist who leaves things to Providence and goes for a long ride without bothering to carry a repairing outfit. If the hardware man believes that there is a possibility of such trade being encouraged in his district, he should lose no time in making preparation, and in evolving good advertising ideas. He should have a sign painted to be hung outside the store informing the man in need of a tool that such articles can be bought within. He can decide upon certain schemes of window dressing in which these tools can be effectively grouped, and he can also procure some attractive automobile posters. He can circularise the owners of automobiles in his district of his new lines, and they will no doubt in turn impart the information to other owners who may be met in the course of their travels. The hardware man should also get in touch with any touring club so that his store may be posted up as a place to be remembered if a car breaks down in that neighborhood. There is no knowing how such seed dropped here and there may not bring forth good fruit, and the selling of tools leads to the wider field at present covered by the garages. Undoubtedly the growth of automobiling makes it incumbent upon the hardware man to ascertain whether he cannot reap some tangible benefit from it. One Toronto concern handling automobile repairs earned a 54 per cent. dividend in 1908.

Gun Display Stands.

Dealers often find it difficult to display guns and cartridges well, especially when any particular grouping effect is desired. The following stands may, in certain cases, be found to be of great help. Take some ordinary wood, say four by four inches square, and bore a 1¼-inch hole before sawing the required length, thus forming the grooved end of two stands at once. At the other end ordinary mounting nailed around the base, completes the stand. Finish with wood dye, or whatever color desired. A gun placed along the groove can then be effectively placed in any part of the window. By cutting the stands in different lengths the guns can be banked if desired from the front of the window to the back. A triangular piece of tin neatly cut with the bottom part bent back to form a base and the thin point at the top so bent as to hold a cartridge, completes the display. These two stands are easily made, and may be found very useful in combined displays, or placed in the window by themselves.

E. P. Paulin, of the Goderich hardware firm of Paulin & Pinder, has purchased the hardware business of J. W. Goodhue, of Ripley.

News of the Paint Trade

CANVASSING THE DISTRICT.

In making a thorough canvass of the property owners in his district, the paint dealer can render his campaign all the stronger by drawing attention to some particular part of the property which appears to need attention. A general intimation to the effect that so-and-so would improve the appearance of his house, barn or fence and add to the preservation of the material, by repainting this spring, is not so likely to bring results as a more personal letter that So and So's property being of a certain material, paint was necessary to its well being, followed up by a suggestion as to the most suitable paint that should be employed. If the dealer is aware that no painting was done in this particular case last year, or for some years past, then the using of this information makes the canvass all the stronger. To give such a direct touch to his campaign, it is necessary for the dealer either to go round his district himself, or to send a trustworthy representative, but the time is well employed for a stronger advertising method could not be used.

For instance attention should be directed to the tin roofs and sidings in the district, and their owners promptly told how essential it was that the surface of such material should be well and properly painted. It should be pointed out that tin, exposed to the weather, requires repainting every three or four years to insure its preservation, and that some of the paints frequently used on such material were of no protection from the elements. These points should be strongly brought out. Tin roofs and sidings must be properly looked after or the owners will soon need fresh material.

The dealer can add strength to his canvass along these lines by pointing out that a good first coat of red oxide and pure linseed oil can be followed by any first class paint, but that lead paint should never be used for the first coat as it will not adhere to the metal for any length of time. It is by personal and opportune efforts such as these that the dealer can best excite the demand. Paint consumption is inclined to be lethargic, unless it is excited by the dealer.

GET READY FOR SPRING.

This is the month for earnest preparation in the retail paint trade. Don't let a day be lost in getting ready for an active spring campaign. Every mild morning suggests that the painting season is approaching. It is assured that the annual stock taking has been completed in January, but if not, it should be done now, and quickly. Get the paint stock in order—classified, marked, ready for instant use on demand. nothing like knowing exactly where an article can be found and not compelling a customer to wait while a clerk hunts for it. Nothing like having a stock complete in every detail. Now is the time to sort up and see to it that there are no shortages. Don't wait until next month when paint manufacturers and jobbers get busy and your order cannot be so promptly filled. For a retailer to lose a sale because the

We'll help you sell them

When you stock Floorglaze Enamel, M.L. Paints, or anything else we make, our interest in you doesn't lapse till it's time for your next order. Not much! We keep busy right along helping you to sell the goods—moving that stock out in a hurry to make room for more. That's one reason why we keep friends with the trade. Another reason is found inside the cans. When you get ready to handle a really complete line of paints, varnishes, enamels, etc.,—and a line that sells and satisfies—this is the address to write to:

Imperial Varnish & Color Co., Ltd.
OF TORONTO

Please correspond with place nearest you.

All our lines carried in full assortment by Imperial Varnish & Color Co., Ltd., 542 Beatty St., Vancouver; Mason & Hickey, 108 Princess St., Winnipeg, Man.

HORSE SHOES

By the brand of Horse Shoes the hardware man carries, the percentage of trade he is doing may be fairly estimated.

"M.R.M." Shoes are asked for by the principal Farriers of the country by reason of the excellent qualities they possess, and the universal satisfaction they give.

To stock "M.R.M." Shoes is to do the bulk of the trade.

The Montreal Rolling Mills Co.

goods wanted are not on his shelves is the worst kind of bad management, and often involves the loss of a customer.

Wall paper dealers especially should be all ready for business in February, says Paint, Oil and Drug Review. Here comes in the utility of the show window. Wall paper properly displayed is one of the most artistic of window decorations. It can also be used to excellent advantage for display in the interior of the store. Here is a chance for the exercise of the dealer's taste and ingenuity. Make your store as attractive as possible by drapings of the handsomest wall paper you handle, and it will soon become known to the entire community as headquarters for high class goods. Arrange comfortable seats for customers, with good light by which they may inspect the patterns. This is the really artistic side of the decorating business, and if properly handled it brings much other work in the line of painting, floor finishing, etc., where the dealer is a painter as well as a retailer. If not himself a contractor, he can make many a dollar in commissions by turning over such work to some reliable workman.

A large stock of wall paper is not necessary, though a good variety should be shown. By ordering carefully the loss and annoyance of carrying over much stock from one year to another is avoided, and this is a matter of considerable importance because the styles of last year in wall paper will not do for this year's trade. The old adage about the "early bird" applies with force to the paint trade. Ample preparation in February for the spring campaign that begins in March will put the dealer in position to get orders that he would not get were he to delay his preliminary work until next month. His object should be to get early orders and thus insure re-orders, both of which are secured by making an early start.

Paint and Oil Markets

MONTREAL.

Montreal Feb. 19.—The week has been characterized by a strong call for ready-to-use articles such as mixed paints, stains, enamels, and varnish in small tins. This seems to anticipate a good movement shortly in the articles necessary for spring cleaning purposes. Supplies which are used by professional mechanics have not been quite so lively. The markets keep firm, and there is no change to note.

Turpentine.—Owing to interruptions to railway communications, it is reported that local stocks are very light, but with ample supplies promised in the near future, quotations keep the same. We quote 58c. for single barrels, net 30 days.

Linseed Oil.—Purchases have been strictly of a hand-to-mouth character, the dealer feeling no anxiety as regards supplies which are apparently in abundance. The market seems to lack vim and character. There is no change in quotations, which are as follows: Raw 1 to 4 barrels, 59c.; 5 to 9 barrels, 58c.; boiled, 1 to 4 barrels, 62c.; 5 to 9 barrels, 61c.

These prices are for immediate delivery, terms strictly net 30 days.

Ground White Lead.—The painting and decorating trades do not yet seem to have stepped into the spring swing, and shipments of ground white lead are scarcely up to the average. We quote. Strictly pure, $5.50 to $6, according to brand, and No. 1, $5 to $5.50 f.o.b. Montreal.

Red Lead.—The fair demand which exists at present is easily taken care of owing to some winter shipments from the Old Country which are just arriving. We quote: Genuine red lead in casks, $4.50; in 100-lb. kegs, $5; in less quantities, at $6 per 100 lbs.; No. 1 red lead casks, $4; kegs, $4.50, and smaller quantities, $5.50.

Varnishes.—Shellac varnish leads in popularity, but it is always a favorite in cold and damp weather owing to its quick drying nature. The makers of varnish report a satisfactory volume at steady figures.

Paris Green.—Some large orders which were booked early in the spring season are being got out of the way, but at present there is a pause in orders for medium sized lots.

White Zinc.—The severe weather seems to have checked the inquiry for white zinc, and the little flurry which was experienced last week seems to have disappeared. Quotations are as follows: Dry V.M. Red Seal, 7½c.; Red Seal, 7c.; French V.M., 6c.; Lehigh 5c.; white zinc, ground in oil, pure, 8½c.; No. 1, 7c.; No. 2, 5¾c.

Putty.—Putty is extremely quiet and likely to remain so until the advent of warm weather. We quote Standard putty, 880-lbs. casks, $1.65; in 100-lbs., drums, $1.90; bladder putty, 100 lbs., in barrels, $1.90; in 100-lb. cases, $2.05; in 25-lb. drums, $2; 25-lb. tins, $2.05; 12½-lb. tins, $2.25 f.o.b. Montreal.

TORONTO.

February 19.—Very little change has come over the market during the week. Trading is yet steadily quiet, and quotations remain at the old figures. Linseed oil is the most interesting line, and it looks as if a further advance is near at hand. Flaxseed has advanced in Winnipeg and other Western Canadian points, due to the shortage in the United States and the importation of native seed by Chicago and Minneapolis interests. This has caused oil to go up in Montreal, and houses there have notified Toronto jobbers that this is a good time to buy, for, say they, higher prices may come any time now. English oil, too, is very firm. Eastern United States crushers are unable to get seed supplies and may have to import from Argentina.

TURPENTINE—Since the Cleveland concern which had been offering a grade of turps at a lower figure than the regular line reaching Toronto has left the local market prices very firm. It is generally thought that prices will go higher before long. In fact, on all sides an advance was anticipated ere this, because

"Give the practical painter a paint that is 70% pure White Lead, 30% pure Zinc White, guaranteed formula label on the can, and you give him what he has been asking for—for years."

Practical Painters Support "English" Liquid Paint

The practical painter has been rather "doubtful" about most prepared paints. He has had two or three pertinent questions to ask such as — "What's the stuff made out of anyway?" "How much lead is there in it?" "I know what good paint should be, and I want to know what I am using."

There is a guarantee formula on "English" Liquid Paint showing that the white base on which the paint is made is 70% Pure White Lead, 30% Pure Zinc White.

Another reason the painters especially like "English" Liquid Paint is because the 70% of lead used is **Brandram's B.B. Genuine White Lead,** which all master painters know is the highest grade made.

Dealers handling "English" Liquid Paint have the support of good painters.

HOT WATER KALSOMINE

SHOWING JUST WHY IT IS THE BEST

The prime requisite for first-class results is the use of first-class materials.

There is a wider difference in the "57 varieties" of kalsomines than almost any other material which the hardwareman has to sell to the painting and decorating trade.

It is a recognized fact that those desiring the best results with kalsomine either use a hot water product or make their own. The latter course, however, is apt to bring dissatisfaction, owing to the varying qualities of the raw materials used and the lack of uniformity in results.

There are many convincing reasons for the superiority of a hot water product. In the use of boiling water a more even temperature is secured, varying only between the degrees of 200 and 212. The act of boiling converts all waters, whether alkaline or hard, to soft. (You secure one temperature and one solution). Boiling water is the natural solvent for all gelatinous matter, and enables kalsomine to be worked quicker and bring more uniform results than any cold water kalsomine could possibly produce. Boiling water is also the best agency for purification. It is a natural distiller, banishing all foreign substances. The more perfect the solvent, the smoother the finish.

In mixing with cold water, the temperature runs anywhere between 30 and 70 degrees. The solution may be cold, tepid, lukewarm, or warm, and the water may be of three varieties—Alkaline, Hard, or Soft. This latitude of temperature and varying water quality kills uniformity and increases unreliability. If the component parts are not perfectly dissolved and intermixed, you cannot expect to get smooth finished surfaces.

The perfect dissolving of the ingredients, obtained by the use of boiling water, affords a greater covering capacity as the smooth, creamy quality permits of great ease in spreading, which not only saves a great deal of the painter's time in applying, but is easy on the brushes.

Are You Awake?

Don't let competition catch you asleep at the switch on the paint proposition, Mr. Dealer. Don't be satisfied with what trade straggles into your store. Be a live one and make a robust bid for the bulk of the business in your town. Why not? There's a way to get it. Get a paint you can enthuse over, and then make a noise that will wake up every paint consumer in your community. Show them the money-saving advantage of using a better paint. We'll help you convince them that

Martin-Senour 100 Percent Pure Paint

is the paint they ought to use. It is noticeably so much better than other paints that customers once using it become audible advertisements for the dealer who supplied them. They talk out loud for **Martin-Senour Paint.** The neighbors hear the story and see the evidence with their own eyes—that starts them too to the dealer's store, and the good work and the good news spreads.

If you want to be the liveliest paint man in your town our plan for turning the paint trade your way will interest you. Write for it today.

The MARTIN-SENOUR CO., LTD.

Pioneers of Pure Paint

MONTREAL **CHICAGO**

The Maritime Paint & Varnish Co., Ltd., Halifax, N. S.

it is usual at this season of the year to gauge supplies in hand. Supplies keep ahead of demand, however, and the South has not yet sent any authentic figures as to the amount of stock on hand. Prices are at last week's figures: Single barrels are 62c; 2 to 4 barrels, 61c, and 5 gallon lots, 67c.

PARIS GREEN—Steadily active is this line at unchanged prices. A larger quantity of Paris Green is expected to go out this year than last. Barrels are still at 20½c, and 25-lb. drums 21¾c.

LINSEED OIL—A decidedly firmer tone is noted in this line. Early in the week an outside house was looking for business at what appeared to be a low quotation, but now advices show that there is rather a tightening up. Raw is yet 59c and boiled 62c for single barrels, with five-barrel lots 1c less.

GLASS AND PUTTY—Very quiet. Nearly all the jobbers are guessing at what is to be the outcome of this season's glass business. Buyers are looking for lower prices and manufacturers say they cannot stay in business and sell at a lower price than prevailed last year. Jobbers think the makers are right. At present stocks are low. Putty is just moving.

WHITE LEAD—No. 1 is at $5.40 to $5.65; pure white, from $5.80 to $6, and a superior line is at $6.25. In red lead the movement is chiefly of a jobbing order. Genuine is quoted at $4.50 for casks and $4.75 to $4.80 in 100 lbs., which are the quotations of last week.

STAINS AND VARNISHES—Prices unchanged and orders light. No immediate change is anticipated, though before summer a tightening up is expected.

PETROLEUM—Prices are unchanged and business fairly good. Prime white is 13½c; water white, 15½c, and Pratt's astral, 17½c.

PUSH PREPARED PAINTS.

In considering your paint purchases for the coming spring season, let the fact sink in deep—that if the railroads and other large consumers of paints invariably purchase prepared paints, so it is to the advantage of the house paint consumers to act likewise, viz.: purchase prepared paint for their use.

The honest manufacturer, by his knowledge and through his laboratory tests, is in position to obtain the highest commercial grades of all raw materials, combining same into perfect mixtures through the use of brains in his factory and the proper machinery. This insures to the consumer:

First—The manufacturer's name on the label, which means his assurance that the materials used are of the best and that they are properly combined.

Second—A product practically ready for use.

Third—A variety of shades.

Fourth—Uniformity of shades.

Fifth—Permanency of shades.

Sixth—A finished product which will produce the best results.

As a consequence, let one of your resolutions be that your full energies will be devoted to the thorough exploitation of prepared paints so that 1909's balance sheet will indicate a much better percentage of profit on the volume of sales.

One other point you should not overlook is, that when you join hands with the reputable manufacturer of prepared paints you will enjoy the fullest protection, thereby building up a lasting business for yourself.—Hardware.

TELL CLERKS ABOUT PAINTS.

Following is a copy of a letter written by the head of a retail business employing an extensive staff:

"A short time since we had an evening meeting which was of considerable benefit. These meetings will be continued at regular intervals. The next one will be———— It is expected that each one of you will attend these meetings as a part of your work.

Margin is Small.

"Conditions in the paint business are far from satisfactory. With the trade considerably divided, we handle goods on a smaller average margin of profit than any other line, unless, possibly, groceries. The volume of sales is a comparatively small one when it is remembered that, aside from contractors and painters, each individual and family uses only a very limited amount per year or per five years. It is necessary for us to secure as large an amount of business as possible, to plan new ways for giving customers the most satisfactory service at a reasonable expense to ourselves, and to get all of the business we can. Anything you have to offer in the way of better service to customers, more economical methods of doing business, is worth while to this store organization and so to yourself.

Study the Business.

"During the past few weeks we have secured and given you some books about paint which are of value.

"We have gone to considerable trouble to secure paint booklets and pamphlets which are of value to paint men and to paint salesmen. You will not be doing your duty by yourselves or by the selling organization if you do not carefully read, and, so far as possible, learn and understand the subjects treated of in these booklets. A good many people content themselves with what they are going to do to-morrow, next week, next month, or next year. Such people average from failures to ordinarily successful men. The man who goes out and does things to-day and this month, is the man who gets results. We want to do things and do them now.

The Question Box.

"Each one of you is requested to leave one or more written questions at my desk each week by or before Friday evening; these questions to touch anything you would like further information about from the making or buying of paint to the selling or use of it, or to troubles which come up in the paint business. These will be arranged and classified and turned over to the organization by Saturday evening, if possible, so that they may be studied out during the coming week and the answer ready at the first meeting. The time is short in which we can do a heavy business this fall. Let every man bring in all the business he can; think, talk, eat and sleep paint, and see if we cannot make a wonderful record and be ready to spread out a little further another year."

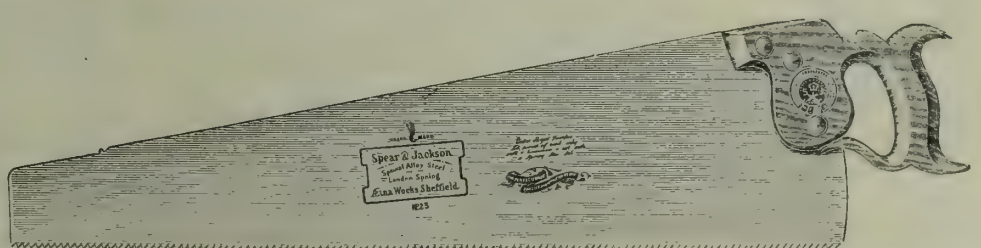
LOOK OUT!

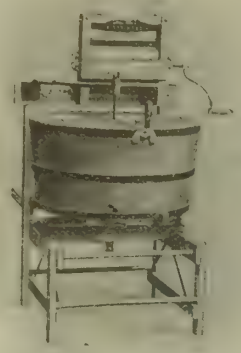


¶ Live business men should always be on the look-out for new lines which are going to take on, because by not carrying them they lose trade and reputation.

¶ We recommend them, therefore, to be quickly on the trail of our new No. 23 Handsaw, which has already met with great favour, partly because men wanted a straight back to compare in quality with our 87 and 87A, and partly because we have hit on a mighty good thing in our new alloy saw steel.

¶ There's "just a little something" in it which makes the difference your customers will notice.

SPEAR & JACKSON, LTD., SHEFFIELD.



SATISFIED CUSTOMERS

Are the results from sales of the Connor Ball Bearing Washers. This machine swings on ball bearings assisted by two coiled steel springs.

The tub is detachable. The wringer stand is very solid. It is the only machine of the kind with a basket rack.

Our Booklet Tells All About It.

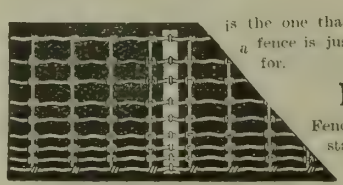
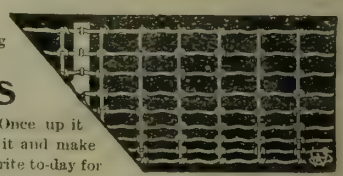
THE FENCE THAT SAVES EXPENSE



is the one that interests you because such a fence is just what the farmer is looking for.

PEERLESS

Fencing seldom needs repairs. Once up it stays. Ask us for proof. Sell it and make both money and friends. Write to-day for terms, etc.



The Banwell Hoxie Wire Fence Co., Ltd., Dept. J, Hamilton, Ont. Winnipeg, Man.

The FOUNTAIN Sprinkler

NOT merely a round box with holes punched in it to let the water out —BUT a perfect Lawn Sprinkler.

NOT merely a group of straight round streams working with mathematical precision—BUT a natural shower of spray.

The Sprinkler with the "MIST LIKE SPRAY."

No other Lawn Sprinkler can produce the beautiful—The perfect results like the "FOUNTAIN."

The name "FOUNTAIN" is plainly marked in raised letters on the bottom of every Genuine, Original FOUNTAIN Sprinkler.

When you think of Lawn Sprinklers — Think FOUNTAIN
When you buy Lawn Sprinklers — Buy FOUNTAIN
And insist on getting the FOUNTAIN
Stick to the Sprinkler you KNOW is right.

Do you want a sample for comparative test. Post paid to any dealer at the wholesale price.

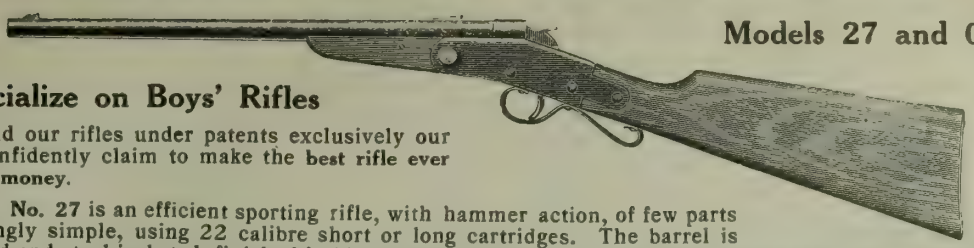
HAMILTON (22 Calibre) RIFLES

Money Makers



Models 27 and 027

Prices $2.00 and $2.25

We Specialize on Boys' Rifles

We build our rifles under patents exclusively our own and confidently claim to make the **best rifle ever built for the money.**

MODEL No. 27 is an efficient sporting rifle, with hammer action, of few parts and exceedingly simple, using 22 calibre short or long cartridges. The barrel is bronze, rifled and steel jacketed, finished in blue black gun finish. Breaks down for loading and ejecting shells. Flat stock and forearm of gun of gum wood. A beautiful model, symmetrical and well balanced. Barrel is 16 inches long, length of rifle over all, 30 inches. **Price $2.00.**

MODEL No. 027 is exactly like No. 27, except the stock and forearm, which are of genuine walnut, turned and beautifully finished. **Price $2.25.**

Other models are Nos. 15 at $2.00, 19 at $2.50 and 23 at $3.50, each a winner in its class.

Our continuous advertising in the boys' papers will bring the business to you, as every boy will want one and you should have a stock on hand. **Write for catalogue and net trade prices.**

Talks To Business Men

NO. 1—GETTING YOUR NAME UP.

Advertisers have a favorite way of thinking that the advertisement that doesn't bring in immediately and directly more than it cost is a failure. Yet they know perfectly well, says the New York Journal of Commerce, that "getting your name up" is a far more valuable asset than the mere sale of a bill of goods; that the big houses of the country have reputations quite as much because they advertise like big houses as because their ads. bring direct sales of goods. There is no more certain way to remain small than by letting the world know that you regard yourself as small—too small and poor to be able to advertise.

It is not the purpose of this article to in any way dispute the fact that advertising to the consumer is profitable. There is too much evidence at hand to prove the contrary. But the manufacturer who "compels" the trade to handle his goods, just because they have been advertised to the consumer —and too frequently neglects to make them profitable—is really bulldozing the trade rather than cooperating. One of the great fruits of organization has been a recognition by manufacturers that the policy which selects the jobber as a channel for distribution is the best one. He has learned to respect the trade. In precisely the same way, it is about time that he carried that recognition to the trade press and realized its power with the trade. The successful advertising campaign of the future will work with both the consumer and the trade, preaching arguments best adapted for each in that medium which reaches it and influences it.

Fire Bricks

To every man who uses Fire Bricks.

Amatite ROOFING

Needs No Painting

If you had a sample of Amatite in your hand you would see in an instant why it needs no painting or coating to keep it waterproof.

It has a rough surface of *real mineral matter* on the weather side.

It is evident to anyone that it is no more necessary to paint such a surface than it is necessary to paint a stone wall. Stone needs no paint; neither does Amatite. It is strong enough in itself to bear the brunt of rain and wind and sun without a protective coat of paint.

To paint Amatite would be a waste of time and trouble.

Amatite will last for many years without any care whatever. It is made to be *trouble proof* as well as *weather proof*.

A roofing that consists of smooth materials, made to receive a heavy coating of paint, is not a roofing at all—the paint is the real roof. If you are told that certain roofings don't need painting when first laid, don't be deceived into thinking that they are like Amatite. The first coat of paint has been applied at the factory—that's all, and it will wear off in a little while and require renewal.

No paint is good enough to make a durable roof; a thick layer of pitch faced with a real mineral surface, is far better—and that means Amatite. **Free Sample and Booklet**—A Free Sample with Booklet will be sent on request to our nearest office.

Read a Few of the Comments of the Leading London Dailies on the Supremacy of the Ross Rifle at the 1908 Bisley Meet.

"Long range Champion, breaks all records, a rifle of wondrous precision." *London Morning Post, July 16th.*

"Records broken at Bisley. A fine Canadian rifle." *London Daily Express, July 16th.*

"Record scoring with the Ross rifle." *London Daily Telegraph, July 15th.*

"Champion of the year." *New York Herald, July 16th.*

"Performance phenomenal by the Ross rifle." *London Field, July 18th.*

"The new Canadian rifle has made an unexpected and altogether successful appearance." *London Daily Mail, July 15th.*

"Great triumph for the Ross rifle which has beaten all the world's rifles." *London Standard, July 15th.*

"Many experts declare that Ross rifle better than new U.S. Rifle." *Nottingham Guardian, July 17th.*

"An individual triumph, the Lee-Enfield hopelessly beaten." *London Morning Post, July 15th.*

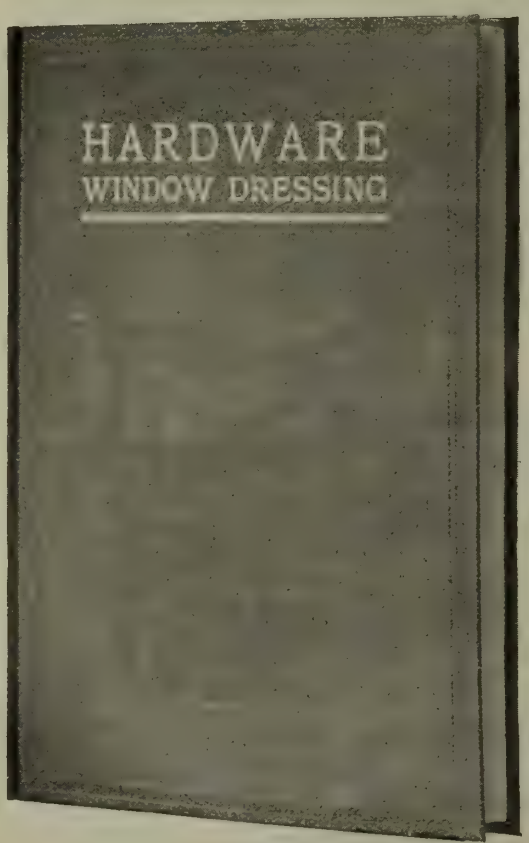
"The Ross rifle achievements were truly remarkable." *London Evening Standard, July 15th.*

"Great victory for the Ross rifle from Canada." *London Daily Express, July 15th.*

"The rifle of the future is the Ross rifle." *London Times, July 16th.*

"A'plague of possibles' with the Ross rifle." *London Sphere, July 15th.*

THE ROSS RIFLE CO., - QUEBEC



You May Become a Practical Window Dresser for $2.50

This is the first book ever written devoted exclusively to Hardware Display, and has been off the press only a few weeks. It is a practical, up-to-date collection of ideas of the most expert window dressers in the world. There are hundreds of displays in the book that can be put in at practically no expense—anyone of them will bring enough extra trade to the store to pay for the book many times.

256 Pages **8x11 Inches** **300 Illustrations**

Price $2.50. (Payable in Advance)

FIRE, LIGHTNING, RUST AND STORM PROOF

SIMCOE, ONT., April 9th, 1908.

"We have handled your 'Eastlake' Shingles for nearly a quarter of a century. They have been on the Court House, Free Library, and other public buildings of this town for 18 years. We have used very large quantities during the past 25 years, and they have always given first-class satisfaction, and have never required any repairs."

(Signed) MADDEN BROS.,
Tinsmiths and Hardware Merchants.

Metallic Skylights

The acme of skylight perfection!

We make them from hollow bars of Copper or Galvanized Steel—in style and sizes to suit all kinds of roofs.

They are very strong, and unaffected by cold or heat, as there is neither contraction nor expansion—and, if glazed with our fire-proof wired glass, they are absolutely fire-proof.

Wholesale Hardware and Iron Merchants

Montreal, ... Canada

F.&W.

Here's the Refrigerator that sells at sight, and each one sold sends along another customer. The

White Frost Refrigerator

MADE entirely of galvanized sheet steel, 1 1-4 in. air space between walls; thoroughly insulated with "Aerofelt" and "Maltha," the best, most expensive insulation known to science. Heavily enamelled outside and inside (enamel baked on.) Not a splinter of wood in its construction. It can not shrink, warp, swell nor decay. Lasts a lifetime.

ROUND in shape. There are no nasty corners, no cracks or crevices for dirt and germs to gather. Turn in the hose and wash it out in a minute. The ONE absolutely Sanitary Refrigerator

REFRIGERATION in harmony with Natural Law—maintaining a low, cool, pure, dry, equable temperature in hottest weather, preserving all foods sweet and untainted all the time—and most economical in ice. Perfect refrigeration guaranteed—and this guarantee based upon five years' successful usage in all parts of the country—Experience has proven the sanitary excellence of the "WHITE FROST." (see cut)

REVOLVING SHELVES do away with all "reaching over" to get an article — prevent spilling-accidents, and make easy use of every inch of shelf space. Shelves quickly removable and easily replaced. You can take the whole "innards" out in two minutes and put them back in less time.

ENAMELED in pure white outside and inside; trimmings of solid brass; perfect lock; ball-bearing castors; make the "WHITE FROST" the handsomest, best and most convenient and absolutely sanitary Refrigerator on the market.

WOMEN fall in love wth the "White Frost" soon's they see it. Sales are made without loss of time. Every customer is delightfully satisfied.

IF YOU want the Refrigerator trade of your city, you want to sell the "WHITE FROST." Get orders in now and guard against disappointment. Catalogue on request.

H&R Guns and Revolvers

H&R REG U.S. PAT OFF ARMS CO.

For over thirty-six years their superior shooting qualities accuracy and dependabiliy have been universally recognized.

Sold the World Over

We want you to have our *new* catalog showing complete line and giving valuable selling points

Here is our three-piece gun, which we call Model 1908. Built on the same lines as our famous Model 1900 in 12, 16, 20 and 28 gauge. This new gun is taken down in the same manner as a double gun—by pulling off the snap fore end and unhooking the barrel from the frame.

Notice the Target Grip

Light, compact, durable. The first combination of a medium priced revolver with *a perfect full grip*. Prevents slipping and twisting—insures a secure hold, because it fits the hand naturally, insuring confidence, which means a steadier aim and greater accuracy in the shooting.

Harrington & Richardson Arms Co.

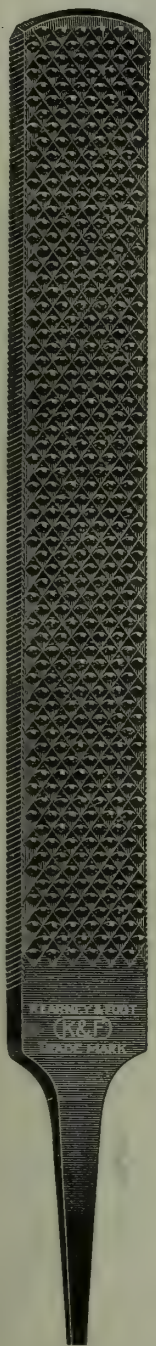
TORONTO HAMILTON MONTREAL

HORSE RASPS



are another excellent example of the completeness of the lines of goods we carry in our stock. We show here four of the best and most reliable makes of horse-rasps in the market. Our stock includes all of these four in both plain and tanged and in a large range of lengths. We have everything in that line you are likely to be asked for.

The completeness and the good selections of sizes and makers are characteristics of our stock. We choose the goods we will sell solely on their merits, and it will pay you to handle the goods we advertise. You can rely on their quality, which is backed up by the makers' names as well as by our own. You can make a good profit on them, too, because we sell right.

Order from us whenever you want hardware.

PURITAN REFRIGERATORS

Medium Priced. ***Extra Good Value***

To hardwaremen having a call for a medium grade refrigerator, our Puritan line is recommended. We make them in four sizes, each size being splendid value for the money. They are not offered in competition with the "cheap" lines. Puritans are lined with high grade galvanized sheet steel, which is easy to keep clean, non-rusting and non-corroding. The case is Soft Elm with a handsome Golden Oak finish, ice rack, provision shelves, ends of ice compartment and drain pipe are easily removable. The insulation is perfect and all parts are easily accessible. Puritans are fitted with strong, heavy retaining castors, lever locks and hinges in copper finish. And there are other points described in our catalogue.

When You Sell Clipping Machines Sell the World's Best

They cost you less than cheaply constructed imitations and give a lot more satisfaction

This Stewart No. 1 Ball Bearing Clipping Machine

is made with cut steel gears (not cast) hardened file hard and running constantly in oil; the highest grade flexible shaft and the world famed Stewart one-nut tension clipping knife.

We guarantee that it must please the man who gets it better than any other machine made, or it can be returned to us for refund of all money paid out including transportation both ways

All Leading Jobbers in Canada Have It

CHICAGO FLEXIBLE SHAFT CO., 250 La Salle Ave., Chicago

FIX UP YOUR CHIMNEYS

Even the best stove or furnace will be unsatisfactory if the chimney does not draw well. But the

"Zephyr Ventilator"

will give a good draft to any chimney. It will even allow the burning of soft coal in the stove, with good results.

We want you to sell the "Zephyr Ventilator" in your town. There is money in it, and the satisfaction that it gives will bring you new customers. **The "Zephyr"** cannot be excelled for ventilating the rooms of **Clubs, Steam Laundries,** etc. **The "Zephyr" makes high chimneys unnecessary.**

Lachine, June 5, 1903.

The J. W. Harris Co., Limited, Montreal.

Dear Sirs,—Your system of ventilation installed in our Convent has given us absolute satisfaction.

Yours respectfully,

How to Conduct a Retail Business.

A Paper by Fred C. Lariviere, Montreal, in Opening the Question Box Discussion at the Ontario Retail Hardware Convention at Hamilton.

Kindly accept my most sincere thanks for the honor conferred in selecting me to preside over the discussion of the Question Box. I am sure that a better choice could have been made from amongst yourselves, but am also sure no one could put better endeavors and good will to make this item of the programme a success. If my twenty-nine years' experience in the hardware trade is sufficient guarantee to answer effectively your questions, you may rest assured that I will do my best to give you the benefit of my long experience. I sincerely congratulate the organizers of this convention for the success they have obtained already, especially as to the number present and the good representation of the retail hardware merchants of the Province of Ontario.

I have been asked before the opening of the Question Box to say a few words on "How to Conduct a Retail Hardware and Stove Business." Not wishing to take very much time with this question, on which volumes could be written, I will confine myself to two important questions: 1st, "The profits that can be obtained over the cost of goods,"; 2nd, "The causes of failure in business."

Profits on Turnover.

I have before me a very striking illustration which, I think, is so plain and so clear that every one of you will be interested. It is a well-known fact that the oftener the stock is turned over the more profitable is the business, and profits accrue very rapidly. Let us suppose an investment in stock of $100 and that the margin of profit would be 20 per cent. on cost. If turned over five times during ten years that $100 would produce $148.83 of gross profits. If ten times during ten years, $510.16. If twenty times during ten years, $3,733.60, and if turned over forty times during ten years, or every three months, $146,870.74. You at once see the productive difference of each different case which I have no doubt no one of you at first sight realized. This principle laid down, I believe the interest of the retailer is to limit his business or stock on hand to the goods that are most saleable and carry a very small quantity of goods of which the demand is slight, and applying the same principle in fixing the selling price it can be seen that it is a better paying proposition to sell on a margin of ten per cent. goods that can be turned over once a month, rather than sell twice a year goods at 50 per cent. profit.

Business is like a man of war bound for a port, called Success. You have heard that more than once. Have you realized that you cannot go forward in the business game unless you fight and you cannot permanently succeed unless you continue to fight. The retail hardware business to-day is really a long-drawn-out battle from start to finish. The business battle is the case of the survival of the fittest. Any time you are caught napping with your hands down you are liable to get hit and the referee may count ten and out. Keeping everlastingly at it is the cost of the victory. If you expect to win in the game of business see that you lead. There should, however, be no such thing as enmity in business or hatred of your rival, only

FRED C. LARIVIERE, MONTREAL.

Who has built up a half million dollar hardware business since 1889.

that genuine pleasure of honorably beating your competitor in the game or contest. To outclass a business competitor should bring that feeling of gratification that we all experience when we outclass a rival in any other game. If our heart is in the game, if we really love it, we find much pleasure in studying the various points even though we are sometimes forced to accept a temporary set-back or defeat.

No great general ever won every skirmish or very battle with the enemy. In fact no one can win every time. We don't have to, and it is not necessary that we should. An occasional victory by your competitor is really a good thing for you. It makes you all the more alert and keen for the next fray, and meanwhile if you have been wide-awake you have strengthened the weak points and your rival will find that every inch of the ground will be hotly contested.

You are all aware that net profits are the result of every move you make. There are practices that will increase net profits more quickly than others, and amongst them are good buying and watching investment in every line.

What Constitutes Good Buying?

Good buying is not merely securing lowest prices, I believe the merchant who secures a fair price in a short time so that he has plenty of time to devote to the selling of his goods and the superintendence of his store is a better buyer than the merchant who gets the extra 2½ or 5 per cent., but in doing that uses so much of his time that the sales department is neglected.

Numerous are the merchants who neglect the watching of investments in every line, yet of all means of producing net profits there is nothing so important as watching everywhere your investment. Your sales go up and down with the number of items you offer for sale, not with increase or decrease in the quantities you own of the various items. To own a six weeks' supply when a two weeks' supply would carry you safely you have needlessly tied up so much of your capital, as is represented by the excess of four weeks' supply. On that amount of excess you lose not only the interest in itself and the cost of the storage, but also the loss of the profit you could have earned on other goods which might have been purchased with that amount.

To be successful each store must have a policy and in all of the departments must be seen at a glance the policy of the house. One of the best I know is to sell reliable goods at reasonable prices and give satisfaction to the customer at whatever cost may be.

Reciprocity of treatment with great efficiency as its prime motive will increase the interest of the customer in the business and will also increase the efficiency of the staff and create a friendly and favorable mental attitude.

The gross returns of profits ensured by a sale should be only secondary consideration. The good name of a firm is oftener of much greater importance than the capital it may dispose of.

What is a Fair Profit?

Is it reasonable to complain about low prices? If they are too low they should be promptly put up. It is better to refuse orders than to take them at unprofitable prices. Let the other fellow

have them. When a tradesman is doing everything possible to buy economically and work systematically, he can be fairly well assured that what is unprofitable to him, will not do his competitor much good. Volume of trade is not important unless it has profit-making quality. Better a small turn-over on a profitable basis than big returns, which are swallowed by wages and other expenses.

A fair profit-yielding price is not a thing that one needs to apologize for. The man who is always professing reason for selling at the low cost, by his action proclaims himself, either knave or fool. We know men who have played the "slaughtered prices" game for years. There is no stability in their business. Their trade is casual. A buyer rarely returns. Their word cannot be relied on. It is different with the man who makes no secret that he is in business for profit. Even though we sometimes cannot pay his prices, we are compelled to respect him for his frankness. We can trust him when he does alter prices to clear slow-moving stock.

In discussing prices it is well to remember that there is plenty of room for difference of opinion as to what constitutes a fair profit. A person of sound judgment who knows the requirements of his district, and is able to anticipate and gauge its requirements may make more profit at 30 per cent. than another man at 50 per cent. He knows there will be demand for particular goods at each season of the year. He has them in stock. He does not wait until the demand is in full swing before he orders. He meets it as soon as it arises, gets his goods off quickly and finishes with bare shelves. His competitor has to refuse orders he knows are wanted and finishes the season with stock in hand that has to be sacrificed or carried over until next season.

Running business is not an eight-hour job. The business man must be continually alert. Many a one owes more to the schemes elaborated in the quiet evening than to the work done with his hands in the shop. In thought he repeats the day's transactions, checks his work and his men's work, calculates, perchance, the profit he has made on sales, discovers where mistakes have been made, and then anticipates the morrow's tasks, plans the work for the men takes mental stock of his surroundings, endeavors to foresee the probable effect of current events and market conditions on the trade of the future. This cannot be done so well in working hours when the busy man is constantly in demand to deal with details.

Causes of Failure.

I will now put before you a few causes of commercial failures, and make an application of same. I will give them in the order that R. G. Dun & Co. have them in their report, naming the first the most numerous.

Lack of capital ...	3,370	$39,342,384
Incompetence	2,091	19,342,908

Extravagance	93	1,094,927
Speculation	70	4,576,734

To lack of capital is attributed over 50 per cent. of the total number of failures. I believe this is much over the reality for many prefer to attribute to lack of capital the cause of failure rather than attribute it to their own administration. I have studied and had occasion to investigate many failures and I have found that whereas in the first years of business with no capital a merchant had succeeded in making a capital of $3,000, $5,000 or $8,000. He thought he was rich and began to pay less attention to business, became a little more extravagant in personal expenses, and, above all, less attentive to customers, leaving it to his clerks to look after their wants. This departure has the most fatal effect on the staff for the moment the owner of a business lacks energy, stability and punctuality, the whole of the staff follow suit. Hence capital is wiped out and the man fails and attributes to lack of capital his lack of energy and ability.

Inexperience and incompetence count for a very large share, and I am greatly surprised at this as this is surely one of the absolute qualifications of a successful trader and I believe no jobber or manufacturer should grant credit to a man in business who is incompetent, and this is one of the easiest things to find out. To the others with the exception of failures of others can be attributed as personal causes, and to eliminate them the merchant should possess the following qualifications:

Concentration Necessary.

First of all is "concentration" and I will relate what Andrew Carnegie, in his book, "The Empire of Business," says:

"The concerns which fail are those which have scattered their capital, which means that they have scattered their brains, also. They have investments on this, or that, or the other, here, there, and everywhere. 'Don't put all your eggs in one basket,' is all wrong, I tell you. 'Put all your eggs in one basket and then watch that basket.' It is trying to carry too many baskets that breaks most eggs in this country. He who carries three baskets must put one on his head which is apt to tumble and trip him up. One fault of the American business man is lack of concentration."

Here is also what the same author says about speculation: "When I was a telegraph operator here in Pittsburg we had no exchanges in the city, but the men or firms who speculated upon the eastern exchanges were necessarily known to the operators. They could be counted on the fingers of one hand. These men were not our citizens of first repute; they were regarded with suspicion. I have lived to see all of these speculators irreparably ruined men, bankrupt in money and bankrupt in character. There is scarcely an instance of a man who had made a fortune by speculation and kept it. Gamesters die poor, and there is certainly not an instance of a speculator who has lived a life creditable to himself, or advantageous to the community. The man who grasps the morning paper to see first how his speculative ventures upon the exchange are likely to result, unfits himself for the calm, consideration and proper solution of business problems, with which he has to deal later in the day, and saps the sources of that persistent and concentrated energy upon which depends the permanent success, and often the very safety of his business,"

Speculators Seldom Win.

"The speculator and the business man tread diverging lines. The former depends upon the sudden turn of fortune's wheel, he is a millionaire to-day, a bankrupt to-morrow. But the man of business knows that only by years of patient, unremitting attention to affairs can he earn his reward, which is the result, not of chance, but of well-devised means for the attainment of ends. During all these years his is the cheering thought that by no possibility can he benefit himself without carrying prosperity to others. The speculator, on the other hand, had better never have lived so far as the good of others or the good of the community is concerned. Nothing is more essential to business men than untarnished credit. Credit begotten of confidence in their prudence, principles and stability of character. Well, believe me nothing kills credit sooner in any bank board than the knowledge that either firms or men engage in speculation. It matters not a whit whether gains or losses be the temporary result of these operations. The moment a man is known to speculate, his credit is impaired, and soon thereafter is gone. How can a man be credited whose resources may be swept away in one hour by a panic among gamesters?"

To succeed in business it will be necessary that your mind be constantly engrossed with these principles and that your cravings be followed by years of unrelenting labor. Great ideas may suddenly crop up in your brain and open up wide vistas, but experience teaches that no durable success is attained where tenacity and self-control are lacking.

Then, again, as we are following the same highway, let us profit by one another's experience. Let us rise above that miserable spirit of jealousy and suspicion towards our brethren. Instead of criticizing, running down and slandering even our competitors, let us say to ourselves that we are in a position to imitate them, that competition is open to all. True, there will be only one at the

head of the list, but it remains, nevertheless, for us to labor steadily and to do our very best to get there, so that if we fail in our efforts it will be no fault of ours.

A casual observation of what is going on especially in large cities, will suffice to convince us that the main cause of most failures is to be found in the peculiarities of those who fail, rather than in the conditions against which they had to contend. Study the methods of those who succeed, and you will find that they are taking to their work with no faint heart, that they are not carried away by the pleasures of society, outdoor sports, and the theatre or similar amusements.

I do not mean that one should refrain from all such pastimes, but they should occupy only a secondary place in our minds and occupations, for no one can hope to get along in the world without concentrating all his energies towards the attainment of the object he has in view. In this respect the same rules apply as regards business and as regards the trade.

Before starting in any business one should make himself acquainted with all its details, with the various uses of all the goods offered for sale as well as with their value. Do not be afraid to accumulate too much information, but work on earnestly and steadily, picking up all available data as you go along and finding out where the various wares can be procured to the best advantage.

Punctuality and Perseverance.

In my opinion to feel that one has done his whole duty should be sufficient inducement to act as aforesaid. The sense of duty brings along with it steady habits and punctuality. Never fail to keep an engagement for punctuality is the mainstay of business success.

Many persons of ordinary ability, and without any other assistance than their knowledge of business conditions in their particular trade, owe to their perseverance, their punctuality and their economy achievements far exceeding their hopes. It follows that we should never feel discouraged, but resolutely face all difficulties and use them as stepping stones towards the desired goal, for what seems unattainable to-day may be easy of accomplishment to-morrow.

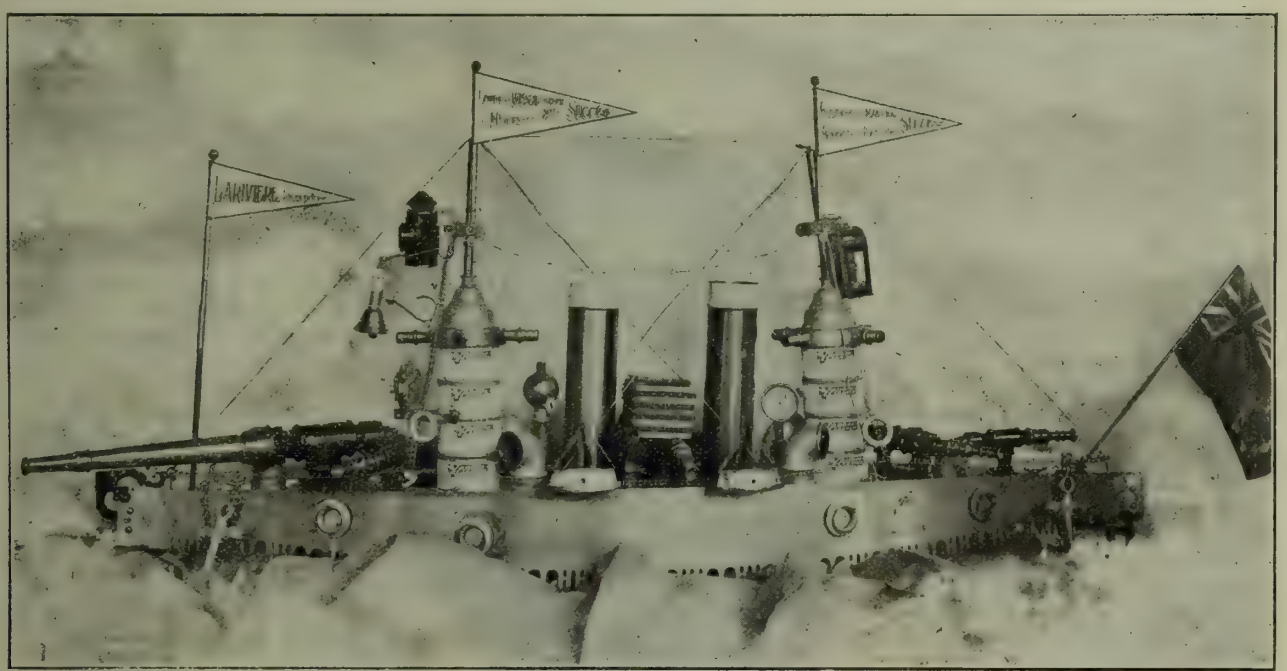
Cultivate uprightness and honesty, which are indispensable to success. Always keep your word. Never make a statement without being positive that it is true, and should you find out afterwards that you were mistaken do not hesitate to acknowledge your error. By doing so, you will retain the confidence not only of your customers, but that of your jobbers as well.

All I have said may be summed up in one word, "Character." Economy is another indispensable quality, for as you are all aware, extravagance is the most frequent causes of failure, I refer to that kind of extravagance developed by meetings and junketings with friends, which keep one away from his work and desk. This truth is so generally admitted that it seems useless to insist upon it. I challenge contradiction when I say that business is not pastime, but a means of acquiring a fortune, or at least a competency, and that a merchant's aim should be to reap great profits from his trade, not only for the benefit of himself and family, but for the benefit of his employes as well.

A branch of work to which, as a rule, merchants do not give enough attention is bookkeeping. If you only realized the variety of information and data which may be obtained from a proper system of accounting, even as regards a small retailer, you would thing of practising that false economy of which so many are guilty. What could be more useful than to realize the amount of one's sales or purchases, of one's stock, assets and liabilities? At any rate, you acknowledge that if you only had once a month all these data you would be better posted as to the real condition of affairs, and in a better position to rush matters to a satisfactory culmination, for bookkeeping is the key to success.

Emerson says: "No one can cheat you out of ultimate success but yourselves."

Accept my sincere thanks for your kind attention.



A Window Display in Mr. Lariviere's Store—"Business is a Man of War Bound for a Port Called Success."

ALUMINUM KNIFE HANDLES.

Steel table knives with aluminum handles are now manufactured in England in large quantities. The aluminum handle is solid and is cast on to the bolster so that the knife is as solid as though made in one piece. The fact that aluminum is light and will not break like a hard-rubber or celluloid handle, is much in its favor. Its cheapness, too, allows the knife to be sold at a very reasonable price. To be sure, it is no more durable than a solid steel knife, but these have always been open to the objection of excessive weight. The fact that one of the leading cutlery manufacturers of Sheffield is now making knives of this description is an indication that they have met with ready sale and are satisfactory.

Beware of a suspicious man; he's apt to judge others by himself.

Prepared Paint Best for Hardwaremen

Address Delivered by C. C. Ballantyne, Before the Ontario Retail Hardware Convention at Hamilton, Feb. 11, 1909.

The time allotted for my address on the subject of "Why Prepared Paint is a More Advantageous Article for the Retail Merchant to Handle Than Lead and Oil," does not permit me to enter into the subject very exhaustively. I, therefore, will only briefly deal with the three most essential points between good prepared paint and good white lead and oil, these being quality, sales and profit.

Quality.

All wise merchants hope and expect to sell to the same people, not once or twice, but time after time. It might be well to preface my remarks with the statement that comparative tests, weather tests and experiments show that prepared paint, and by this I mean, prepared paint honestly and scientifically made, contains ingredients that strengthen white lead and linseed oil, cause it to cover more surface, provide a tougher, more lasting coat than simply the hand-mixed white lead and oil used alone.

Prepared paint has had to fight a hard battle against prejudice ever since it made its appearance on the field some 20 or 25 years ago. Prior to that time the field was held undisputedly by lead and oil. The gigantic strides in popularity and sales prepared paint has made in Canada and elsewhere prove that the idea is right. And the proportion of prepared paint sold has grown much more rapidly than the total consumption of painting material.

The best paint that is made to-day is good prepared paint. This is not generally recognized to be true, because a great many of the prepared paints made are worthless. Unfortunately, there are more of the poor kind than the good. The good suffer for the poor. This is equally true of white lead, which has been looked upon in the past, and is still looked upon by many, as the best painting material. All white lead is not good. There's a great difference in brands. Just as in prepared paints, some are worthless and some are good. There is just as much trouble, just as much dissatisfaction, and just as many poor results from the use of white lead as from other paint material, but it's not generally admitted. It's strange, but true, some painters will make excuses for and overlook poor results from white lead they mix themselves, when under similar circumstances where prepared paints have been used they will condemn them every time.

It's habit—due to prejudice. More prepared paint will be used when such prejudice is overcome. A better knowledge of and more experience with good prepared paints will bring such a change about.

There are many reasons why paints prepared by machinery are better than paints prepared by hand. Remember in paint making, as in every other line of business, the world has progressed, and is progressing. Things have changed; they have advanced; they have improved. People not so long ago, used to grind their own corn and spin their own yarn. They used to burn candles, and travel by stage coach. They don't now. When a woman spun her own yarn and ground her own corn, she felt she could do this work better than it could be done for her by machinery. She had been doing it so long and had become so accustomed to it, she could not all at once trust it to anybody else.

It's the same with paint. Painters have been so long mixing their own, in their own way, it's hard for all of them to believe it can be done as well in any

C. C. BALLANTYNE, MONTREAL,

Managing Director Sherwin-Williams Company in Canada.

other way. I am pleased to state, however, that a large number of some of the most reputable practical painters in Canada are now counted among the largest users of good prepared paint. It must be borne in mind that while prepared paint can be used to advantage by amateurs, it is always preferable to engage a good practical painter to apply prepared paint, especially where a large amount of painting is to be done, like painting a new house or re-painting an old one.

Habit is strong. But improvements always make their way. It's the world's habit to progress—it's the survival of the fittest all the time. Paints prepared by machinery are an improvement over paints prepared by hand, and they will make their way—just as sure as the sun rises and sets.

Good prepared paint is a better paint than any man can prepare by hand. It will cover more surface, it will look better, and is more economical than any paint prepared by hand. Let me briefly explain why:

It will cover more surface, because it's more thoroughly mixed and more finely ground than paint prepared by hand. It will wear longer, because the oil and pigments are so thoroughly incorporated by the mixing and grinding that they hold together better and make a more solid surface, than it is possible to obtain by paints mixed by hand. It will look better, because the color is clearer and cleaner, and has a better, more lasting gloss than paint mixed by hand. It is more economical, because a gallon of it will spread farther than a gallon of paint prepared by hand, and it will last longer.

Sales.

But it is the merchandising of paint that you are most interested in. You want to sell the goods that net you the greatest profits and satisfaction and move quickly off your shelves.

In a comparison of this kind, the first and most prominent feature seems to me to be the creative work that the prepared paint houses have done and from which the retail dealer reaps not a little of the profit. I do not believe that it is any exaggeration to say that the educational work done among property owners and paint users generally is responsible for 25 per cent. of the painting done in the country. By this I mean that if the pressure which the paint makers continually exert on the public was withdrawn, the sales of paint generally would fall off just 25 per cent. This educational work takes the form of magazine and newspaper advertisements, personal letters and literature of all description showing convincingly and in plain language how the life of lumber is prolonged by the use of paint; how the real estate value is enhanced, and the increased pleasure of beholding and living in buildings which are kept well painted. This sort of work unremittingly kept up, creates a tremendous amount of painting which would never be undertaken otherwise, and while the lead and oil vendors have participated in this created business to a considerable extent, the merchants selling prepared paint have, of course, been the greatest gainers.

By making proper use of the cartons and hanger displays provided by manufacturers for the advertising of shelf goods, they will practically sell themselves and prove a source of constant revenue and the means of attracting people to your store.

And then there is a point that would appeal to me I think very strongly if I should establish a hardware store—and that is the question of appearance. Any one who has had experience knows white lead and oil is an inconvenient, messy, unattractive and time-consuming com-

modity to handle. Prepared paint is just the opposite. It is put up in cans attractively labeled which make a handsome shelf and counter display when rightly handled. It is convenient and easy to handle, and the display advertising supplied by the leading manufacturers adds much to the appearance of the store interiors. In addition to this, prepared paint allows of attractive and striking window trims which create business. You could hardly trim a window with white lead and oil, and if you did the average householder would not be influenced to paint thereby. The workman buys prepared paint and so does the houseowner, or householder, who, on the summer evenings after work, will brighten up his fences, barns or even the house itself. This class afford an outlet for the sale of prepared paint and shelf goods which cannot be reached by lead and oil.

Prepared paint manufacturers are satisfied to confine the sale of their paints to one merchant in each locality. They are prepared to advertise your store by advertising their paint. They will give you booklets, enclosing slips, newspaper electros and, in fact, every possible assistance is afforded to push the sale of paint. This has the effect of advertising not your paint department only, but your entire store, for you know the desirability of having people come into your store, how you can often sell one man hardware who comes after rope, another man paint who comes for nails, and so on, until finally you have made customers of them for all time. This is one of the greatest advantages in handling a line of well advertised and favorably known prepared paint, the people come to your store. In the case of lead it is entirely up to the painter. Prospective customers for prepared paint can be shown color cards, samples, etc., of the actual goods, in fact, a clever salesman can make the buying of paint for a house of as much moment to a woman as the buying of a gown, and a matter of lively interest to a man as well. Some of the leading prepared paint makers have established a department in connection with their advertising which places the merchant in the smallest town on a par with decorators in the largest centres. The manufacturers if furnished the name, address and all available particulars of the prospective job, will send color sketches, samples of rugs and curtains for interior decorating, etc. In short, this service is exactly the same as would be afforded by a high-class and costly decorator. And the paint, varnish and stain for the work is sold, not direct by the manufacturer who does all the work, but by the local dealer. All the inquiries received by extensive magazine and newspaper advertising are referred to the nearest agent to buy the goods. Then there is the personal letter system used by the leading paint houses. Personal letters, addressed on good paper, under two-cent postage, are written to prospective paint and varnish users, giving good logical reasons for painting with their particular make of paint and advising where it can be purchased in their neighborhood.

Profit.

The question of profit is, of course, most important, and without going into specific figures, it is well known that prepared paint allows a larger margin of profit than white lead, the latter being to the hardware merchant something like sugar is to the grocer, an unprofitable staple, sold on a very, very close margin.

Another feature which comes strictly under the heading of profits, is that the merchant selling prepared paint is in a position to carry a full line of "shelf goods." You, of course, know that shelf goods include varnishes, stains, floor paints, paint and varnish remover, screen enamel and a host of similar specialties which the housewife is in constant need of, and, in fact, there are practically none of your customers who would not at some time or other buy a certain quantity of shelf goods if they were noticeably and attractively displayed. And the profits on this line of goods are most liberal.

To sum the situation up, it may fairly be claimed that prepared paint is the modern method of selling paint. The same transformation has come about in many other directions than paint, within the last few years. We travel much faster over the land, we can if we so desire venture under the sea, and a few valiant souls have even taken wings unto themselves and are doing fairly well considering. These things all represent progress. And so prepared paint is the modern method, up-to-date, if you will, both in the manner of manufacture, selling and advertising of painting materials.

DISSTON'S NEW CANADIAN WORKS.

Henry Disston & Sons, saw and tool manufacturers, Philadelphia and Toronto, have purchased four acres of land on Fraser Avenue, Toronto, on which to locate their Canadian works, the present premises, although built specially for the Disstons, having proven too small.

The company has set apart $250,000 for this purpose, and in March two two-storey brick and steel structures will be erected. These buildings will be 260 x 60 feet, and 177 x 53 feet. There will also be erected separate buildings for boiler-house and engine-house. Although these buildings will not occupy one-quarter of the site, the Disstons thought it well to provide for the future.

The present intention is to remove the plant now situated on Adelaide Street to the new site and there continue the manufacture of lumber mill saws. All new machinery will be installed and the home works at Philadelphia are now busy making the latest special machines for the Toronto factory. The new buildings to go up next month call for an expenditure of about $70,000, and will give employment to 75 men.

Wm. E. Radcliff, the Toronto manager, could not state definitely how much further the company is prepared to go, but it is believed that next year great additions will be made to the Toronto plant by the erection of new buildings to look after the manufacture of hand saws, files and general hardware tool lines. The lumber industry in Canada is quiet for about five months every year and this causes a consequent quietness in the saw works; and then the French tariff which places the maximum rate on goods made in the United States gives a third reason for enlarging the Canadian plant.

Electric energy will be employed to run the machinery at the new works.

THE CUTTING IN STEEL.

George E. Drummond, of Drummond, McCall & Co., Montreal, stated that prices for Canadian products would not be affected by the cut in the States. Steel rails and pig iron, for instance, were already cheaper than cutting would be likely to render similar products in the States. So far as import stuff was concerned, the case was different. The trade generally would get the benefit of any reduction going. Mr. Drummond believed that the action of the U. S. Steel Corporation would do a great deal of good. It would tend to stimulate buying.

The Canadian selling agents at Montreal of the United States Steel Products Export Co., for galvanized and black sheets, etc., state that there has not been any change in prices in these lines for the Canadian markets, the reduction announced having been in the selling prices for the United States market and not for export. It is also stated that the charge does not affect their prices for any class of wire in the States or in Canada, but is all confined to heavy material.

Chas. L. Bailey, Toronto, representing Wm. Jessop & Sons, Sheffield, England, said the reduction applied only to structural iron, such as angles, girders and beams used for construction purposes and in the manufacture of agricultural implements. It might also apply to the bar iron and rods of certain low grades.

S. Samuel, of M. & L. Samuel, Benjamin & Co., thought the reduction would have only a sentimental effect on the Canadian market, as special export prices were made for iron and steel entering this country. The iron and steel market has undoubtedly been in a depressed condition. It is a question, however, whether this reduction is not made with a view to influencing the recommendation of the forthcoming tariff commission in the hope of having the wage earners bear some portion of the probable reduction. On the other hand if the reduced price is bona fide the effect on the market will be perceptible as the anti-dumping clause will not be operated. Meanwhile it may affect the placing of immediate orders until buyers are able to see which way the market will turn.

Belleville has received a proposition from the Burrell Rock Drill Company, for the erection of new buildings and plant on consideration of exemption from taxes and free power.

Hardware Conditions in Great Britain

(By Hardware and Metal's European Correspondent).

Sheffield, Feb. 18.—Some manufacturers profess to be disappointed that trade has not moved forward more quickly. That it is not stagnant is apparent from the fact that more men are being put on, and in some instances extra shifts are being worked at the stell foundries and cutlery and plate works. Trade has been so bad that is recognized by the bulk of manufacturers that it is better that it should revive gradually, and that is what is happening.

But no sooner does one difficulty disappear than another makes its appearance. Last month I said that one dispute affecting a section of the engineering trades had been ended. Now there is another. In all parts of the country the Employers' Federations have notified the men that their wages are to be reduced and the men refuse to "take it lying down." In the Manchester district the reduction sought to be imposed was 2s.

SIR JOSEPH JONAS.

per week on time and 5 per cent on piece work, now it has been altered to 1s. and 2½ per cent. The Trade Union Leaders recommend the men to accept the amended terms and the result of the ballot will undoubtedly be in favor of this amicable settlement. In Sheffield the men are holding out against a 1s. reduction on time rates and 2½ per cent. on piece, but there is no doubt that the lower rates are inevitable. The masters are very firm in their attitude.

A New High Speed Steel.

Something like a sensation has been created by the pronouncement made by Professor Arnold, of the Metalurgical Dept. of Sheffield University, that it is probable there will soon be on the market British steel with quadruple the cutting power of any known to metallurgy.

He was dealing at the time with the statement made by Mr. Carnegie that the decadence of British steel metallurgy is well advanced. The professor averred that speaking not only on general grounds that scientific progress was inevitable, but also on specific facts within his knowledge, he was strongly of opinion that in a short time the best high-speed steel to-day is destined to become a "back number."

I have gone into this matter with several steel makers, and have come to the conclusion that there will not be such an upheaval in the steel industry as the Professor's statement seemed to indicate. The secret rests with one firm, Jonas & Colver, and I understand that the process is not very different from the one employed in the manufacture of high-speed steel. There will be no scrapping of machinery.

If workshop practice demonstrates that the new steel will do all that is predicted, then Sheffield's reputation as a leading steel city will be further justified.

Further inquiry reveals the fact that the new steel is already on the market. The head of the firm who are the makers is Sir Joseph Jonas. "It is hardened in water," he said in the course of an interview, "and shows a remarkable increase in hardness over the present high-speed steel. Rigorous tests reveal that it has at least four times the cutting power of any other known steel of this class."

He pointed out that it is not likely to revolutionize machinery again, as machinery has already been modified greatly in consequence of advances in high-speed steel. The present circumstance is that machinery is stronger than the cutting steel, but the new steel will give to tools four times the durability they possess at present.

It has been demonstrated that a tool made from the steel can be hardened seventeen consecutive times without showing signs of a crack.

Sir Joseph Jonas is a remarkable man of exceptional business capacity. He is a German by birth, but has been so long in Sheffield that there is nothing he does not know of value about Great Britain and her industries, especially those allied to steel. Sir Joseph believes in business first, and pleasure a long way after, and this has no doubt had a good deal to do with the success he has achieved as a steel manufacturer and a public man. When he was made Lord Mayor of Sheffield in 1904, he told the story of how he arrived at the Midland station, not very many years before, a stranger to the city. Now he had achieved the highest dignity.

After his Majesty the King visited the city to open the new University buildings during Sir Joseph's Lord Mayoralty, the whole city was delighted that his Majesty had decided to confer the dignity of knighthood upon Sheffield's first citizen.

High-Speed Steel Litigation.

Last month I dealt in detail with the action instituted by the Bethlehem Steel Company, of Philadelphia, against a user of high speed steel. At that time judgment had been reserved. The Bethlehem Steel Company have since lost their case, which means that they have failed in their attempt to secure the monopoly of the manufacture and sale of high-speed steel in America.

It seems rather strange that any one firm should endeavor to uphold a contention that they had the sole right to use the high-heat treatment, which is the only known method of making the steel do the work which has made high-speed steel gain such a vogue.

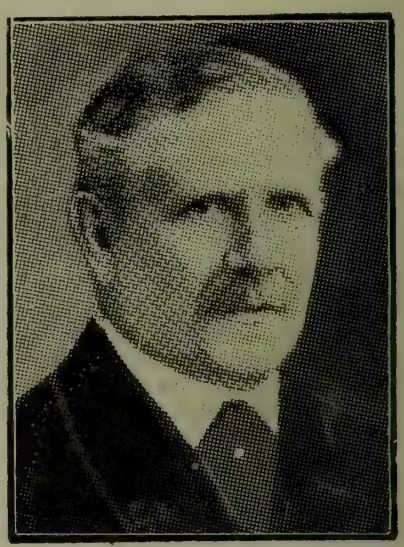
The decision, of course, has been received with jubilation in Sheffield and other steel centres from which high-speed steel is sent in big quantities to the United States.

I hear it was solely this action which led Jonas & Colver to make the experiments which have resulted in the new steel.

Death of Steel Magnate.

Everyone was very sorry to hear of the rather sudden death of Dr. Francis Elgar, at Monte Carlo, where he was spending a holiday. He was the chairman of Cammell, Laird & Co., the big armament steel and shipbuilding firm which is well known in Canada and other parts of the world.

He was one of the best known authorities of the day on naval architecture,



DR. FRANCIS ELGAR.

and the biggest shipbuilding companies were in the habit of consulting him whenever they contemplated any departure in building. At one time he was a director of His Majesty's dockyards.

Undoubtedly the strain of directing the reorganization of the company told severely upon him, and considerably shortened his days.

A New Zinc Trust.

Definite information is to hand as to the new Zinc Trust which has been formed on the Continent. It will consist of a combination of the various unions already in existence in different countries and will thus take in almost the entire European output of zinc. The most powerful partner will be the group of German works, together with the Belgian undertakings affiliated to them. The next group consists of the old Franco Belgian works. Besides these groups of producers must be mentioned the English works, about five in number, who do not belong to the Union,

but in the opinion of the German representatives will give their adhesion.

No effort will be made to include the American Zinc foundries in the combine, chiefly on account of the prevalent opinion held by members of the Union that exports of American Zinc will not be a factor to be reckoned with for some time.

The first object held in view by the Trust, which is to be called the Zinc Founders Union, is the regulation of the output by means of a system of quotas assigned to the various members, and it is the difficulty experienced in fixing this which has hindered the definite formation of the union for about a year. The quotas are now arranged on a sliding scale, which will be extended or contracted just as the demand becomes active or grows dull.

At present, no prices will be fixed by the Union, but it is only to be expected that this will come in the near future. At any rate, a rise in price will be looked for before very long. It is intimated that if new Zinc works are erected outside the Union of such a capacity as to disturb the state of the market, the Union will be dissolved forthwith.

The Tin-plate Trade.

The Board of Trade annual returns of exports of tin-plates show that although the total volume of trade for 1908 fell slightly below the total of 1907—a record year—the exports were eminently satisfactory amounting to 403,007 tons, as against 405,328 tons in 1907, a decrease of 2,321 tons. The year 1908 will, therefore, rank amongst the most prosperous in the Welsh tin-plate trade. A remarkable fact is that the United States imported more Welsh tinplates last year than in 1907, the total for 1908 being 60,602 tons, as against 58,-920 tons in 1907. Canada imported 17,-808 tons in 1908, compared with 20,101 tons in 1907, and 19,975 tons in 1906. More trade was done in 1908 than in 1907, with Russia, Belgium, Portugal and Australia.

No effect has been experienced in the tin-plate trade consequent upon the establishment of works at Morrisburg, Ontario. R. A.

BLACK OIL FINISH ON STEEL.

Many articles are found in the market with the black oil finish. It is also known as the burnt oil finish. It is a finish quite extensively used on hardware, particularly mechanics' tools, like wrenches, chisels, pliers and similar implements. While there are several methods of producing it one of the best is the following suggested by the Brass World:

The article to be finished is heated in a furnace, to cherry redness, and then plunged into oil (preferably lard oil). The article is then removed and the oil burned off in the furnace. After this has been done it is immersed in water. The oil must be kept cold when a large number of tools are to be treated, as the heat will cause it to burn. After the immersion in water, the surface will be found black and protected against rust. In order to bring out the best surface, a light film of linseed oil is applied to the article, and the excess then wiped off.

Tents and Camp Supplies

Hardware Men Who Handle Sporting Goods Can Make Money on Taking Orders for Awnings, Tents, Camp Furniture and Campers' Outfits.

Why should not the average hardware merchant sell tents, awnings, bunting, flags and general camp supplies?

Is there any valid reason why he should not extend his business opportunities and possibilities to cover these lines? As it is now in the smaller towns and cities outsiders usually come in with these goods and reap the profits. The suggestion that the hardwareman should take up such articles does not imply that he should lay in a heavy stock and invest capital in the articles which are largely seasonable, but he could advantageously represent some reputable house and take orders from catalogues, especially for spring and summer delivery.

No one, for a moment, would expect him to have a big consignment of tents, awnings, flags or camping utensils, but he should place himself in a position to meet and supply the demand which, in certain centres, might not be large, but with cultivation and judicious advertising would be bound to grow.

While hardwaremen generally go more or less extensively into sporting goods such as guns, rifles, ammunition, fishing tackle, skates, hockey sticks, lacrosse sticks, it is but one step further to be in a position to furnish tents and the usual camp, hunting or tourist requisites.

A careful survey of the field would lead to the conclusion that the venture is worth trying at any rate, and does not involve much outlay. As it is now several manufacturers and jobbers report that they frequently receive orders for tents, bunting and flags through hardware dealers, and they see no reason why this trade and connection cannot be developed with mutually satisfactory results.

What the Dealers Say.

The D. Pike Company, Toronto, have several hardwaremen who sell their goods, particularly in the West. They believed that the hardwareman was in a good position from the nature of his business and the fact that he handled sporting goods, blankets, etc., to take orders and be on the lookout for the tent, hunting, awning, sail and kindred articles which he could dispose of mostly by catalogue. Such business would fit in very well with hardware.

John Leckie, Limited, Toronto, also has hardwaremen carrying their goods in Cobalt, Sudbury, Sault Ste. Marie and Port Arthur, where many mining, prospecting and fishing parties are outfitted each year. In the smaller places in the old and more settled portions of Ontario, it would, perhaps, not pay the dealer to lay in a stock, as the business was to a certain extent limited, but they received more orders from these centres from hardware merchants than from any other class of merchant.

Wm. Bartlett & Son, Toronto, manufacturers of awnings, etc., consider that hardwaremen would not be able to take orders for awnings of the rolled type, which are operated by a chain gear, as it requires an experienced man to make the proper measurements, to know the character of the structure to which these awnings are to be attached; and in addition, they are difficult to put up. So far as pulley awnings are concerned, to take the measurements for these, which are operated by a rope and pulley, is simple. The awning can easily be attached to a store front by one man. There is no reason why the hardware dealer should not take orders and do business for this style of awnings, they being more used in the smaller towns than awnings of the roller type.

Camp Outfit Problem.

Mr. Bond, of Rice Lewis & Son, Toronto, said that it was but a natural step for the dealer supplying sporting goods to handle outfits for tourists, prospectors and campers. As soon as this firm moves into its new building on Victoria Street, it intends to go extensively into the retailing of hunters' clothing, camp beds and chairs, camp stoves and reflectors, as well as collapsible aluminum cooking outfits, which contain all the table requirements for a party of four and yet weighs only 4 pounds. In reference to the sporting goods line, Mr. Bond tells an amusing story with a rather good point to it which might be pertinent to the camp outfit trade. A hardwareman complained to him recently that even his best and oldest customers went directly by his store door to the neighboring town of Orillia to buy their guns and rifles.

"Do you know," he rather innocently inquired, "I can't understand it?"

"It is strange," was the reply. "How much of a stock do you carry?"

"I don't carry any," answered the caller, "but you would think customers would come to me any way to make some inquiries."

"Well, suppose you place a few rifles in stock and see what you can do," was the rejoinder.

The visitor accepted the advice and is now doing a good trade in sporting goods.

HOME-MADE FIRE EXTINGUISHER.

An inexpensive fire extinguisher may be made by taking twenty parts of common lime; salt, five parts, and water, seventy-five parts. Mix well and put in thin bottles. In case of fire a bottle should be thrown so that it will break in or near the fire, when the gases liberated from the water, salt and lime solution will put it out. This mixture is said to be better and cheaper than that used in many of the high-priced fire extinguishers installed for fire protection.

The Maniwaki Electric Company has decided to increase its lines next summer in a southerly direction from Blue Sea Lake to Gracefield and in a northerly direction from Maniwaki to Bois Franc, River Joseph and Montcerf. When these improvements are completed the company will have 30 miles of line.

THE STOVE PEDDLER AGAIN.

A retail hardwareman in Western Ontario complains that the stove peddler is operating in his district and succeeded in selling a number of ranges before he was aware they were at work. While the problem now is to curtail the amount of damage done it is always better to lock the stable door before the mare is stolen.

How does the stove peddler work? He descends upon a community with a carload of ranges and a staff of expert salesmen who drive out into the country in all directions seeking customers. They drive up to a farm house and while the leader is doing spectacular work to impress unpon the farmers the unbreakable qualities of the malleable range, an assistant is usually pumping the farmer's wife or daughter for information, and gathering together some selected sticks of fuel in case a demonstration can be secured. The range is dumped off the wagon, jumped upon or hit a glancing blow to show its soundness and, if possible, the old range is taken down and the new one set up. Then the farmer is taken in for a big price on a note extended over two or three years. In this way the peddlers get rid of their stock and get ahead of the unprogressive dealer who sits in his store and waits for business to drop into his lap.

The merchant with modern ideas will not wait for the stove peddler to appear on the scene. He will go out after business himself and knowing that his community may be the next place visited he will warn his farmer friends not to be taken in by any "smart Alecs" who try to unload high priced ranges on them without giving time for investigation. A circular letter sent to the farmers and townspeople urging them to buy nothing without comparing with the goods displayed in the local hardware store will receive attention. Then back this up by a plain talk showing that the so-called high qualities of the malleable range are doubtful advantages. Ask them to see if the fire pot and grates of a malleable range are malleable or cast iron before buying. And tell them that if the malleable range manufacturers find it necessary to use cast iron in the places where the heat and strain are the greatest that all the noise made in banging the top of the range is mere show and sham. Point out that a range of equal quality can be had at the local store for from half to two thirds the price the stove peddler asks and if any repairs are needed they can be secured from a man on the spot without delay.

The hardwareman who adopts this line of action need not be afraid of the stove peddler. Newspaper publicity and the use of the store mailing list—combined with up-to-date methods in canvassing the district for business—are the best means of combatting the competition of peddlers and catalogue houses.

PROFITS IN CEMENT.

At the annual meeting of the International Portland Cement Company, at Ottawa, a few days ago, it was announced that the orders for 1909 delivery, taken up to Feb. 15, show an increase of over 23½ per cent. over previous years. The financial statement for the year ending Nov. 30, 1908, showed net profits of $217,227, the earnings being at the rate of about 18 per cent. on the outstanding capital.

This is an excellent record for an off year such as 1908 was and must be accountable to the company having some large contracts covering the season's business and booked early in the year before the prices were broken.

Last summer conditions in the cement industry became so unsatisfactory that several of the smaller concerns shut down their mills indefinitely. Building was dull and the establishment of the large Lehigh plant at Belleville, together with the enormous output of the existing concerns, overstocked the market, prices tumbling in the fall to the record low level of $1.30 per barrel, plus the usual charge of 40 cents for sacks. And that these conditions are no better as yet, is shown by the Hamilton civic contract for 1909, for which the quotation was $1.23½.

This year, too, will see the opening of the Canadian Portland Cement Co.'s mammoth mill at Port Colborne, built to supply the western trade, one order received from the west for delivery in 1909 being for 80,000 barrels for the Winnipeg municipal power plant, this being the largest order for cement ever placed in Canada.

The agitation in favor of changing the selling base of cement from the 350 pound barrel to the 100 pound bag is making headway, and the large cement companies are gradually coming to a realization of its advisability, although it means the replacing of their millions of cotton sacks from the 87½ lb. to the 100 lb size. Paper sacks are also being used more extensively and are being found very satisfactory for the work.

The coming season, beginning with prices from 50 to 60 cents lower than a year ago, does not hold out the same possibilities for profits as were earned in 1908, according to the report of the Ottawa concern, of which Sir Sandford Fleming is the president.

KEEPING ACCOUNT OF EXPENSE.

Prosperous merchants often place too little importance on the exact keeping account of expenses with the result that there are many small "leaks" which eat into the profits and which cannot be accounted for at the end of the year. Stove dealers may be included in this list, for they are quite likely to ignore such expenses as labor caused by men setting up these goods in homes, costs of repairing, expense of draying and display.

They often do not think of figuring in running costs and then may feel bitterly disappointed when the total net profits do not balance with their ideas. It is an especially easy task to arrive at an accurate cost of stove handling and it should be done so the dealer can more readily see whether or not he is getting sufficient profits from each one sold.

CUT IN STEEL PRICES.

The cutting in steel prices by the independent firms in the United States, which has been going on for some time, and to which we have alluded in the columns of Hardware and Metal, has been followed by an open market announcement from the Chairman of the Steel Corporation. It cannot be said that such an action was unexpected, although the firm stand taken by the Steel Corporation during and following the panic of October, 1907, made opin-

ion far from certain on the point. It was realized that the steel magnates might hold to prices now just in the same way, and that therefore it was unwise to be too positive as to any change. But Judge Gary settled all doubts on the question by a declaration that the Steel Corporation had decided to give way in the hopes of improving a situation rendered gloomy by the dull state of trade, the outside cutting of prices which unsettled the markets, and the uneasiness as to the tariff.

In his announcement conveying the momentous news, Judge Gary said that in view of the fact that stocks on hand at the time of the panic had been dispersed and contracts taken care of, the need for maintaining prices had been modified. The leading manufacturers had determined, therefore, to protect their customers and to sell at such modified prices as may be necessary in order to retain their fair share of business. There is no doubt that the cutting going on by the independents, and the uneasy feeling engendered by the non-committal attitude of the Steel Corporation, was producing a situation that was far from being in the best interests of the trading of the country. The metal markets, while not being directly swayed by the iron and steel conditions, were sensitive to the lack of stability in iron and steel, while the dullness of trade, produced by customers holding off in anticipation of something happening, was adversely affecting the natural development of commerce.

The eagerly anticipated remedy has now come, the big manufacturers are out in the open market and drastic cuts not only in steel, but in pig iron, are reported. There has been heavy selling in U. S. Steel stock, and for the time being there is naturally a chaos existing. At present it is impossible to determine what are the real figures obtaining.

Of course the disadvantage of cutting is that consumers, unless they are in immediate need of material, will hold off in the hopes of further reduction, an action which further tends to weaken the position. Cutting in itself does not create a demand. If no structural material be needed throughout the country, if the railroads are supplied with the metal they want, then all the cutting in the world will not bring about a buying movement, unless it be of a speculative character. But when there is a demand waiting only for the existence of prices which will enable more profitable working, when the railroads are hanging back until they can buy in what they think should obtain—a cheaper market—then a cut is the only remedy. The immediate results of this cut in steel products will not probably be productive of much good. There will be a holding off by consumers to see if the prices can be further reduced, and the markets will have to stand some buffeting. When, however, prices have adjusted themselves on rock bottom, when the consumptive needs of the country can no longer be held back by the barrier of what is considered too high prices, then the buying movement will commence in earnest. Undoubtedly there are many large contracts pending, and when buying really starts a general movement will take place all the way along. It is extremely likely that this action of the U. S. Steel Corporation will help the copper market which is at present weak. Taking everything into consideration the cut came at the right time, as the markets have now a chance of settling down on a more solid basis.

So far as Canada is concerned, the general opinion is that while home products will not be affected, as they are already at figures equal to if not lower than, the cutting likely to occur in the States, many kinds of imported stuff will be cheaper. It is stated that there will be little change in prices so far as the U. S. Steel are concerned, at which orders for the Canadian markets will be booked. The prices have been cut for home trade and not for export. The prices in this market are already lower than any reduction which are likely to take place in quotations in the United States market, the figures for this market being fixed more with a view to meet British and Continental prices. Importers, generally, however, are inclined to believe that many lines will be lower, as they will naturally offer their customers any advantage they are likely to get in the U. S. markets. The tendency, therefore, seems to be for certain lines to become cheaper in this country.

COURTESY TO TRAVELERS.

At the recent convention of the Ontario Retail Hardware and Stove Dealers' Association the friendly feeling for that great moving army familiarly known as commercial travelers, was evidenced in a number of speeches delivered by the trade, and also by the action of the Association in deciding to admit travelers as members, which will enable them to attend the open sessions of the gathering and confer with the hardwaremen on matters of mutual interest. It is only by the trade and the traveler working hand in hand that the best results are attained and any misunderstanding cleared up. Nothing but contempt was expressed by every hardwareman present for the man in business who did not extend to the traveler every courtesy and attention, whether the merchant wanted to buy goods or not. One member declared: "I always give a fellow on the road a hearty handshake no matter how much I may be loaded up with commodities in his line. An encouraging word goes a long way even if you cannot place an order with him. You will find that traveler in a position to help you some day and he will give you a tip or put you next to some snap which will repay you many times over for any time taken up in talking to him."

All successful merchants recognize that travelers are their best friends and feel that, if any favors are going, it is from the representative on the road that they receive them, rather than from the house. Very few business men nowadays buy direct. They can do better with a traveler who gets close to his customer, appreciates his wants and knows his field and district more intimately than the firm in whose service he is.

The traveler is the forerunner of all improvements in every kind of goods and knows exactly the state of trade. He is intelligent, alert and watchful of the best interests of his house and of the line of wares which he represents. He is also practical and in touch with every phase of conditions which affect the trade. He is an educating medium between the wholesaler, the manufacturer and the retailer in exactly the same manner as the latter is a source of much information and the disseminator of knowledge between the business in which he is engaged and the consumer. A traveler is in a position to give the business community many pointers as to the latest ideas and most practical and successful methods of merchandising, and if there is failure or fraud abroad he warns the customer, who, in turn, can protect the public. In other ways and in every sphere of mercantile activity the man on the road is the best and truest friend of the retailer, and happily the great majority of the latter know and appreciate his wisdom, worth, business insight and helpful co-operation.

COLLECTION LETTERS BRING RESULTS.

Adamson & Sproule, Orangeville, write: "Your letter duly received covering "A. G.'s" account of $6.20. Accept our thanks for caring for the proceeds. They come to us in all manner of ways through the faithful efforts of the Association's valuable "inviters."

Retail dealers who complain because their customers send out of town for goods might, in many instances, secure the trade if they would offer to send for articles they do not have in stock. Hang up in your store a sign reading, "If we haven't got it we'll get it," and then stick to the motto, and see if it does not have a good effect in holding old customers and attracting new ones.

Hardware and Metal Markets

(For detailed prices see Current Market Quotations, page 74.)

MARKETS IN BRIEF.

Montreal.

Copper—Cut of ½c.
Lead—Back to $3.70.
Antimony—Cut of ½c. in Cooksons.
Brass—Weaker.

Toronto.

Turpentine—Drop of 2c.
Copper—½c. lower.
Lead—Up 1c.

MONTREAL HARDWARE MARKETS.

February 26.—Trade continues to improve all the way round, although the local business is not quite so good as it should be. It cannot be said that the real spring movement has started as yet. Trade is undoubtedly opening out, but the real swing has not arrived. Another week or so should make all the difference, as with lower freights in April orders will be accelerated. What booking has occurred is not bulky, and dealers still seem to hesitate to place anything but sorting-up orders, Undoubtedly stocks are light, and the danger seems to be more than ever pressing that things will be left so late that congestion will occur when April arrives. The Maritime Provinces are booking steadily, and prospects there look very promising. Conditions seem to be much more staple in this part of the country than elsewhere, and reports generally are very encouraging. The Northwest is somewhat slow in opening up, but travelers are very sanguine that the spring movement will soon develop good strength.

Builders' hardware has shown much better strength, and it is evident that the reports as to a promising building season have not been without effect. Lumbermen's supplies are also moving well, while sugaring supplies are in good demand. Household utensils, especially the spring cleaning side, are developing in strength. There has been a good spurt in bolts and nuts, and it is evident that dealers are taking into account the lowness of their stocks. The markets generally are firm, although one or two changes seem threatening.

BUILDERS' HARDWARE — There has been a much stronger movement in builders' hardware, and good trade is opening up. The promise of a great building season seems to be stimulating trade. We continue to quote: Discounts on door sets, 50 and 10; escutcheons, 50 and 10; escutcheon pins, steel, 50; brass, 55. Spring hinges, per gross, No. 20, $9.

SPRING LINES—Trade in these lines has shown improvement, although it cannot be said that the spring movement has started fairly and squarely. Conditions are shaping that way, but the snap to trade is still lacking. The bookings are not of the bulk generally associated with this time of the year. They are more of a sorting-up character, and the fear is being generally expressed that the heavy spring ordering will be left so late that congestion may occur in the shipping arrangements. Harvest tools, lawn mowers, hose, hose nozzles, lawn sprinklers, gardeners' tools, ice cream freezers, screen doors, green wire cloth, and poultry netting are showing greater strength in shipment, although the heavy movement will not take place until later on. Egg crates are commencing to move for immediate shipment. We quote: Screen doors, stained, $7.80; grained, $8.10; poultry netting, 60 and 2½; green wire cloth, $1.70 in 100 feet rolls.

SPORTING GOODS—The movement in general sporting lines is still quiet. Baseball outfits are in some demand, but the greatest strength is being shown by guns, ammunition and fishing tackle. We quote: Dominion rim cartridges and C B caps, 50 and 2½ per cent.; B.B. caps, 50, 10, 2½ per cent.; Crown black powder, 18 per cent.

HOUSEHOLD UTENSILS — Housecleaning utensils are showing much better strength, and some good assorted orders have been received for carpet sweepers, wash tubs, wringers, brooms, pails and polishes. Tinware and graniteware continue in good request, although the demand has made no decided improvement. We quote: Carpet sweepers, $2 and up; sad irons, Mrs. Potts', No. 55, 75c; No. 50, 80c per set; asbestos $1.50; cake makers. $17.25 per dozen; bread makers, $18 per dozen and upwards.

LUMBERMEN'S SUPPLIES — Immediate sorting-up orders in boot calks cant hooks, peavies and binder chains continue to show good strength, and it is evident that a steady demand for these articles continues to show. We quote: Boot calks, $4 to $4.25 per 1,000; wing calks, $6.50; cant hooks. $12 to $16 per dozen; axe handles, $1 upwards; axes, $6 upwards.

SUGARING SUPPLIES— Sugaring supplies are showing very good strength, and the season promises to prove better than the average. Sap spouts and pails are most in evidence. Bits are quoted at 50 off.

BOLTS AND NUTS—The demand has become more active and trade is assuming good proportions. It is evident that dealers are taking into account the lowness of their stocks. We quote: Discounts on carriage bolts, ⅝ and smaller, 70; machine bolts, ⅝ and less, 60, 10 and 10; coach screws, 75; stove bolts, 80 and 7½.

SCREWS—Screws are also showing better strength, and some good orders have been received, Here again the lowness of the stocks in dealers' hands is evidently stimulating a call. We continue to quote: Discounts at 85 and 10 off for flat head bright; 80 and 10 off for round head bright; 75 and 10 for flat head brass and 70 and 10 for round head brass.

WIRE—Trade is opening up well, orders being of good strength and showing promise of better things. We continue to quote: Plain wire, $2.30 base; barb wire, $2.65 in straight and mixed car lots, and $2.70 in small lots. Galvanized wire, No. 9, $2.35 in straight and mixed car lots, and $2.40 small lots, f.o.b. Montreal. Coiled spring fencing, $2.65 straight and mixed car lots, and $2.75 small lots.

BRIGHT WIRE GOODS—Trade continues to show up well, and the recent alteration in gate hooks and eyes, and screw hooks seems to have stimulated much business. We quote: Gate hooks and eyes, and screw hooks at 60 and 20 per cent.; stove pipe eyes, screw eyes, and square hooks, 60 per cent.

TORONTO HARDWARE MARKETS.

February 26.—Quite an noticeably improved situation prevails this week as compared with last week and the week before. Orders are pretty plentiful and some of the warehouses are compelled to bring back their help in the evenings to properly get things out. A number of orders are for future delivery, but sufficient of them are for present shipment to create a satisfactory feeling among the trade.

General sorting lines have the call just now, but spring goods ; household utensils for kitchen and cleaning purposes, lawn goods ; screens ; and articles of like nature are free in demand. Prices are unchanged from last week, and it is not known yet whether or not the steel and iron price cutting in the United States will affect the cost of manufactured hardware lines in Canada.

Jobbers in builders' hardware report very good trade and the indications point to continued good business.

SEASONABLE LINES—Winter goods are again slow and in this line the past week was a quiet one. Stocks are low now, and jobbers are thankful that they did so well considering the openness of the present winter season.

WIRE NAILS—The cut price of $2.20 quoted last week rules now in the trade, and business is fairly steady.

SPRING GOODS—Orders have taken a jump and future calls while not heavy are satisfactory. They are much in advance of this time last year. In fact business in this regard is nearly back to normal.

BUILDERS' HARDWARE — Very good trade is being done, and the expectation is that the present and coming season will see a big call for varied

lines. Novel designs in door sets are shown and the better class of goods is asked for in preference to the common and ordinary grades.

ROPE and TWINE—Pure Manilla twine is 11½c. Orders are light, but sufficient for the season. No doubt later on when the hardwareman is able to estimate more accurately his wants demand will increase.

WIRE—Some speculation is indulged in with regard to wire because of the cut prices on iron and steel prevailing in the United States. However, no authority has as yet come forth to state what is likely to be the outcome, although on all hands quite a number aver that prices will remain unchanged, and to the observer it looks that way. Galvanized barb is $2.90, and plain twist, $3.20. Coiled spring wire continues at $2.75 for Number 9. Galvanized wire is still quoted at Pittsburg, base sizes 6 to 9, $2.25. Less than car lots 10c. higher. Wire nails are unchanged at $2.30; poultry netting at 60 and 2½, and green wire cloth at $1, $6 in 100 ft. rolls.

HOUSEHOLD UTENSILS—Demand is splendid, especially for kitchenware. Enamelware and tinware have the biggest call, but tubs, brooms, wringers, mops and cleaning articles are asked for in a satisfying manner.

HEAVY GOODS—Although quoting the old prices and not anticipating any change, still it cannot be overlooked that the cut on iron and steel in the United States is expected to have some effect on bar iron in Canada. Jobbers however, state that the Canadian prices are yet below the lowest United States quotations, and say they cannot go lower. Business is only fair. Bar iron is yet $1.95. Stove bolts are 80 and 7½. Bright and steel wood screws, flat, 85 and 10 and round head, 80 and 10 per cent. Brass screws are, flat, 75 and 10 and round head, 80 and 10 per cent. Brass screws are, flat, 75 and 10, and round, 70 and 10.

MONTREAL METAL MARKET.

February 26.—The continued weakness in the New York copper market has induced lower figures locally, as we anticipated last week, and jobbing prices for copper have been cut ½c, making quotations around 14½c. Brass values are also weaker, but no definite changes have yet been announced. Lead, generally, is back to $3.70 again, while antimony is cut ½c, making the price for Cooksons 9c. Tin, however, is firm. Although a fair amount of metal is going out for immediate delivery, trade is not quite so good as was expected. The promise of January has not been fulfilled this month. There is no doubt that the feeling of uneasiness as to the markets in tin and copper is keeping a lot of business back. For the time being, too, the cut in the United States Steel Company's products has not tended to improve matters, although eventually it should do so. Copper and tin are very sensitive at present, and anything that unsettles trade conditions affects the metals. Locally prospects continue to look hopeful. Inquiries are good, and there is a lot of business to come at some time or other.

Tin, in the primary markets, again made a jump this week, the bulls getting the upper hand. Owing to the concentration of supplies there has been difficulty in getting spot tin in New York, and this situation helped to advance the market. There was a slump when it was announced that the Banca sales would be increased in tonnage offered, but the rally was very sharp. Tin is in strong control, and the tendency always is for higher figures in April and May. Copper is in a weak state. Consumption continues very bad, while the English market appears to be getting weaker and weaker. This makes it harder for producers to hold prices. There is an enormous amount of stock in the States, but fortunately it is held strongly. Still there can be only one effect of the holding off in buying—lower figures. Lead continues to grow in strength in the English market, and is assuming respectable figures again. Spelter also continues to advance in London, although at East St. Louis conditions are not so good. Cleveland warrants are weaker in the Old Country, although the home trade is keeping up well. The great sensation has, of course, been the announcement of an open market by the U.S. Steel Corporation. The need for the maintenance of prices having gone by, and the market being cut by outside firms, the steel magnates decided to force the hands of the former and to bring about more uniformity to the markets by reducing prices themselves. For the time being it is impossible to find out what scale of prices are now ruling. But the markets will soon settle themselves. It is generally believed that business will greatly be stimulated by the action, and the long expected rally in consumption now set going.

PIG IRON—There is a better local inquiry, and some fairly large contracts have been placed. Stocks in consumers' hands are down to a low ebb, and many users have been compelled to replenish at comparatively stiff prices, owing to the winter freights. Local furnaces making foundry iron still have tonnage for sale, and are offering their surplus for prompt delivery at prices which are below the limit of imported metal. The reduction in steel prices in the States, while not likely to influence home products, so producers say, as the prices ruling here are lower, will probably affect the selling price for imported goods. It is the opinion of the jobbing trade that while there will be a cut here in many classes, the comparative reduction will not be so great as in the States, owing to the fact that export prices have been lower all the way along than the home quotations. We continue to quote: Middlesboro, No. 3, $19.50; Summerlee, No. 1, $21 to $21.50; No. 2, $20.50. Despite the fact that Cleveland warrants are quoted at 47s., 1s. lower than last week, the English market is improving both for pig iron and steel, the ship-building industry taking more material. The poor demand from the continent, however, is tending to keep prices lower.

TIN—There is no change to note in tin quotations, the jobbing prices remaining firm around 31½c. The market is steady, with fair business doing. Inquiries continue good, and there is plenty of business in prospect. The English market has firmed up again, after another bear movement. Supplies are in strong hands, and with the little better inquiry going on, tin has advanced. This is about the time for an upward movement in tin, but no reliance can be placed on the metal. It is too speculative.

COPPER—As we anticipated last week, local prices in copper have been cut, and we now quote 14½c for jobbing lots. Trade is perhaps not quite so good as it was, although fair orders are going through. The continued drift in the metal is not doing trade any good. The New York market is in a weak state, the home consumption being poor, and the English market steadily slipping back. There seems to be no snap to operations at all, and with record production going on, although the stocks are held in strong hands, the position is one that is bound to create weakness. It is hoped that the cut in steel will tend to stimulate the copper market. For the time being, however, the movement in force to produce lower prices is having everything its own way.

SPELTER—Spelter is naturally very firm. We make no change in our quotation of $5.50. Good business is doing, and there is little to cavil at in the situation. The English market is steadily gaining strength, but East St. Louis is weakening.

LEAD—Although lead is firm, quotations are more around $3.70 than $3.80, and we put prices at the former figure. Trade is fair, and good business is anticipated. The English market is certainly making a strong upward movement and it is evident that buying has broken in strongly.

TORONTO METAL MARKET.

February 26.—The new iron and steel prices in the United States are the talk of the metal men this week, and they are speculating as to the outcome. No change is anticipated in Canadian prices though both the United States Steel Corporation and the independents are inquiring by sending out feeling letters to the trade in Canada as to what the "other fellow" is doing. Canadian prices at present are from 10 to 20 cents lower than United States prices, and the cut on the other side of the line is on domestic steel only, export being quoted at the old figures.

During 1908 the United States Corporation held prices firm and whatever credit is going for the stability of the market last year is due principally to that organization. The corporation say that the independents have not kept faith; that whereas the trust has been operating at but one-third capacity the independents have been running full time. One of the independents began the cut some little time ago, and now the United States Corporation has issued an ultimatum to the effect that it will reach out for business and meet whatever prices are going, and the inference is that they will more than meet prices if cutting continues.

What effect this will have upon the Canadian trade is problematical, the concensus of opinion being that prices here will not at all be affected. At any rate the powers that be are trying to arrive at an understanding and certainly some days must go by before any decided opinion can be expressed.

Some economic authorities (not metal men), in the United States hold the opinion that the cut now is due to the forthcoming revision of the tariff which is expected to take place when Congress meets before the end of March.

Metal men, however, hold that the business depression alone is responsible and since the trust has issued the threat to cut the independents say they will meet competing prices. However, so far as the Canadian metal trade is concerned the prices ruling to-day are unchanged from last week. The cut in the United States affected shapes, plates, steel bars, steel pipe, rails, sheet bars, billets, sheets and tin plates, and structural iron. Wire products are expected to be cut, but no change is likely before next week. The other lines are anticipated to hold firm.

PIG IRON—Very quiet. Canadian foundry is $18.50; No. 3 Middlesboro, $21; and Cleveland, $22.

COPPER—Irregular, but more active than last week. The price is down ¼c., the quotation now standing at 14½c.

TIN—This metal is strong and has advanced 1c. above last week's quotations, being now at 31c.

LEAD—Steady at the old figure, $3.80 for imported pig.

SPELTER—This metal is very firm on account of low stocks. The quotation is yet at $5.50.

SHEETS AND PLATES—Continued steady business is going on. This line does not frequently change, and will not, if present indications count for much, before the opening of navigation in the spring.

OLD MATERIALS—An easier feeling is noted. Copper is off about ¼c. and almost every line has fallen suit. Heavy stocks are being got rid of now to the manufacturers.

U. S. IRON MARKET.

Cleveland, February 25.—The Iron Trade Review to-day says:

The declaration of an open market on iron and steel products has thrown the trade into a state of confusion from which it is now attempting to free itself. While reductions of prices had been anticipated for some time, the abruptness of the inception and the sweeping character of the new policy proclaimed, quite astonished both buyers and sellers, and sufficient time has not yet been had for a calm and accurate analysis of the situation or for a test of the results likely to be accomplished. Increased inquiries from patrons have been brought to the mills, but the gain in tonnage actually booked has not been of a significant amount. The abandonment of official quotations, however, is looked upon as the buyer's opportunity, and a considerable volume of new business is expected to be stimulated soon. While the market appears considerably disturbed at present, there is no evidence of disastrous demoralization. Lower prices have been swiftly named on some finished lines, but in others, there is shown a spirit of deliberation and caution in establishing new quotations.

Current prices represent reductions of $4 a ton on merchant bars, hoops and bands; $6 a ton on plates and structural shapes; $3 to $5 on sheets and $1 on wire products. New official discounts announced on tubular goods entail concessions of from $4 to $8 on merchant pipe, and $6 to $10 on boiler tubes. To a great extent, the lower prices on finished material apply only to attractive business, for reasonably prompt shipment and not all orders for any delivery may command such quotations. At the same time there is a determination displayed by some interests—especially by the subsidiaries of the United States Steel Corporation—to secure what they regard as their rightful share of current orders, and this fact is leaving present prices, except where official announcements have been made, within very indefinite limits.

COLD ROLLING MILLS.

The Canada Steel Goods Co., Hamilton, will commence immediately to erect a mill for the purpose of manufacturing for themselves and for the market cold rolled steel, all widths and thicknesses.

Arthur F. Hatch, general manager of the company, explained that the mill was being erected for the purpose of furnishing a higher grade of material than has hitherto been used in the manufacture of hinges in Canada. They will also erect a building about 50 feet by 120 feet, for electroplating their butt hinges, brackets, drawer pulls, and general builders' hardware lines.

HARDWARE TRADE GOSSIP.

Ontario.

The estate of A. Thompson, Bradford, has sold their hardware business to D. McLeod, Aurora.

The Canada Paint Co. opened their new Toronto office in the Peterkin building, Bay Street, this week.

The Walkerton Binder Twine Co,'s factory will be dismantled and the machinery sold. The company will be wound up.

Drummond, McCall & Co. are this week moving their Toronto office and warehouse from Front Street East to 100 King St. West.

E. Fielding, Toronto, representing in Ontario the American Naval Stores Co., New York, is visiting the latter city on business this week.

Norman McDonald, late buyer for Rice Lewis & Son, Toronto, is arranging to establish a manufacturers' agency business with headquarters at Toronto.

Thos G. Dexter, of H. S. Howland, Sons & Co., Toronto, who has lately returned from a business trip to the Pacific coast, is confined to his home with a slight illness.

The binder twine factory at Kingston penitentiary will be run until June, and then will close for a time at least as the factory will have sufficient of the finished product to meet all demands for two years to come.

William Black, the Durham hardware man, who is secretary of the Durham Horse Fair, writes that at the third monthly horse fair, on Feb. 16, twenty-seven sales were made, ranging in price from $100 to $225.

Vrooman & Jackson have succeeded J. H. E. Vrooman in the hardware business at Sunderland. Mr. Jackson will manage the business and Mr. Vrooman will act as salesman for the Pedlar Roofing Co., Oshawa.

Robert Smith, of Smith & Shaefer, Bolton, was in Toronto on Tuesday. Mr. Smith says their hardware store is to be enlarged this spring by taking in the adjoining store now occupied by a furniture stock which is to be removed upstairs.

The Perrin Plow & Stove Co., Smith's Falls, is putting a new steel range on the market. As yet a name has not been decided upon for it. The company is asking the general public to assist them in choosing a suitable one. The person lucky enough to supply the name decided upon will be presented with one of the new ranges, valued at $60,00.

Patterson & Hilborn, recently with George Awde, Drayton, whose hardware business is being merged into that of O. B. Henry, are opening a store of their own. Mr. Patterson was in Toronto on Tuesday buying his opening stock, the Kennedy Hardware Co., and the Kemp Mfg. Co. getting the business. Both Mr. Patterson and Mr. Hilborn are enterprising young men, with several years' experience in the hardware business.

MUTUAL FIRE INSURANCE.

The Hamilton convention of the Ontario Retail Hardware Association decided to endeavor to secure an amendment to the Ontario Fire Insurance Act making it possible for retail merchants to form mutual fire insurance companies on the same conditions as farmers now organize mutual fire companies.

G. C. Wilson, M.P.P., Dundas, Ont., and Hon. Frank Cochrane, M.P.P., Sudbury, are both hardwaremen and should help secure the desired amendment, Mr. Wilson having been asked by the convention to bring in the proposed amendment.

Hon. J. S. Duff, Minister of Agriculture, has had the desires of the Retail Hardware Association brought to his attention, through J. S. Willoughby, of Cookstown and he can hardly refuse to retail merchants privileges now enjoyed by the farmers.

The secretary of the association has taken the matter up with Mr. Wilson as instructed by the convention, but it would be well if every hardwareman who would like to receive a rebate of from 30 to 50 per cent. of his present fire insurance premiums, to write both Mr. Wilson and the local M.P.P., urging them to curb the monopoly enjoyed by the fire insurance companies. The more letters Mr. Wilson receives the stronger his hand will be.

LETTER BOX.

Sap Evaporators.—Norris Bros., of Flesherton, ask for the names of manufacturers of sap evaporators.

The Steel Trough & Machine Co., of Tweed, make this line.—Editor.

Brass Rolling Mills.—"Subscriber," asks if there are any copper or brass rolling mills in Canada.

The only mill is located at New Toronto, but it has not been in operation for about three years although is was protected by a duty. It is now in the hands of J. F. Brown, furniture merchant, Toronto, who is uncertain whether he will sell or operate it.—Editor.

Trade News From Atlantic to Pacific

Maritime Provinces

Clerk Arrested for Theft—Nova Scotia May Get Important Iodine Industry.

HALIFAX.

February 22.—Trade shows little improvement since last report, but the dealers are hopeful of better times with the opening of the spring. The outlook is promising for fishing supplies and there will probably be a lot of building operations carried on. The lumbering business continues active throughout the province, and the cut promises to be the largest for years. Prices are improving in the foreign markets, and the operators are hopeful of good results for their season's work. Prices in most lines handled by the hardware trade are practically unchanged. Glass is a trifle easier, and quotations on wire netting are unsettled. The same may be said of linseed oil. It is now quoted at 60c per barrel lots, and 65c per barrel for raw. There is considerable ship-building going on in the province this season, the activity at some places being greater than usual. In the shipyards at Parrsboro and vicinity five large schooners are under construction, ranging from 150 to 400 tons. In addition to the building, the rigging and outfitting of these vessels means a large outlay of money, a goodly portion of which reaches the hardware trade.

Rhodes, Curry & Co. have been awarded the contract for erecting a large bungalow for a party of Americans at Argyle, N.S. The price is $30,000. Some idea of the bungalow may be gleaned from the fact that there are to be seven bath rooms and ten lavatories in the building.

The settlement of the Steel-Coal dispute is likely to bring about the establishment of the National Rolling Mills Co.'s plant in Sydney. Messrs. Crowell and Wetmore will leave Sydney about the first of May for Toronto to conclude arrangements to this end.

The copper mine at Quide Vidi, Newfoundland, owned by Messrs. Rendell and Phillips, is to be worked in the spring. A company is being formed, with a capital of $40,000 to work the property.

Business is rather quiet in the mining town of River Hebert. The Strathcona coal mine has been closed down owing to financial difficulties, and the Minudie Coal Co. has been idle for several days through a scarcity of orders. At the Joggins mines, however, work is brisk, and the output of coal is being increased.

The industries committee of the Board of Trade met to-day and was addressed by prominent merchants of the city regarding the manufacture of iodine from seaweed, and it was pointed out that this could be made profitable to the fishermen of the province, as seaweed is perennial and the supply even, and also on account of the situation of the province it being almost surrounded by water. The world is supplied largely with iodine at present by Japan, but large quantities are also made in Scotland and Norway, and those who have taken the matter under consideration think that the situation of Nova Scotia for the gathering of seaweed is unequalled.

President J. A. Johnson represented the Halifax Board of Trade at the Quebec Board's banquet on Saturday evening last, and in a strong speech, he advocated the entry of the Canadian Pacific Railway into Halifax.

Wm. Robertson, of the wholesale hardware firm of William Robertson & Son, has returned from a pleasant trip to Montreal, Toronto, Boston and New York. J. H.

ST. JOHN.

February 23.—The store of Quinn & Co., stove dealers, on Main street, was visited by fire on Saturday night last but owing to prompt action by the firemen the damage was slight—about $150.

A. E. Hamilton and A. W. Gay have purchased the business and factory of the Lawton Co., woodworkers. The property was sold at public auction and bid in at $15,000. The business will be continued under the name of Hamilton & Gay.

John D. Newton, of New York, Dennis Bergen, Hon. J. D. Hozen, premier of New Brunswick, D. King Hozen and E. P. Raymond, of St. John, have been incorporated as the Harvey and Salisbury Railway by the Dominion Government. The capital stock is $500,000.

W. Herbert Downie, a clerk for T. S. Simms & Co., brush and broom manufacturers, was arrested on Friday, Feb. 19, on the charge of stealing $1,114.80, the company's payroll from the vault. Downie told a sensational story about being set upon by some unknown persons at the noon hour on Friday while alone in the office and of being choked into unconsciousness. The police suspected the young man himself and on search being made the money was found hidden in his desk in the office and his arrest followed. The case is now before the courts.—W. E. H.

The C.P.R.'s programme of railway construction this year east of Fort William will include a branch line from Coldwater Junction to Peterboro, which will be part of the scheme for a short rail route between Montreal and Georgian Bay ports. It is anticipated also that during the coming season forty additional miles will be added to the double-tracking of the C.P.R. between Toronto and Montreal.

Province of Ontario

Rural Telephones in Kent County—Hamilton Gets Cement at $1.23½ per Barrel—Will London be Allowed to Bonus New Industries.

OTTAWA.

February 23.—Trade is very quiet in the capital and what buying there is comprises small wares and household articles.

A. Newlands reports a very good sale of Kelsey furnaces this season. Instalation of one of them has just been completed in McKay Presbyterian Church, and splendid satisfaction is reported.

Eugene Cadieux, a member of the Ontario executive of the Trades and Labor Congress, will ask the executive to impress upon the Legislature the desirability of making municipal plumbing inspection compulsory in every town and city in the Province. At present Ottawa and Toronto are the only cities where experienced plumbing inspectors are permanently engaged. The local labor bodies have been advocating the appointment of an assistant inspector as the task is considered too arduous for one man.—G.E.M.H.

PETERBORO.

February 22.—The Peterboro Canoe Co. shipped an unusually well built steamboat to Fort William this week. It was a sixty footer with an eleven foot beam. The planking was all of oak and every part of the vessel was given special attention. Considerable difficulty was experienced in loading it on a flat car.

A merchant has written to one of the local papers urging the farmers of this district to do their shopping on Saturday earlier in the day. He states that they wait until late in the afternoon when the stores are congested with customers and they cannot receive the same service as they would if they would make their purchases at an earlier hour.

New plans have been prepared for a steel bridge over the Otonabee at Smith Street, at a cost of $30,000. It was the original intention of the city engineer to construct a bridge costing $50,000 but the people defeated the by-law when it was presented to them. Only one steel firm has answered the engineer's letter for quotations and he cannot therefore go ahead with the work until he has the figures for the cost of the steel.

Best's "Happy Thought" Curling club have issued a general challenge to all the hardware store staffs in the city to meet them in a game of curling. A number of games will likely be played before the season closes.

One of the buildings which has been contemplated for some time but which will likely be constructed this summer is a new public library. The site has been decided upon and the plans are now being examined by contractors.

Your Brantford correspondent gives Peterboro credit for something which this city does not deserve and that is the progressive policy of engaging a publicity commissioner. The council did consider the question and it looked as if the appointment would be made but there has as yet been no definite action.

"Viamede" a Stony Lake resort which was destroyed by fire last autumn will be rebuilt this spring. The building will be 160 feet by 140 feet. It will be fitted with modern improvements in the line of plumbing and will be lighted by gas.

S. H. Knox Co. opened up a 5, 10 and 15 cent store on Saturday and appear to be doing a heavy business.

The Lakefield Cement Co. has been awarded the contract for the supply of cement for the Hamilton Board of Works. The price is $1.23½ a barrel as compared with $1.67 paid by that city last year.

The Master Painters' Association of the United States and Canada will hold its annual convention in Peterboro in July next. The local painters are very pleased with the success of their efforts to bring the 600 or more painters to this city and already they have begun arrangements for entertaining the delegates. They will be in the city three or four days and an effort will be made to give them a royal reception.

H. T.

BRANTFORD.

February 23.—The Brantford Board of Trade will strenuously object to London's proposal to apply for power to set aside $100,000 to be voted as the council of London sees fit, for the purchase of sites as bonuses for new industries, claiming that it will give London an unequalled opportunity, and lead to expensive and extravagant competition between various municipalities. The question has been brought to the hatching point by the action of the London City Council, who have announced their intention of asking for power to set aside the sum mentioned above. An association of real estate owners and taxpayers of London has been formed to protest against such a move and every possible aid will be extended by Brantford. The time is past when industries must be bonused to induce them to locate in a city.

A company has been formed to make a daily delivery of a million and a half feet of gas in Welland and St. Catharines, for industrial purposes, at a rate of 25c. per thousand feet. The promoters state that at this price it is much more economical than other fuel. Options on gas wells at Selkirk have been secured by the company, which is backed by local capital.

Tenders are now being called for the erection of a schoolhouse at Bruce's Corner, about five miles from Brantford.

John Harold has tendered his resignation as managing director of the Paris Plow Co., that he may devote more time to the interests of the Harold-Sanderson Co.

Turnbull and Cutliffe announce that they intend making a number of changes in the interior of their fine store on the corner of Colborne and King Sts. As a preliminary, and in order to make room for the carpenters, they are announcing a sale of stoves and ranges.

The Ontario Gazette contains the announcement of the incorporation of W B. Burril, J. B. Rouse, John Moffat and James Burns, of Brantford, and H. A. Burrill, of the township of North Norwich, as the Brantford Foundry and Development Company, with authorized capital of $40,000.

The Lyon's Electric Co. are showing a fine line of their electric lamps and lamp shades this week. John Bishop & Son have an exhibit of blacksmith's supplies in their north window. Several of the local plumbers and gasfitters announce sales of gas requisites, especially mantels.

"Everything is moving well," said a prominent local hardware dealer to your correspondent this morning. "Once the weather settles down for good, no doubt spring goods will move off rapidly. Building prospects are good, especially in the number of residences which it is proposed to erect this summer, from which the hardwaremen expect to glean a harvest.

GUELPH.

February 11.—On Tuesday, February the 11th, the Page Hersey Company, at their rolling mills here made a world's record run, turning out 7,551 lengths of half inch pipe in 10 hours. The previous record to this was made by the Spang Chalfant Mills at Ettna, when they made 7,500 lengths, which was 53 lengths more than the biggest run made by the United States Steel Corporation's big plant at Loraine, Ohio.

G. R. Kerr is in Guelph securing signatures of prominent citizens who are in favor of the building of the electric line being surveyed from Guelph to Woodstock. The municipalities along this line will be called upon shortly to subscribe $300,000 worth of stock in this road. Guelph's share of this according to Mr. Kerr will likely be about $60,000.

Manager W. G. Howell, of the retail department of Bond's Hardware store, and also a member of the firm, evidenced a natural pride, when on Saturday afternoon he showed your correspondent a few interesting things about the paint oil and stains that the firm have for sale.

"It will not be long now," he said, "before our customers will begin to think of freshening up their homes with a coat of paint and we're ready for them as soon as ever they take the notion." He went on to show the full line of Martin-Senour Paints, which had just recently been stocked. In addition to this the retail department of this enterprising firm are making quite a specialty of Johnson's wood dyes. They have a very attractive window dressed with wood dyes and wood dye samples exclusively. "That has been a good window; we have sold a good deal out of it," said Mr. Howell. When asked how trade conditions were at present, his answer was that conditions were normal for this season and he expected considerably increased activity in the spring.

LONDON.

February 23.—Hardware trade has been rather quiet during the week, but in view of the prospects of a revival of building activity as soon as the frost leaves the ground dealers are looking forward to a brisk spring trade. Moreover, the farmers hereabouts seem to have more money than they had a year ago, and this fact should mean something to the hardware trade.

The Labatt Manufacturing Company is at present negotiating with a large Milwaukee firm in the wholesale plumbers' supplies business for the purchase of the Labatt brass works here. It is expected the deal will go through and the transfer made in a short time, in which event the American firm will begin operations without delay, employing many hands.

The third annual banquet and dance of the employes of the London Rolling Mills Company in the Masonic Temple on Saturday night was a very successful affair.

The McClary Mfg. Co. intends installing a sprinkler system in their works in the southwestern part of the city, similar to that which it has in its down town establishment.—F. T. V.

GALT.

February 23.—Business in Galt has been brisk in all lines during the past fortnight and prospects for the future are bright.

The Dominion Tack and Nail Company, recently started in Galt, although not saying very much, is coming rapidly to the front as one of Galt's most promising industries. As the name indicates the firm manufactures various kinds of tacks, nails and other small articles of hardware.

Work on the building for the Hammond Potato Machinery Co. is coming rapidly along and when spring opens it is expected Galt's latest industry will be in full blast.

The right of way into Galt has been purchased for Patterson's Hamilton-Guelph radial railway.

Charlie Banks who formerly conducted a sporting goods store in Galt was a welcome two days' visitor this week. He is now in business in Peterborough.

The Knox people who recently opened in Galt are doing a large business in graniteware.

Tenders will shortly be asked for the addition of six rooms to Central school.

The Dietrich block, on South Water street, when completed will be probably the handsomest business block in Galt. It is now ready for the heating and other interior arrangements.

If the law requiring all sleighs, etc., to be equipped with bells was enforced local hardware dealers would profit.

B. E. C.

CHATHAM.

February 23.—The new civic electric light plant was the theme of a midnight discussion at a board of trade meeting held last Tuesday night. The aldermen have been "scrapping" over the rival merits of direct current and alternating dynamos, but on Monday evening they finally decided to ask for tenders on a dynamo of the d.c. type, and also on one of the magnetite type, after which they will decide which to purchase. The board of trade endorsed petitions for a proposed new bi-lingual school here, and also a new asylum.

A scheme of more than passing importance to merchants was brought up in connection with rural telephones. Outside the Bell rural lines, Chatham is connected with no rural systems; while

Wallaceburg, Dresden and particularly Blenheim have stolen a march on this city by reaching out into the country with independent rural phone lines. As a result, a certain amount of traffic has been diverted from Chatham, and farmers as near as three miles away from us have free phone communication with Blenheim, 12 miles away, while they have to pay to talk to Chatham. It is proposed to hold a conference here in the near future with a view to interesting the adjoining township municipalities in the construction of municipal rural telephones, with head offices in Chatham and free connections with the Bell system. A special committee has been named to handle the matter.

The Chatham Navigation Co., having sold the excursion steamer, City of Chatham, which has covered the Detroit-Chatham run for many years, has decided to build a new steel-hull ship, capable of carrying 1,000 passengers, at a cost approximating $60,000.

H. A. McLean and A. W. Kelly, of Sarnia, were in the city last week inspecting the Chatham Steam Heating Co.'s central heating plant. A similar heating system is in contemplation for Sarnia.

The Ridgetown hardware firm of J. Laing & Sons, comprising Andrew and George Laing, has been dissolved, the dissolution dating from Feb. 12. Andrew Laing is retiring, George Laing continuing the business.

Goodhue & Glover, hardware merchants, of Ridgetown, have had an arch cut between their store and that formerly occupied by John Grass. One store will be devoted to a stove department and show room, while the other will be given to general business.

Perry McGregor, of Chatham, has left for Elk Lake to take a position in a hardware store.

Mayor Westman, of Westman Bros., returned on Friday from a business trip to Montreal, where, incidentally, he took in the sights of the ice carnival.

The Pedlar Metal Roofing Co., of Oshawa, recently opened a branch house at Chatham, under the management of E. B. Northwood.

Brimful of enthusiasm for the cause of organization, A. E. Westman was this evening unanimously elected president of the local branch of the Retail Merchants' Association, thereby fulfilling the prophecy of the Hardware and Metal correspondent some time ago that a hardware man would be elected to the post. The new president is a brother and partner of Mayor W. H. Westman, of the firm of Westman Bros. During the past year he has held the office of first vice-president, and has always been a strong believer in organization. His enthusiasm bodes well for an organization which just at present sorely needs that element. Other officers elected were:—First vice-president, John McCorvie; second vice-president, T. Walter Poile; secretary, J. W. Powers; treasurer, J. A. Wilson.

The unique system of debt collection evolved by the Guelph merchants was brought to the attention of the gathering by V. J. Bosworth, who strongly urged that the Chatham merchants take up the matter. V. J. Bosworth and H.G. Hodges were appointed a committee to look into the matter and report at the next meeting on a feasible system of coping with dead beats and collecting bad debts. A modification of the Guelph scheme was strongly favored.

The subject of price cutting brought forth an interesting discussion, J. A. Wilson remarking that the practice was becoming widespread in the grocery trade, owing to recent keen competition. Hardware men present also referred to the prevalence of the evil in their line of business.

"I think it is more a disposition on the part of the purchaser than on the part of the opposition dealer to crowd the price," remarked Peter Cunningham.

He also gave a couple of instances. "To-day," he said, "a man walked out of my store as angry as could be because I would not give him his price. He came back in half an hour and paid what we asked him. The other day," he added. "a customer had $72 worth of material measured out before dinner. In the afternoon he said he could do better somewhere else by $5. He wanted us to name a better price and we would not do it. Just for the fun of it I detailed a boy to watch him. That man until nearly dark was dickering at first one place and then another, and finally went home without a pound of stuff. The same man's son has been back and taken out a portion of that order. These are two reasons why I say a great deal depends on us, and our being firm and not giving way to the whims of these people."

President Westman said a good, stiff backbone in the merchant was the chief requisite. "The retailer ought to have his margin," he said. "As soon as he gives his margin away he must shut up shop. He is entitled to his margin and should have the manhood to get it."

A committee was appointed to arrange for an address for the next meeting, scheduled to take place on March 9.

INGERSOLL.

February 23.—J. A. Coulter, president and manager of the John Morrow Machine Screw Co., is the new chairman of the Ingersoll Board of Trade. In various public capacities Mr. Coulter has proved his usefulness in promoting the welfare of the town. Identified with two important industries, he naturally has much interest in the advancement of the town and all measures looking to this end have received his unhesitating endorsation. Mr. Coulter is a patriotic citizen in every sense of the term, and as he is in touch with the progress of other places, it goes without saying that he will wield a strong influence for industrial development, and improvement of conditions generally, during his tenure of office.

KINGSTON.

February 23.—Dealers report the hardware business to be very quiet this week. The changeable weather which we have been experiencing for several weeks is given as the cause. Farmers have not been coming into the city in such large numbers as usual, owing to the condition of the roads. There has been a couple of hard rainstorms and this has made the crossing on the lake from Wolfe Island very bad, and although the farmers have a lot to bring into the city they have been keeping off, awaiting good weather. And thus it is, that if the farmers do not come in, the hardware trade is dull.

A fact that is much to be regretted is that at the present time Kingston hardwaremen have no association. The merchants had an organization some few years ago, but for some reason, it went out of existence. A few of the hardwaremen belong to the Retail Merchants' Association and while this organization is of course, a benefit, it could not be expected to be as good for the hardwaremen as would an association which had for its object the furthering of the interests of the one special line of business.

During these slack days the hardwaremen are paying more attention for window displays. One of the best noticed this season is that shown in the windows of McKelvey & Birch, of an assortment of carpenters' tools. One window at John Corbett's is given over to skates, hockey sticks and other sporting supplies, arranged in a most attractive manner, and in the other a special line of graniteware is given prominence.

Quite a number of sleighs have been noticed around the streets, minus sleighbells. Complaint has been made to the police, and the result will be that the hardwaremen will make a few sales. It's an ill wind that blows no person good.

The Board of Education will ask the City Council at its next session for $4,000 for a gymnasium for the Collegiate Institute.

An average of 80 tons of flint per day is being taken out of Richardson's mines at Bedford, all of which is being shipped to the electric smelter at Welland.

The local hardware hockey team met defeat in their game at Lansdowne on Monday night, the village team winning by 8 goals to 5.

E. G. B.

Western Canada

Saskatoon Board of Trade Complains About Extortionate Express Rates—Calgary Firm Also Enters Complaint —Trade Active at Edmonton.

CALGARY.

February 17.—The Ashdown Hardware Company have secured the contract of supplying the hardware for the new General Hospital.

The Railway Commissioners are sitting here to-day, adjusting all claims, complaints, etc. The hardware firm of Linton & Hall have laid a complaint of excessive express charges by the Dominion Express Co., from Worcester, Mass., to Calgary.

The Alberta Provincial Government are erecting a new office and stores building at the corner of Eighth Ave. and Fourth St. West.

The excavation is about completed for the new five storey office building, to be erected by W. R. Hull, on Ninth Ave. and First St. West.

If all the railroads, reported to be heading for Calgary, reach here this summer, the effect will probably be similar to that caused by the Italian earthquake.

All specifications required for the street railway system are now prepared, and tenders for the material required will be called for at once.

The City of Calgary has called for tenders for all lines of hardware for the year 1909.—W. A.

EDMONTON.

February 22.—Trade has been fairly active during the past week, one reason being that some of the Grand Trunk Pacific contractors have returned from their Christmas vacations and they are now buying supplies in preparation for starting work again.

Business in the towns on the Grand Trunk Pacific east of here is rather quiet as the merchants do not care to buy heavily until they are sure just when the railway will reach them; on the other hand dealers west of Edmonton are fairly busy as there is a large number of teams hauling railway supplies west which makes some demand on the hardware dealer.

There has been a slight movement in harvest tools, principally hoes and rakes, and orders have been coming in quite freely for rope. Business is also good in enamelware and tinware, the principal demand being for galvanized pails.

H. Oppertshauser, the hardwareman at Stony Plain, has just returned from a vacation east.

R. O. Bird, of Tofield, which is one of the new Grand Trunk towns east of here, is visiting Edmonton on a business trip.—J. H.

SASKATOON.

February 22.—While the question of excessive express rates is being discussed all over the Dominion and efforts being made through the board of railway commissioners to obtain a substantial reduction, the case presented by the Saskatoon board of trade is worthy of attention. For some time complaints have been received from merchants and others regarding the high rates charged and the inadequate delivery of parcels in some sections of the city. When the railway commission sat in Regina on Feb. 11 the board seized the opportunity and laid a strong case before that body. Two hardware merchants, M. Isbister and Mayor W. Hopkins, with H. Aird representing the Massey-Harris Co. and Commissioner Sclanders of the Board of Trade, were among the deputation which left the city to interview the railway board.

Previous to leaving for Regina merchants as well as private individuals and surrounding boards of trade were notified to hand in any complaints they might have against the express companies. In this way a considerable amount of data was brought together and put in tangible form to lay before the board. It was found that charges were being made for light parcels far in excess of their value. In one case submitted by a hardware dealer 80 cents express had been charged on a casting valued at 50 cents and there was also trouble over parcels sent C.O.D. Taking the rates altogether they were found to be 80 per cent. higher in Saskatchewan than in Ontario. No published tariff seemed to be adopted for the operation of the express companies, vigilant inquiry only bringing to light a table of rates and classifications "for the information of the employes only." The prevailing custom was, on delivery, to present a book with a certain amount charged, demand a signature and the figure stated and give no receipt.

The case as presented by the Saskatoon board of trade contained numerous instances of charges made in Minnesota, Ontario and Saskatchewan and is in part as follows:

"From comparisons made Saskatchewan rates are 80 per cent higher than those charged for a ten per cent longer haul in Ontario.

"We respectfully submit that Ontario shippers now contend that their express rates are high; and that if Ontario express rates are high, then Saskatchewan express rates constitute a reasonable basis of grievance.

"Comparison of express rates demonstrate that Minnesota rates to outlying points are on a similar basis to those ruling generally to important Ontario points.

"We contend that Minnesota conditions more closely resemble conditions throughout Saskatchewan than conditions prevailing in Ontario. Such being the case it would seem that Ontario rates are high, Saskatchewan rates are therefore extortionate.

"We contend that express rates should be controlled in the public interest, upon some definite, legitimate basis which would apply equally to all points, whether competitive or otherwise.

"We respectfully point to the fact that no interchange arrangement exists between the Canadian Pacific and the Canadian Northern Express Companies. In the absence of such interchange arrangement each company charges full local rates for its own portion of any haul. An interchange arrangement is universal among express companies doing business in the United States. We contend that an interchange arrangement between express companies should be rendered compulsory upon all business done throughout the Dominion.

"We respectfully contend under the existing graduations the express charge on light parcels is entirely too high. This, more especially as a large percentage of express traffic here and elsewhere is comprised of light parcels. We further submit that under existing graduated charges the expressage on light parcels very frequently exceeds the value of their contents.

"We plead for the publication by express companies, for the distribution on request, of tariffs, graduated charges, classifications and all other conditions under which the express companies operate."—D.G.R.

The Victoria & Barkley Sound Railway intend to build from Victoria to a point on Barkley Sound, in the neighborhood of Sarita river, by way of Otter Point and San Juan, with branch lines not exceeding twelve miles in length from any points on the main line to points adjacent to it.

British Columbia.

Building Permits for Many Structures Being Issued at Both Victoria and Vancouver.

VICTORIA.

February 18.—Though February is little more than half gone the aggregate value of the buildings for which permits have been issued is $9,000 more than the total value of last February. The figures are February 1 to 16, $82,315, last February $73,315. On the 16th permits were issued for $21,350, mostly for small dwellings up to $5,000. The demand for permits indicates clearly the increased activities in building operations throughout the city.

The Victoria Creamery Association are calling for tenders for the erection of a brick block in which to conduct their business. They are to put a lot of new and up to date machinery in their new building when completed.

The B.C. Soap and Paint Works are contemplating putting an addition to their factory. This has been made necessary by the increased demand for their output. The addition that will be made will enable the company to increase the capacity of their factory so as to meet the present demand and any extra trade for the near future. The different articles, soap, paint, tree spray, etc., which the B.C. Soap and Paint Works manufacture find a very ready sale.—W.B.C.

VANCOUVER.

February 20.—That business is not too bad in the West is shown by the success of a commission man who has reached here from Winnipeg, coming through on the main line of the C.P.R. He is a representative of manufacturers of leather belting and heavy machinery, and although only five weeks out has cleared $1,200 in commission in that time. A good sale, he told the Hardware and Metal, was that of a big leather belt 2,300 feet long. He will return via the Kootenay and Crow's nest. Generally speaking, the agents of machinery houses have been doing very well in British Columbia.

Hardwaremen in Vancouver are not complaining much about trade. It has continued through the winter almost better than was expected, and with the spring opening up, there is a good demand in all lines. The prospects are for as good a season as any that have been, and preparations are being made accordingly. If the lumber mills get busy again, and there is every reason to think that they will, there will not be a single drawback.

The deal was closed in Montreal this week for the financing of the Stave Lake Power Company's project. The proposition is to develop the falls on the Stave river, about 40 miles from Vancouver, though what the market will be when it is ready has not been divulged. It is not known whether the company has any particular enterprises in view to utilize the power that will be generated or whether it will enter into competition with the B. C. Electric Railway Company, which controls the power and lighting business of the lower mainland. The B. C. Electric, it is currently reported, was offered an op-

tion on the location for $400,000, but as an application was being made to the legislature to enable the B. C. Electric to increase the height of its dam at Coquitlam Lake to sixty feet, which would give ample power for increased purposes, the option was not taken. Considerable opposition has been made to this application, and it has now been stood over for a couple of months. If the B. C. Electric did not get permission, it would mean that it might be up against it for power, and taking this chance the Stave Lake people have raised their price to a million dollars. This rumor is quite probable considering the circumstances, and if Stave Lake project is gone on with, the B. C. Electric will have a very formidable competitor.

Walter Thomas, who was formerly manager of the Vancouver Gas Works, and who recently invented a gas producing apparatus, has with associates bought out the works at Nanaimo. The plans of the company embrace plants at Ladysmith and Duncan, adjacent towns. The price was $30,000. The Nanaimo gas works were established 22 years ago by Nanaimo people, but later passed into the hands of Victoria capitalists.

Contracts for supplying the requisites for the waterworks in Vancouver have been let by the city council as follows: Galvanized pipe, Crane & Company, Vancouver, $2,745.50; lead pipe, Robertson Godson Company, Vancouver, $1,720; brass goods, Chadwick Bros., Hamilton, Ont.

Incorporation has been granted to the B. C. Carriage Hardware and Top Company, Ltd., with a capital of $50,000, to acquire and take over a going concern the business now carried on in Vancouver.

Sixty building permits were issued last week, the total value being $126,705. These were mostly for dwellings. One permit was for a $24,000 building on Pender street, three stories in height to be used for stores and apartments. The promoter is F. Fuller, the architects, Parr & Fee, and the contractor is George S. Williamson.

An important structure will be that to be erected by the city at English Bay beach and to be utilized as a bath house. It will altogether be of re-inforced concrete, the only wood being that of the doors and window sashes. It will be 272 feet long and about twenty feet wide, extending with the roof on a level just above the sidewalk, excavation being made so as to allow the floor to be just above high water level. The cost will be $25,000, W. Blackmore being the architect.

VERNON.

February 13.—A peculiarly sad occurrence was the death of James Vallance, sr., of Hamilton, Ont., which took place here last week, the cause being pneumonia. The deceased, accompanied by his daughter, Miss Bessie Vallance, had arrived here but a week previous to spend six weeks with his son, who manages the Vallance Hardware Company. He was taken ill on Saturday morning, and the progress of the disease was very active. Mr. Vallance and the bereaved relatives have the sympathy of many friends in Vernon.

Catalogues and Booklets

Manufacturers or jobbers sending printed matter for review, should draw attention to the new lines listed; and retailers sending for catalogues or other matter, should write on their regular printed letterhead and mention this paper to make clear that they are in the trade.

Russell Motor Cars—A beautiful specimen of the printers', engravers' and pressmen's art is the 1909 catalogue published by the Canada Cycle and Motor Co., West Toronto, and devoted to a description of Russell motor cars. The various sections of the cars are illustrated by picture and word, and the particularly good points are emphasized. To the motorist the catalogue contains much valuable and useful information.

Sporting Goods Trade Directory—The Sporting Goods Dealer, St. Louis, Mo., have issued their second annual edition of their Sporting Goods Trade Directory. The directory contains nearly 200 pages. In it is a classified index of goods made by sporting goods manufacturers and a list of sporting goods jobbers and manufacturers' agents in the United States.

Wire Hardware—The Wire Goods Co., Worcester, Mass., have issued under date of February, 1909, a new discount sheet, containing the latest discounts on goods made by that concern, and as the company claim to make "everything in wire," the list is a very comprehensive one. This discount list also contains the new discounts in the supplementary catalogues issued, though the winter supplement, dated as well, February, 1909, gives illustrations and fuller information regarding the goods made. The company's line of goods may be divided into three great sections—heavy wire hardware, kitchen wire hardware, and special goods, made to order. The number of individual articles made by the Wire Goods Co. is over 4,400.

Comfortable Homes—Under the above title F. W. Bird & Son, Hamilton, Ont., makers of sheathing and roofing papers and felt, have put out a little booklet containing practical advice and suggestions for owners of property, and incidentally advertising the various lines and grades of goods put out by the company. A series of photogravures of quaint and pretty houses in the Eastern States occupies the greater part of the booklet and makes it one worth keeping.

NEW AUTO LAMP.

Quick-witted manufacturers nowadays are making fortunes by devising just the things for convenience and use that meet the long-felt want. Just such an invention has been brought out by the Schultz Lantern Company, Hamilton, Ont., in the shape of an auto lantern globe, patented, to fit all standard lanterns. It is just as simple in construction as it is useful and convenient, being the creation of a pioneer in the lantern business, E. Schultz, president of the company, bearing his name. It has been patented in the United States and Canada, and while it is named the auto globe, its utility is manifold, as it can be used by farmers, fishermen, motor boats and pleasure parties by land or water.

The flexibility of the globe is in the fact that it is made of metal and cannot be broken, hence can be used under all kinds of difficulties. With reasonable care the makers claim that this globe will last a lifetime. It is said to excel ordinary search lights and dash board lamps, because of the powerful magnifying lense and mirror plate reflector which is claimed to render it about 200 per cent. stronger than any light for this purpose yet produced. It is so fitted that it can be turned at any angle, while the price, 50 cents, places it within easy reach of any one.

A. H. Brittain & Co., Montreal, are the selling agents, Mr. Brittain being vice-president of the Schultz Company.

Plenty of attractive literature is being prepared supplementing the work of a strong selling staff all over the Dominion.

A NEW DOUBLE WRENCH.

The Bemis & Call Hardware & Tool Co., Springfield, Mass., manufacturers of nuts, combination and "S" wrenches, are getting out at present a new wrench called No. 51 Double End "S" Wrench, which is a combination of the earlier No. 48 and No. 50 wrenches. This wrench is only made in the 6-inch size, and is especially adapted for automobile and gas engine purposes. It also adapts itself readily to use for nuts and pipe, and is a handy tool for the pocket or tool kit. The illustration gives a clear idea of its shape.

New B. & C. Wrench.

Tenders are being called by the Minister of Public Works at Victoria, B.C., for the erection and completion of a lavatory and septic tank for the Government buildings at Alberni, B.C. Tenders to be in by February 22.

Talks with Business Men

No. 2—Salesmanship in Tandem

Trade newspapers make possible a new factor in the distribution of goods—SALESMANSHIP IN TANDEM. Through this medium you may place an auxiliary salesman on the road and it will help every one of your order-taking staff.

A trade newspaper, if it is a good one, makes a periodical visit to the best merchants in the country—they are the men who appreciate most fully the advantages of a trade paper—AND IT IS WELCOME. This is the lead salesman in your tandem. Merchants like him and at a time when they are in a receptive mood, he speaks about the firm he represents—you—and tells something about the goods you sell, or the service you give, or some other distinctive feature of your business. This is, of course, assuming that you use the trade paper for that purpose.

The result is that when the traveler—the second half of the tandem—comes around WITH THE GOODS, HE IS BETTER RECEIVED, because an interest in the firm or the goods has already been aroused, and a desire—possibly an unconscious desire—to see the goods, created.

CONDENSED OR "WANT" ADVERTISEMENTS.

RATES.

Two cents per word first insertion; one cent per word subsequent insertions.

Five cents additional each insertion where box number is desired.

Contractions count as one word, but five figures (as $1,000) are allowed as one word.

Cash remittances to cover cost must accompany all advertisements. In no case can this rule be overlooked. Advertisements received without remittance cannot be acknowledged.

RULES FOR COPY.

In addressing replies care of HARDWARE AND METAL don't fail to give box number.

Replies addressed to HARDWARE AND METAL boxes are re-mailed to advertisers every Monday, Wednesday and Friday.

Requests for classification will be followed where they do not conflict with established classified rules.

Orders should always clearly specify the number of times the advertisement is to run.

All "Want" advertisements are payable in advance.

AGENTS WANTED.

This is the problem of many manufacturers who are anxious to get a foothold in Western Canada. It will be easily solved if HARDWARE AND METAL is given the opportunity to solve it.

AGENTS WANTED—Reliable hardware merchant wanted in every city and town in Canada to handle the Empire Light, "the world's cheapest artificial illuminant," (burns coal oil). An attractive and paying proposition. Write us to-day. THE EMPIRE LIGHT CO., Limited, Packard Building, Montreal. (10)

MANUFACTURER, hardware specialty wants agents for Ontario, New Brunswick, Nova Scotia, on commission. Selling wholesale and retail hardware trade. Box 802, HARDWARE AND METAL, Toronto. [12]

WANTED—Good live agent in Montreal, Toronto and Winnipeg to handle A1 line of hammocks which have been marketed successfully in Canada for some years. The line will be strongly advertised in Hardware and Metal. Apply, giving full information as to lines you now have, Box 796, HARDWARE AND METAL, Toronto. (10)

AGENCIES WANTED

Manufacturers of hardware lines both at home and abroad watch our paper each week. If you want to secure the exclusive agency for any line for the whole Dominion, for a Province or for your own city or town you will find a Want Ad. will put you in touch with the right firm.

TRAVELER, experienced, wants two or three good lines on commission. Box 100, HARDWARE AND METAL, Winnipeg. (10)

ARTICLES FOR SALE.

Don't keep any fixtures or tools around your store for which you have no further use. They are worth more to-day than they will a year hence. Don't keep money tied up which you could use to secure discounts from your wholesaler.

FOR SALE—New Oliver typewriter. Agents' sample. Box 800, HARDWARE AND METAL, Toronto. (9)

TWO counters for sale, one ten feet long and the other sixteen feet long. The counters are in good condition, have oak top and panelled front, with two stools attached. Will sell for about half original cost. W. Walker, 1228 Yonge St., Toronto. (10f)

BUSINESS CHANCES.

WANTED—Responsible partner or manufacturer to take interest in patented article for builders' hardware trade. Can be made and sold at good profit. Address, The Rowland Manufacturing Co., Denver, Colo. (9)

BUSINESSES FOR SALE.

Somewhere in Canada is a man who is looking for just such a proposition as you have to offer. Our "For Sale" department brings together buyer and seller, and enables them to do business although they may be thousands of miles apart.

HARDWARE BUSINESS FOR SALE in one of the finest farming sections of Ontario. Two railways. Stock about $4,500. Good reasons for selling. Address Box 782, HARDWARE AND METAL, Toronto. (11)

HARDWARE, Stove and Tinware business for sale in one of the best towns in New Ontario. Snap for good live man. Premises either for sale or to rent. Apply Box 801, HARDWARE AND METAL, Toronto. (9)

MACHINE SHOP and manufacturing business in city of Ottawa for sale or partnership. Apply to A. H. Edwards, Ottawa. (10)

WELL ESTABLISHED GENERAL HARDWARE BUSINESS in prosperous Manitoba town surrounded by excellent farming district. Stock about $8,000. A splendid opportunity. Apply Box 785, HARDWARE AND METAL, Toronto. (10)

MISCELLANEOUS

ADDING TYPEWRITERS write, add or subtract in one operation. Elliott Fisher, Limited, 129 Bay Street, Toronto.

A MARKET OF BUYERS, backed up by money to spend, is open to you in the Busy Man's Magazine. Every territory in Canada is represented. If you have something to sell, something you want to buy, a condensed advertisement in the Busy Man's Magazine will put you in touch with the classes you want to reach. Four cents per word will carry your message from Atlantic to Pacific. Send copy of your advertisement along with order to cover cost of insertion. Your announcement will appear under a special heading. BUSY MAN'S MAGAZINE, Montreal, Toronto, Winnipeg.

AN EXTRA 1 PER CENT.—A National Cash Register will earn at least an extra one per cent profit for any retail merchant. The National Cash Register Co., F. E. Mutton, Canadian Manager, cor. Yonge Street and Wilton Avenue, Toronto, Ont.

HIGH CLASS COLOR WORK; Commercial Stationery, Posters. The Hough Lithographing Co. Limited, Office—No. 3 Jarvis St., Toronto, Telephone, Main 1576. Art, Good Workmanship; Business Methods.

IF INTERESTED in a Duplicating Machine for getting out circular letters, reports, price-lists, etc., or for printing various office forms, write for booklet and samples of work. The "POLYGRAPH" is the newest, latest, and best, and sells for a lower price than the others. Is unexcelled by any similar device on the market. F. W. Tenney, Canadian Sales Agent, 123 Bay Street, Room 116 Stair Building, Toronto, Can. (tf)

IF YOU are looking for a side line to add to your business there is none better than COLUMBIA GRAPHOPHONES. Double Disc Records (which means two records for a single price) and Indestructible Records (that will not break or wear out no matter how much you abuse them). The Columbia Phonograph Company is the only firm that manufactures both Disc and Cylinder Machines and Records, therefore, a Columbia dealer has the advantage over all others, as he can furnish his customers with what they want, while his competitor has to sell them what he has or lose the sale, which he generally does where there is a Columbia dealer. Are Columbia goods sold in your town? If not, why not? Do you want the exclusive agency? (remember exclusive). You had better write to-day or someone else in your town will read this advertisement and beat you to it. A postal will bring catalogues and full information free. Write to-day. Do it now. Toronto Phonograph Company, Limited, Exclusive Columbia Jobbers, 40 Melinda St., Toronto, Canada.

NOTICE—Users of Pitner Gasoline Lamps are warned against being induced to purchase parts of other makes of lamps to be used on the Pitner. The most vital part of any lamp is its generator, and the Pitner generator has been granted a patent in Canada, the United States and other countries, on the principle of its improved method of generating gasoline vapour Supplies and parts for the Pitner lamps can be received by return mail by applying to our representatives or direct to THE PITNER LIGHTING CO., Limited, 36-38 Lombard St., Toronto, Ontario.

THE RELIABLE LIGHT will light your store 100% better than gas, electricity or acetylene. 600 candle power light costs 1 cent per hour to operate. Thousands in use. A safe, reliable, pure white light of intense brilliancy. Write for booklet M. The Rice, Knight Mfg. Co., Limited, 40 Lombard Street, Toronto.

SITUATIONS VACANT.

You can secure a "five-thousand-a-year" manager, or a "five-hundred-a-year" clerk, by stating your wants under "Situations Vacant."

SMART young boy wanted to learn the hardware business. W. Walker, 1228 Yonge St., Toronto. (10f)

TRAVELER of experience in the Stove and Furnace Business for the Provinces of Quebec and New Brunswick. Must speak English and French. Address Box 786, HARDWARE AND METAL, Toronto, stating experience, salary, etc. (tf)

WANTED—Buyer and manager for cutlery and sporting goods department of wholesale hardware house. Apply, giving full particulars, H. 9, HARDWARE AND METAL, Montreal. (tf)

WANTED—Competent clerk for retail hardware business. Good salesman and window dresser. Apply, stating qualifications with references, to Box 799, HARDWARE AND METAL, Toronto. (9)

SITUATIONS WANTED.

Travellers, clerks, or tinsmiths, wishing to secure new positions, can engage the attention of the largest number of employers in their respective lines, by giving full particulars as to qualifications, etc., under "Situations Vacant."

SITUATION wanted by practical tinsmith as salesman for stoves, furnaces, hardware, tinware, roofing, or paints and oils. Have been in the retail business. References. Box 803, HARDWARE AND METAL, Toronto. (10)

WANTED—Position as travelling salesman. Six years former experience as representative of paint company. Hardware or paints preferred. Past four years managing hardware business. Best references. Box 795, HARDWARE AND METAL, Toronto. (9)

WANTED—Position as salesman for retail hardware. Eight years experience with good preference. J. E. Thomas, 662 King St., London. (10)

STORE FOR RENT

NEW STORE to rent in Galt, Ont., opposite the Post Office. One of the best locations in town. It is now under construction, will be completed the first of April, 1909. Size, 40 ft. front, 100 ft. deep. Fine basement under whole building. For particulars address J. C. Deitrich, Box 915, Galt, Ont. [12]

TECHNICAL BOOKS

ESTIMATING, by Edward Nichols, Architect.—140 pp., 35 illus. Cloth binding. Containing invaluable information for the use of Architects, Contractors, Builders, Carpenters, Plumbers and Heaters, Painters, Roofers, Cornice-Makers, and other workers in the building trades. This handbook tells just how to go about the task of making an estimate intelligently. Price $1.00. MacLean Publishing Co., Technical Book Dept., 10 Front St. East, Toronto.

It illustrates and explains how hardware windows may be dressed to sell goods. Price $2.50 post paid., The MacLean Publishing Co., Technical Book Dept. 10 Front St. East, Toronto.

MENSURATION FOR SHEET METAL WORKERS, by Wm. Neubecker.—This new book gives the principles of the art of measure, showing its practical application in solving problems, in finding the areas, dimensions or capacities of the diverse sizes and shapes of sheet metal products. It is of infinite value to all sheet metal workers. 72 subjects and 70 figures. Price 50 cents, postpaid. The MacLean Publishing Co., Technical Book Dept., 10 Front St. East, Toronto.

NEW METAL WORKER PATTERN BOOK, by G. W. Kittredge.—Most elaborate and complete work ever published for sheet metal pattern cutters. Principal contents are Terms and Definitions, Drawing Instruments and Materials, Linear Drawing, Geometrical Problems, Principles of Pattern Cutting. 430 pages (10 x 13 inches), 744 illustrations. Price $5.00, postpaid. MacLean Publishing Co., Technical Book Dept., 10 Front St. East, Toronto.

THE ERECTION AND REPAIR OF WIRE FENCING.—Practical treatise relative to Wire, Posts, Pattern of Fence to Build, Laying the Wires, Straining Tools and Repair Work. Price 25 cents. MACLEAN PUBLISHING CO., Technical Book Department, 10 Front St. E., Toronto.

WESTERN CANADA HARDWARE MARKETS

Corrected by telegraph up to 12 noon Friday, Room 511, Union Bank Bldg, Winnipeg.

The market situation has been one of unusual interest all week culminating og Saturday when May wheat closed at $1.09. The strength of the American market has, without doubt, been a strong factor in the advance of the Winnipeg market, but it has not been the only factor by any means.

As was stated last week and the week before there has been a steadily growing export demand and the week just closed has seen this considerably augmented, but in addition to the export demand there has been an especially keen demand from both local and eastern millers. The week opened with a good demand for everything in the shape of contract stuff and the publisning of the Dominion Government report about the middle of the week placing "final" returns of the wheat crop of the Canadian west for 1908-9 at 91,-800,000 bushels has been the strongest bull factor of the week. It is interesting to note, however, that even this announcement has not had any very marked effect on the Liverpool market. These returns can only be regarded as final in so far as the Dominion Government will not issue another bulletin on the subject, but as the end of the crop year is not until August 31st, it is impossible to say that figures on the crop are final in February. There are still five months in which wheat can be mar. keted on the crop of 1908-9 and it is very remarkable if that period does not bring to light considerable wheat. Roughly speaking, taking into account the amount required for seed and interior mills about 89,000,000 bushels of the wheat have already been accounted for and it will be very remarkable indeed if the next five months do not see the farmers dig up more than two and three-quarter million bbshels.

In the meantime whoever wishes to sell is getting the full benefit of the very high price. It would not be surprising if the fact of the American markets being closed on Monday brought a slump in the Winnipeg market, but it is not likely to be a heavy slump nor is it likely to last, the situation is strong the world over and just at present points to its remaining so.

Manitoba's Potato Crop.

The potato situation is just now almost as interesting as the wheat. It was mentioned in these columns some time ago that Alberta and B.C. were looking to Manitoba for potatoes, owing to frost damage during the unusually severe weather in January. This demand from unexpected quarters lays emphasis on the fact that the potato crop of the Canadian west in 1908 was short. This was stated quite emphatically in the early fall when the Free Press crop experts returned from their annual trip, but very little attention was paid to it at the time, because receipts were liberal and there was no special outside demand. Now, however, Manitoba is being asked to supply not only Alberta but Saskatchewan also. Over 35 cars have been dispatched to Alberta and B.C. and a number of cars to such points in Saskatchewan as Prince Albert and Saskatoon and the demand keeps coming in. The Manitoba supply is beginning to show signs of exhaustion and prices are likely to rule high. In this connection it is being pointed out that there is plenty of room for increased potato growing in the Canadian west and it is a very profitable crop were it properly handled. Reports came in last week from some of the men who really make a business of growing potatoes, that during 1908, which was not a prolific year, they garnered 550 bushels to the acre from some varieties. Dealers point out that hitherto the western grower of potatoes has paid very little attention to variety and nearly all samples received are mixed. This makes them wholly unsuited to markets outside the west and it will not be long before the western market will demand unmixed varieties. It takes relatively no more trouble to grow one variety than it does to grow a mixture; it is only a matter of getting pure seed and sticking to it. Another defect in western potatoes, from the standpoint of the dealer, is the careless way in which they are handled and put on the market, there being such a large percentage of broken and bruised potatoes as to very seriously detract from their market value. With England exporting large quantities of potatoes to the United States, potatoes that are raised on very high priced land and at large outlay for fertilization, it would seem that farmers in the Canadian west, with a soil that will produce up to 600 bushels per acre with good cultivation and no other fertilizer than the ordinary barnyard manure ought to find potato growing profitable, more especially with the constantly increasing home market and a growing demand from the sections of Ontario lying along Lake Superior and also from the Western States.

Alberta Pork Packing Report.

The commission appointed by the Alberta Legislature to inquire into the whole question of the wisdom of the Government establishing pork packing industries reported during the week. The report is rather an interesting one the commission appearing to have gone into the matter with very considerable thoroughness. Among the leading recommendations made were that the Government should erect a hog packing plant with a capacity of 300 hogs per day when a sufficient number of farmers were prepared to guarantee at least 50,000 per year to a plant. That the management take in the farmer's hog and pay for them up to 2-3 of the estimated value, and then at regular intervals when sufficient time has elapsed to place the product on the market, pay the producer the balance of the full value less the cost of curing and marketing, and a sum sufficient to pay local working expenses, also less one fourth of a cent per pound live weight to be applied for the creation of a fund for the purpose of paying back to the government the original investment and interest and at the same time to allow shares to each patron equal to the amount paid into this fund by the assessment of the one-fourth of a cent per pound on his product.

In the matter of freight rates it was recommended that the total of all freight rates paid on the railways be subdivided and charged equally against each pound of pork supplied, that there be regular shipping days and that each patron bind himself to give all the hogs which he wishes to dispose of for packing to the plant, and failing to do so that he be subject to a fine not exceeding $2.00 per hog. The legislature has not yet disposed of the report. The distance of Alberta from large markets and the desirability of placing the roughage of their farm on the market in the most concrete form, together with the increased easy way with which pork can be raised in Alberta owing to the increase in butter making has led to the packing question being a very live one indeed.

Forestry Work in Manitoba.

The week of February 15th to 20th is known as Farmer's Week at the Manitoba Agricultural College and this year the gatherings were the most successful that have ever been held. The week opened with the annual gathering of the representatives of Agricultural Societies and these remained in session for two days, at the same time short courses in stock judging were carried on for those who were specially interested. Following the Agricultural Society the Provincial Dairy Association and the Western Horticultural Societies held their annual meetings, and every day and all day long there was something of interest to the farmers going on at the college. The attendance at the various gatherings averaged some 300 a day. The discussions were animated, the topics all live agricultural subjects and the spirit prevailing throughout the week was a very happy one.

Perhaps one of the most interesting of all the addresses given was that by Norman Ross, B.S.A., B.F., Chief of the Forestry Division of the Dominion Department of Agriculture, who has charge of the Forestry Station at Indian Head. By means of some excellent lantern slides he showed the marvellous results that had been attained in tree planting on the open prairie in even four years. There were rows of cottonwoods and poplars 15 feet high and spruce and pine that had made a wonderful growth. There was not so much as a switch to beat a dog with on the land when it was purchased by the DominionGovernment for this station, just 4½ years ago. The lecture should be delivered in eastern Canada as it would do more than anything else to disabuse the minds of the people about the treeless prairies.—H.

Hardware Markets.

Advance orders for delivery during the spring and summer are very much in excess of those booked at this date last year and the most conservative of the hardware wholesalers agree that everything points to the biggest year's business in the history of the west. The outlook for building is particularly good in Winnipeg and practically every town of importance in the west, while the new towns on the new lines of railway mean new hardware accounts with heavy demands for builders' hardware.

The only disturbing feature in the general situation is the fact that the amount of wheat in farmer's hands yet to be marketed has been very generally over-estimated. The superintendent of

THE REAL VALUE OF A FURNACE SALE

is not as much the profit on one sale, but rather the number of sales you are sure to make in the future, when you place a reliable furnace—A furnace your customer will recommend to his friends

Let us help you to start right.

Pease Foundry Co., Ltd.
TORONTO, ONT.

Pease-Waldon Co., Ltd.
WINNIPEG, MAN.

Manufacturers of Furnaces, Combination Heaters, Round and Sectional Boilers for Hot Water or Steam, Registers, &c.

We maintain an engineering department. Ask for our assistance when you have an out-of-the-way heating or ventilating problem to solve.

the car service department of the C. P. R. stated to Hardware and Metal that his information is that the estimates of the grain men have been at least 10,000,000 bushels too high. If this be correct, the amount of money to be put in circulation this spring is not so great as has been expected and the West has yet to harvest its first 1000,000,000 bushels wheat crop.

Newspaper Advertising.

Messrs. Barry & Butler,
Allentown, P. Q.

Gentlemen:-

I am especially interested to hear, from your letter of the 10th, that you are about to start a vigorous advertising campaign in the daily papers, because I know just how profitable newspaper advertising can be made if properly handled.

I am sending you under separate cover copy of our Handbook on Advertising. This book illustrates more than 600 electros, any of which we will be glad to send you upon application. It also gives some mighty good information on newspaper advertising. I have also requested our Advertising Department to take the matter up with you and give you any special assistance they can. If you desire, our staff of ad writers and artists will be glad to prepare a series of special ads for you, not only on paints and varnishes, but on all the lines you carry, as well. There is no cost for this service, as we are always glad to help our agents do a better business.

Assuring you that I am very glad of this opportunity to be of service to you, I am,

Yours very truly,

C. C. BALLANTYNE.

BUILDING AND INDUSTRIAL NEWS

For additional items see the correspondence pages. Information is solicited regarding building and industrial news, the incorporation of companies, establishment or enlargement of mills, factories or foundries, municipal waterworks and sewerage systems, railway or mining news, etc.

Municipal Undertakings.

Revelstoke's, B.C., sewerage system will cost about $43,000.

Kingston may extend its waterworks mains to all parts of the city, at a cost of $35,000.

Sydney, C.B., will spend over $90,000 in sewers, water extension, bridges, fire station, etc.

A by-law will be submitted shortly to the ratepayers of Thorold to raise $15,000 for waterworks.

Peterboro's water commissioners advocate installing a new waterworks plant, to cost $120,000.

Fort Erie, Ont., ratepayers will, on March 15, vote on a by-law to raise $50,000 for waterworks.

Estevan, Sask., ratepayers will probably vote on a by-law to raise $30,000 for fire protection purposes.

A by-law will probably be submitted to the Pembroke, Ont., ratepayers to spend about $125,000 for a water system.

Notre Dame de Grace, Que., is considering borrowing $350,000 for the purchase of the water system of the Credit Municipale.

Industrial Activity.

The Dawson Lumber Company's mills at Yarmouth, N.S., have resumed operations.

Odleifson & Thornsteinson have started a saw mill at Gimli.

C. Jobin & Company, St. Augustine, Que., have been incorporated to operate sawmills.

The Lewis Miller Company will probably build a large sawmill at Jordan Falls, N.S.

The Sarnia Board of Trade have a proposition for the erection of a canning factory.

The Davidson-Ward Lumber Company are erecting a 20-machine shingle mill at Loughborough Inlet, B.C.

It is stated that a company is being organized for the erection of another large elevator at Port Stanley.

C. A. McGilivray, Bellingham, Wash., has purchased a site at Vancouver, for the erection of a large sawmill.

The Canada Cycle & Motor Company will erect a 4-storey building at Toronto, at a cost of about $50,000.

A. W. Allen & Son recently added a barrel making plant to their woodworking factory at Middleton, N.S.

The Canadian Industrial Company will erect a large paper and pulp mill at a site on the Powell River, near Vancouver, B.C.

The newly organized Western Canada Wood Pulp & Paper Company will erect a large pulp and paper plant at Quatsino Sound, B.C.

MacKay Bros., Charlottetown, P.E.I., have bought the Nova Scotia Carriage Company's factory at Kentville, N.S., and are resuming operations.

The Estevan, Sask., Board of Trade are stated to be negotiating with an English firm wishing to manufacture tile, sewer pipe and other clay goods.

The Manitoba Iron Works have purchased a considerable amount of property at Winnipeg, where they will make extensive additions to their plant.

J. H. Griffin, general inspector and traffic agent of the Great Northern Railway, states that an elevator will be erected in Brandon early next season.

Samuel Brown, Winnipeg, has been awarded the contract for the erection of the new freight sheds for the C.N.R. at Saskatoon. Approximate cost, $20,000.

The Kelowna Sawmill Company, Kelowna, B.C., are adding new machinery for the manufacture of fruit packing boxes. A new planer and a conveyor for handling slabs have been put in.

The Welland, Ont., council is stated to be negotiating with the Kee Lox Company, Rochester, N.Y., manufacturers of carbon paper and typewriter ribbons, for the establishment of a Canadian branch factory.

It is reported that the coal industry of Pictou County, N.S., is in a very satisfactory condition, all the collieries of the Acadia Coal Co. are working full time. The Drummond Colliery at Westville is also working quite steadily.

Improvements to the Winnipeg shops are planned by the Canadian Northern, and on the arrival of spring, work will commence on several additions to the works at Fort Rouge. A carpenter shop, costing $25,000, will be erected and smaller additions to the present buildings will also be made.

Railway Development.

It is definitely announced that the C. P.R. will construct a line from Weyburn to Lethbridge, 400 miles, this season.

Appropriations totalling $2,000,000 have been passed by the C.P.R. for improvements on the Pacific division of that road.

Final surveys of the North Midland Electric Railway are now being made and the system will be in operation in a few months.

The Peterborough Radial Railway Company contemplates extending its line from Clear Lake to a point in Stony Lake in Peterborough County.

The Niagara Peninsular Railway Co. will apply for permission to build a branch line of electric railway from Port Colborne through Welland.

It is stated that the Great Northern Railway Company will shortly submit plans to the Vancouver council for its proposed terminals in that city, to cost $3,000,000.

Application has been made for the incorporation of the Southwest Alberta Railway Company, which will build a line from the G.T.P branch line between Calgary and Lethbridge, to Pincher Creek, a distance of about 100 miles.

Wallace McDonald, Edmonton, is applying for a charter for the Alberta & Great Waterways with power to build a railway from Edmonton to Fort McMurray, with several branch lines, in all about 300 miles, according to the route taken.

In addition to the Weyburn line, which the C.P.R. will construct this season, the company will lay a line from Lethbridge to connect the Macleod branch with the Calgary and Edmonton line, a little north of High River station.

The Flathead Railway Bill has been reported favorably to the B. C. House and there is every prospect of its being passed. The proposed route of the new line is from a point on the eastern British Columbia railway at or near the Town of Corbin, to the international boundary line, a distance of nearly fifty miles.

According to the vice-president, D. D. Mann, of the Canadian Northern, that system will begin at an early date on the extension of the line to the Pacific coast.

In round figures the big western roads will end the year with the following added mileage: Canadian Pacific, six thousand; Canadian Northern four thousand; Grand Trunk Pacific, two thousand; Great Northern, four thousand.

Dominion Public Works Estimates.

The following are the estimates of the Public Works Department of cost of work necessary to be done on public buildings in Canada during 1909:

Nova Scotia:—Amherst Public Building, improvements, $2,000; Bridgewater, public building, $6,000; Glace Bay, public building, $12,000; Guysboro' public building, improvements, $1,200; Halifax Dominion building, improvements, $75,000; Halifax Dominion buildings, improvements, $4,000; Halifax, immigrant detention building, hospital, $2,500; New Glasgow public building, improvements, $1,000; Pictou public buildings, $2,000; Shelburne, public buildings, $19,000; Westville, public building, $5,000.

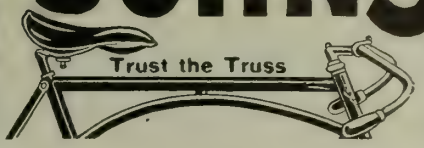
IVER JOHNSON



Truss Bridge Bicycle

Dealers

like to sell the Iver Johnson Truss Bridge Bicycle because it remains sold—proof against "come backs." Our **Agent's Proposition** is worth looking into, for the man who would make good money on a good proposition.

Riders

prefer it because it is the most durable; because it is made of the best materials by the most skilled mechanics in the world. Costs moderately in the beginning, nothing for repairs if not mistreated, and costs least, therefore, in the end.

Send for Free Catalogue

It illustrates the 1909 models and shows why the Truss Bridge is so popular among dealers and riders. It is a text book on bicycles.

We Want Agents

to sell the

Manitoba Steel Plate Furnace

We want a good hardware man in every town to handle our furnace. It will burn Souris and other soft coals mined in the West, and it will burn them economically. It is the furnace Western people have been looking for. If you are from Missouri, so much the better. Ask us and we will show you.

The consumer saves 25 to 40 per cent. on fuel when he uses the Manitoba.

New Companies.

Smith Hardware Co., Montreal; capital, $20,000; to deal in hardware and cutlery. Incorporators, D. G. Smith, A. R. Hall and S. W. Jacobs, Montreal.

Novelty Woodworking Co., St. John; capital, $20,000; to manufacture wares and novelties made from wood. Incorporators, H. R. Ross, J. H. King and H. E. Figsby, St. John.

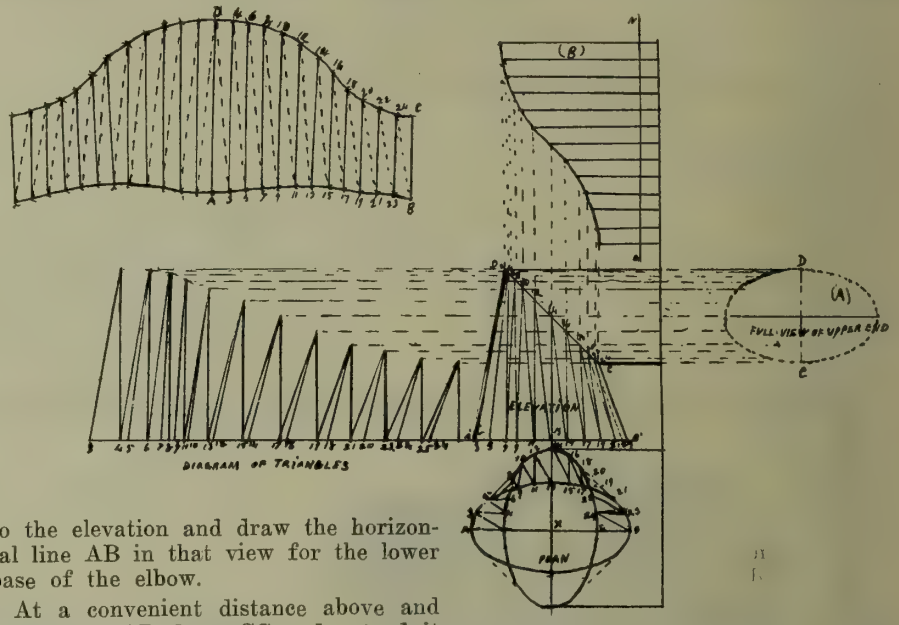
The J. J. Wilson Mfg. Co., Ottawa; capital, $20,000; to make shoe polish, stove polish, harness dressing, etc. Incorporators, J. J. Wilson, W. H. V. Hooper and E. P. McGrath, Ottawa.

Cutting Patterns in the Tin Shop

IRREGULAR ELLIPTICAL ELBOW.

In the erection of the smokepipe for a certain class of steam heaters, provided with ellipitical collars, it is often desirable, in order to obtain the greatest amount of headroom in the cellar, to make the whole line of pipe elliptical in sectional outline. To do this you must use an irregular elliptical elbow.

First construct the ellipse, whose major axis is represented on the horizontal line AB, as shown in the plan. This ellipse is supposed to represent the outline of heater-collar and will serve for the plan view of the lower base of the solid that is to be shown in the elevation. From the point X at the intersection of the two diameters draw a vertical line of indefinite length upwards



to the elevation and draw the horizontal line AB in that view for the lower base of the elbow.

At a convenient distance above and parallel to AB draw CC and extend it indefinitely at both sides of the vertical line. At any convenient point on this line, namely, C, erect a perpendicular line, on which as a minor axis draw the ellipse shown at A. This is to be the same size as the ellipse, previously constructed in the plan.

From the upper end of the minor axis at A carry toward the elevation a horizontal line of indefinite length. Next fix the point W on the vertical line drawn through the elevation midway between the lines CC and DD and through this point draw a line at an angle of 45 degrees. Draw A1D and B1C to represent the lateral outlines of the lower section of elbow. This completes the elevation and it now remains to finish the drawing by projecting the several points to the plan, the foreshortened view of the section on the line CD will be represented therein by an ellipse the exact size of the one at A. Divide one-half of the outline of view shown at A into any number of convenient spaces. Lay off and develop the stretchout MN shown at B. The pattern is then produced by projecting the points on the outline at A to the line of intersection CD and thence to the development at B.

The development for the lower section of elbow can only be accomplished by triangulation. Divide one-half of the ellipse into any number of equal spaces as the half of view at A. For convenience the points are numbered 3, 5, 7, 9, 11, etc. The points on the line CD of elevation may now be projected to their corresponding positions on the other ellipse. These points are numbered 2, 4, 6, 8, 10, etc. The base line A1B1 of the elevation may be extended indefinitely toward the left. Take the distance 2, 3 of the plan and set it off on this line. In a similar manner take 3, 4 and continue until the point B is reached. The vertical heights are then projected from elevation in manner shown, taking similar points in each case.

The true length of all lines now having been determined, the development may be constructed as shown. The line AD may be set off at any convenient point. The length of it being the same as the length of A1D of elevation, as that is the true length. From A as centre and radius A3 of plan describe an arc; intersect this arc by an arc described from D as centre and with radius equal to the length of line 3. This completes the triangle AD3. The triangle 3D4 is next constructed, but it should be noted that the radii for distances on upper base are taken from corresponding positions on the curved outline of pattern. At B this arc is intersected by an arc struck from 3 as centre and having a radius equal to length of line 4. This completes the triangle 3D4. The rest of the triangles are constructed in similar manner, taking lengths of lines in rotation. The work may be carried on at the same time on both sides of line AD at C, thus producing a complete pattern for lower section of elbow. Edges must be allowed. W. M. M.

News of the Paint Trade

DISPLAY ADVERTISING MATTER.

It is open to doubt whether in many cases the paint dealer gives the attention that he should to the advertising matter that the manufacturer places at his disposal. He is apt to minimize the selling power of attractive hangers, cards, in the same way that he has been disposed to believe that paints should sell themselves. But the progressive hardwareman knows better. He realizes the value of having in his possession real facts about the goods he handles, and he appreciates the advantage of having these facts presented in the most convincing way by the people best able to do it—the manufacturer As it has been pointed out, the preparation of every distinctive piece of advertising matter represents the knowledge of those who fully understand the best selling points of the line in question and who are therefore better qualified to present the merits of the article to the customer, than the merchant whose qualifications must necessarily be sufficiently diverse to sell a mixed stock of merchandise covering many lines of industry. The salesman should not depend too much on his own arguments, alone. He should back them up, or preface them, by the convincing talk of experts.

As much depends upon the interior display of a store as the exterior. When a customer enters a store he should not be allowed to concentrate his attention on the articles he intends to buy to the exclusion of everything else. That is to say, if he wants a screw-driver, for instance, he should not be allowed to leave the store without thinking of something else besides screw-drivers. He should be made to think of paints. How is this best done? By the proper display of the advertising matter that the merchant has at his command. Especially is this essential where the paint department is not well to the front in the store.

A survey of the interior by the dealer will quickly tell him the best locations for his advertising matter. Bearing in mind that the customer will not go round looking for the advertisements, those places must be selected which command most readily the attention of the observer. When the best locations are found, care should be taken that the most suitable form of poster, or whatever form the advertisement may be in, is used. A square card, for instance, should not be placed where a round one would look better. The idea is to attract the gaze of a customer, and to hold his attention afterwards. Therefore, the more attractive the general arrangement, the better the chance of doing this When the attention of a prospective customer has been attracted, the salesman can, with a greater amount of success, follow up the impression made by the other arguments at his command.

Merchandise has an advertising value that is all its own. This is especially

We'll help you sell them

When you stock Floorglaze Enamel, M.L. Paints, or anything else we make, our interest in you doesn't lapse till it's time for your next order. Not much! We keep busy right along helping you to sell the goods—moving that stock out in a hurry to make room for more. That's one reason why we keep friends with the trade. Another reason is found inside the cans. When you get ready to handle a really complete line of paints, varnishes, enamels, etc.,—and a line that sells and satisfies—this is the address to write to:

Imperial Varnish & Color Co., Ltd.
OF TORONTO

Please correspond with place nearest you.

TIGER BRAND

WHITE LEAD

The painter who is desirous of getting the best results demands White Lead that he can depend upon to be absolutely pure and reliable.

"TIGER" Brand has always stood for the best to be had in White Lead, and, therefore, is asked for by all the leading painters of this country.

Made from pure White Lead and pure Linseed Oil, containing no adulteration whatever.

Every package bears the guarantee of the White Lead Association of Canada.

The Montreal Rolling Mills Co.

true of paint and paint specialties. Not only does the style of the package in many cases suggest convenience in use, but the label is often so designed, illustrated, colored, and worked, that as it stands on the shelf it tells a strong story to the customer. But the customer must be brought to read this story, and one of the easiest ways is by means of a judicious display of advertising matter. Attract the attention of the customer. Excite his envy by the sight of a well-painted house, barn, or room, and the work of the salesman is half done. But have none of the sign stories, and the salesman will often have hard work to convince a customer that his house is in need of paint. Advertising matter is of little use unless it is displayed properly.

Paint and Oil Markets

MONTREAL.

February 26—A steady volume of business is being done. Orders continue on the light side, but the aggregate bulk improves as the spring draws near. Dealers report in many cases a determination to push through a strong spring campaign, and this should liven trade up later on. The markets are unchanged. Mixed paints, stains, enamels, and varnish in small tins continue to move well.

Turpentine—There was a slight strengthening in quotations at the points of shipment, but this proved only temporary, and prices fell back to normal. The demand is fair and local quotations continue around 58c. for single barrels, net 30 days.

Linseed Oil—The demand is not on the heavy side, and the market does not seem so firm as it might be. There is, however, no change to report either in large or small lots, and we quote: Raw 1 to 4 barrels, 59c.; 5 to 9 barrels, 58c.; boiled, 1 to 4 barrels, 62c.; 5 to 9 barrels, 61c. Strictly net 30 days.

Ground White Lead—Heavy sales in ground white lead are extremely rare. Painters and decorators state that prospects for redecoration, and for repairs are much lighter than at this time last year, and this apparently has had a tendency to make ground white lead move in a moderate way. We quote strictly pure, $5.50 to $6, according to brand, and No. 1, $5 to $5.50 f.o.b. Montreal.

Red Lead—New structural work is being approached with caution on account of the condition of the steel market and shipments of red lead are in consequence rather slow at present. Prices are unchanged, and we quote: Genuine red lead in casks, $4.50; in 100-lb. kegs, $5; in less quantities, at $6 per 100 lbs.; No. 1 red lead casks, $4; kegs, $4.50, and smaller quantities, $5.50.

Varnishes—The spring call is of a very strong character, and all varnishes and japans are showing the influence of better weather conditions. Shellac varnish continues a strong favorite.

Paris Green.—The very heavy jobbing orders seem to have been pretty well placed, and the call for immediate shipment is on the light side. March and April will however see a stronger movement in this article. There is no change in price, and we quote 1-lb. packets, 100 lbs. in case, 21c.; 1-lb. packets, 50 lbs. in case, 21½c.; ½-lb. packets, 100 lbs. in case, 23c.; 1-lb. tins, 100 lbs. in case, 22c.

White Zinc.—This line is featureless. Shipments continue light, and quotations are as follows: Dry V.M. Red Seal, 7½c.; Red Seal, 7c.; French V.M., 6c.; Lehigh 5c.; white zinc, ground in oil, pure, 8½c.; No. 1, 7c.; No. 2, 5½c.

Putty.—Considering the early approach of spring, the movement in putty is on the light side. There is no change to report in the market and we quote: Standard putty, 880-lbs. casks, $1.65; in 100-lbs., drums, $1.90; bladder putty, 400 lbs., in barrels, $1.90; in 100-lb. cases, $2.05; in 25-lb. drums, $2; 25-lb. tins, $2.05; 12½-lb tins, $2.25 f.o.b. Montreal.

TORONTO.

February 26.—A drop of two cents is made to-day in turpentine, which makes the price quoted by all houses the same. But for this change conditions are the same as a week ago. Spring orders continue to come in in fair numbers and the quantities asked for are quite satisfactory. Present trading, however, is quiet. There are still rumors going round regarding cutting in oil, but no foundation can be found for the statements, all the jobbing houses saying they are selling at the market quotation.

TURPENTINE—Very much easier has turpentine become during the week, and a drop of two cents is noted. Single barrels are 60c.; 2 to 4 barrels, 59c.; and 5 gallon lots 65c.

LINSEED OIL—Though rumors of cutting are still abroad there are none who confess to selling below the market quotation, and no certain evidence of such is at hand. The prices of a week ago still hold good. Raw is still 59c. and boiled 62c. for single barrels, 5 barrel lots being quoted 1c. less.

GLASS AND PUTTY—Fairly high prices continue to be asked for glass. Stocks are low, and trade is quiet. The independents in the United States have been trying to form some kind of association, but it looks now like deferring any coming together for another little while. Putty is in fair demand only.

WHITE LEAD—The situation is interesting, but the market quotations have not undergone any change; nor is there any immediate prospect of one. No. 1 is $5.40 to $5.65; pure white, from $5.80 to $6, and a superior line is offered at $6.25. In red lead the movement is chiefly of a jobbing order. Genuine is quoted at $4.50 for casks and $4.75 to $4.80 in 100 lbs.

PARIS GREEN—Barrels at 20½c. and 25-lb. drums 21½c., are the quotations this week, which are unchanged from last week. Demand is quiet.

STAINS AND VARNISHES — Light orders are being received, but by the

"Selling goods is the easiest thing in the world if you have the right goods."

The white base of

"English" Liquid Paint

is

70% Pure White Lead
30% Pure Zinc White

And all of this 70% of lead is Brandram's B. B. Genuine White Lead.

Brandram's B. B. Genuine White Lead has been manufactured by Brandram Bros. & Co. at London, England, for over one hundred years. Its whiteness, its wonderful covering capacity, its minute fineness, its affinity for linseed oil, mark its superiority and justify its command of highest market prices.

Brandram's B. B. Genuine White Lead is now manufactured by the original "Brandram" process in the new lead corroding works at Montreal of Brandram-Henderson, Limited.

"ENGLISH" LIQUID PAINT costs you no more although it is made of 70% pure white lead.

But it gives you better paint.

"ENGLISH" LIQUID PAINT costs you no more although all of the 70% lead used is Brandram's B. B. Genuine White Lead.

But it gives you better paint.

PETROLEUM -- Business continues good, nearly as good as in December, when petroleum was in brisk demand. Prime white is 13½c.; water white, 15½c., and Pratt's astral, 17½c.

OIL WELL BURNS TWO MONTHS.

The great oil well fire in the San Geronimo district of New Mexico burned continuously for two months before it could be extinguished. The oil was ignited on July 4, and a gas blow-out which immediately followed caused the opening in the earth to be widened, and the whole drilling outfit, derrick, engine and all, were engulfed.

The outpouring of oil caused a miniature volcano to form, the crater being several hundred feet across. The flame from the burning hole was 160 to 180 feet wide and rose to a height of about 1,800 feet, the smoke and vapor rising to an additional height of about 16,000 feet. It was a grand spectacle, the flame being easily seen for a distance of 200 miles.

The fire was finally extinguished, after destroying oil estimated at 5,000,000 barrels, by six centrifugal pumps which threw mud and water into the caldron day and night for two weeks.

After the flames were extinguished the mammoth well continued to flow oil at the rate of 150,000 barrels a day and the services of several hundred Mexican soldiers and other laborers were required to construct temporary earthen reservoirs to hold it. Even then great quantities of the oil escaped into the San Geronimo River and adjacent lagoons.

The fire was without doubt the greatest oil fire in the history of the world. The nights were turned into day while it lasted and fine print could be read at night within a radius of 100 miles of the burning oil, the illumination was so brilliant.

Of such grandeur and force as to create a feeling of awe within the stoutest heart, it was viewed by the ignorant Mexicans for 200 miles around with fear and superstition. They wondered if it would spread until the whole world was consumed, and muttered and hinted at all sorts of dire things because the Americanos had not been content with what the Creator had placed on top of the earth for them, but had bored great holes in the earth, tapping the fires of hell.

ATTRACTIVE PAINT WINDOW.

Many hardware men neglect to push paint in their window displays, although it is one of the best to exhibit in the spring, when the customers are thinking of housecleaning and brightening up both the interior and exterior of their houses.

A very good display arranged last March by H. J. Marshall, for George W. Ecclestone, Bracebridge, Ont., is shown in the accompanying illustration and it should encourage others to make a similar push for business at this time.

Good Spring Display of Paints, made by Geo. W. Ecclestone, Bracebridge.

NEW FIRM AT OTTAWA.

The Capital Paint & Oil Co. have opened offices at Ottawa as manufacturers' agents in paints, oils, varnishes and glass, representing in particular P. D. Dods & Co., Montreal, and the British American Oil Co., Toronto.

H. J. Dupont, who will manage the new concern, was formerly manager of the Canadian Oil Co.'s branch at Kingston, and for the past three years in charge of their Ottawa branch. He has a wide connection with the trade in Eastern Ontario, having traveled the ground for many years. J. H. Weber, who has been traveling east of Ottawa for "Island City" paints, will cover the same territory for the new firm, while T. H. Berney will continue to travel west of Ottawa, the ground he has been covering for the Canadian Oil Co. H. M. Kert, who will be secretary of the Capital Paint Co., has been bookkeeper for the Canadian Oil Co. at the Ottawa branch.

"CUMOFF"
Paint and Varnish Remover
FOR USE ON
Wood or Metal

Removes Old Paint, Varnish, Shellac or Enamel, leaving the surface ready for refinishing.

Will not raise the grain of the wood.

HAS NO DISAGREEABLE ODOR.

Will not injure the hands. Will not destroy the brush.

Will undoubtedly increase your trade as "Cumoff" is an article long wanted by every painter.

Specially useful on Mouldings, Carving and the refinishing of old frames or Cabinet Work.

DIRECTIONS

Apply a good thick coat, using an ordinary Paint or Varnish Brush. Allow it to remain on for about 10 minutes. When the coating to be removed has become thoroughly softened, proceed to remove by using a Painter's Scraper or Pallet Knife. On Carved Work or Mouldings use a hard Scrub Brush instead of a Knife.

"CUMOFF"
IS MANUFACTURED ONLY BY
The Canada Paint
Company, Limited

By the HOT Water You Will Know THEM

Various wall finishes claim the same qualities as Alabastine. Yet how can they possess these same qualities when they are not made of the same ingredients? Alabastine is a hygienic cement made from gypsum rock. "Imitations" are whiting and glue preparations, requiring the addition of hot water. Cold water is all that's necessary with Alabastine. Order Alabastine through your jobber or direct from the Alabastine Co., Ltd., Paris, Canada.

Just Add COLD Water to ALABASTINE

For Interior Finishing.

ELASTICA

Some Strong Selling Suggestions.

Hardens over Night.

It dries free from dust in from four to six hours and on linoleum, oilcloth, painted or old floors, one coat is sufficient. It is a finish, that after applying at night, you can walk on the next morning and no heel marks will be observable, neither will it rub off. Elastica will retain its lustre and will stand the severest wear and washing. It works easily and will not scratch, spot or mar.

Sold throughout the Dominion by all Wholesale and Retail Hardware Merchants.

The Canadian Hardware Jobbers

Use Large Space in Our Annual Spring Number each year. Last year during depression

Lewis Bros , Montreal, used 5 pages
Hobbs Hardware Co., London, 2 pages
Caverhill, Learmont & Co., Montreal, 2 pages
H. S. Howland, Sons & Co., Toronto, 2-page insert
Frothingham & Workman, Montreal, 1 page
Rice Lewis & Son, Toronto, 1 page
D. H. Howden, London, 1 page
Kennedy Hardware Co., Toronto, 1 page
Wood, Vallance & Co., Hamilton, 1 page

These firms have travellers covering the country thoroughly and are in a position to know whether or not this Number is read by the hardware trade throughout Canada.
Practically every article sold through the Canadian Hardware Trade will be advertised in it.
It will, therefore, be used for months as a Directory by Wholesale and Retail Dealers.
Our Annual Spring Number will be published March 20—just when Spring trade is opening up. An immense amount of Hardware is shipped to the West as soon as navigation opens. The end of March is, therefore, a most opportune time to make good, strong bid for business.

WE GUARANTEE TO SEND A COPY OF THIS NUMBER TO EVERY HARDWARE, STOVE AND TINWARE DEALER IN CANADA

RATES: Full Page, $35.00 *Half Page, $20.00* *Quarter Page, $12.00*

HARDWARE AND METAL

MONTREAL TORONTO WINNIPEG

Fire Bricks

To every man who uses Fire Bricks.

We handle the best makes of Scotch Fire Bricks, and our prices are right, but there are occasions when you must have more refractory materials, and then please remember that we are the Canadian representatives of the

"HARBISON WALKER REFRACTORIES" COMPANY

and this should indicate that we are the Fire Brick House of Canada.

Others of our exclusive specialties are

Lafarge
Non-Staining Cement

Iron Clad
Portland Cement

United Paving Bricks
Best in the World.

Enamelled Bricks
All Colors

Drain Pipes
Plaster, etc.

Francis Hyde & Co.

KING, QUEEN and WELLINGTON STS.

MONTREAL

GILBERTSON'S COMET

Gilbertson's Sheets
and the COMET Brand

mean quality and security in whatever work you may undertake.

Galvanized Flat Sheets that are unequalled as to flatness ; absolute trueness to gauge ; admirably suited in softness for any working. Note the brand "COMET." GILBERTSON on every sheet means security.

W. GILBERTSON & CO., Ltd., PONTARDAWE, South Wales

CURRENT MARKET QUOTATIONS.

February 27, 1909

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for larger quantities and prompt pay. Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate.

TRADE B MARK

Amatite ROOFING

Something Back of It

AMATITE is easy to sell because it offers better value for the money than any other ready roofing.

It can be profitably retailed for less than any other roofing of more than half its weight, so that the man that wants a good roof at low cost gets Amatite

Case's Grain Store, Colchester, Conn.

It is made with pitch, the greatest waterproof material known and so it appeals to the man that wants durability.

It needs no paint—the real mineral surface takes care of that—and the "no painting" feature of Amatite appeals to everybody.
Back of the forces that sell Amatite is the HEAVIEST ADVERTISING CAMPAIGN in the business, which is "going some" these days.
We help the dealer by giving him samples, booklets, electros and signs for his own advertising. Write For Particulars.

Read a Few of the Comments of the Leading London Dailies on the Supremacy of the Ross Rifle at the 1908 Bisley Meet.

"Long range Champion, breaks all records, a rifle of wondrous precision." *London Morning Post, July 16th.*

"Records broken at Bisley. A fine Canadian rifle." *London Daily Express, July 16th.*

"Record scoring with the Ross rifle." *London Daily Telegraph, July 15th.*

"Champion of the year." *New York Herald, July 16th.*

"Performance phenomenal by the Ross rifle." *London Field, July 18th.*

"The new Canadian rifle has made an unexpected and altogether successful appearance." *London Daily Mail, July 15th.*

"Great triumph for the Ross rifle which has beaten all the world's rifles." *London Standard, July 15th.*

"Many experts declare that Ross rifle better than new U.S. Rifle." *Nottingham Guardian, July 17th.*

"An individual triumph, the Lee-Enfield hopelessly beaten." *London Morning Post, July 15th.*

"The Ross rifle achievements were truly remarkable." *London Evening Standard, July 15th.*

"Great victory for the Ross rifle from Canada." *London Daily Express, July 15th.*

"The rifle of the future is the Ross rifle." *London Times, July 16th.*

"A'plague of possibles' with the Ross rifle." *London Sphere, July 15th.*

THE ROSS RIFLE CO., - QUEBEC

You May Become a Practical Window Dresser for $2.50

This is the first book ever written devoted exclusively to Hardware Display, and has been off the press only a few weeks. It is a practical, up-to-date collection of ideas of the most expert window dressers in the world. There are hundreds of displays in the book that can be put in at practically no expense—anyone of them will bring enough extra trade to the store to pay for the book many times.

256 Pages **8x11 Inches** **300 Illustrations**

Price $2.50. (Payable in Advance)

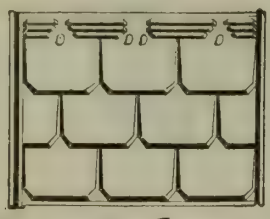
We Have Protected the Trade for 24 Years.



Eastlake Steel Shingles

either Galvanized or Painted

Are Always Reliable They are more economically durable and quicker to apply than any others, fitting accurately—and therefore most easily laid.

They have been thoroughly tested in all kinds of climates, invariably proving **Fire, Lightning, Rust and Weather Proof.**

If you're building, make sure of satisfaction by ordering EASTLAKES for the roof—fullest information if you write.

Metallic Roofing Co., Limited,

WHOLESALE MFRS., TORONTO, CANADA.

METALLIC CEILINGS

are everything that plaster, wood and wall paper **are not.**

Metallic Ceilings are fireproof, absolutely.

Metallic Ceilings don't crack or crumble — don't get damp or mouldy—don't need repairs.

Metallic Ceilings are far-and-away the most economical building material you can put in a house.

You don't believe it? We can prove it. Write us for the facts.

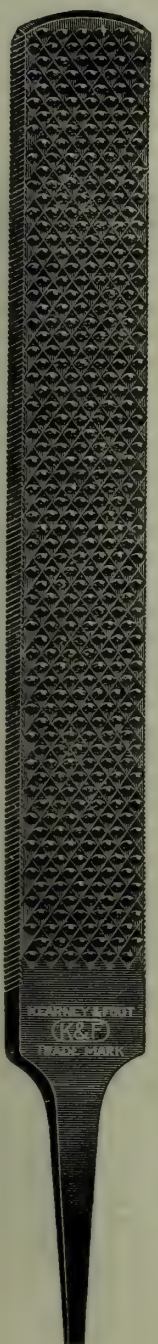
HORSE RASPS



are another excellent example of the completeness of the lines of goods we carry in our stock. We show here four of the best and most reliable makes of horse-rasps in the market. Our stock includes all of these four in both plain and tanged and in a large range of lengths. We have everything in that line you are likely to be asked for.

The completeness and the good selections of sizes and makers are characteristics of our stock. We choose the goods we will sell solely on their merits, and it will pay you to handle the goods we advertise. You can rely on their quality, which is backed up by the makers' names as well as by our own. You can make a good profit on them, too, because we sell right.

Order from us whenever you want hardware.

Eclipse Roofing

A large factory covered with Eclipse Roofing.

Eclipse Roofing is a high quality, water proof and odorless roofing. It is adapted to all kinds of roofs and will resist the severest weather.

It is made of a composition which renders it tough and durable. It will resist acids and is an excellent protection from fire.

Every dealer should carry a stock in hand. Eclipse Roofing is very popular on account of its good qualities, not the least of which is the ease with which it can be laid.

Why not get your share of the profits to be obtained by the sale of Eclipse Roofing.

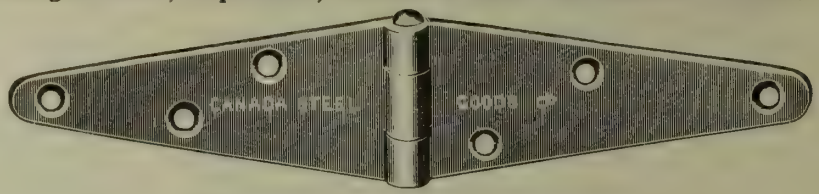
Crescent Brand Hinges and Butts

Bright Steel, Japanned, Electro-Plated and Nickel Finishes

Crescent Brand

Registered



Is the other fellow pressing you hard for business ?

Chances are he is doing it with Crescent Brand Hinges and Butts.

Many of the successful fellows have chosen them exclusively—and they are well worth choosing too, being made for the trade that seeks the best, and who are governed by quality.

Can you risk handicapping your business with inferior goods, when the price is not lower ?

If your jobber does not keep them, we will fill your order.

Canada Steel Goods Company, Limited

Hamilton, Ontario

Leave the Money in the Country Wherein You Expect to Make Yours

Up to the Times

During our career of more than a third of a century we have always been leaders in the introduction of progressive methods. As a result, the quality of our goods is unquestionably the standard.

WIRE NAILS

Machine Screws, Iron, Brass and Copper Rivets and Burrs; Staples, Corrugated Fasteners; Stove, Sink, Tire and Sleigh Shoe Bolts; Bright Wire Goods; Wire—Bright, Coppered, Tinned, in coils and cut to lengths, etc.

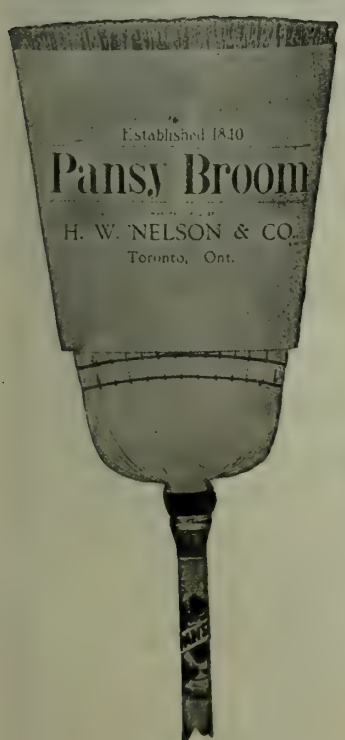
We manufacture all kinds of lumber tools.

Light and Durable.

Send for catalogue and price list.

Long Distance Phone No. 87

Sold throughout the Dominion by all Wholesale and Retail Hardware Merchants.



It pays to buy a High-class Broom

At all times but never so much as just now. The recent advance in the price of broom corn used in common brooms has been very much greater than in the highest grade of that material, and you pay a good deal more accordingly for the ordinary kind. Sell

The "PANSY" which is chock full of Quality

and is an article that you can conscientiously recommend. The corn used is selected from the finest crop grown and the workmanship is the best. An ordinary broom is doubly dear at present but a real good broom is just now of double value.

"Buy from the makers."

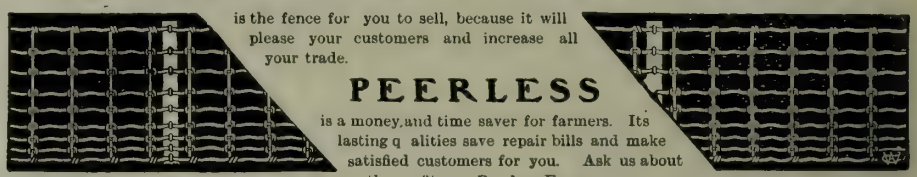
THE FENCE THAT SAVES EXPENSE



is the fence for you to sell, because it will please your customers and increase all your trade.

PEERLESS

is a money and time saver for farmers. Its lasting qualities save repair bills and make satisfied customers for you. Ask us about the profits on Peerless Fence.

The Banwell Hoxie Wire Fence Co., Ltd., Dept. J, Hamilton, Ont. Winnipeg, Man.

Queen City Water White Oil

GIVES PERFECT LIGHT
FOR SALE BY DEALERS EVERYWHERE

Remember! There is only one "Galt" Shingle

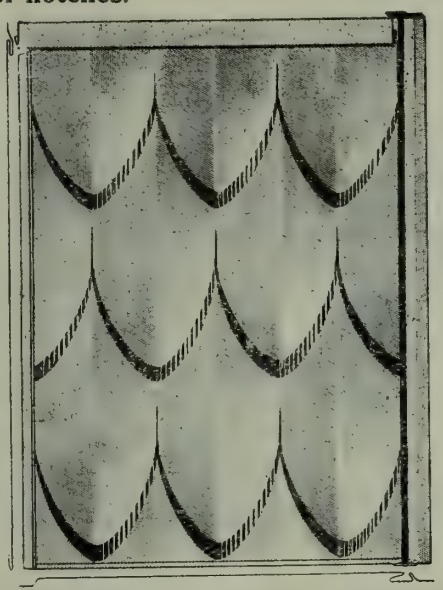
Only one shingle with the gale-proof, non-leakable, closed side-lock illustrated here :

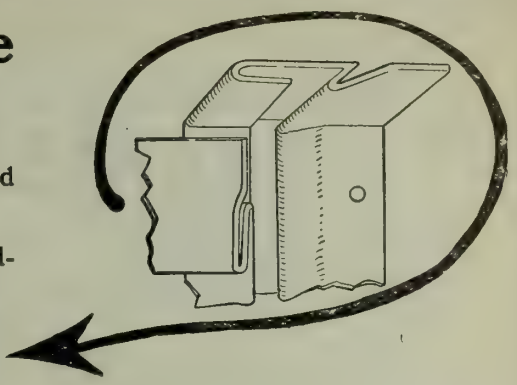
Only one shingle with two concealed nailing flanges :

And only one shingle with continuous, over-lapping end-locks formed without cleats or notches.

Just about places the "GALT" SHINGLE in a class by itself, doesn't it? This is the shingle your customers will insist upon and it's the shingle that you must handle if you want to make the most of metal roofing business.

You don't need to carry stock nor handle an account—just ask us for samples to-day and begin now to corner the roofing business in your locality. Will you?





THIS CLOSED SIDE-LOCK is found only in the new "Galt" Shingle. It is folded down by a blow from the hammer after laying and positively prevents wind from driving snow or rain up and out of the side-lock. It is the simplest, quickest, easiest, ONLY way to keep water out at this point.

It is such a real, conspicuous improvement on the old-fashioned metal shingle that it decides a man in favor of the "Galt" on sight.

This is something REAL to show a prospect—he doesn't care whether the manufacturer is twenty years old or a hundred—he wants a water tight roof and in the "Galt" he has one.

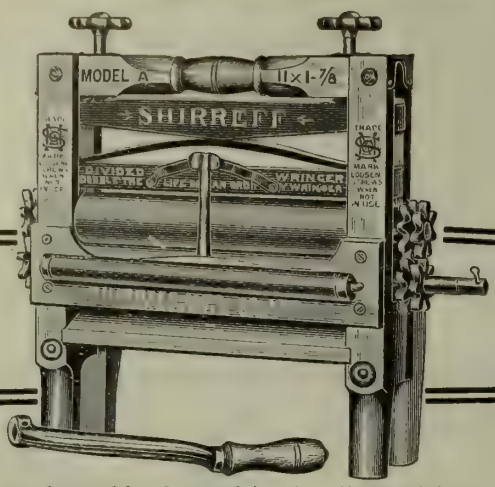
A Selling Argument



that always hits the mark is what distinguishes

SHIRREFF'S DIVIDED WRINGER

from all others. It is the central dividing bar which causes the rubber rollers to wear evenly along their whole surface. This gives them double the life of ordinary wringers, as the rollers of ordinary wringers soon wear out in the centre.

Write for List and Discounts

SURETY BOND

INSIDE EACH ROLL OF

CONGO ROOFING

With the 3-ply Congo Roofing sold hereafter there will accompany each roll a Guarantee Bond, issued by the National Surety Company, insuring to the purchaser a good roof for TEN YEARS AT LEAST. The bond covers that space of time—but we are very confident that with the ordinary care and attention called for Congo will last much longer.

Congo is so thoroughly durable, reliable and altogether satisfactory that we have no hesitancy in offering our customers this security.

Congo has achieved for itself a reputation as the "never-leak" roof, which it sustains through all vicissitudes of weathers and climates.

This bond is issued as a proof of our belief in Congo and the National Surety Company stands BACK OF IT and back of every roll of Congo made. We know its worth and usefulness and want everyone who has a building to roof over to know the satisfaction of a Congo Roof.

To-day is the time to write for a sample and full information regarding this special offer.

Belleville, Ontario Limited

SEVERAL NEW FEATURES Are Embodied in the LACKAWANNA WARM AIR FURNACE

The radiator and combustion chamber are combined in one. The former, which is very large, has two inside radiating surfaces in addition to the large outside radiating surface. The flue is horseshoe-shaped and the air supply passes up through the radiator as well as all around it. This affords an unusually generous area of surface exposed to the direct influence of the products of combustion.

There are many other desirable features about this furnace which make it easy to sell and satisfactory to the buyer. Our illustrated catalogue—write for it—will tell you much more.

"Enterprise" Meat Choppers and

"Enterprise" Sausage Stuffers and Lard Presses

DRIVE THESE TANDEM!

Every user of an **"Enterprise" Sausage Stuffer and Lard Press** needs an **"Enterprise" Meat Chopper.** Sell them together. Push them together. Drive them "tandem."

Every dealer and almost every buyer, knows the superiority of genuine "Enterprise" Choppers.

Lest you forget we remind you of these points about the **"Enterprise" Sausage Stuffer and Lard Press :**

Accurately-bored cylinder. Lips on the inner tin cylinder to make easy its handling when heated. No hot iron cylinder to handle when pressing lard. A patent latch which prevents breaking of plates. Patent corrugated spout prevents air entering the casing thus assuring preservation of sausage.

Write for catalogue describing, illustrating and listing these and other "Enterprise" specialties. Get our advertising aids for dealers.

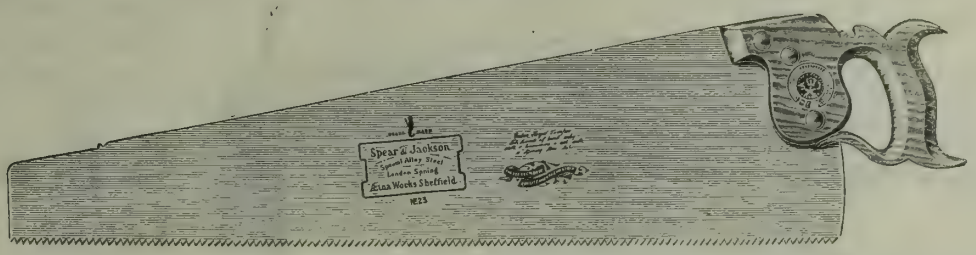
LOOK OUT!



¶ Live business men should always be on the look-out for new lines which are going to take on, because by not carrying them they lose trade and reputation.

¶ We recommend them, therefore, to be quickly on the trail of our new No. 23 Handsaw, which has already met with great favour, partly because men wanted a straight back to compare in quality with our 87 and 87A, and partly because we have hit on a mighty good thing in our new alloy saw steel.

¶ There's "just a little something" in it which makes the difference your customers will notice.

Retail Hardware Association News

Official News and Correspondence on Association Matters Should Be Sent to the Secretary of the Ontario Retail Hardware Association, 10 Front Street East, Toronto, and Matter for Publication in This Department Addressed to the Editor of Hardware and Metal, Toronto.

EXECUTIVE MEETING.

J. Walton Peart, St. Mary's the member of the Executive Committee of the Ontario Association, who has been ill with typhoid fever, is well enough to be out of bed again and hopes to be well enough to attend the next executive meeting, which is likely to be held on Good Friday, April 9.

NEXT YEAR'S CONVENTION.

Mayor Stevely, of London, has placed the City Hall at London at the disposal of the Ontario Retail Hardware Association, if it is decided to hold next year's convention in the Forest City. Mr. Stevely is also president of the Board of Trade and their rooms have also been offered for the convention meetings, they being directly across from the City Hall, where the exhibits could be held. Both halls are only one block from the G.T.R. depot, the Tecumseh and Grigg houses.

THE TALK OF THE TRADE.

From all parts of the Province comes word that the recent convention at Hamilton is still a live topic for discussion.

Two large manufacturers who visited the convention expressed their surprise and stated that had they realized the greatness the convention has attained they would have made exhibits.

Retailers, too, who did not attend the convention, are realizing the good time they missed and some of the manufacturers who presented the delegates with souvenirs are being compelled to write many customers stating that their supply was exhausted at the convention.

Then the travelers are also enthusiastic and several have taken advantage of the opportunity to join the association as honorary members on the conditions adopted by the convention. One writes from Quebec: "The fact that the convention was a big success I have heard all over the country, and it must be a source of satisfaction for you to have it result in such an achievement."

THOSE RUBBER STAMPS.

The secretary is in receipt of half a dozen letters from members of the association who are impatient about the rubber stamps to be used by members who decline to pay the special charge for cartage at point of shipment.

One of the members thinks the secretary is rather slow in supplying the members with the stamps and suggests that the matter evidently doesn't affect the secretary as directly as it does the hardwareman. The secretary can only say that he is doing the work as rapidly as his time permits. His work as secretary is altogether secondary to his regular employment and at this season his work is particularly heavy. The association work must be done in the limited overtime at his disposal and if the members will be patient their work will be done in due time.

The rubber stamps have been ordered and they will be ready for delivery by March 10.

MUTUAL FIRE INSURANCE LAW.

An effort is being made to have the amendment to the Ontario Insurance Act prepared in time to be dealt with at the present session of the Ontario Legislature. The time for receiving private bills, however, closes next week and it may not be found possible to have the matter in satisfactory shape for presentation this year.

In case it is found necessary to hold the matter over until 1910, a regular campaign can be worked up, copies of the proposed bill being placed in the hands of every retail hardware merchant so that the local M.P.P. can learn what the retailers want.

ANOTHER FINE SOUVENIR.

Members of the association who registered at the exhibit of E. C. Atkins & Company at the recent convention at Hamilton received a very neat souvenir this week in the form of a nickle-plated saw with gold-plated handle, it being about 1½ inches in length and in the form of a watch fob. The souvenir was ordered to be ready for distribution at the convention but the order was not filled until last week.

The Atkins Company, extends each member an invitation to visit their new plant when Hamilton is next visited.

The Canadian Tool & Shovel Company have also sent an interesting letter to the delegates to the recent convention expressing the hope that the convention will again meet in Hamilton next year.

A RECORD COLLECTION.

W. H. Thornton, Sundridge, made a record collection last week, form letter No. 1 bringing in a cheque for $240 the day after the letter was sent out. Mr. Thornton also tells of another account owing by a dead-beat who was brought to time by the No. 2 letter. "He came into the store in a big rush saying that if we would just keep those Toronto fellows off for a week he would get the money and he kept his word."

Mackie & Ryan, Pembroke, tried one lot of the collection letters and last week came back for $2 worth additional. "We find they are an excellent thing and we should have had them long ago," they wrote.

Christenson & Cove, MacLennon, received $15 through the secretary this week in response to a No. 2 letter.

"R. C.," Holt, Ont., has forwarded $2 to the secretary in response to a No. 1 letter. But the firm who sent out the letter did not fill in their name in the blank space for this purpose and "R. C." does not say to whom the money is due. Will the owner send his name and prove claim by giving the delinquent's name?

U. S. NATIONAL CONVENTION.

The dates decided upon for the tenth annual convention of the National Retail Hardware Association of the United States, to be held at Milwaukee, are May 25 to 28. Representatives of the Ontario Association may attend to secure first-hand information regarding the workings of the associations across the border.

A. J. Scott, Marine City secretary of the Michigan Retail Hardware Association, writes the Ontario secretary as follows: "We expect to have a record-breaking meeting in Saginaw next August and are preparing to hold a big hardware show in the Auditorium, which will be participated in by a great many of the largest manufacturers of hardware specialties in the country. I hope that some of your members will make it a point to be with us at that time and that you will be amongst that number." This invitation ought to be accepted by some of the hardware merchants at Sault Ste. Marie, Ont., and other Northern Ontario places within reach of Saginaw.

R. Phillips, Havelock, who was a visitor in Toronto this week, says he joined the Retail Hardware Association in order to secure the collection form letters and he does not regret it, as he has collected fully two-thirds of the accounts sent out. He has also used the special lawyers' letter to good advantage in collecting accounts from railway men he did not want to sue. Mr. Phillips was delighted with the Hamilton convention and though he lives 25 miles east of Peterboro he wants to go to London in 1910.

Holiday Advertising Contest Awards

Prize Again Won by Emerson & Fisher, St. John—Some Good Runners-Up—Reproductions of Some of the Entries, Together With Commendations and Criticisms of Good and Bad Points.

It is a remarkable fact that the winner of Hardware and Metal's Christmas Advertising Contest for 1907 should again be the winner in 1908, but a fact it is, all the same.

Although there were several very creditable advertisements among the runners-up, the judges were quite unanimous in awarding first place to the clerk who wrote the ad for Emerson & Fisher, St. John, N.B.

Both in size and get-up, as well as in the quality of the reading matter, the winning ad leaves very little to be desired. An ad like that could hardly help pulling business.

As may be seen from the reduced reproduction, the winning ad occupied full page space and is extremely simple in design; display type being used only where there is sound reason for it. Each specific offering is isolated, so to speak, in a neat rule box, thus enhancing its force by separating it from its fellows.

One other full page ad was submitted—by A. W. Humphries & Son, Parkhill. This ad is very well written, is chock full of good offerings and occupied the front page of the Parkhill Post. This ad has something of a confused look, owing to an over-abundance of display type and a lack of white space between the various items. In this respect it differs greatly from the winning ad, the style of which is so simple and legible that it can be read with the greatest ease.

A very attractive set-up is the strong print of the four-column ad of A. L. Fenn & Sons. Its strength along that line is, however, offset a good deal by the lack of prices. The copy is well written, clear and concise, and but for the omission of priced inducements, this ad would have been on a level with the prize winner—except in the matter of size.

Williams Brothers & Co., Gladstone, Man., submitted an ad which also deserves special mention. Lacking something in neatness, and burdened with some infrequent chunks of whirlgig border (which appear to serve no useful purpose), the ad is otherwise a good one. The opening paragraph appealed to the judges as being very appropriate and well worded. Prices are quoted in almost every offer, but do not appeal as forcibly as they would had the printer used type of a heavier style and larger size. Figures are most effective when printed in the same size type as the heading of the paragraph, of which they form the main feature. On the whole, this ad could have been made much neater and more striking had the compositor taken greater pains in selecting type and joining rules.

The force that can be lent to an ad by printing prices in type as heavy as the paragraph heading is well demonstrated in a couple of ads sent in by C. C. Falconer & Co., Winnipeg. In one ad the emphasis is laid on the name of the article and its price. Connecting the two is the necessary descriptive matter. In the other ad there are four paragraphs headed respectively "For Father," "For Mother," "For Brother," "For Sister." Under these headings various articles are suggested; the prices quoted being printed in type as heavy as that used in the paragraph heading.

J. S. Mitchell & Co., Sherbrooke, Que., sent in three specimens which are rather unusual in appearance. They are respectively twelve, ten and nine inches long by one column wide; and, in appearance, are something between display advertising and reading notices. It is probable that these three ads paid the advertisers very well indeed. They are strong, because they are simple. There's no straining after effect. The infrequency of the displayed lines add to their strength. The copy is not "clever," it is just plain, common-sense suggestion, with the prices tacked on. It is good advertising copy which advertises the articles—not the ad writer.

At this point it is quite appropriate to reiterate the proven fact that the merchant who tries to be "original" or "clever" and for that reason indulges in freak copy, is playing a losing game. Look on advertising as a business talk. Have something to sell and say what and why in plain English. All your readers can understand plain English; but probably few would get to the point of an elaborate "story" or "editorial."

The Burk's Falls Hardware Co. submitted a neat, effective ad, occupying 10 inches, five columns, and containing nothing superfluous. A strong headline, "More Christmas Bargains," followed by a well-worded three-line talk on the necessity of quick buying to get the best selection, then an extensive list of articles with the regular and special prices quoted.

A Commendable Entry in Hardware and Metal's Holiday Ad. Contest.

Scissors in Cases
A case of Scissors is always a most acceptable gift as these are articles that are in constant use and one can never have too many.
Having the Sole Trade in new we sell a large line of these goods all from the works of the most reliable makers
Prices, $1.75, $2.25 $3.00 $3.75 and $4.75

Carpet Sweepers!
It would be hard to select an article at anywhere near the same cost that will give as much satisfaction and comfort as a **Bissell's Grand Rapids Sweeper**
PRICE - $3.00
Toy Sweepers - 25 and 35c

"Rubberset" Shaving Brushes
No matter how often the Rubberset Brush gets in hot water it is never in trouble. The bristles are set in hard vulcanized rubber,
Price 50c to $3.00

STERLING SILVER
A Gift Worth Giving or Receiving

Salad Spoons,	40c each
Mustard Spoons,	60c each
Butter Picks,	90c each
Butter Spreaders,	$1 35 each
Bon-Bon Tongs,	1 25 each
Sugar Spoons,	2 00 each
Jelly Spoons,	2 50 each
Pickle Forks	2 60 each
Cold Meat Forks,	3 50 each
Tea Spoons, Table Spoons, Forks	1 1c

Thermos Bottles!
The world's modern necessity for everybody, young and old
Keep contents hot 24 hours without fire.
Keep contents cold three days without ice
Pint size, gun metal case..... $3.50
Quart size, gun metal case..... 5.50

"Ever Ready" Safety Razor
This Razor is by no means an experiment. It has "made good" a million times and will make good with you.
Absolutely guaranteed
PRICE $1.00

The Famous Ingersoll Dollar Watch
You could not give your boy a more serviceable present at ten times the cost of one of these practical **guaranteed time-keepers**—and they'll be prized above many costlier gifts too
Price $1.00

Snow Shoes
Indian make, correct shapes The bows made from ground ash, which is very tough the filling of stretched calf skin

Child's size,	$0.00
Ladies' size	3.25
Men's size,	4.75

Razor..... .....Strops
All men who shave themselves appreciate a good Strop. Some prefer the Swing Strop others the Cushion pattern Both kinds here in qualities to suit the most fastidious
Prices from 30c. to $2.25.

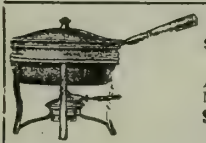
Hot Water Kettles for Table Use.

Brass, Copper, Nickel, with and without spirit lamps Some of the newer designs are very handsome Kettles, complete with spirit lamp and stand,
$1.75 to $8.00
Kettles separately, **1.25 to 4.00**

TEA AND COFFEE POTS.

Made from solid Copper, Nickel plated on the outside and Silver plated on the inside With ordinary care will wear a lifetime Handsome enough to serve on any table Can be heated on the stove.
Prices . $1.00 to $5.00

Chafing Dishes.



Solid Copper or Copper Plated with Nickel.
A household necessity.
Many designs. Prices:
$4.75. $5.00. $7.50. $9.00 and $12.00

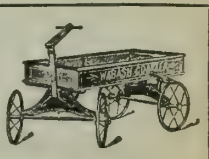
Fireplace Fittings

Fenders, black or solid brass. $2.00 to $25 00
Fire Sets, black or solid brass $2 25 to $9.00 per set
Coal Hods brass or copper, $6 50 to $15.00
Coal Pots, black with copper trimmings. $2 50 up
Everything for the Open Fireplace
We have an excellent stock of these goods all the year around, but at this season many patterns added to suit the holiday demand.

RELIABLE CUTLERY

All boys like a knife provided it is sharp and will stay that way 150 different patterns here from which to make selection. A guarantee with each.
Prices from ..... 25c. to $3.00

Wheelbarrows.
Express Waggons.



JUST WHAT THE SMALL BOY WILL APPRECIATE
WHEELBARROWS 90c, $1.00. $1.10

The : Famous : Buster : Brown
..EXPRESS WAGGONS..
TWO SIZES, $4.00. $15.00
Express Waggons, 50c to $5.00.

Special!
Wooden : Tea : Tray : Sale
These trays are of superior manufacture. They are made of oak trimmed with mahogony or ebony, with nickel mounted handles
25 p. c. Discount.

Awarded First Prize in Hardware and Metal's Christmas Ad. Contest.

Two very creditable ads were submitted by R. F. Johnstone, Acton, Ont., occupying twelve inches, four columns, in which cuts of various articles were used to considerable advantage. They are good examples of common-sense advertising.

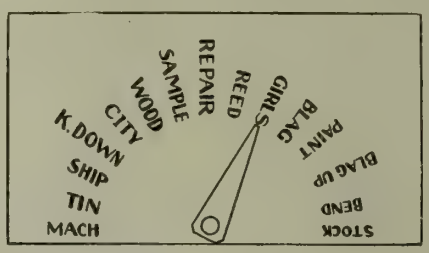
The ads submitted by McGregor & Co., Caledonia, Ont., demonstrate the fact that but poor results can be obtained from printing a fine screen half-tone cut on an ordinary newspaper press, when ordinary pulp paper is used. On one of the McGregor ads, under the heading of silverware, there occurs a mushroom-shaped blotch which detracts considerably from the appearance of the ad. where line cuts are used much better results are obtained, which is quite natural. Another criticism we would offer is that the ads do not appear to hang together very well. With a little more care as to arrangement and the elimination of half-tones, these ads would be much stronger, as they contain plenty of meat in the way of priced items. Effective arrangement would make these items talk with a more forcible voice.

An ad sent by Sanders' Hardware Store, Boissevain, Man., also loses in attractiveness from a badly printed half-tone. Otherwise it is a thoroughly good one—specially well written, neatly arranged, fairly large and well displayed.

The limitations of space prevent going into details regarding all the ads entered for the contest, but several good runners-up besides those already mentioned, were sent in by Hurd & McBride, Ottawa; Gilpin's Hardware, Collingwood; Brace McKay & Co., Summerside, P.E.I.; C. B. Miner, Cobden, Ont.; Ashdown Hardware Co., Calgary; P. Mymmen Co., Berlin, and John Bailes & Sons, Oshawa.

TRANSFER CARDS.

In the Gendron Mfg. Co., Toronto, the elevator man does most of the transferring from one flat to another. He devised a scheme to facilitate the quick transportation of material. When a truck is loaded in one department it



Transfer Card.

is taken to the elevator. At the side of the elevator are hanging a number of tin plates, painted white, with the names of the various departments printed on them. One of these plates is shown in the illustration.

A workman hangs one of these transfer cards on the truck, turning the arrow to the name of the department to which it is to be delivered. The elevator man looks at the card, hangs it on the nail so it may be used again and takes the truck to the proper department. This scheme is found to greatly facilitate the handling of loads of material and besides saves the time of the workmen.

A Commendable Entry in Hardware an d Metal's Holiday Ad. Contest.

CLEAN OUT GOODS THAT DON'T MOVE.

Watch the stock for the slightest symptoms of the genus "sticker," and then go for it until its selling pace is accelerated. Don't allow it to take root. Find out why the goods are slow. Of course, you do not knowingly buy slow sellers, but buyers are not infallible, and the best of them are liable to run counter to their customers' tastes occasionally. Teach the clerks to be observant and to give you the customers' reasons why such lines are not appreciated. Your taste may have been at fault your judgment may have been poor, you may have paid too much money for the goods. There may be other reasons that do not occur to you; therefore get other people's opinions. Ask questions—a business man should be a perambulating interrogation point if he would make the most of his opportunities. Watch your trade. Goods that are quick sellers in one locality may be the slowest kind of stock in another, and unless a buyer is tolerably certain of his trade, he had better go slow. A plunger will always have hard battles to fight with hard stock, but a plunger who neglects to keep himself thoroughly posted on his customers' wants and necessities will be overwhelmed.

THE NAIL OF DESTINY.

"For the want of a nail the shoe was lost,
For the want of the shoe the horse was lost,
For the want of the horse the rider was lost,
For the want of the rider the battle was lost,
For the want of the battle the kingdom was lost—
And all for the want of a horseshoe nail!"

But this, my child, as you doubtless know,
Was a number of hundred years ago.
Brought down to date, the facts are these:
The general chooses to ride at ease
In a new six-cylinder automobile,
And he punctures the tire of his off front wheel:
So the battle goes bump—not for the lack,
But because of a smallish carpet-tack.

J. D. Brown, for the past two years manager of the retail department of Rice Lewis & Son, Toronto, has accepted a position with the Kennedy Hardware Company, Toronto, and will represent them on the territory between Niagara Falls and Windsor. Mr. Brown was with the old-time firm of Risley & Kerrigan, leaving them to join the staff of Rice Lewis & Son, for whom he worked eighteen years as a Western Ontario salesman.

ENTERPRISE AND NEGLECT.

Two stories told the editor of Hardware and Metal during the past week are worth repeating, one telling the story of how an enterprising retailer overcame obstacles and won success and the other of how a retailer through lack of enterprise has practically driven a manufacturer who wants to protect the trade to sell through other sources.

The first is the experience of James Dandie, of Streetsville, known to most members of the Retail Hardware Association. Going into the hardware business a few years ago through having a vacant store on his hands and having little knowledge of the trade, he began in a conservative manner, buying stoves and other goods in small lots. He found it hard to make headway, but he had the quality of persistence, and in two or three seasons began buying stoves in car lots, his sales now running into figures far higher than many stove dealers in larger and better districts. His success is due to his persistent work and his method of going out after business. When he sells a range, for instance, he puts it on his wagon, and, instead of going direct to his customers he takes a round-about way, calling at numerous farm houses, explaining that "he was out delivering the range to Mrs. So-and-So and took the opportunity of calling in to see how their range was working." Frequently the range does not go to the original customer, but is bought by the party called upon. And, in addition much valuable information is secured resulting in future sales and a strengthening of the bonds of friendship between the merchant and the farmer's family.

The story of neglect is of a hardwareman who has no opposition in his town. Called upon by a traveler representing sheet metal goods, the firm were very stiff with the salesman, informing him that they were independent and wouldn't advise anybody to buy any particular make of goods, that they would sell anybody's and would not exert themselves in the least to make sales. They would not give the salesmen a single name of intending builders in their district, and they wouldn't even drive with him to see one of their customers who had asked them for a price a few days before.

There are a good many people like this in the hardware business. They expect to buy from anybody who will give them the lowest price, and they will not be loyal to any firm. They expect the manufacturers to be loyal to them, and would be in a high state of indignation should any manufacturers sell direct to anybody in their district. Yet Hardware and Metal would have no criticism to offer if the salesman referred to, finding it impossible to induce the hardware firm to adopt modern business methods, went outside the trade and placed the agency with a builder or mill man who would seek business instead of waiting for it to come to them.

THE METAL SITUATION.

Although the open market in steel has not produced the disorganization in the States that some expected it would, there is still a great deal of uncertainty as to real conditions. Everything is unsettled, and the reticence of the large steel manufacturers in discussing prices, only natural in the circumstances, is not helping to make the markets steadier. The magnates do not wish to show their hands to the smaller fry who forced the present situation on them.

It is stated that an open declaration of prices will be avoided, and that the battle will be fought out on each individual sale. In other words, the steel concerns are going to give nothing away, and they cannot be blamed. An open declaration would establish a definite base for further cutting. In these circumstances it is natural that little should be known as to the scale of prices now obtaining. Steel bars, billets, shapes, plates, merchant steel pipe and sheets are openly, but no one seems to know how much, down. The opinion is also expressed that steel rails will in time be affected by the situation. Wire is still being held, and so are tin plates. The latter fact is being very adversely commented on, in view of the tin situation, and the canning season opening in April. It is evident that some time must elapse before the markets are thoroughly settled and meanwhile buying must be affected.

We stated last week that the immediate result of the open market would be to hold consumers off, and the week's trading seems to have confirmed this. There has been no rush to take advantage of the situation. Buyers, as we expected, are waiting to see how far prices will fall, and until their needs, or the buying needs of other consumers, force them to enter the markets, they will sit on the fence. The decision not to make any open declaration of prices, so far as stimulating prices is concerned, is a wise move. It leaves an uncertainty in any estimation as to how far the markets are likely to fall, and having nothing definite to go on, the buyer will be tempted sooner. Undoubtedly in the end purchasing will be stimulated, but in the meantime there will be a prolongation of quiet times.

Canada has not yet been affected. Whether she will or not remains to be seen. Export prices are not home prices, as the U. S. Steel have pointed out, and the companies are not anticipating any reduction here. Still, when two countries are so closely allied in a business sense, and so much structural material finds its way here, market conditions such as exist now in the States cannot be without an influence. Whatever happens, however, to prices we certainly would heartily welcome any stimulation in the general consumption across the border. Trade has been nothing like so quiet, comparatively speaking, in Canada, as in the States, but a good development in buying by our neighbors would certainly quicken the pace here.

MAIL ORDER CANVASSERS.

A Chicago catalogue house has organized a school of instruction for canvassers, and it is said, twelve hundred young men and ladies are to be divided up into small parties and sent into different sections. Their mission will be to visit every farmer, explain how to order by mail, and try and secure an

order which it is expected will pay the expenses of this new venture.

Most likely these people will first visit the retail stores and make some purchases, procuring the merchants' sales-slip to clinch the argument they will use in comparing his goods with those sold by the catalog house. They will secure a list of future wants and try to fill them by sending special letters and circulars.

This is a new move by the enemy which retailers must prepare for and guard against. Are you ready to meet it? Have you any plan to suggest? Watch your territory. If these trained, smooth-tongued solicitors make a success in the Western States they can be looked for in Canada before long.

The only hope for the retailer is in trade organization. By acting unitedly the local spirit of country publishers and property owners can be appealed to, but acting as individual units the modern Juggernaut will soon crush out opposition.

DISCUSSION ON CARTAGE INVITED.

A rather tense situation exists on the cartage charges question. Some retailers claim that their jobbers allow them the special charge for cartage from the wholesale warehouse to the freight station. And because some claim to be getting it, others want to be placed on an equal footing.

Just as price-cutting among retailers is demoralizing, so is the granting of special favors by jobbers to certain customers a disturbing factor in the trade.

The members of the Ontario Retail Hardware and Stove Dealers Association have taken a stand against paying the special charge for cartage at point of shipment, while the Canadian Wholesale Hardware Association have re-affirmed their decision not to allow the cartage charge from warehouse to freight shed.

What is to be the solution to this dilemma? Are the jobbers to be true to their pledge not to allow the charge to any customers? Or is the charge to be allowed in special cases, thus encouraging others to demand that they be similarly treated? Is not the jobber who lives up to his pledge being subjected to unfair discrimination by other members of the wholesale association who allow the charge?

While a strong stand has been taken on both sides of the controversy, the subject has never been fully discussed and there are many who have open minds and desire further information before taking a stand. Is the time not opportune, therefore, for both wholesalers and retailers to state their arguments for and against the abolition of this special charge?

The columns of Hardware and Metal are open to any manufacturer, wholesaler, traveler or retailer who wishes to express his views on the cartage charges question.

NEED OF PUBLIC CONVENIENCES

In an investigation as to the public toilet facilities available to the people of the city of Chicago, John K. Allen states that it was repeatedly shown that saloons depend more upon their toilet facilities to bring them new business than they do upon their free lunch counters. The pastor of the Erie Street chapel in Chicago had his attention aroused to the necessity for the provision of these conveniences by the statement made by a teamster, that for many years he had been a slave to the drink habit because his work took him long distances away from his place of employment and the saloon was the only place open to him for necessary purposes. Even in cities where private enterprise furnishes toilet conveniences to the people, many of these are not open on Sunday or holidays, with a great attendant moral danger which should not be underestimated.

An example of this danger is shown by the shameful life and hopeless death of a woman who counted as her first misstep the entering of a Chicago saloon because it offered to her the only place on a Sunday afternoon in the downtown district where she could go for such accommodation as she must have. They were too sensitive to accept these accommodations without purchasing, and there began a taste for drink which ended in a life of shame and a nameless grave in the potter's field.

The added burden laid upon hotels, office buildings, commercial establishments, railroad stations and the like, in providing toilet facilities for the general public who are not customers, rests heavily upon private shoulders. In the case of hotels, few realize how this privilege is abused. In the case of office buildings, the increased room given for such purposes is withheld from rental, the increased consumption of water is paid for at meter rates, and requires an additional mechanical equipment for its elevation and distribution; additional elevator service must be maintained, as these rooms are usually placed near the tops of buildings; and additional janitor service is required. All of these items amount to a considerable sum, more than would be required if the toilet facilities were confined to the use of tenants. In one of the railroad stations in the city of Chicago recently observed, the men's toilet room was being visited at the rate of over 7,000 persons a day and the visit was timed at a dull period. The attendant reported that during the noon hour the room was visited by at least 1,000 people each day from adjoining buildings. In a large retail store in Chicago at least 5 per cent. of the users of the ladies' toilet room are employees from adjoining competitor establishments. While it is true that this burden is cheerfully borne by private establishments, it is none the less true that it is an unfair tax upon private enterprise and should not be permitted by the public.

Most municipalities make it an offense for a policeman to visit a saloon in uniform, except in the discharge of his duty. How unreasonable it is, then, to provide no place for his necessary comforts and how demoralizing it is to the public service that this rule must be daily broken. When, Theodore Roosevelt was Police Commissioner of New York City, he wrote: "One great trouble we find in trying our policemen for going into saloons in uniform is that they can now plead a legitimate excuse."

M. F. Doherty, Chicago's Superintendent of Streets, makes the statement that "The lack of and necessity for public conveniences in connection with our street cleaning forces has, for ten years or more past, increasingly forced itself upon my attention. Those employed in cleaning our streets are to an extent foreign born and too often lack that fine sense which prevents their committing nuisances in alleys and slightly out of the way corners from which bad odors soon arise. Not infrequently such places are in view of the passing public whose sensibilities are disgusted or shocked. Underground, cleanly kept closets and lavatories would tend to the physical comfort and moral well being of our large labor force."

AMEND DIVISION COURT ACT.

Hon. J. J. Foy, Attorney General of the Ontario Government, has promised that he will "carefully consider" the recommendations made by the Ontario Retail Hardware Association convention at Hamilton this month regarding the amendment of the Division Court Act to allow accounts under $25 to be collectable by garnishment, and accounts under $10 to be collectable before a magistrate.

It's all a question of who is the strongest, and every merchant should write his local representative in the Legislature, pointing out the justice of these requests and asking him to see Mr. Foy and urge that the law be amended.

Hardware and Metal Markets

(For detailed prices see Current Market Quotations, page 74.)

MARKETS IN BRIEF.

Montreal.

Copper—Weaker.
Best Manilla Rope—Down ½c.

Toronto.

Manilla Rope—Now 11c.
Copper—Easier.
Pressed Spikes—15c lower.
Metal Cap Log Rules—Down about 50c.

MONTREAL HARDWARE MARKETS

March 5.—Trade continues to improve steadily, although there is no rush tendency observable. Dealers generally show little inclination to book ahead, and only order their goods as they want them. A fair number of orders, however, are accumulating for shipment next month, and between now and the 1st April there should be strong additions. It is evident that April will be a busy month with the jobbers, as owing to the lightness of the buying repeat orders will closely follow upon the original ones.

The movement in spring lines is naturally stronger, but the greatest improvement seems to be in house-cleaning utensils, wringers, washing machines, stove brushes, scrubbing brushes, clothes lines, pulleys and reels, showing marked stimulation. Builders' hardware continues to show activity and bolts and nuts are in stronger evidence. Sugaring supplies keep up well, but there is a slackening, only to be expected, in lumbermen's supplies. The Maritime Provinces and the Northwest seem to be showing the greatest improvement in trade as yet, the east being still somewhat slow. The roads, locally, have not lately been in the best condition, and this has kept things back a little. In the last two or three days things have improved in this direction. The opening of the Gowganda district has brought good trade for Montreal. The markets generally keep firm. A reduction of ½c has been made in pure manilla rope. With the reduction on the cost of the raw material this was only to be expected. British manilla and sisal are unchanged.

BUILDERS' HARDWARE—Builders' hardware continues to show improvement. Building prospects locally appear to be very good, and most encouraging reports have been issued. Plenty of building is promised all over the country and this naturally is stimulating hardware. We continue to quote: Discounts on door sets, 50 and 10 escutcheons, 50 and 10; escutcheon pins, steel, 50; brass 55. Spring hinges, per gross, No. 20, $9.

SPRING LINES—There has been no startling improvement in spring lines, although steady progress has been made. Dealers are still disinclined to book ahead, and the major portion of the spring trade this year will be done in immediate delivery. Fair movement characterizes the following lines: Egg crates, harvest tools, lawn mowers, hose, hose nozzles, lawn sprinklers, gardeners' tools, ice cream freezers, screen doors, green wire cloth, and poultry netting. We quote: Screen doors, stained, $7.80; grained, $8.10; poultry netting, 60 and 2½; green wire cloth $1.70 in 100 feet rolls.

SPORTING GOODS—There is no strength to any of these lines as yet. Guns and ammunition show a better movement but apart from fishing tackle and baseball accessories, trade has not opened out. We quote: Dominion rim cartridges and C.B. caps, 50 and 2½ per cent.; B.B. caps, 50, 10, 2½ per cent.; Crown black powder, 18 per cent.

HOUSEHOLD UTENSILS — The greatest improvement this week seems to have shown in spring cleaning accessories. Wringers, washing machines, stove brushes, scrubbing brushes, clothes lines, pulleys, reels, polishes, brooms and pails have all shown stimulation. We quote: Carpet sweepers, $2 and up; sad irons, Mrs. Potts', No. 55, 75c; No. 50, 80c per set; asbestos, $1.50; cake makers, $17.25 per dozen; bread makers, $18 per dozen and upwards.

LUMBERMEN'S SUPPLIES—As is only to be expected at this time, trade shows signs of falling off. The season is nearing its end, and the movement in cant hooks, peavies and binder chains is slow. We quote: Boot calks, $4 to $4.25 per 1,000; wing calks, $6.50; cant hooks, $12 to $16 per dozen; axe handles, $1 upwards; axes, $6 upwards.

SUGARING SUPPLIES—The movement in these lines maintains its strength. A good sugaring season is promised. Bits are still quoted at 50 off.

BOLTS AND NUTS—With an improvement in structural work there has been a decided stimulation to bolts and nuts, and the trade has assumed good proportions. We quote: Discounts on carriage bolts, ⅜ and smaller, 70; machine bolts, ⅜ and less, 60, 10 and 10; coach screws, 75; stove bolts, 80 and 7½.

SCREWS—The movement in screws is about the same as last week. All sizes are moving, and prospects look healthy. We quote: Discounts at 85 and 10 off for flat head bright; 80 and 10 off for round head bright; 75 and 10 for flat head brass, and 70 and 10 for round head brass.

WIRE—Trade shows improvement, and business is now assuming good proportions. There is no change in prices, and we quote: Plain wire, $2.30 base; barb wire, $2.65 in straight and mixed car lots, and $2.70 in small lots. Galvanized wire, No. 9, $2.35 in straight and mixed car lots, and $2.40 small lots, f.o.b. Montreal. Coiled spring fencing, $2.65 straight and mixed car lots, and $2.75 small lots.

BRIGHT WIRE GOODS—Trade is very good, and all lines are getting a share. The lightness of stocks in dealers' hands promises good stimulation later on. We quote: Gate hooks and eyes, and screw hooks at 60 and 20 per cent.; stove pipe eyes, screw eyes, and square hooks, 60 per cent. Wire hat and coat hooks, 40c a gross.

ROPE—Owing to the reduction in the cost of raw material pure manilla rope has been reduced ½c and is now quoted at 11c. This should stimulate buying. There is no change in British manilla or sisal. We quote; Best manilla, 11c; British manilla, 9½c; sisal, 9c.

TORONTO HARDWARE MARKETS.

March 5.—March has opened up well, much better than February. Orders are beginning to go out, and some houses are working their clerical staff overtime to keep faith with their customers. Travelers report increasing trade in the country. Spring goods, kitchen ware, household utensils, and house-cleaning lines form the bulk of the orders, though every order calls for some sorting-up articles as well. Demand is thus for general hardware lines. Builders' hardware, too, is in good, steady demand and from all accounts should be a good seller for the whole length of the building season.

Prices generally are steady and firm, though some few of the minor lines show an easier tendency. Best Manilla rope is down, 11c now being asked. Raw material was of good stock and plentiful in supply last season, and jobbers think that offering it at a low rate will induce buying. The cheaper grades are considered low enough, and they certainly are lower for this season of year than for some years past. Pressed or ship spikes are lower; and so are metal cap log rules, the latter nearly 50 cents.

SEASONABLE LINES—With a setback into the lap of winter it would be hard to say what are seasonable lines. Jobbers and retailers were awaiting the call for spring goods when the larger centres reported general snowstorms. This has delayed booking of orders slightly, but on the other hand has allowed the hardware merchant another chance to get rid of his winter goods, especially snow shovels and scrapers, etc.

SPRING GOODS—Orders are coming in pretty well and are being filled for immediate shipment. Travelers report bright prospects in the country. The orders for the coming season's lines include many articles of a sorting-up nature. Evidently the country hardwareman is beginning to stock up.

BUILDERS' HARDWARE — Steady and continuous good trade is being done. Orders for city and province are satisfactory, and future trading looks good, especially as building permits all over Ontario are on the increase. Lock sets, bolts, hinges, nuts, bells, and many other articles asked for by builders are in good demand.

HOUSEHOLD UTENSILS — Almost every order being filled calls for more or less large quantities of articles used about the house. Kitchenware in tin and enamel lines, and housecleansing articles of all kinds are being asked

for. Screens, doors, lawn goods, refrigerators, freezers, etc., are inquired for, although not yet figuring in orders.

ROPE AND TWINE—Pure Manilla twine is down ½c, and is now quoted at 11c. Raw material was good and plentiful last season and stocks are pretty heavy. Jobbers are quoting the low price to deplete stocks, as by April quite a little more may be offering. The cheaper grades remain unchanged.

WIRE—Rather steadier than a week ago. Galvanized barb is $2.90, and plain twist, $3.20. Coiled spring wire continues at $2.75 for Number 9. Wire nails are irregular and run in price from $2.20 to $2.30; poultry netting at 60 and 2½, and green wire cloth at $1, $6 in 100 ft. rolls.

HEAVY GOODS—Business is fair. Bar iron is yet $1.95. Stove bolts are 80 and 7½. Bright and steel wood screws, flat, 85 and 10 and round head, 80 and 10 per cent. Brass screws are flat, 75 and 10 and round head, 80 and 10 per cent. Brass screws are, flat, 75 and 10, and round, 70 and 10.

MONTREAL METAL MARKETS.

March 5.—There is no change in the markets this week, although copper, owing to the New York situation, is weak. Shading is going on, but generally for small jobbing lots the price of 14½c is maintained. Trade has been slightly better, although as one jobber said, there is indeed no boom. All the metal purchased, however, is being used at once, which makes the position stronger than it appears to be on the surface. Inquiries are good, and it is evident that a lot of business is waiting a favorable opportunity to show itself. If the steel cutting in the States improves consumption in that country, and stimulates the general metal market, the effect will soon be felt here. It only requires a steadily advancing market for consumers to come in strongly. Spelter and lead have been in good request, the firmness of the quotations having much to do with this. The month has opened out fairly well, and promises better business than February, which month was not so good as the preceding one.

In the primary markets legitimate consumption in tin and copper is still on the quiet side. Tin has been fluctuating up and down, but a favorable opinion seems to exist as to the future of the metal. There is a decrease of some 1,149 tons for the month of February in the visible supplies, while the deliveries into consumption according to official figures were good, the total for January and February showing an increase of 2,000 tons, compared with the same month last year. This, with the fact that the tin plate mills are running well, induce confidence in New York, and this is naturally reflected in London. Copper is weak, although a speculative advance in London stimulated things a little. There has been an attempt to boost prices as against the movement that has been so long working to reduce them. But manipulation will be of little effect until consumption comes to its aid. Spelter is maintaining strong figures in London, but at St. Louis the bottom seems to be falling out of the market. The tinkering with the tariff is affecting this market. Lead is somewhat easier in London, but that is only to be expected. The iron and steel market across the Atlantic is practically unchanged, Cleveland warrants being 1 penny higher than last figures published. The situation in the States is so unsettled that it is impossible to state with any degree of accuracy what scale of prices are obtaining. Most lines are down, but manufacturers are declining to quote prices openly. Buying has not been stimulated as yet, but when the markets have settled down to some acknowledged basis conditions will improve.

PIG IRON—Local inquiry is good, and a fair amount of metal is being consumed. It is evident that users are anxiously waiting the opening of navigation, as stocks are low, and there is no great desire to pay the winter freight prices. Next fall consumers will look ahead further than they did last year. Local furnaces are still maintaining prices. We continue to quote: Middlesboro, No. 3, $19.50; Summerlee, No. 1, $21 to $21.50; No. 2, $20.50. Cleveland warrants are quoted at 47s 1d, an increase of 1d over last figures. The English market continues to improve, and higher figures are wanted for future delivery. Pig iron prices are flattening in the States in sympathy with the steel situation, but the fact will not affect Canada figures, which are already as much lower when freight and duty are considered.

TIN—Tin is unchanged this week, the jobbing price remaining around 31½c. Business has improved on last week, and is more at the level established in January. Inquiries are good. A more confident feeling has been shown in the primary markets for tin. There has been a decrease in the visible supplies for the month, and an increase of metal gone into consumption. The action of the American Sheet and Tin Plate Company in not reducing tin plates is being adversely commented upon in view of the fact that the tin market wants support, but it may be that such an action would sacrifice a large amount of stock. There is no doubt under the present circumstances that if it was thought advisable to reduce the price this would be done.

COPPER—Copper is unchanged, the quotation of 14½c being maintained generally for small jobbing lots, although there is shading going on. Fair business has been done, but the weakness in figures is keeping purchasing back. A speculative advance in the English market strengthened figures somewhat, and there has been an attempt to boost prices as against the bearing movement that has been in existence for so long. Indications are that some of the larger consumers are getting interested in copper at the present low figure. In any case it is evident that manipulation will not improve the situation for long. Legitimate consumption can alone do that.

SPELTER—There is no change in quotations, and the price of $5.50 still obtains. Business remains steady with good inquiry. The English market still remains very strong. St. Louis, however, continues to weaken. Consumption is poor, and the tinkering with the tariff is not helping matters.

LEAD—The quotation of $3.70 is being maintained, with Trail at 10c less. Trade has been better this week, and some good orders have been placed. The English market has shown signs of sagging, which is only to be expected after the long advancing movement that has been in progress.

TORONTO METAL MARKETS.

March 5—This has been an off week on the local metal market and very little trading has been done. Iron and copper are easier, though quotations remain at the old figures. The cut in prices across the border has made for irregularity and uncertainty in trading.

More credence is given to the theory that the steel price war in the United States is a clever ruse of the producers to forestall any change in the tariff. Formal announcement has been made of a reduction on the price of structural shapes and plates and bars; and it is believed steel pipe will come down $10 a ton.

The principal item of railroad-buying news of the week is that the New York Central has placed orders calling for 100,000 tons of steel rails for delivery this year, 5,400 tons of this is placed with the Algoma Steel Co. at the Canadian Soo. It is presumed this is to be used on Michigan Central betterment work in Ontario, and a great deal of it at Windsor, where the M. C. R. tunnel emerges from the Detroit river. Production in America of steel rails declined in 1908 as compared with 1907, nearly 50 per cent. and the same decline is noted in the production of steel ingots and castings. Idle cars still decrease in number, but a recent bad feature is the closing of some G. T. R. shops, the officials of that road stating they were too sanguine in prophecying a sudden revival of good business this year.

PIG IRON—Considerable business is being done locally, but the market is disappointing and irregular. Canadian foundry is $18.50; No. 3 Middlesboro, $21; and Cleveland, $22. An authority in the Canadian Lake Superior country says the iron situation this year looks good to him. He believes there will be a boom this year in his section, and that a great deal of Canadian Lake Superior iron ore will find its way to the eastern furnances.

COPPER—Strong and active was copper at the beginning of the week, but it has gone off color again and is irregular. The local quotation, 14½c for small quantities, still holds, but larger quantities can be had for a lower figure. The U. S. show an increase in production in 1908 of 32,615 tons, which means a great deal more during a year of depression like last year.

TIN—Still at 31c the quotation of last week, is tin. There is no change in conditions. Trading is quiet. Straits exports to Europe and America last year were 60,463 tons compared with 52,524 tons in 1907.

LEAD—Quiet and unchanged is lead this week. Imported pig is $3.80. Demand is quiet. Speculators are said to

be looking for lead ore in Halifax County, N.S., some fair samples having been found, it is said, in the silver district.

SPELTER—Receipts and shipments both show increases so far this year when compared with 1908. Local quotations are still at $5.50 and conditions are quiet and unchanged.

SHEETS AND PLATES—Unchanged in price with steady demand existing. Taking America as a whole there is more activity just now in the production of sheet iron than there is in any other branch of the finished iron and steel trade. United States canners are calling for a heavier coating for tin plates.

OLD MATERIALS—An easier feeling exists as to old iron and copper lines. Demand is quiet—quieter than it was even this time last year.

U. S. IRON TRADE.

Cleveland, March 4.—The Iron Trade Review says: The adjustment of the iron and steel industry to the changed conditions brought about by the declaration iof the open market is continuing, and in the meantime, the consuming trade is drawing true bearings upon the situation. Generally, any stimulating effect of the reduced level of prices is lacking up to this time, although in steel bars some buying of note is reported. Inquiries are increasing, and consumers are showing a keener interest in developments, but there is a disposition to proceed cautiously until conditions are well settled.

In some products, notably semi-finished steel and wire material, considerable indefiniteness in the way of prices continues. The billet and sheet bar market, especially is attracting the close attention of the manufacturing trade, because of the relation it bears to other products, and by reason of the interesting conditions which it presents. The sheet makers who do not reduce their own steel are expecting the mills to make a re-adjustment in their running sheet bar contracts because of the reductions forced in sheets. In contrast to this position, tin plate makers are holding their own market firm and are desirous of having the price on sheet and tin bars continue unchanged in order to avoid any re-arrangement of their own contracts already locked. In billets, the nominal market is now ruling above steel bars.

Independent sheet manufacturers at a meeting in Pittsburg Tuesday, determined to clear the situation in their product, and announced reductions of from $2 to $5 in block sheets, $4 to $6 in galvanized, and $2 to $4 in corrugated roofing.

METAL NOTES.

An attempt was made the night of March 2 to blow up the boilers of the Canada Iron Furnace Co.'s smelting works at Midland by shutting off the water supply pipes. The police are investigating.

The New York Central Railroad will this year buy 101,000 tons of steel rails, The Algoma Steel Co., Sault Ste. Marie, Ont., will supply 5,400 tons, presumably for betterment use on the Michigan Central road in Ontario, especially in connection with the tunnel under the Detroit River at Windsor.

HARDWARE TRADE GOSSIP.

Ontario.

The Reid Foundry and Machine Co., Ingersoll, have assigned.

Geo. Robinson's hardware store at Weston was burned recently.

T. W. N. Clements, tinsmith, Chatham, is retiring from business.

W. O. Reid, of Reid & Wilson, hardware merchants, Seaforth, is dead.

The estate of N. Emsur, Kirkfield, are advertising his tinware business for sale.

The McGlashan Clarke Co.'s cutlery works at Niagara Falls were damaged by fire recently.

The Prescott Emery Wheel Co., Prescott, has increased its capital from $25,000 to $35,000.

The McClary people will instal a sprinkler system in their London south end stove works.

Paulin & Munn, hardwaremen, Ripley, have dissolved partnership. Mr. Munn will continue the business.

S. H. Alexander, buyer for Wood, Vallance & Co., Hamilton, leaves this week for Florida, where he intends taking a few weeks' rest.

Geo. B. Haynes, hardware merchant, Gananoque, who a few weeks ago had the misfortune to fall on an icy path, is able to be out again.

J. R. Hambly, Barrie, visited Drayton this week to attend the celebration of his father's 90th birthday. Mr. Hambly called at the Toronto office of Hardware and Metal on his return on Thursday.

Freeman Jameson, clerk with the St. Mary's Hardware, while using a crowbar under a heavy case of zinc plate a few days ago let fall the crowbar, which fell heavily on one of his feet severely crushing some of the toes.

Architect Chas. Mills, Hamilton, has completed plans for a large store building to be erected on John Street South in that city. The building will be commenced in the spring, and will be occupied by the Mills Hardware Company.

E. W. McClung, hardware merchant, Elk Lake, and formerly with E. T. Walker, Cobalt, was a visitor in Toronto this week. Mr. McClung has taken in nine cars of goods this winter and he is enthusiastic about the prospects in Gow Ganda next summer.

The following contracts were awarded for the $40,000 warehouse being erected at 40 Queen Street East, Toronto, for the Vokes Hardware Company, Yonge and Adelaide Streets: Masonry, H. N. Dancy & Son; carpentry, E. G. Powell; tinsmithing, A. B. Ormsby & Co.; steel work, Reid & Brown; plumbing and heating, Fred Armstrong Co.; elevators, Parkin Elevator Co., Hespeler, Ont. The building will be of mill construction, with brick foundation, felt and gravel roof, hardwood floors, open plumbing, steam heating, etc.

Quebec.

J. W. Parrish, of the D. Moore Stove Co., Hamilton, has been visiting Montreal.

A meeting of creditors of P. Tufts, hardware merchant, Fairfax, Que., has been held.

Caverhill, Learmont & Co Montreal, hockey club defeated Henry Morgan, Colonial House, team at the Arena, Montreal, by 5 goals to 0.

W. J. Lough, of the Coulonge Hardware Co., Fort Coulonge, has been visiting Montreal hardware circles.

C. A. Lusby, secretary of the Amherst Foundry Company, Amherst, N.S., has been on a visit to Montreal.

J. A. Cochrane, representing Frothingham & Workman, Montreal, in the Ottawa Valley and New Ontario, has been visiting headquarters in Montreal.

Ambrose L. Kent, of Kent & Turcotte, accountants, of Montreal, who started in Montreal as a clerk in a hardware store, died this week at the age of 66.

David Madore, the French wholesale carriage hardware merchant of Montreal, died last week at West Palm Beach, Florida, where he had gone to recoup his strength after a severe attack of pleurisy. Mr. Madore was born in 1853 at Ste. Anne de Bellevue, and founded his business more than 30 years ago.

The Canadian Sales Company, manufacturers' agent, of 107 St. James Street, Montreal, have a large number of agencies, including the cutlery lines of Seabrooke Bros., London, Eng.; the Rockingham Works, Sheffield, Eng.; E. J. Partridge, Birmingham, Eng.; Apollo Safety Razor Company, Paris, France; the Seabrooke Safety Razor, London, Eng.; Gem Cutlery Company, New York; the Imperial Safety Razor Company, New York, and the National Safety Razor Company, New York. In gas and electric fixtures, the following firms: the Universal Gas Appliance Company, London, Eng.; G. M. Boddy & Sons, London; A. P. Lundberg & Sons, London. In machinery and hardware, the Scarlmont Glass Works, Belgium; Crosier, Stephens & Company, Newcastle-on-Tyne, England; Burrell Rock Drill Company, Belleville; Indestructible Paint Company, London, Eng.; Muntz Metal Company, Birmingham, Eng.; Consolidated Manufacturing Co., Hartford, Conn.; Constantine, Craeis & Co., London, Eng.; L. B. Gaylor Auto Safety Razor Blade Sharpeners, London, Eng., and Lepay Fils, Charleville, France.

Western Canada.

J. B. Warkentin, ex-manager of the Bank of Hamilton, Morden, Man., has entered the employ of the Winkler Hardware Co. at that place.

Anderson & Thomas, hardware merchants, Winnipeg, have assigned.

H. Alanson, Vancouver, has sold his hardware business to G. R. Baird.

Walton & Cleave's hardware store at Carman, Man., was badly scorched by fire recently.

Among the new business arrivals at Zealandia is A. S. Worthen, who is building a hardware store and furniture warerooms on 1st Avenue.

Wm. McCrimmon, of Fell & McCrimmon, Stonewall, Man., has accepted a position with the Capewell Horse Shoe Nail Co., as traveling salesman in Alberta.

SALESMAN WANTED.

HARDWARE SALESMAN WANTED—A man capable of doing business with jobbers direct from the factory. State age and experience; must be furnished with very best references as to habits. Box No. 809, HARDWARE AND METAL, Toronto. (12)

Trade News From Atlantic to Pacific

Maritime Provinces

St. John, N.B., May Get New Scale Factory—Costly Bridge to Be Built—Fire at Bathurst, N.B.

ST. JOHN.

March 3.—A fire at Bathurst on Feb. 23 did damage to the extent of about $25,000. The office and warehouse of the Lounsbury Company, general store, owned by Simon Holdengraber and J. P. McTomney's plumbing establishment were practically destroyed. Lounsbury Company's loss was covered by $12,000 insurance, McTomney had $800 on his stock and Holdengraber's loss is placed at about $10,000, without insurance.

Engineer F. W. Holt, who was engaged by a special committee of the city council to prepare plans for a bridge across the St. John harbor has submitted his plans, which provide for a steel bridge on concrete piers. Provision is made for steam railway tracks, electric railway, teams and foot passengers, on a double-decked structure with a rolling draw. The cost is estimated at about $700,000.

Jess F. Hinck, secretary of the Farmers' Friend Scale Company, of Minneapolis, Minn., has been in the city for some days and is organizing a company to manufacture farm scales for which his company holds patents. The scales are attached to a farm wagon in a few minutes and the entire load is weighed. Mr. Hinck says he has secured the support of several local business men to finance the company and a local concern will make the scales. W. E. H.

HALIFAX.

March 1.—There has been some improvement in trade during the past week and conditions are much brighter generally. The wholesale hardware jobbers report that trade is looking up, and collections have improved somewhat, although in some sections of the country money is still very tight. For a few days there was a break in the price of wire nails, but the manufacturers got together and restored the price to its former figure. Some of the manufacturers claim that there will be a sharp rise in the price of this commodity in the near future. When the spring opens up it is expected that business will boom. Already there is considerable activity in building operations at the north end of the city, particularly in the residential sections. The Silliker Car Company's shops are working full time, and it is understood that they will shortly be compelled to put on a double shift so as to keep up with their orders.

Hon. Christopher Chisholm, Commissioner of Public Works for Nova Scotia, is asking tenders for the instalation of a heating system in the new technical college at Halifax. The contract will be a large one, and the tenders close on March 5.

The committee in charge of movement for a Children's Hospital at Halifax have accepted the tender of Walter Lownds, contractor, for the building. The contract price is $15,057, and the building will be completed during the coming summer.

Officials of the Halifax and South Western Railway and the Canadian Iron Corporation visited the mines at Torbrook, on the Bay of Fundy, and at Port Wade. It is reported that a spur line will be built from the mines to the railway line and ore shipped to Europe via Port Wade. Extensive loading facilities are to be erected at the mines and at Port Wade to handle four or five thousand tons of iron ore a week.

The deciding of the big industrial lawsuit in favor of the Dominion Iron & Steel Company, will mean much to Sydney, and business is already beginning to feel the forerunner of good times. As already stated by President Plummer, the output of the plant will be increased and a larger number of men given employment. He says that the present year gives every prospect of being the most profitable in the history of the country.—J. H.

Province of Ontario

London Traveler Buys a Retail Store—Presentation to Lady Clerk at St. Thomas—Dresden Retailers Adopt Early-closing — Brantford Industries Expanding.

OTTAWA.

March 3.—Trade has not improved a great deal during the last week, although there seems to be a fair demand for builders' hardware.

W. A. Rankin has a novel and exceedingly useful screw cabinet in his new store. Screws of any size are at immediate command. His store is not yet fully laid out as regards inside arrangement, but by spring some changes will be made which will improve appearances and facilitate business.

The National Mfg. Co. are opening up a retail showroom on Bank St. for the sale of their stoves and ranges. A good line in on view.

Some nice contracts were placed by the civic committees. The plum of the lot was that for cast iron pipe, which was landed by T. S. Kerby & Co., at $15,065.10. McKinley & Northwood secured the lead pipe contract and the James Robertson Co., Montreal, the contract for brass goods.

During February considerable activity was evident in real estate, which fact is proven by the registry office record of transfers which number 105. Residential properties were the chief ones enumerated, but some business sites were also tabled.

New tenders will be called for in connection with the proposed grand stand for the exhibition grounds. The structure, as now conceived, will combine fire and police stations and the estimated cost is $85,000.

The Ottawa Retail Hardware Association held its monthly meeting last evening, no business was called and the members present enjoyed a game of euchre. It is proposed to keep a tally of the points scored by the individual players who draw their partners each night, and a prize will be awarded those with the highest score at the May meeting of the association.—G. E. M. H.

HAMILTON.

March 2.—The retail hardware merchants report during the past seven days the greatest sale of door locks and chains in the history of their businesses. This is due to the sensational murder here last Thursday of Miss Ethel Kinrade, in her own home, supposedly by a tramp. Excitement over the horrible crime has been so intense and the people have been so impressed with their own danger that for several days there was a veritable run on the hardware stores. Several ingenious peddlers arose to their opportunity and sold door chains along the streets adjacent to that on which the murder took place. They did a land office business. The demand is dying out now, however.

It has been definitely announced that the Canadian Westinghouse Company has been awarded the contract for about a third of the work of building and equipping the transmission lines and power stations for the Hydro-Electric Commission. The contract will amount to about $300,000, and will consist of the fitting up of power stations at Niagara Falls and Dundas, and all high tension switches. The letting of this extensive contract to a Hamilton concern will be of the greatest importance to the workmen and business men of the city.

J. C. McCarty, of Brooklyn, N.Y., president of the Canadian Tool & Shovel Company, visited the plant in this city last week. He was accompanied by his son, E. W. McCarty, who is a director of the company and his brother, Right Rev. Monsignor McCarty. They are interested in asbestos mines in Quebec, and came west to visit their interests here after which they returned to New York.

A. F. McCallum, of Toronto, has been appointed City Engineer, in succession to E. G. Barrow, who has been made consulting engineer.

The Board of Education is confident that the Department of Education will build the proposed technical college for Ontario in this city. The Government intends spending $1,000,000 on the building wherever it is erected.

A very important real estate transaction took place this week involving the purchase of the old Central Church property for manufacturing purposes. W. A. Stewart, architect, bought the building of which only the walls remain standing. He intends to convert it into a building in which space can be rented to industries just starting up or testing the market, and which do not want to risk putting up buildings. Hamilton has lost a number of important industries because of the scarcity of vacant buildings suitable for the purpose, and this will fill a long felt want. The building will be fitted up with shaftings and other necessaries.—D. L.

ST. THOMAS.

March 2.—Geo. W. Brown, senior member of G. W. Brown & Son, hardware dealers, contemplates a visit to the Pacific coast in the near future.

Ingram & Davey have completed their contract of putting on metallic ceilings in the Oddfellows' hall. W. Rose, the foreman in charge of the work, is being congratulated on the workmanship of the job.

W. W. Cadman, who recently sold his business to Meecham Bros., is devoting his time to chickens. He is secretary of the poultry association.

W. J. McMurtry has announced that their business here will be carried on under the name of the McMurtry Hardware Co.

The Board of Education decided at their last meeting to pay the claim of $1,200 to the Jas. Smart Co., Brockville, for the Kelsey hot air system put into the Balaklava Street school. The amount was held back in order to have a test in cold weather, but as prospects are that the very cold weather has passed, the board decided to pay the claim.

The directors of Ingram & Davey Limited, met Thursday evening, and elected the following officers: G. A. Ingram, president and treasurer; G. W. Davey, vice-president and general manager; G. A. Ferguson, assistant manager; E. A. Davey, secretary. It was decided not to offer any stock for sale at present.

Foster Cook, the Ross Street plumber, has taken an Aylmer young lady into partnership for life.

Mrs. E. T. Bromell, who has for several years had charge of the housefurnishings department of Ingram & Davey's west end store, resigned last week, and was married on Feb. 22 to John Savigny, a M.C.R. engineer. The firm and fellow employes took the occasion to present her with a case of pearl-handled knives and forks, as a token of the high esteem in which she was held by them.

The Port Stanley fishing fleet is being overhauled getting ready for the coming season.

H. C. Timmerman, one of the foreign representatives of Thomas Bros., who lately returned from a year's trip to South America and the West Indies, left last week on a two-year's trip to South Africa, Australia and New Zealand.

A merchant in talking about prospects for this year said, "If the farmers of Elgin county have any wheat in their barns at present, will have no occasion to ask for credit at the prices they are being offered, but few are selling. This ought to be a banner year for wire and wire fencing."

G. A. F.

BRANTFORD.

March 2.—It is understood that the American Radiator Co., who have leased the factory on the canal bank formerly occupied by the Cockshutt Plow Co., and who have not been very active at their Brantford branch, will strongly develop it from now on. It is stated that they intend to purchase the present buildings outright, and contemplate improvements totalling about $50,000. A number of the Brantford shareholders of the National Portland Cement Co. were in Toronto last week, attending the annual meeting of the company.

The Westrumite Paving Co. have secured three contracts for paving amounting to $520,000. They are in East Chicago, Mt. Clemens, and Mt. Pleasant, Mich.

The trustees of S.S. No. 18, Township of Brantford, are considering plans for a new school which they intend building this year.

W. S. Brewster, M.P.P., South Brant, is introducing a bill into the Legislature which proposes to make insurance companies liable for damages caused by gas explosions. This will meet with the approval of all merchants in this and other cities where natural gas is used, and where there is, accordingly, a liability of explosion.

There was a splendid turnout on the Grand Valley Radial Railway on Saturday, many taking advantage of the February excursion rates to Brantford. These excursions have been so well patronized, and have gained such favor, that they will be continued through March. The local hardware merchants report that they received a good share of trade as a result of these excursions.

The Sanderson-Harold Co., Paris, manufacturers of refrigerators, screen doors, etc., whose factory was burned down in December last, will remain in that town. They ask that the council grant them a guarantee of $25,000 of their bonds, a request that will probably be complied with. The company will rebuild, setting up a factory to cost $45,000, and will employ half as many hands again as before the fire, with a probable increase to double the capacity in the near future.

Members of the local Orange Order have raised $5,000 for the erection of a new hall.

T. A. Cowan and Company, plumbers, secured the contract for sewer connections at the St. Joseph's schools.

The Niagara Veneer and Basket Co., recently organized, with $100,000 capital, is looking for a site in the Niagara peninsula.

The Brantford Street Railway Co. have deposited the $25,000 guarantee with the city treasurer, according to their agreement with the municipality. This means that they will spend $3,000,000, in two years, in additions and improvements, all of the main streets of the city to be done within four months from May 1.—A. W.

CHATHAM.

March 2.—Hardwaremen all down the line are taking an optimistic view of present trade and future prospects.

"The fine weather is causing trade to pick up and prospects are good for spring business," remarked A. D. Westman, of Westman Bros. "Building among the farming community bids fair to be much ahead of last year."

"This has been a better February than any other February in our history," remarked Ed. Wanless, of the J. C. Wanless firm, "and it's 50 per cent. ahead of last February. Better still, there has been a big increase, in cash business. Best of all, the prospects are exceedingly good."

Every indication points to the fact that there is plenty of money in the country, where there was very little last year. Farmers are in many cases paying spot cash, which shows that good crops have had their effect.

Claude and Hillyard Bragg, formerly associated with their father, the late J. H. Bragg, in the hardware and implement business, which they have since been carrying on, left this week for Cuba. One of them will return shortly, it is expected, to resume charge of the business.

A. D. Westman is taking hold of the presidency of the Retail Merchants in energetic fashion, and will spare no effort to make the next meeting on March 9 a rouser. Barrister J. G. Kerr has been secured to give an address on commercial subjects from the legal point of view, besides which there will be other interesting items for discussion, including a consideration of the best method of coping with delinquent debtors.

Early closing has scored an advance in Dresden, both the local hardware firms, Wells & Wells and J. B. Carscallen, having agreed to close their stores on Monday, Wednesday and Friday evenings of each week at 6 p.m. The agreement went into effect on March 1. This is one of the results of fraternizing with each other at the recent Retail Hardware Convention at Hamilton.

E. S. Hubbell & Sons, of Thamesville, have added another new machine to the equipment of their plumbing and tinsmithing department.

Commencing April 1, the Wallaceburg Electric Light Company will put on an all night service and instal meters with all their customers. They are also improving their plant.

Orval Hubbell, the Thamesville hardwareman, visited in Lansing, Mich., last week.

The new opera house at Leamington, now being constructed by Jos. Henry, will have an electric lighting plant of its own, using 200 lights for the front and interior of the building.

What is described as the "secret" of brazing cast iron has been discovered by a Chatham machinist, who claims that till the present time the work has never been successfully performed.

The Amherstburg Iron Works is again running full blast with a large force of men. Messrs. Woods, the proprietors, have installed the old waterworks boiler to provide steam for their new engine.

The Tilbury Iron Works, owned by R. J. Clements, suffered from a bad fire last week, which caused damage to the extent of about $500. There was no insurance. A defective gas mixer was the cause.

T. G. Johnston, the Ridgetown implement man, has taken the agency for a new gasoline lighting system, which is now in exhibition in his implement shop. Several business places are installing the system.

Nelson Wake, of the Wanless hardware staff, has resumed his duties after a month's illness.

Letters patent have been asked for the incorporation of the Chatham Wrench Co., Limited, with a capital of $10,000, for the manufacture of a newly invented pipe wrench, for which the company has the exclusive British and Canadian rights. Those interested are W. D. Sheldon, R. J. Gardiner and R. L. Brackin, of Chatham, and M. S. Ewen, of Detroit

Ed. Mackness has secured the contract for the plumbing of Westland Gregg's new house on Sheldon Avenue.

The Western Ontario Brickmakers' Association held its annual convention in Blenheim last week, when it was decided to petition the Provincial Government to provide a technical school for clay work in Western Ontario. The following officers were elected: Honorary President, Adolphe Whelan, Rodney; President, John Milner, Kingsville; First Vice-President, A. W. Hill, Essex; Second Vice-President, John Wardell, Blenheim; Secretary-Treasurer, A. Whelan, Cairo.—W. E. P.

LONDON.

March 2.—Locally the hardware trade is as yet hardly what dealers would have it. Nevertheless, all are still looking forward to a substantial revival as soon as spring sets in.

An important business deal is reported this week. J. E. Young, traveler for the Hobbs Hardware Co., for the past eight years, and for ten years in Westman's retail store, has purchased the stock and good-will of the McMurtry Hardware Co., on Dundas Street. G. A. McMurtry will continue to reside in St. Thomas, though in what line of business he will engage he has not yet decided. Mr. Young takes possession on March 15.

A number of local men have, it is understood, formed a company to establish machine works in the east end, and their plans will be made public shortly. A site has been selected along the G.T. R., and when the concern is started in operation it will give employment to a goodly number of hands. The promoters will, of course, expect to share in the city council's proposition to lay aside $100,000 for the purchase of free sites for manufactories, provided that proposition gets the approval of the Legislature, which, in view of the strong opposition which has developed, is none too certain.

Ex-Mayor Rumball and A. E. Welch, promoters of the North Midland Railway, an electric line, which is to run from London to St. Mary's and Stratford, and to whose efforts is due the fact that the Southwestern Traction line is now an accomplished fact, met the Board of Trade on Friday evening and outlined plans for this latest undertaking. The idea is to make the Traction and North Midland part of a radial system to branch out from London, and the gentlemen named succeeded in demonstrating to the board the fact that such a system would be of incalculable benefit to London and surrounding towns. As soon as the board has been provided with the details of this new project it will give it its endorsation, probably asking the city council to aid it with a guarantee of bonds.

J. E. YOUNG, LONDON.

Though little has been heard of late concerning the project to pipe natural gas from the rich Port Dover field, it must not be supposed that it has been allowed to drop. As a matter of fact, the company is in hope of beginning the laying of pipes early in the coming spring. Parties in this city and Toronto have been interested in the proposition, and any day may find the company in possession of funds sufficient to go on with the work.

Tenders Wanted for Public Works—Cheap Gas Produced by New Invention—Construction Work Going On.

VANCOUVER.

February 27.—Allan Purvis, superintendent of the C.P.R. at Nelson, was in the city this week and speaks very encouragingly of the prospects for the coming summer in the Kootenay. Mining is looming up exceedingly well, which means good general business, and lumbermen anticipate improved conditions. Never before have conditions been so roseate than at present.

On the coast everything points to better business all the way through. None of the business men have complaints to make, and the fact that there is much money going into real estate shows that people have it, and if that sort of prosperity is rather effervescent, the activity tends to circulate money and to promote business generally.

Walter Thomas, for years manager of the Vancouver Gas Company, has on exhibition this week for demonstration purposes, a small model of his invention to make gas out of any old refuse that will burn. At present he is using wood, of which there is an amount daily being burned at the saw mills in the city sufficient to light Vancouver and furnish power for all its industrial establishments. At 1229 Granville Street, Mr. Thomas has a small woodpile in the back yard, while inside the building the gas is generated in what looks like a series of big coffee pots. Power is provided to operate a 7 h.p. Crossley engine, and a 3 h.p. dynamo generates the electricity for the light. By this method gas can be produced for less than 50 cents per thousand feet, as against $1.35 per thousand from coal, without taking into account the by-products, such as tar, turpentine, ammonia, etc., that are recovered as the process goes on. The apparatus now on exhibition will be displayed at the Alaska-Yukon-Pacific Exposition during the coming summer.

Albert Adams has been awarded the contract for the concrete bathing house to be erected at English Bay by the city. His price is $24,600.

J. S. Heyler, E. W. MacLean, J. W. Weart and the other owners of a lot on Hastings Street, between Cambie and Abbott, in the centre of the business portion, are having plans made for an eight-storey building, which will cost $65,000. The stock exchange will have a floor in this building.

Permits for the past week amounted to $80,260 in value, the number being 43.

D. A. Roberts, of this city, is in Nanaimo installing a plant for the Imperial laundry. This plant will be one of the most modern on the coast.

The Blue Funnel liner, Keemun, which has arrived, brought 3,000 tons of steel rails from the Old Country for use on the Chilliwack extension of the B. C. Electric Railway.

Hardwaremen Bigger Than Their Business

Experiences of Men Establishing One Of the Early Businesses at Fort William—A Hardwareman Who Took an Active Part in Securing a Water System for His Town.

The hardware firm of J. & T. M. Piper is one of the few business houses of Fort William which have retained their identity unchanged since the early days of the city, having been established in 1896, and continued under the same management for over twenty-two years.

Of the two brothers who are the sole members of the firm James Piper came to Canada as a child with his parents thirty-five years ago, the family taking up their residence in Wardsville, Ont., and in 1884 he came west to Fort William, where an elder brother was already located, and under him commenced his apprenticeship to the tinsmithing business, returning east after a short time and completing his trade in London. The younger brother, Thomas M. Piper, was born in Wardsville, being a native-born Canadian, and moved with his family to Fort William at the age of eight years, and was educated there, and also got a thorough grounding in the hardware business on the retail side from the delivery wagon to the purchasing department.

In those days Fort William was entirely confined to the portion of the city now known as Westfort, and was little more than a flourishing village community, the railway terminals not having as yet been moved east to the mouth of the Kaministiquia River, and the experiences of those days were amusing, and among Tom Piper's first business essays as a boy, was the peddling of coal oil, with a dog sleigh, hiring the dog from an Indian on the Mission for a gallon of oil at 15 cents.

In 1896, by which time he had saved up a little capital, T. M. Piper saw an opportunity of going into business in the east end of the town, which had by that time assumed the greater importance as a business center, and had put the west end completely in the shade. He sent word to his brother to join him in the new venture and the firm was established by mail and wire, and the partner on the ground proceeded to rent a small store and order a stock in keeping with the size of the building. The doors were opened for trade on Nov. 20, 1896, and the firm still has the old books showing the volume of daily business, which seems absolutely ridiculously small in the light of present-day experience, the first day's cash takings being $5.50. This was a very fair day's work in the light of some later days, when the cash receipts totalled as low as 65 cents.

From this small beginning the history of the firm is one of steady success, attained by hard work, business methods and rigid economy, and their comfortable homes, holdings of city property, as well as the immense stock carried by the firm to-day afford solid proof of the prosperity which they have earned.

Early in the following year James Piper joined his brother, and they moved into larger and more expensive quarters, which they still occupy, although they have since enlarged and extended many times, giving a large retail store and big workshop, with considerable space adjacent for warehouse and storage purposes. James Piper being a thoroughly practical mechanic, took charge of workshop and his brother handled the retail store exclusively, and their firm has been connected with the erection of many of the finest buildings in the city, on which they have secured the contracts for sheet metal work, metallic or slate roofing and all other work that was in their line. A branch line of plumbing was at one time opened, but this was later abandoned in favor of firms who made this their exclusive business.

JAMES PIPER, FORT WILLIAM

The record of this firm is a bright example of the possibility of building up a big and flourishing business from the smallest commencement, when both members of the firm had a single eye to the success of their joint undertaking.

James Piper is the only one of the two brothers who has taken a prominent part in municipal affairs, having served for three years on the commission which handles the city's utilities, where his practical knowledge has been of great service. Although the press of business at times was such as to render it very inconvenient for him to devote the time required to public affairs, he has never grudged it in order to help the city in its handling of municipally owned utilities, and he took a very prominent part in promoting the plan which is now approaching completion, of tapping Loch Lomond, a lake 350 feet above the city level and securing a permanent supply of pure water with ample gravity pressure to serve for domestic and fire service.

W. S. Piper's Store.

The hardware firm of W. S. Piper is the oldest established of any of the business houses of Fort William, having been in existence continuously from 1884. W. S. Piper, the head of the firm, is the eldest of the five brothers of the name who have all become intimately identified with Fort William and the vicinity, two of them being also in the hardware business under the firm name of J. & T. M. Piper, and another being in a hardware and general store business in the west ward of the city. Mr. Piper opened out in business in the west end before the east end was inhabited and shortly after opened a branch in the Town of Port Arthur, under the management of his brother, H. M. Piper. This branch was just becoming a flourishing portion of the business when it was destroyed by fire and the building and stock were a total loss. In 1889 the C. P. Ry. Co. having moved their works and yards to the east end, the pioneer hardware firm followed suit and opened a small store on Victoria Avenue on the site now occupied by their present buildings. H. M. Piper continued his connection with his brother's business and Robert S. Piper also joined the firm continuing with it until he established himself in the west end a few years ago when the arrival of business in that portion of the city was effected by the entry of the Grand Trunk Pacific Railway into Fort William.

All three of the brothers being practical mechanics as well as good business men, they were able successfully to carry on business at a time when the condition of affairs in Fort William was at the lowest ebb, being prepared to take the fullest advantage of the prosperity which has prevailed for the past decade.

Their buildings, of the interior of which the accompanying illustration gives a view, now cover their entire property, 50 by 150 feet, with an additional warehouse across a lane 100 feet square.

The firm, in addition to the retail business which has grown to very large proportions, carries on an extensive business in contract work, and has established a good reputation for the instalation of heating plants. They also handle a large quantity of heavy building material and contractors' supplies, especially in such hardware as is required in the lumbering business in the surrounding district.

W. S. Piper, whose name is that under which the firm does business, has to some extent retired from the active work of the firm, leaving the details of management to Hugh M. Piper, and has many other interests which occupy his attention. He has been identified with several of the enterprises which have helped to build up the city, notably the

Fort William Brick & Tile Co., which was the first firm to make a practical success of brick-making from the beds of clay which underlie a large portion of this district. The beautiful red brick, first manufactured by them, is one

Interior of J. &. T. M. Piper's Store at Fort William.

of the first features of the building that catches the eye of the stranger who visits Fort William. He was also among the first to demonstrate the possibilities of agriculture in the country surrounding this city and for many years the Piper farm in the Slate river valley, about 12 miles from town, has been one of the show pieces of the district.

H. M. Piper, on whose shoulders the active management of the hardware business rests, has been most actively identified with the volunteer fire brigade of which he has been chief since its commencement. He gained his early experience in London, and under his management the fire brigade has reached a state of efficiency that is rarely equalled among volunteer organizations. He has had to deal with several fires that threatened to sweep over thickly built up sections of the city, and can point with pride to the fact that Fort William has never been visited with a conflagration that he was unable to control and confine within very limited area.

TAX ON TRAVELERS.

This Has Been Eliminated in Prince Edward Island—Still in Force in British Columbia.

A Bill has been passed by the provincial government of Prince Edward Island repealing the tax on commercial travelers which yielded a revenue of about $8,000 annually. The tax on travelers amounted to a yearly fee of $20. The opposition offered no objection to the measure. Although this bill was passed last week it will take effect from Jan. 1st last.

There was considerable unfavorable comment, according to a despatch from Charlottetown, from the mainland press and the passing of the measure did not tend to make the Island popular with the large business houses.

The government has, however, pursued the proper course in repealing the tax so that Prince Edward Island can stand on the same footing as most of the other provinces of the Dominion.

There is no tax imposed in New Brunswick, while in Nova Scotia there is no provincial law imposing a tax or fee, but power is vested in most of the incorporated towns to impose such a tax. Neither Ontario nor Quebec assess the traveler and the same may be said of Manitoba and the other western provinces with the exception of British Columbia.

In British Columbia no commercial traveler, agent or other person not being a resident of the province can solicit orders for goods to be imported into the province without a license therefor and paying the prescribed fee. Every commercial traveler soliciting orders for liquors or cigars, or both, to be imported into British Columbia must pay a license of $100 every six months. For those soliciting orders for any other kind of goods, wares or merchandise for importation the fee is $50 for every six months.

It is time the far western province was falling in line too and eliminating the tax on the commercial man and no doubt it will soon come to this.

MRS. McGREGOR'S NAIL BOX.

A plain practical article always gets a good call in the hardware business and one of the best examples lately on the market is Mrs. McGregor's family nail box. This creation embraces a neat box in which there are 500 nails of all sizes. The idea is to have a nail for every useful purpose and the box is certainly unique. These boxes should be in great demand at this season, as householders are after just such ideal conveniences.

AMERICAN STOVES IN WALES.

It is reported that American stoves will find a ready market in Wales if a proper effort is made to develop the trade. Swansea is in the very heart of the anthracite coal field, but stoves suitable for burning this hard coal are conspicuous by their absence. American stoves, if properly introduced, should find an excellent market, and once established would expand with the sale of the coals. They must be introduced by direct representatives who are expert at showing the advantages of American goods, and the appointment of local agents should at all times be quite a supplemental affair. At present anthracite coal is burned in open grates in thousands of homes.

Interior of W. S. Piper's Store at Fort William.

The Cart
Before the Horse

The calendar is all right in its place.

Its place, however, is not substitution for trade, magazine, or ordinary newspaper advertising.

The calendar as an advertising medium is supplementary only to these.

Even the circular letter ranks higher in importance.

If, after the proper mediums have been judiciously provided for, there is money to spare for artistic calendars which are designed to please, not to sell, well and good.

But don't put the cart before the horse in advertising.

CONDENSED OR "WANT" ADVERTISEMENTS.

RATES.

Two cents per word first insertion; one cent per word subsequent insertions.

Five cents additional each insertion where box number is desired.

Contractions count as one word, but five figures (as $1,000) are allowed as one word.

Cash remittances to cover cost **must** accompany all advertisements. **In no case** can this rule be overlooked. Advertisements received without remittance cannot be acknowledged.

RULES FOR COPY.

In addressing replies care of HARDWARE AND METAL don't fail to give box number.

Replies addressed to HARDWARE AND METAL boxes are re-mailed to advertisers every Monday, Wednesday and Friday.

Requests for classification will be followed where they do not conflict with established classified rules.

Orders should always clearly specify the number of times the advertisement is to run.

All "Want" advertisements are payable in advance.

AGENTS WANTED.

This is the problem of many manufacturers who are anxious to get a foothold in Western Canada. It will be easily solved if HARDWARE AND METAL is given the opportunity to solve it.

AGENTS WANTED—Reliable hardware merchant wanted in every city and town in Canada to handle the Empire Light, "the world's cheapest artificial illuminant," (burns coal oil). An attractive and paying proposition. Write us to-day. THE EMPIRE LIGHT CO., Limited, Packard Building, Montreal. (10)

MANUFACTURER, hardware specialty wants agents for Ontario, New Brunswick, Nova Scotia, on commission. Selling wholesale and retail hardware trade. Box 802, HARDWARE AND METAL, Toronto. [12]

WANTED—Good live agent in Montreal, Toronto and Winnipeg to handle A1 line of hammocks which have been marketed successfully in Canada for some years. The line will be strongly advertised in Hardware and Metal. Apply, giving full information as to lines you now have, Box 796, HARDWARE AND METAL, Toronto. (10)

AGENCIES WANTED

Manufacturers of hardware lines both at home and abroad watch our paper each week. If you want to secure the exclusive agency for any line for the whole Dominion, for a Province or for your own city or town you will find a Want Ad. will put you in touch with the right firm.

TRAVELER, experienced, wants two or three good lines on commission. Box 100, HARDWARE AND METAL, Winnipeg. (10)

MANUFACTURERS agent covering Canada desires to secure first-class lines suitable for the wholesale and retail hardware, railway and mill suppiy trade. Strong connection; highest references. Box H, HARDWARE AND METAL, Montreal. (10)

ARTICLES FOR SALE.

Don't keep any fixtures or tools around your store for which you have no further use. They are worth more to-day than they will a year hence. Don't keep money tied up which you could use to secure discounts from your wholesaler.

TWO counters for sale, one ten feet long and the other sixteen feet long. The counters are in good condition, have oak top and panelled front, with two stools attached. Will sell for about half original cost. W. Walker, 1228 Yonge St., Toronto. (10f)

SECOND-HAND tinners' tools. For list apply to Box 807, HARDWARE AND METAL, Toronto. (12)

BUSINESSES FOR SALE.

Somewhere in Canada is a man who is looking for just such a proposition as you have to offer. Our "For Sale" department brings together buyer and seller, and enables them to do business although they may be thousands of miles apart.

HARDWARE BUSINESS FOR SALE in one of the finest farming sections of Ontario. Two railways. Stock about $4,500. Good reasons for selling. Address Box 782, HARDWARE AND METAL, Toronto. (11)

MACHINE SHOP and manufacturing business in city of Ottawa for sale or partnership. Apply to A. H. Edwards, Ottawa. (10)

WELL ESTABLISHED GENERAL HARDWARE BUSINESS in prosperous Manitoba town surrounded by excellent farming district. Stock about $8,000. A splendid opportunity. Apply Box 785, HARDWARE AND METAL, Toronto. (10)

MISCELLANEOUS

ADDING TYPEWRITERS write, add or subtract in one operation. Elliott Fisher, Limited, 129 Bay Street, Toronto.

A MARKET OF BUYERS, backed up by money to spend, is open to you in the Busy Man's Magazine. Every territory in Canada is represented. If you have something to sell, something you want to buy, a condensed advertisement in the Busy Man's Magazine will put you in touch with the classes you want to reach. Four cents per word will carry your message from Atlantic to Pacific. Send copy of your advertisement along with order to cover cost of insertion. Your announcement will appear under a special heading. BUSY MAN'S MAGAZINE, Montreal, Toronto, Winnipeg.

HIGH CLASS COLOR WORK; Commercial Stationery, Posters. The Hough Lithographing Co. Limited, Office—No. 3 Jarvis St., Toronto, Telephone, Main 1576. Art, Good Workmanship; Business Methods.

IF INTERESTED in a Duplicating Machine for getting out circular letters, reports, price-lists, etc., or for printing various office forms, write for booklet and samples of work. The "POLYGRAPH" is the newest, latest, and best, and sells for a lower price than the others. Is unexcelled by any similar device on the market. F. W. Tenney, Canadian Sales Agent, 123 Bay Street, Room 116 Stair Building, Toronto, Can. (tf)

IF YOU are looking for a side line to add to your business there is none better than COLUMBIA GRAPHOPHONES, Double Disc Records (which means two records for a single price) and Indestructible Records (that will not break or wear out no matter how much you abuse them). The Columbia Phonograph Company is the only firm that manufactures both Disc and Cylinder Machines and Records, therefore, a Columbia dealer has the advantage over all others, as he can furnish his customers with what they want, while his competitor has to sell them what he has or lose the sale, which he generally does where there is a Columbia dealer. Are Columbia goods sold in your town? If not, why not? Do you want the exclusive agency? (remember exclusive). You had better write to-day or someone else in your town will read this advertisement and beat you to it. A postal will bring catalogues and full information free. Write to-day. Do it now. Toronto Phonograph Company, Limited, Exclusive Columbia Jobbers, 40 Melinda St., Toronto, Canada.

IT PAYS FOR ITSELF—The money you are now losing because you haven't a National Cash Register, would pay for one in a short time. The National Cash Register Co., F. E. Mutton, Canadian Manager, cor. Yonge St. and Wilton Ave., Toronto, Ont

NOTICE—Users of Pitner Gasoline Lamps are warned against being induced to purchase parts of other makes of lamps to be used on the Pitner. The most vital part of any lamp is its generator, and the Pitner generator has been granted a patent in Canada, the United States and other countries, on the principle of its improved method of generating gasoline vapour. Supplies and parts for the Pitner lamps can be received by return mail by applying to our representatives or direct to THE PITNER LIGHTING CO., Limited, 36-38 Lombard St., Toronto, Ontario.

THE RELIABLE LIGHT will light your store 100% better than gas, electricity or acetylene. 600 candle power light costs 1 cent per hour to operate. Thousands in use. A safe, reliable, pure white light of intense brilliancy. Write for booklet M. The Rice, Knight Mfg. Co., Limited, 40 Lombard Street, Toronto.

SITUATIONS VACANT.

You can secure a "five-thousand-a-year" manager, or a "five-hundred-a-year" clerk, by stating your wants under "Situations Vacant."

SMART young boy wanted to learn the hardware business. W. Walker, 1228 Yonge St., Toronto. (10f)

TRAVELER or experience in the Stove and Furnace Business for the Provinces of Quebec and New Brunswick. Must speak English and French. Address Box 786, HARDWARE AND METAL, Toronto, stating experience, salary, etc. (tf)

WANTED—Buyer and manager for cutlery and sporting goods department of wholesale hardware house. Apply, giving full particulars, H. 9, HARDWARE AND METAL, Montreal. (tf)

SITUATIONS WANTED.

Travellers, clerks, or tinsmiths, wishing to secure new positions, can engage the attention of the largest number of employers in their respective lines, by giving full particulars as to qualifications, etc., under "Situations Vacant."

SITUATION wanted by practical tinsmith as salesman for stoves, furnaces, hardware, tinware, roofing, or paints and oils. Have been in the retail business. References. Box 803, HARDWARE AND METAL, Toronto. (10)

WANTED—Position as salesman for retail hardware. Eight years experience with good preference. J. E. Thomas, 662 King St., London. (10)

WANTED—A situation in office, by a thoroughly posted hardwareman, recovering from an injury to his hip, later on will be a first-class man in store. Address HARDWARE AND METAL, Box 808, Toronto. [10]

STORE FOR RENT

NEW STORE to rent in Galt, Ont., opposite the Post Office. One of the best locations in town. It is now under construction, will be completed the first of April, 1909. Size, 40 ft. front, 100 ft. deep. Fine basement under whole building. For particulars address J. C. Deitrich, Box 915, Galt, Ont. [12]

TECHNICAL BOOKS

ESTIMATING, by Edward Nichols, Architect.—140 pp. 35 illus. Cloth binding. Containing invaluable information for the use of Architects, Contractors, Builders, Carpenters, Plumbers and Heaters, Painters, Roofers, Cornice-Makers, and other workers in the building trades. This handbook tells just how to go about the task of making an estimate intelligently. Price $1.00. MacLean Publishing Co., Technical Book Dept., 10 Front St. East, Toronto.

It illustrates and explains how hardware windows may be dressed to sell goods. Price $2.50 post paid., The MacLean Publishing Co., Technical Book Dept. 10 Front St. East, Toronto.

MENSURATION FOR SHEET METAL WORKERS, by Wm. Neubecker.—This new book gives the principles of the art of measure, showing its practical application in solving problems, in finding the areas, dimensions or capacities of the diverse sizes and shapes of sheet metal products. It is of infinite value to all sheet metal workers. 72 subjects and 70 figures. Price 50 cents, postpaid. The MacLean Publishing Co., Technical Book Dept., 10 Front St. East, Toronto.

Salesmen Wanted!

Be a high grade Traveling Salesman and earn from $1,000 to $10,000 a year and expenses. We will prepare you by mail in eight weeks to be one and assist you to secure a good position. Hundreds of our graduates now holding good positions we secured for them, with reliable firms. Many who had no former experience now earn $100 to $500 monthly and expenses. If you want to secure a good position and increase your earnings our Free Book, "A Knight of the Grip" will show you how. Send for it today. Address nearest office. Dept. 288 NATIONAL SALESMEN'S TRAINING ASSOCIATION, Chicago, New York, Kansas City, Minneapolis, San Francisco.

WESTERN CANADA HARDWARE MARKETS

Corrected by telegraph up to 12 noon Friday, Room 511, Union Bank Bldg, Winnipeg.

Winnipeg, March 2.—Another week's markets have come to an end and still the price of wheat soars. May wheat closed Saturday, Feb. 27, at $1.13½ or 4½ over the close of the previous Saturday and 10½ higher than it was at the first of February. Trading has been active all week; there has been much buying for export. There has been some active speculative buying and taking profits also and it is currently rumored that one of the most successful speculators of the week has been Hon. R. P. Roblin, premier of Manitoba. He is variously credited with a clean up of from $75,000 to $100,000 for the week.

There has certainly been a lot of money made in wheat this week. The advance in prices has brought about a noticeable increase of receipts and for the last few days they have been running about double what they were at the same date last year. This rather disposes of the theory that there was no more wheat in the country or rather that there was very little more.

One of the rather surprising things is that with the rapid advance in the price of wheat there has been no corresponding advance in the price of flour up to date, although prices have advanced in the east. Mills are all running full time and millers report a fair domestic demand and a moderate export inquiry.

Apart from the interest taken in wheat there has been little to mark the week.

The Legislature is in session and the two parties continue to belabor each other day after day with short intervals of attending to the country's business.

Monopoly Not Necessary.

The Grain Growers' Associations of Manitoba have presented a gigantic petition asking for the Government ownership of interior elevators and claiming that it is not necessary for the Government to have a monopoly in order to go into the business.

In the meantime companies with Dominion charters are quietly going ahead making preparations for a big season of elevator building.

The indications are that the British America Elevator Company will erect between 50 and 60 elevators in the Canadian West this year. It is known for a fact that they have placed orders for the machinery for a large number.

Alberta Pork Packing Report.

The commission appointed by the Alberta Legislature to inquire into the whole question of the wisdom of the Government establishing pork packing industries reported last week. The report is rather an interesting one, the commission appearing to have gone into the matter with very considerable thoroughness. Among the leading recommendations made were that the Government should erect a hog packing plant with a capacity of 300 hogs per day when a sufficient number of farmers were prepared to guarantee at least 50,000 per year to a plant. That the management take in the farmer's hog and pay for them up to 2-3 of the estimated value, and then at regular intervals when sufficient time has elapsed to place the product on the market, pay the producer the balance of the full value less the cost of curing and marketing, and a sum sufficient to pay local working expenses, also less one fourth of a cent per pound live weight to be applied for the creation of a fund for the purpose of paying back to the Government the original investment and interest and at the same time to allow shares to each patron equal to the amount paid into this fund by the assessment of the one-fourth of a cent per pound on his product.

In the matter of freight rates it was recommended that the total of all freight rates paid on the railways be subdivided and charged equally against each pound of pork supplied, and there be regular shipping days and that each patron bind himself to give all the hogs which he wishes to dispose of for packing to the plant, and failing to do so that he be subject to a fine not exceeding $2 per hog. The Legislature has not yet disposed of the report. The distance of Alberta from large markets and the desirability of placing the roughage of their farm on the market in the most concrete form together with the increased easy way with which pork can be raised in Alberta owing to the increase in butter making has led to the packing question being a very live one indeed.

Since then Alberta Legislature accepted and to some extent acted upon the report of the packing commission, there being an appropriation of $50,000 in the estimates for the erection of the first plant.

The working out of this attempt of Government ownership will be watched with keen interest all over the West.

Winnipeg Hardware Markets.

Wholesale hardware markets continue to be very steady here, there being no price changes of importance to record this week. While orders for future delivery are very much in excess of last year's, there is already a steady movement of goods to country points. That there will be an unusual demand for builders' hardware becomes more apparent as the season advances. A constant improvement is noted in trade conditions.

Price Quotations.

WIRE—Barbed wire, 100 lbs., $3.15; plain twist, $3.40; staples, $2.90; annealed wire, $2.90 base; oiled, 10c extra; bright iron, $3.10 base; brass spring wire, 29c base; plain galvanized, wire, 6, 7, and 8, $3.50; No. 9, $3.10; No. 10, $3.60; No. 11, $3.70; No. 12, $3.30; No. 13, $3.40; No. 14, $4.25; No. 15, $4.75; No. 16, $5.

POULTRY NETTING—57½ per cent.

RESUME OPERATIONS.

The Manitoba Rolling Mills, Winnipeg, resumed operations last week after being closed down for two months. The company will erect a new building during the summer.

NEW WESTMINSTER.

February 27.—Many of the large saw mills of this Province do a large business with machinery houses in Seattle, and in view of this it is well to note that a new edger installed in the Red Fir Lumber Company's mill at Nanaimo by the Schaake Machine Works, of this city, has given excellent satisfaction. When it is possible to produce the best of machinery in British Columbia, mills should patronize home industries.

VICTORIA.

February 27.—Tenders are being called by the Victoria city council for fifteen 12-in. double-gate valves, twenty 8-in. double-gate valves, twenty 6-in. double-gate valves. Valves to have two bell ends, brass faces and spindles and to turn from left to right. The nut on the head of spindle to be 1¼-in. square.

Tenders are being called by the Ladysmith city council for the construction of the sewerage system recently passed by the citizens.

Tenders are being called by the Dominion Government at Ottawa for heating apparatus to be installed in the public buildings about to be erected at Ladysmith. The building is to be of two storeys and basement. The basement is to be used for heating apparatus, etc.; the ground floor for a post office and examining warehouse, while the first floor will contain the customs house and caretaker's apartments. A lavatory and water-closet are also to be put in.

W. B. C.

NEW WHEELBARROW AGENCY.

The Meaford Wheelbarrow Company have secured the Canadian rights to manufacture the line of roller bearing wheelbarrows and concrete carts made by the Sterling Wheelbarrow Company, Milwaukee, Wis. These goods have been sold exclusively by Mussens, Limited, Montreal, but the Meaford Company intends to offer these to the retail hardware trade.

BELLEVILLE ROLLING MILLS.

The rolling mills and horseshoe factory at Belleville, which were recently taken over by P. J. Smith and D. S. Thornton, have been running steadily since the change in ownership, and the new proprietors report a very encouraging demand for "Bell" horseshoes.

Hardware Letter Box

Any questions on trade subjects will be answered by the editor in this department. Do you want any address, any special line of goods, anything relating to the hardware trade? Ask us. Letters from manufacturers, jobbers, travelers, retailers or clerks are solicited. Suggestions for trade improvement or discussions on trade evils are invited.

Blacksmiths' Bellows.—Marks, Clavet & Dobie, Port Arthur, ask who are the principal makers of blacksmiths' bellows in Canada?

The Canadian Buffalo Forge Co., Montreal.—Editor.

List of Manufacturers.—Taylor Bros., Carleton Place, ask if there is a book published giving a list of the manufacturers of Canada?

Yes. By the Manufacturers' List Co., Montreal.—Editor.

WHY *SHERWIN-WILLIAMS* Linseed Oil IS SO good

Messrs. Barry & Butler,
Allentown, P. Q.

Gentlemen:-

You wanted to know in your recent letter how we were able to make so much better linseed oil than the ordinary commercial linseed oil. This is how we do it:

Long ago we found it necessary to use a higher quality of linseed oil than could be secured on the open market if we were to continue the improvement of Sherwin-Williams Products. So we erected our own mills and set about to produce a superior quality of oil. We crushed only the choicest of Northwestern No. 1 flaxseed. Although the seed was carefully cleaned when we bought it we recleaned it ourselves to make sure that no foreign substances remained. We crushed the seed by the SCREW PRESS process (which we now control exclusively in Canada.) This extracts the oil at a much lower temperature than is usually employed, thus keeping in the cake the albumen and mucilaginous matter which usually finds its way into the oil, where it is detrimental. As a result S-W. Oil is much superior to the ordinary commercial linseed oil.

In order to enable users of S-W. Paints to get the best results from their use, we decided some time ago to give them the opportunity to secure S-W. strictly pure screw pressed Linseed Oil. You will find that S-W. Oil will make you many friends, especially among painters, who appreciate its exceptional quality.

Yours very truly,

C. C. BALLANTYNE.

BUILDING AND INDUSTRIAL NEWS

For additional items see the correspondence pages. Information is solicited regarding building and industrial news, the incorporation of companies, establishment or enlargement of mills, factories or foundries, municipal waterworks and sewerage systems, railway or mining news, etc.

Industrial Development.

The C.P.R. will build a grain elevator at Vancouver.

C. A. Ahrens will build a new and larger shoe factory at Berlin.

A joint stock company will erect a veneer mill at Mansonville, Que.

The Tent and Mattress Co., Saskatoon, are putting up a new warehouse.

The P.& O. Mfg. Co., Pittsburgh, contemplate erecting a branch factory at Hull.

The L. E. Waterman Co.'s pen factory at St. Lambert, Que., has opened for business.

Bentley & Marsh, makers of sporting goods, Niagara Falls, are erecting a new and larger factory.

The B.C.E.R. Co.'s shops at New Westminster, B.C., are very busy turning out cars for the line.

Kamloops, B.C., is on the eve of an industrial revival, a number of concerns contemplating building there.

Heintzman & Company, Toronto, have purchased a site for the construction of an extension to their factory.

Windsor civic authorities have offered a bonus to Cleveland interests to locate a gas plant machinery factory there.

The Western Canada Wood Pulp and Paper Co. is pushing on the construction of its plant at Quatsino Sound, B.C.

A $35,000 hydraulic placer plant will be erected on Ruby Creek, Atlin County, B.C., by Boston and Seattle interests.

The rolling mills of the Ontario Iron & Steel Co., at Welland, have been started again with a day shift of 60 men.

New Westminster, B.C., has offered the Canadian Northern Railway a free site for the erection of shops and repair works.

The Vancouver Milling & Grain Co., are rebuilding the mill recently burned at Vancouver. The new mill will cost $40,000.

The Transcontinental Railway Commission has advertised for tenders for the erection of the G.T.R. shops at St. Boniface.

All the machinery is on the ground for the new lumber mill of the Fischer Lumber Co., on the line of the Transcontinental Railway near Good Lake, Ont.

The Dominion Iron & Steel Co., Sydney, C.B., has resumed work in its rail mill after a close of some weeks. The N.T.R. is taking a great quantity of 80-lb. rails.

The Canadian Antimony Co. intend to erect a smelter and reduction plant at Lake George, N.B., and connect that place with the C.P.R. by building a 12-mile spur.

The McCaskey Register Company of Alliance, Ohio, has decided to locate its Canadian branch in Hamilton. It will manufacture account registers and other patented articles.

A number of branch factories of U.S. industrial concerns are anticipated to be built in Canada this year owing to the change in the French tariff, which compels U.S. manufacturers to pay the maximum rate.

The annual report of the Marine Department for the last fiscal year shows that the total number of new vessels built and registered in the Dominion during the year was 392, measuring 38,410 tons register, with a total estimated value of $1,728,450.

At the recent annual meeting of the Woodstock, Ont., Board of Trade, the secretary read a communication from the Russell Harvesting Machine Company, in which a plan was submitted for the erection of a large factory in that city. The citizens are asked to take up $25,000 of stock, and the company wants free light, water and taxes for ten years, or a free site. The company was recently organized to manufacture grain shockers.

Railway Development.

An elevated railway is proposed for Montreal.

The C.P.R. will enlarge their London yards this year.

The Soo line may build 250 miles of additional branches and extensions this season.

Toronto civic authorities may build a spur along Ashbridge's Bay at a cost of $90,000.

The Canadian Western Railway will open up southern Alberta by building a line from Calgary to Butte, Mont.

The G.T.P. Branch Lines Co. is applying for legislation empowering the company to construct 325 miles of additional branches in Alberta.

The Quebec and New Brunswick Railway is applying for authorization to construct a line down the St. John valley from Connors Station, N.B., to Centreville, Woodstock and St. John, passing through the counties of Madawaska, Victoria, Carleton, York, Sunbury and Kings.

The C.P.R. will rail the gap between Wynard and Lanigan, in Saskatchewan, the first thing in the spring, and construction on the line from Lanigan to Prince Albert located last fall, will be commenced early in the season and pushed to completion.

General Building Notes.

The Arlington Hotel, Sarnia, will be enlarged.

John Hayman will erect a large apartment house at London.

F. Fuller, Vancouver, will erect a $24,000 business block.

J. T. Hutson, Toronto, will erect an $18,000 block of dwellings.

P. A. Alder will erect two dwellings at Vancouver to cost $10,000.

John Garvey, London, will erect a five-storey grocery warehouse.

W. A. Clark, Vancouver, will build an apartment house to cost $20,000,

L. Mazza will erect a block of six dwellings at Toronto to cost $14,000.

S. R. Willinsky, Toronto, may erect a $25,000 dry goods store and office building.

New Masonic headquarters will be erected in New Westminster at a cost of $20,000.

The Canadian Express Company will erect a new express office at Sydney Mines, N.S.

The G.T.R. will next month begin the erection of a twelve-storey office block at Winnipeg.

Plans for the Quebec Bank's new building, to be erected at Montreal, have been completed.

Plans have been prepared for the new building to be erected at Three Rivers, by the National Bank.

C. S. Douglas & Co., Vancouver, will build a $22,000 apartment and store structure in the spring.

Rhodes, Curry & Co., Amherst, N.S., will erect a $30,000 bungalow at Argyle, N.S., for a Boston millionaire.

It is stated that the Royal Bank are contemplating the erection of a new building at Campbellton, N.B.

It is stated that W. A. Snelgrove intends adding 20 rooms to his hotel at Melville, Sask., early in March.

It is stated that the C.P.R. have plans for the extension of their hotels at Banff, Lake Louise and Glacier.

The Massey-Harris Company will shortly commence the erection of a distributing warehouse at Melville, Sask.

W. W. Cross proposes to erect an apartment and store building at Winnipeg to cost between $30,000 and $40,000.

J. F. Robertson, of Robertson & Cantwell, painter, Fort William, will erect a $25,000 office and store building in the spring.

Robins, Limited, Toronto, report the sale of property to a purchaser for the erection of a business block to cost $70,000.

It is stated that a company is being organized in Vancouver for the erection of a large residential hotel to cost in the neighborhood of $200,000.

Wm. Lyall, of Peter Lyall & Sons, Montreal, has purchased a large block of land in that city on which he will erect twenty semi-detached residences in the spring.

James Frederick has been awarded the contract for a large summer home to be erected on Jarvis Point, near Brockville, for Geo. C. Boldt, of the Waldorf Astoria, New York.

Property has been purchased by the National Bank for the erection of a large new building at Montreal. The present bank building there will also be considerably extended.

Public Buildings.

A $10,000 municipal hall is proposed for Estevan, Sask.

A new fire hall will likely be erected at Lethbridge.

An addition will be made to the Central School at Galt.

A new and larger immigration hall will be built at Calgary.

A $48,000 Baptist Church will be built at Calgary this spring.

THE ROOFING, CORNICE AND SKYLIGHT MANUAL

The Book consists of three articles:

TIN ROOFING—The Roofing Bench, Putting Tin Together, Soldering, Flat Seam Roofing, Standing Seam Roofing.

CORNICE WORK—Equipment of Country Cornice Shop, Taking Measurements and Making Patterns, Cutting Cornice Miters, Attachment of Eave Troughs to Roofs of different kinds, Manufacture of Round and Square Leaders and Making Simple Ornaments

SKYLIGHT CONSTRUCTION Ground Plan and Elevation of Skylight; Plan of Top Miters; Development of Curb, Ridge and Cap Miters; Pattern for Common Bar, Hip Bar and Jack Bars.

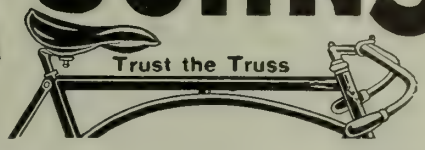
IVER JOHNSON



Truss Bridge Bicycle

Dealers

like to sell the Iver Johnson Truss Bridge Bicycle because it remains sold—proof against "come backs." Our **Agent's Proposition** is worth looking into, for the man who would make good money on a good proposition.

Riders

prefer it because it is the most durable because it is made of the best materials by the most skilled mechanics in the world. Costs moderately in the beginning, nothing for repairs if not mistreated, and costs least, therefore, in the end.

Send for Free Catalogue

It illustrates the 1909 models and shows why the Truss Bridge is so popular among dealers and riders. It is a text book on bicycles.

to sell the

Manitoba Steel Plate Furnace

We want a good hardware man in every town to handle our furnace. It will burn Souris and other soft coals mined in the West, and it will burn them economically. It is the furnace Western people have been looking for. If you are from Missouri, so much the better. Ask us and we will show you.

The consumer saves 25 to 40 per cent. on fuel when he uses the Manitoba.

The Brandon Machine Works Co., Limited

Brandon, Manitoba

A new public school will be built at Riverside, a suburb of Calgary.

An addition will be made to the Stratford Collegiate Institute.

It is proposed to establish a consolidated rural school at Burnside, Man.

The contract for the new children's hospital at Halifax will shortly be awarded.

Sir Lomer Gouin recently stated that a new court house would be erected in Montreal.

The congregation of St. Aidan's parish, Toronto, has decided to erect a new church.

A movement is on foot to raise $12,000 for the erection of a general hospital at Ingersoll,

It is proposed to build an addition to the Infirmary in Renfrew, Ont., at a cost of $25,000.

A new Catholic Church, to replace the one recently burned, at Bedford, Que., will likely be built.

The members of St. George's Church, Windsor Mills, Que., have decided to erect a new church.

The Jarray and Melick council is considering the erection of a new school building near Kenora.

A permit has been issued for the erection of Shea's new theatre, Toronto, at a cost of $260,000.

The congregation of Murray Street Baptist Church, Peterborough, are considering the erection of a new building.

Tenders for the construction and erection of shops for the N.T.R., east of Winnipeg, are called for before March 10.

It is stated that preparations are being made for converting a business block at Stratford into a modern theatre.

The attention of Toronto's Board of Control has been called to the need of a new building for the House of Industry.

The Minister of Railways recently stated that it was the intention of the Government to build a new station at Truro, N.S.

Dr. Roberts, Hamilton's Medical Health Officer, will ask the board, at its next meeting, to consider the erection of an isolation hospital.

The trustees of the Port Colborne Presbyterian Church are arranging to rebuild their church, which will cost probably two thousand dollars.

A project for the erection at Halifax of science and library buildings for Dalhousie University, is being considered by the authorities of that institution.

Plans have been prepared for the new building to be erected by the congregation of Christ Church, Deer Park, Toronto, at an estimated cost of $20,000.

Sydney, C.B., ratepayers will be asked to vote on a by-law to raise nearly $142,000, $50,000 of which is for the new academy and $20,000 for public school extensions.

The Canadian Northern Railway will in the near future commence the erection of the proposed new depot and freight sheds at Brandon. The depot when completed will cost approximately $45,000.

The trustees of the Toronto General Hospital are considering the appointment of an expert to pass upon the plans for the new hospital. The plans submitted call for expenditures respectively of $1,350,000 and $1,210,000.

Knox Presbyterian congregation, Peterboro, has decided to build a new church which will cost in the neighborhood of $30,000. The work of erecting the All Saints' (Anglican) Church has been begun, and will be completed, if possible, this year.

The Dominion Government intend to add a $14,000 addition to the Astronomical Observatory at Ottawa; erect a new $125,000 departmental building; spend $93,000 on alterations to the Parliament Buildings; build a $30,000 addition at the Royal Mint; and erect a $400,000 Victoria Memorial Museum.

Among the buildings to go up this year in Toronto are a new fire hall and police station at East Toronto; fire hall on Perth Avenue, and an addition to the main pumping station. Then there is the General Hospital and the additions to Western and Isolation hospitals, some university buildings, and a technical school, several warehouses and many dwellings.

The Ontario Department of Mines issued the following statement of the mineral production of Ontario last year:

Total production		$25,219,609

The figures given are subject to revision. Values are computed at the selling prices at the mines or works, and in the form in which the substances are produced.

As compared with 1907, there has been a considerable increase in the output of metalliferous mines and works, and a shrinkage in the non-metallic production, the aggregate for 1908 being about $200,000 in excess of that for the preceding year.

The falling off in the non-metallic list is mainly in crude petroleum and building materials. The new oil field in Kent County showed a greater proportionate diminution in yield than the older fields in Lambton County. The output of natural gas was materially greater than in 1907.

The silver mines of Cobalt yielded 9,000,000 ounces more than in 1907, but owing to the fall in the price of silver the value was not correspondingly greater. Shipments from the silver mines amounted to 24,485 tons. A little less than a third of the total tonnage was treated in Canadian reduction works, most of the remainder going to the United States, and a small amount to Europe. The ore treated at home was largely high-grade, the lower qualities being sent mainly to smelters in the United States, where they have been found suitable for mixture with other ores.

The nickel and copper output for 1908 was about the same as in 1907, but the valuation is lower.

WIRE FENCING FOR EXPORT.

Owing to the rapid increase in the export business of the Page Wire Fence Company, Walkerville, Ont., since the introduction of its "Empire" white fencing for railway, farm and ranch use, it has been thought best to have the foreign business handled by a company of a name similar to that of the fencing, and to this end the Empire Fence Export Company, Limited, has been formed. It is owned and controlled by the same people as the old company and the head office and factory will be at Walkerville.

TO FIGHT THE POWDER TRUST.

The Clark interests of Montana have made plans to establish opposition to the "Powder Trust." With them will be associated John Bermingham, for many years general manager of the Dupont-De Nemours Company, a branch of the trust; J. A. Folger, head of the big mercantile house that bears his name, and former State Senator Charles M. Belshaw. The plant will be located near San Francisco, presumably at Antioch, and operations will be conducted on a big scale. The Clark Company will begin with a capital of $3,000,000 and it is the intention to add to the investment as the business warrants.

News of the Paint Trade

THE SPRING CAMPAIGN.

The dealer should not let a day pass by now without paying some attention to the selling campaign that he intends to start when the spring opens. It is assumed that everything is practically ready in the department, and the stock in good order, and classified so that a customer rushing in with the first breath of spring can get what he wants without waiting for it. As to the new stock if it is not in, or already placed, see that no more time is lost, or the consignment may not be despatched quickly enough to serve the first customer. Start at once on creating a demand for paint. Bring your store before the man who is thinking of painting his house, store, or factory, while he is still in the act of thinking. Do not wait until he has made up his mind and gone to a competitor.

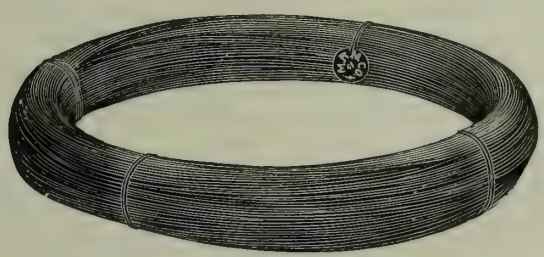
There is no doubt that paint is an article peculiarly susceptible to pushing. Its uses are innumerable, and its usefulness is ridiculously out of proportion to its cost. But the average consumer is slow to discover these facts for himself. The dealer, therefore must be alert and busy every day instructing the consumer. The progressive man makes things "hum." He does not make a collection of paints and leave it at that. He clears his shelves with that celerity which means good profits, and he does it by compelling customers to come in by the force of his selling campaign.

Some dealers act as if no initiative work was necessary to push their paint department. They take no advantage of the enormous advertising expenditure of the paint and varnish manufacturers. A great sum is being spent to popularize and create a demand for certain lines and unless the dealer energetically seconds these efforts, he reaps no advantage. It is the man who keeps abreast of the times, the man who follows up these advertising schemes, the man who lets no opportunity pass to make money out of the goods which are being extensively pushed by the manufacturer, who will make the most money this spring.

BAKU OIL WELLS.

The old fields of Russia at Baku, on the Caspian Sea, have been described as bearing the palm both for abundance and constancy of production. From the earliest times gas has been known to come out of the rocks there, so that it early became a sacred place for the Parsees, or fire worshippers. For thousands of years the sacred fires were kept burning beneath the dome of a great temple built by the priests, and religious devotees came from as far away as India. Indeed, it is only a few years since their visits ceased.

But the discovery of oil in this region in vast commercial quantities has crowded out the religious devotees. The facts are stranger than fiction. A territory at Baku no larger than a single township furnishes more oil than the whole United States, and has continued



Oiled and Annealed Wire

The success achieved by our Wire is due to the care we exercise in selecting the Rods from which it is made; to the attention paid to the annealing of the Wire, and in the oiling to obtain a fine dry surface which enables it to be easily handled.

We make both large and small diameter coils.

The Montreal Rolling Mills Co.

to do so for many years. Our consular reports show also that the percentage of increase in that field is greater for the last five years than it has been here.

At Baku they must go down with their wells only a few hundred feet, when they strike a reservoir which is under tremendous pressure. The drills are thrown out of the well, followed by bombardment of pebbles which batters the derrick to pieces and piles up a pyramid of stones about the mouth, and the oil pours out in torrents. This is preserved, not in large iron tanks, as here, but is collected in pools by a dam across the valley.

It is not always fortunate to strike a flowing oil well. A Russian in Baku two years ago struck one which poured forth 2,000,000 barrels in a month, and caused so much damage by its overflow that it ruined him.

It is interesting to see how near Alexander the Great came to being the oil king of Central Asia rather than the conqueror of India. The histories relate that when he was at Samarcand he started out on an expedition farther north, when he found his army short of water, and commanded his men to dig a well. But instead of finding water they "struck oil," which was bad to the taste. Moreover, the soothsayer said it was a bad omen. So he ordered it to be filled up and sacrifices to be made, and then started for India. But now all the locomotives on the Transcaspian Railroad use petroleum from the wells of Baku.

Paint and Oil Markets

MONTREAL.

March 5.—Shipments this week show a marked improvement not only in volume but in variety, and in consequence a cheerful feeling pervades the paint and varnish trade. Heavy goods such as white lead, linseed oil, etc., are moving with greater freedom, showing that the improved feeling is extending to all lines. There is no change in quotations, and the market generally is firm.

TURPENTINE—Quotations in the turpentine districts in the South show a slight tendency to ease, having in view the marketing of the spring crops. However, as local stocks are not over-abundant, and the demand steady, no change in prices has been made and we continue to quote 58c for single barrels, net 30 days.

LINSEED OIL—Shipments are now showing up strongly, the mild weather having induced more painting. It is reported that the scale of prices are pretty well adhered to, and we quote: Raw 1 to 4 barrels, 59c; 5 to 9 barrels, 58c; boiled, 1 to 4 barrels, 62c; 5 to 9 barrels, 61c. Strictly net, 30 days.

GROUND WHITE LEAD—Shipment are more encouraging than for some time past, and the markets are very firm. We quote: Strictly pure, $5.50 to $6, according to brand, and No. 1, $5 to $5.50 f.o.b. Montreal.

RED LEAD—A nominal inquiry is apparent, and figures for large quantities show some tendency to ease off. However, for ordinary lots we continue to quote: Genuine red lead in casks, $4.50; in 100-lb. kegs, $5; in less quantities, at $6 per 100 lbs.; No. 1 red lead casks, $4; kegs, $4.50, and smaller quantities, $5.50.

VARNISH—The past week has been characterized by an increasing demand for No. 1 furniture varnish, japans, hard oil finish, and shellacs. A most satisfactory business is being done.

PARIS GREEN—A light but steady demand is showing. Not much improvement is expected until later on. There is no change, and we quote: 1-lb. packets, 100 lbs., in case, 21c; 1lb. packets, 50 lbs., in case, 21½c; ½-lb. packets, 100 lbs. in case, 23c; 1-lb. tins, 100 lbs. in case, 22c.

WHITE ZINC—The better movement in white lead is reflected in this line, and the output is reported much more satisfactory than for some time past. There is no change and we quote: Dry V.M. Red Seal, 7½c; Red Seal, 7c; French V.M., 6c; Lehigh, 5c; white zinc, ground in oil, pure, 8½c; No. 1, 7c; No. 2, 5¾c.

PUTTY—This article does not seem to show the improvement noticed in the other lines. Stocks appear to be heavy, and shipments are light. We quote: Standard putty, 880-lbs. casks, $1.65; in 100-lbs., drums, $1.90; bladder putty, 400 lbs., in barrels, $1.90; in 100-lb. cases, $2.05; in 25-lb. drums, $2; 25-lb. tins, $2.05; 12½-lb. tins, $2.25 f.o.b. Montreal.

TORONTO.

March 5.—Some improvement is noted in paint lines this week. Prices are steady and unchanged, and jobbers are experiencing a better demand for products of all kinds. Orders are coming in freely and since the beginning of the month some good shipments have been made. The country is taking its share of stock and it looks as if we were at the beginning of a new era of good business.

Though the weather for the moment is unpropitious, signs of spring are evident in the improvement of business. Travelers report trade improving in all districts and the building permits all over Canada are much more numerous than they were a year ago.

TURPENTINE—In regard to turpentine there still seems to remain some of the old stock on hand at Savannah. The price is steady. The statements that have been made that the amount of turpentine produced was declining do not seem to have much foundation, as in the year 1908 it is now stated from the best American statistics that the product amounted to 36,589,000 gallons, as against 34,180,000 gallons in 1907,

70% Lead
30% Zinc

100% Pure

All Pure Paint

This little sum in addition, sums up the whole paint situation, and is the correct answer to the question. "What is the best paint to handle?"

"English" Liquid Paint shows a guarantee formula label, stating, that the white base on which the paint is made is 70% pure White Lead (Brandram's B.B. Genuine) and 30% Pure White Zinc. All Pure Paint.

You will find "English" Liquid Paint very profitable to handle, and it is backed by a unique forceful advertising campaign.

Just send us a postal card for prices and selling plans.

BRANDRAM-HENDERSON, LIMITED

Montreal Halifax
St. John Winnipeg

MURESCO

Is Something You Can Strongly Recommend

For mural decoration, because it is economical, sanitary, clean, artistic and durable—five sound talking points.

This Spring you are, of course, going after the painters' trade, and there is no more reliable, profitable and mutually satisfactory line you can push than Muresco.

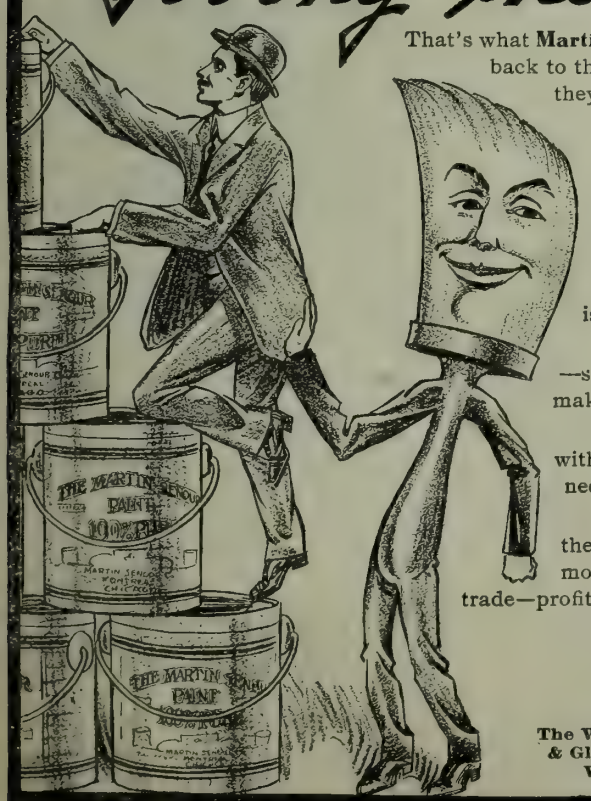
You may easily build up a big, rapidly moving business in Muresco, because beyond a doubt it is the finest water color wall finish on the market, containing thirty per cent. more water than any other preparation. One coat in most cases is sufficient.

Have you sent for our color cards and prices?

BENJAMIN MOORE & COMPANY, Limited
WEST TORONTO, CANADA

New York **Chicago** **Cleveland**

Giving the Dealer a Boost



That's what **Martin-Senour** Paint is doing. People are so **pleased** with it, that they come back to the dealer for **more** and incidentally for **other** goods. And why shouldn't they be pleased with Martin-Senour Paint?

It is the most durable—best looking—and most **economical paint** on the market. Don't you want to sell paint like that? Paint that pleases the buyer and attracts the passers-by? Of course, you do. Well then,

Martin-Senour Paint
100 Percent Pure

is the paint for you to sell.

It's pure—that's why it's the best. Test it any way you like—for purity—spreading qualities—wearing qualities and everything else that goes toward making the best paint.

Martin-Senour Paint satisfies every time. The man who paints his house with Martin-Senour Paint this year will come back for more the next time he needs paint. And every time he gets a chance he'll **boost** Martin-Senour Paint.

Mr. Dealer, are you selling all the paint that you ought to? If you're not, there must be a reason. You're not handling the paint that pleases best and most! Try Martin-Senour Paint and you'll increase your paint trade—regular trade—profits, because it **satisfies.** Write for our "Business Boosting Plan," terms, etc.

The MARTIN-SENOUR CO., Ltd.,
Pioneers of Pure Paints

Montreal **Chicago**

The Winnipeg Paint & Glass Co., Ltd., Winnipeg

The Maritime Paint & Varnish Co., Ltd., Halifax, N. S.

For the past three months the demand has been rather limited, but it is expected as the spring season opens the demand will be increasing and it is very likely there will be a slight advance in prices. Local prices are still at last week's figures: Single barrels are 60c; 2 to 4 barrels, 59c; and 5 gallon lots, 65c.

LINSEED OIL—In linseed oil there appears no change at the present time, though one crusher reports a firming up and has increased prices one cent above our market quotations. The price in England seems, if anything, a trifle weaker, it is yet much too high a price to import to Canada, consequently the Canadian trade must be wholly dependent upon the home production and as the price for flaxseed has advanced further there does not appear to be any likelihood of a change in the near future. Raw is still 59c and boiled 62c for single barrels, and 5 barrel lots are quoted at 1c less.

GLASS AND PUTTY—Prices and conditions are unchanged in both these lines. Glass continues scarce and quotations high, with little demand. Putty is a little freer in demand, but prices are unchanged.

WHITE LEAD—No. 1 is $5.40 to $5.65; pure white, from $5.80 to $6, and a superior line is offered at $6.25. In red lead the movement is chiefly of a jobbing order. Genuine is quoted at $4.50 for casks and $4.75 to $4.80 in 100 lbs.

PARIS GREEN—Barrels at 20½c and 25-lb. drums 21¾c., are the quotations this week, which are unchanged from last week. Demand is quiet just at present, though since the beginning of the year some good sales have been made.

STAINS AND VARNISHES—Manufacturers report business expanding, and they speak optimistically. Prices are firm, and demand is good.

PETROLEUM—Still in splendid demand are petroleum lines at unchanged prices. Prime white is 13½c; water white, 15½c, and Pratt's astral, 17½c.

THE SMALL PURCHASER.

Don't despise the small purchaser. He may surprise you some day with a big order. Many a man hesitates to ask for five or ten cents' worth of any material, and many a clerk gives such an order a contemptuous reception that makes the buyer feel decidedly uncomfortable. Yet there are times when one needs only a very small quantity—when a purchase of a little at a trifling cost is more of an accommodation to the buyer than the filling of a large order. At such times courteous treatment on the part of the clerk is doubly effective. And the man who is treated politely when buying little is likely to return when he happens to need much.

It has been well said that prompt, willing attention and courtesy will often make more of an impression on the five-cent purchaser than on the customer whose order runs up into the dollars. The first customer knows that he is not favored because of a liberal purchase. He is pleased because he is getting as much attention and courtesy for five cents as he could get for five dollars. He is just as much a customer as the man whose purchase swells the day's receipts.

It is the little things that count. It is the little sales with a little good salesman that make a small store grow big. The smile, the "Good morning," the "Thank you," the "Come again," are little things that count. Business grows and thrives on just these little courtesies. When the salesman says, part in words and part in manner, "Come again; it gave me pleasure to wait on you," most likely the customer comes again, and again, brought back by a little thing, a little diplomacy.

HINTS FOR THE DEALER.

Don't pause when business is slow. Keep going. Rearrange your stock. Be dissatisfied with the way they were displayed yesterday and rearrange them.

Don't ask your customers why they quit when they desert you. Take them around some new and novel item which might appeal to them; outline its merits, beauty, etc.

Don't use stereotyped phrases in speaking of the merits of your goods. They become stale and frequent customers tire of them. Make use of expressions which mean the same, then your conversation becomes almost as interesting to the customer as the article on which you are talking.

Don't imitate the ideas of your competitor. Go and see them and let them serve as ideas on which to improve.

Don't try to wait on two customers at the same time. Devote your whole time and thought to the first customer; finish as quickly as possible without hurrying him. This is accomplished through knowing your stock and talking to the point.

Don't forget to remind a man about the brushes when he is buying paint.

Don't try to remember orders in your head; pencil and paper are cheap.

PAINT NOTES.

The 25th annual (silver jubilee) convention of the International Master House Painters' Association was held last week at Baltimore, Md. Canada was represented by 21 delegates and three guests, Wm. Burden, of the E. Harris Co., Toronto; H. Clucas, the Canada Paint Co., Toronto; and W. G. Francis, the Benjamin-Moore Co., West Toronto. The party occupied a special car from Toronto to Baltimore.

E. Fielding, Toronto, has been appointed Ontario representative for the Wilckes, Martin, Wilckes Co., New York, makers of "Bear Germantown Lampblacks."

The congregation of Bell Street Methodist Church, Ottawa, are contemplating the erection of a new building. It has not yet been decided whether to erect a new church and hall or only a Sunday school hall.

Answers to Correspondents

ANXIOUS ONE:

"Please say what is "Cumoff?"

ANSWER:

"CUMOFF"

is the

Paint and Varnish Remover

for use on

Wood or Metal

Removes Old Paint, Varnish, Shellac or Enamel, leaving the surface ready for refinishing.

Will not raise the grain of the wood.

HAS NO DISAGREEABLE ODOR.

Will not injure the hands. Will not destroy the brush.

Will undoubtedly increase your trade as "Cumoff" is an article long wanted by every painter.

Specially useful on Mouldings, Carving and the refinishing of old frames or Cabinet Work.

CURRENT MARKET QUOTATIONS.

March 6, 1909

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for larger quantities and prompt pay. Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate.

Read a Few of the Comments of the Leading London Dailies on the Supremacy of the Ross Rifle at the 1908 Bisley Meet.

"Long range Champion, breaks all records, a rifle of wondrous precision." *London Morning Post, July 16th.*

"Records broken at Bisley. A fine Canadian rifle." *London Daily Express, July 16th.*

"Record scoring with the Ross rifle." *London Daily Telegraph, July 15th.*

"Champion of the year." *New York Herald, July 16th.*

"Performance phenomenal by the Ross rifle." *London Field, July 18th.*

"The new Canadian rifle has made an unexpected and altogether successful appearance." *London Daily Mail, July 15th.*

"Great triumph for the Ross rifle which has beaten all the world's rifles." *London Standard, July 15th.*

"Many experts declare that Ross rifle better than new U.S. Rifle." *Nottingham Guardian, July 17th.*

"An individual triumph, the Lee-Enfield hopelessly beaten." *London Morning Post, July 15th.*

"The Ross rifle achievements were truly remarkable." *London Evening Standard, July 15th.*

"Great victory for the Ross rifle from Canada." *London Daily Express, July 15th.*

"The rifle of the future is the Ross rifle." *London Times, July 16th.*

"A 'plague of possibles' with the Ross rifle." *London Sphere, July 15th.*

We Have Protected the Trade for 24 Years.

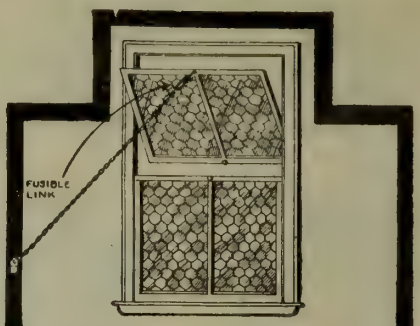
A handsome steel siding for all kinds of building purposes; supplied either Galvanized or Painted.

OUR ROCK FACED STONE

is fire and damp proof—resists all weather conditions—is very reasonably priced—and can be so easily applied it gives universal satisfaction.

Find further facts about it in our catalog.

Metallic Roofing Co., Limited,
Wholesale Manufacturers,
Toronto, - - Canada



FIRE-PROOF GLASS WINDOWS.

They give absolute security—resisting intense fire heat, as well as the action of water.

Arranged to open with this "fusible link" attachment, they close and lock automatically if a fire occurs—150° melts the link—thus giving complete and perfect protection.

This "wired glass" admits the light as freely as plain glass—is rather ornamental in effect, and greatly lessens insurance rates.

Full information if you write

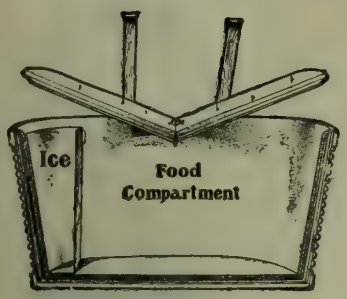
The Hawkeye Refrigerator Basket

KEEPS CONTENTS ICE COLD



It is Built Like an Ice Chest

Indispensable to the full enjoyment of a Summer Outing

WHITE ENAMEL LINED

We help you to sell Hawkeye Refrigerator Baskets. We will supply every purchaser with an electrotype like the illustration above on request.

This is the most convenient commodity we have ever seen. They have only been on the market a year, and you will find them with all the first-class Sporting Goods Houses, Fine Grocers, Automobile Supply Houses, and General Hardware Stores in the United States, you will find them advertised in Collier's, Saturday Evening Post, Everybody's, Country Life in America, Motor, Recreation, Outing, Outdoor Life, Field and Stream, Vogue, Life, Theatre Magazine, Outdoors, Literary Digest, Sports Afield, etc.

These advertisements will create a wide-spread demand so buy a saleable and profitable article before your neighbor.

We have hundreds of Testimonials like the following:

The HAWKEYE REFRIGERATOR BASKET I purchased of you last year was one of the best investments I ever made. It is simply great. For fishing, yachting, picnicking or automobiling it fills a long-felt want. If I could not get another I would not take $100 for mine. Wishing you all success.

Cordially yours,

DR. R. F. C. BROWNE,
176 Broadway, Providence, R.I.

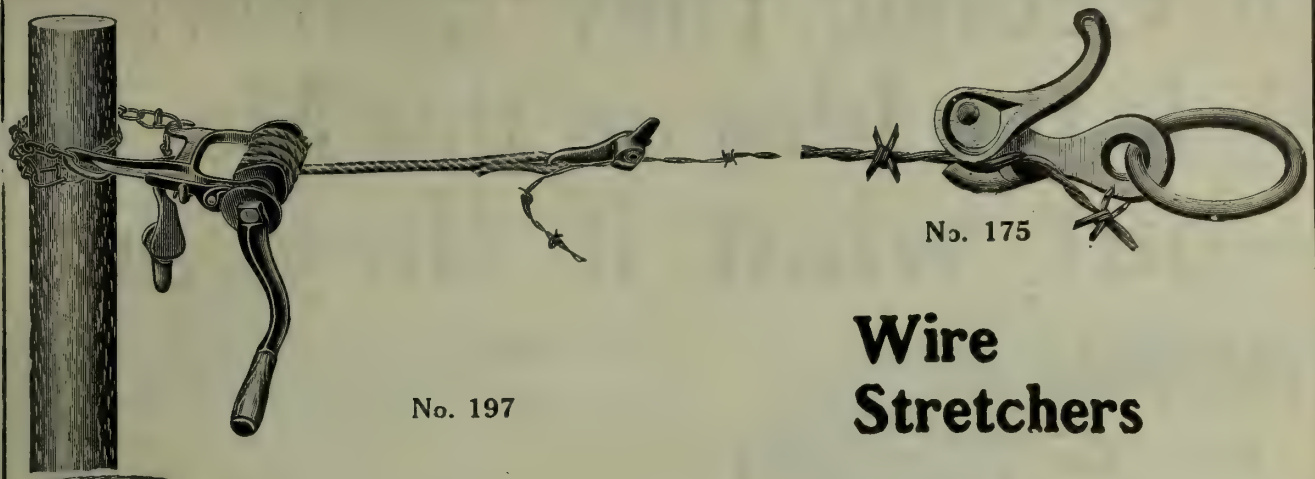
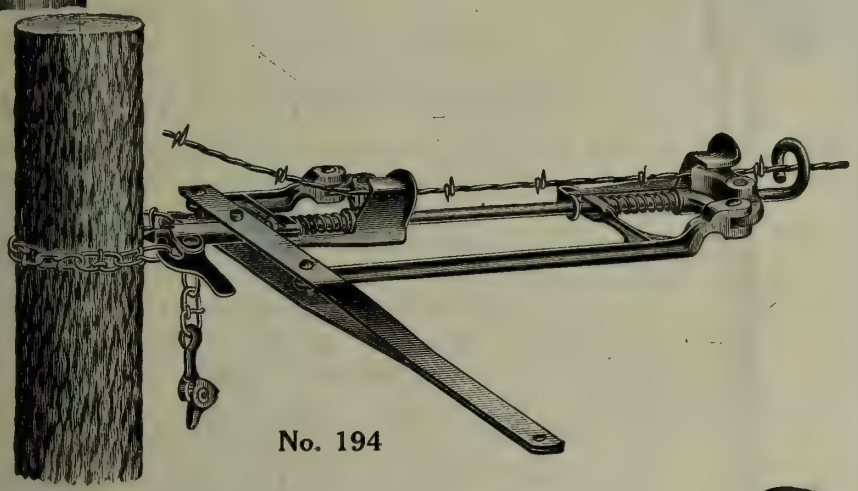
Montreal, ...



No. 175

No. 197

Wire Stretchers



No. 194

are articles that you should have in stock ready for the fencing business that is always done in the spring. Unless you have the goods in stock you can hardly expect to make sales. Neither can you expect to make as many sales nor please as many customers unless you have a variety of lines to offer, and those of a kind that will do the work they are intended to do.

The stretchers shown here are only a part of what we stock and are all we could show on this page. These, however, are the ones in most demand and you could satisfy almost any of your customers with these. Our travellers will show you the complete line in their catalogs or write us and we will quote you.

BUT, ORDER EARLY

Caverhill Learmont & Co

Hardware, Iron and Steel

Head Office and Warehouse, MONTREAL. Warehouse at WINNIPEG, MANITOBA.

Showrooms, TORONTO, 77 York St. OTTAWA, 111 Sparks Street,

QUEBEC. FRASERVILLE.

Of Course, They Deliberately Stole the Idea on this Machine —but what if they did!!

The Stewart is THE HORSE CLIPPING MACHINE that Horse-Owners have been educated to buy and use.

We give a POSITIVE GUARANTEE that this Machine is all we claim.

Money is instantly refunded when asked for.

It Merely Shows

the Stewart Horse Clipping Machine was constructed on the only correct mechanical principle. It proved the Stewart was the one that horse-owners wanted. It was testimony to Stewart superiority.

The Buyer Wants the Best

For the Britisher, who **loves fair play,** and the shrewd and discriminating buyer—and seller—of horse clipping machines wants the **best** machines, whether they're made in America, Britain, Germany, France or any other country on earth.

If you buy horse clipping machines as a **business** proposition buy Stewarts. But if you do business on **sentiment,** buy the other kind. That's all.

Something They Couldn't Steal

When they pilfered the idea they couldn't pilfer the manufacturing process. That was impossible, because Stewart Horse Clipping Machines embody **experience,** the **highest** quality and most **durable** materials it is possible to obtain. The gears are made out of cut steel (not cast), and are file hard. To facilitate easy running they are enclosed in an oil bath.

How We Bring Trade to Dealers

We offer more inducements to the hardware dealer to stock the Stewart Horse Clipping Machines than any other manufacturers in the world. Besides telling every horse-owner in America and Canada to clip his horses, and to clip them with a Stewart machine, we tell them to buy from their **local dealer.** To help the dealer make the sale we give him individual advertising. He is furnished with all the booklets, circulars, hangers, etc., he wants, **and has his name printed on them, FREE.**

Every jobber in Canada carries this line. Order from your jobber.

Congo Roofing

Thickness	Width	Weight of 108 sq. ft.
1 Ply	36-in.	35 lbs. per roll
2 "	36-in.	43 " "
3 "	36-in.	55 " "

Congo Roofing

There is one kind of ready roofing which is absolutely waterproof and meets all the requirements of a ready roofing

that is

Congo Never-Leak Roofing

It is not only waterproof, it is also proof against heat, cold and acid fumes.

The strong point about Congo is the wonderful pliability. It bends like rubber, looks like it and keeps the water out the same as real rubber would.

CONGO
NEVER-LEAK
ROOFING

It's proof against water, acids, alkali, climate.

It's a most excellent fire resistant. It is odorless and will not taint water.

Easily and quickly laid by anyone.

Suitable for flat or steep roofs.

A Roll includes Cement, Caps and Nails for applying. Each roll contains 108 square feet sufficient to cover 100 square feet and allow for 2 in. lap.

H&R Guns and Revolvers

For over thirty-six years their superior shooting qualities accuracy and dependability have been universally recognized.

Sold the World Over

We want you to have our *new* catalog showing complete line and giving valuable selling points

Here is our three-piece gun, which we call Model 1908. Built on the same lines as our famous Model 1900 in 12, 16, 20 and 28 gauge. This new gun is taken down in the same manner as a double gun—by pulling off the snap fore end and unhooking the barrel from the frame.

Notice the Target Grip

Light, compact, durable. The first combination of a medium priced revolver with *a perfect full grip*. Prevents slipping and twisting—insures a secure hold, because it fits the hand naturally, insuring confidence, which means a steadier aim and greater accuracy in the shooting.

Harrington & Richardson Arms Co.

515 Park Avenue, Worcester, Mass.

Eclipse Roofing

FOR ALL
CONDITIONS OF
ROOF OR WEATHER

A
WATERPROOF—ODORLESS
ACID AND
FIREPROOF ROOFING

A perfectly high grade roofing. Reliable and durable. The cheapest kind of roofing, it excels all others in its powers of resisting all unfavorable weather conditions. Each roll contains sufficient nails and cement to securely fasten it in position.

Every up-to-date dealer should carry a stock of ECLIPSE ROOFING. It will increase the reputation of the one who sells it and will be found one of the most profitable lines.

THE "PANSY" BROOM IS A GOOD BROOM

and being made out of the best broom corn is one that will give compensation and repay seller and purchaser alike much more in satisfactory service.

Look for the individual wrapper every time.

Any new broom will sweep clean for a while but how long.

That's a question. Now one of our high class Pansy Brooms will outwear three of the common sort.

You want a broom that is the right style, weight and size.

One that is durable, springy and of the workmanship that will stand wear and tear.

"Buy from the makers."

CLINCH THE ARGUMENT

By explaining that Dillon Hinge Stay Field Fence is away ahead of all others. Nothing just like it. The hinge-in-the-stay relieves any strain on the strand wires. In a straight stay fence the laterals are always being broken by the weather, ice, snow, animals and from other causes. No fractured wires in our fence. It will stand any test or abuse because the strain is on the hinges only.

Produces More Sap than any other make

"Runs Sap Early and Late"

Strongly made of Malleable Iron—will not break.
No rossing of the trees necessary—no injury to the bark.
The construction gives it a greater sap saving capacity than any other spout.
No wind or weight of sap in the bucket can pull the spout out of the tree.
It does not leak and is easy to insert and just as easy to remove.

GREAT SELLERS

Royal Oak Refrigerators

This line represents perfection in refrigerator construction. The walls consist of light, tightly packed layers. First, the outside case of thoroughly kiln-dried oak or ash, then a layer of insulating sheathing, an air space, another layer of insulating sheathing, a packed layer of mineral wool, another layer of insulating paper, then lumber seven eighths of an inch thick, then the inside lining of Galvanized Sheet Steel or Porcelain or Opalite as the case may be. Couldn't be more honestly constructed, could they? Result—proper refrigeration, ice economy. It'll pay you to handle such an excellent line. Catalogue on request.

Our Manufacturing Facilities

Represent Sixty-one Years of Obeying the Call: "Wanted --- More Goods with the Name 'McClary' on"

A Nine-Acre Floor Area

Sixteen and one-half acres of London, with additional branch plants, is the domain in which we transact business, in which we hold the confidence of dealers all over Canada.

In the Enamelware Plant, wherein are produced "WHITE" WARE, "CANADA" WARE, "IMPERIAL" WARE, and an assortment of lines which it takes a three hundred and fifty-two page catalog to describe, we require a floor area of nine acres, with a great big sprinkling of humanity.

Every stage in the procedure of tinware or enamelware making is the result of careful study and perfect-working dies, ovens, etc.

We do every bit of the work ourselves. That is why we are emphatic about the genuine value of our guarantee.

Famous Stoves Known Everywhere

In our Stove Plant we have a floor area of seven and one-half acres. Here are produced the FAMOUS line of stoves and ranges known and sold in nine provinces.

This plant is ideally laid out, the minimum amount of time and cost following every procedure from the melting to the mounting.

The air in the shops is drawn away every few minutes, being then clarified and re-circulated.

How Orders Are Influenced

Some dealers may think these facts have no bearing on the selling value of our goods. That is just a great big mistake.

An artisan is not complete without his tools. A company is not complete without its facilities.

A Comparison and a Moral

A good artisan with poor tools is no better than a poor artisan with good tools. Likewise a company.

But when we start an artisan off with right tools, or a company with the right manufacturing facilities, we have got the necessary start on the Road to Pleaseville.

The brains that must back manufacturing facilities up — that we will look into next week.

So Point No. 1 in favor of a dealer purchasing McClary products is The Capacity and Exactness of McClary Manufacturing Facilities.

Every Little Bit Helps!!

Mr. Hardware Man,—Don't you often find that the "little sales" of the day are a big feature in the day's receipts and are often the lever to larger sales?

The Kaiser Wax Pad and Iron Cleaner

is a "little thing"—retails at 10 cent—but it is a household necessity, something entirely new on the market, a quick and big seller, with a good profit.

Every housekeeper dreads ironing day, especially so when she has a lot of shirt waists, men's shirts, collars, cuffs, etc. to iron, she always wants to obtain a high-grade finish, equal to first-class laundries. She of course asks the dealer for advice—in return he offers her the common wax—She knows it is impossible to do good work with the common wax—So she walks away—one customer lost.

Now where she can procure an article of this merit—that reduces ironing time by half—reduces labor to a minimum—adds to the finish of clothes—and makes ironing a day of pleasure—THERE SHE IS SURE TO DO HER BUYING—AND LEAVE HER ORDER FOR OTHER THINGS.

A post card to any of our Canadian agents or direct will bring a sample of this great little business getter.

The Business Man and Law Reform Bill

How the Merchants of Ontario Will Benefit by the Provisions of the New Measure—The Wider Jurisdiction of County Courts as Proposed and as it is To-day—Curtailment of the Number of Appeals—The Contract System Between Client and Lawyer as to Costs Sanctioned—Other Features of the Bill.

As long as law governs all men are subject to it. They cannot get away from its provisions much as they would like to, owing to its costly character, vexatious proceedings, tedious delays, irritating appeals and uncertain results. The trouble hitherto has been that many a business man has chafed under a palpable injustice or silently suffered gross wrong because he did not care to rush into litigation. In the first place, he had no definite idea where an action once begun, would terminate, and in the second place, the expense involved is of such an uncertain nature that the costs of the court, not to speak of solicitor's fees, have financially crippled many an otherwise prosperous and peaceful citizen, who has sought to keep out, of, but has been drawn into, the legal maelstrom.

Reforms are frequently agitated for years before they are realized, but, after public attention and interest have been aroused and various Associations have taken up the matter, a law relief measure has at last been introduced in the Ontario Legislature by Hon. J. J. Foy, Attorney-General. The bill has not been printed as yet and will not be specifically discussed and its various details considered in the House until it comes up for its second reading.

It is, however, only natural that any reform of the law which promises to curtail appeals and legalize legal business with a consequent lessening of lawyers' costs, should receive criticism from at least a portion of the legal fraternity. The measure introduced by Mr. Foy, on the other hand, ought to be that much more valuable from the ordinary litigants' standpoint. So far as at present understood, it should produce a simplification of the law that is highly desirable.

Four Main Features.

Stripped of their legal phraseology the main features of the bill are :

The abolition of appeals to the present divisional court.

Limitation of appeals to Privy Council.

Increased jurisdiction for county and district courts.

Contracts between solicitors and clients made possible.

Two branches of supreme court of judicature established to embrace divisional courts.

The question naturally arises what benefit or advantage will the proposed alterations be to business men.

Mr. Foy, the accredited framer of the document, was seen by a representative of this paper. The Attorney-General said that he had been an exceptionally busy man with the measure and had been besieged by so many interests, legal and otherwise, that he was not able to partake of his meals without interruption. He added that he had not a word to say in defence or criticism of the bill and would offer nothing in the line of comment until it came up for its second reading. Mr. Foy firmly, but politely, declined to state whether or not it would afford relief to merchants who may find it necessary to go into the law courts.

No Division Court Changes.

There is no change made in the Division Court, and its powers remain the same. These are : (a) All personal actions where the amount claimed does not exceed $60. (b) In any personal action if all the parties consent thereto in writing and the amount claimed does not exceed $100. (c) All claims and demands of debt account or breach of contract or covenant or money demand, whether payable in money or otherwise, where the amount or balance claimed does not exceed $100. (d) All claims for the recovery of a debt or money demand the amount or balance of which does not exceed $200, where the amount or original amount of the claim is ascertained by the signature of the defendant (or of the person whom as executor or administrator the defendant represents). The accrued interest upon any such claim is also included.

The Ontario Retail Hardware Association is seeking an amendment to the present act, whereby accounts under $25 may be collected by garnishment and accounts under $10 may be collectable before a magistrate. Mr. Foy has promised to give the request careful consideration.

Section 180, Chap. 60, R.S.O., 1897, now says : "No debt due or accruing to a mechanic, workman, laborer, servant, clerk, or employe, for, or in respect of, his wages or salary, shall be liable to seizure or attachment under this act or any other act relating to the attachment or garnishment of debts, unless the debt exceeds the sum of $25, and then only to the extent of the excess."

Section 181 reads : "Nothing in the next preceding section contained shall apply to any case where the debt has been contracted for board or lodging, and in the opinion of the judge, the exemption of $25 is not necessary for the support and maintenance of the debtor's family, or where the debtor is an unmarried person having no family depending on him for support, and the debt was contracted on or after the 23rd day of March, 1889."

County Court Powers.

The jurisdiction of the county courts has been greatly extended and under the terms of the new bill county and district judges will have a great deal to do. Their positions will be much more responsible and their duties more onerous. This is a change, which, in the opinion of many, will benefit the business man and, while the advances are not as great as some may have desired, still a half a loaf is better than no bread.

The changes in brief are :

In all causes and actions relating to debt, covenant and contract, to $600, where the amount is liquidated or ascertained as being due, by the act of the parties or by the signature of the defendant. The amendment raises the amount to $800.

Personal actions, except actions for criminal conversion, libel or slander, up to $200. This sum has been raised to $500.

Trespass or injury to land where the value of the land is not over $200. The amendment makes the sum read $500.

Actions of replevin or for the recovery of property, real or personal, where the value of the goods or effects distrained, taken or retained does not exceed $200. The amendment raises this figure to $500.

In sale or foreclosure proceedings up to $200 ; now changed to $500.

Partnership actions where the capital involved does not exceed $1,000. This is raised to $2,000.

Legacies and interest up to $200, where the value of the estate does not exceed $1,000. These figures are altered to $500 and $2,000, respectively.

All other actions for equitable relief where the sum does not exceed $200. This is made to read $500.

Creditors' claims not over $400 will henceforth rank as $500 in amount.

Lessening Number of Appeals.

The number of appeals is also discouraged and the intention and spirit of the act is evidently to obviate a too often ruinous proceeding to the loser. The sum is elevated from $4,000 to $10,000 on which appeal may be made to the Judicial Committee of the Privy Council, except where constitutional or other highly important points are at issue.

In plain language the amendment on this phase of the matter says :

"Appeal by right to the Privy Council is abolished, and leave to appeal granted by his Majesty is also abolished except where some constitutional matter is concerned, where the matter in controversy exceeds $10,000 in value exclusive of costs, where the questions involved affect rights or interests of such magnitude or importance as to warrant an appeal and the Divisional Court so certifies, and where the liberty of the subject is involved. In other words, the amount upon which appeal can be taken is increased from $4,000 to $10,000.

Court of Two Branches.

The divisions and Divisional courts of the present High Court of the province are also abolished and in their place are established two branches or divi-

sions of the Supreme Court, to be known respectively as the Appellate and Supreme division of the High Court. The Court of Appeal hereafter will be known as the Appellate division, and the bill states that this division is not to be known as a new court, but only as a division of the Court of Appeal. The High Court is to be known as the High Court division of the Supreme Court, and shall not be regarded as a new court.

All jurisdiction power and authority now vested in the Court of Appeal or Divisional Court shall be vested in the Appellate division and there shall be as many divisions of this as shall be necessary to dispose of business.

Neither the Chief Justice nor any of the present judges of the Court of Appeal shall without his consent be arraigned to any duty except sitting on appeals.

Appeals to the Appellate Court may be heard by four judges, except as to controverted election appeals under the criminal code.

A high criminal court will sit in Toronto monthly except during vacation giving ten sittings a year instead of four, thus facilitating the clearing away of criminal business.

Contracts With Lawyers.

Many a business man has been deterred from prosecuting a just claim on entering an action in defence of his rights as, with the way opened for so many appeals and the unknown costs of the court, especially of lawyers—he had no idea of what the outlay would be. The probable expense has held him in check. Under the new measure it is permissible for a client to enter into a contract with a lawyer whereby a case will be carried on for a fixed sum so that the former will enter litigation with his eyes open and know at the outset what a case will cost. Some lawyers strenuously object to this provision and say that, although the practice is in operation in certain states in the Union it cheapens the profession. Mr. Foy's amendment, however, declares that no solicitor may purchase an interest in his client's action. This is simply the re-enactment of the present law to prohibit the taking up by solicitors of cases on speculation.

The provision in the new act sets forth that, subject to sections 30-46 of the Act a solicitor may make an agreement in writing with his client stating the sum the latter is to pay him for his services in lump sum, salary, or otherwise. Where, however, the solicitor serves his client in any but the Division Court the sum he shall receive for his services shall first be allowed by the taxing officer, should the taxing officer consider the amount unfair he shall have authority to submit it to a judge who may reduce it as he thinks proper and tax the costs in the usual way.

The solicitor is limited to the amount mentioned in the agreement, and this agreement does not free him from liability for negligence or improper conduct during litigation.

No formal action shall be brought on such an agreement, but summary application may be made to a judge who, if he thinks it fair, shall allow it, if not may declare it void.

This measure will it is said, aid litigation as by reason of it the lawyer and client will know exactly where they are at. The contract system between the client and lawyer resolves itself into a straight business proposition. A disputant, when he begins an action does not know whether it is going to cost him $10 or $500, but if the measure carries, he will to his solicitor be able to say: "Here, Smith, how much will you take and see this matter through?" Smith will name his figure and if satisfactory there is an end to it, so far as lawyer's fees are concerned, and a better understanding should prevail.

Speaking from the standpoint of a business man it would appear that simplicity and decentralization are aimed at in the fairly broad measure of law reform. Both are valuable points to the litigants, and they have a strong claim to some consideration. While not as advanced a measure as originally outlined, Attorney-General Foy is evidently proceeding on right lines.

In speaking of law reform it has been asked why it should not be the aim of all interested to work out a code of laws, and state them so explicitly, that all would know them and understand them, leaving to the courts only the task of sifting evidence as to facts? Facts will always be in dispute where self-interests clash, but why should there be eternal disputes as to laws and their meanings? Echo alone answers why?

Will Lawyers Reform the Law?

W. K. McNaught, of the American Watch Case Company, and representative of North Toronto in the Legislature, when asked his views regarding the proposed measure of law reform, said that he had not had an opportunity of examining the bill closely, but so far as he had been able to get information he thought the measure as a first instalment was a very fair one, but, of course, it did not go as far in the direction aimed at as many would like to see.

"My own opinion," he declared, "is that you will never get law reform from lawyers. Mr. Foy is a careful, cautious representative and is not apt to err on the side of going too far. I hold that if a government is anxious to get a general, free and purely disinterested expression of sentiment they should, in a matter like law reform, go to boards of trade, and business men's associations. I would, if dealing with such a far-reaching question, where all classes of people are affected, appoint a royal commission to take evidence from merchants, laborers, mechanics, manufacturers, farmers and others, the same as a tariff commission hears evidence and, on this bases its report and recommendations. The manufacturers alone are not allowed to make the tariff, neither should law societies be permitted to say what the law shall be. Yes, I am strongly in favor of appointing a commission. These are my views on law reform generally and how I would proceed about it; and not a criticism of the present measure, which I have already pointed out, has not been discussed in the House or even printed, therefore, I am not sufficiently familiar with the proposed alterations to discuss them intelligently as to how they would or would not benefit business men."

Hardware Letter Box

Any questions on trade subjects will be answered by the editor in this department. Do you want any address, any special line of goods, anything relating to the hardware trade? Ask us. Letters from manufacturers, jobbers, travelers, retailers or clerks are solicited. Suggestions for trade improvement or discussions on trade evils are invited.

Tweeddale & Co., Fredericton, ask for the names and addresses of manufacturers of hammered brass and copper novelties.

The Jas. Morrison Brass Mfg. Co., Toronto, is one manufacturer of these goods.—Editor.

S. B. Merrill, Enterprise, Ont., asks the names of makers of cream separators in use in Ontario.

The De Laval Mfg. Co., Montreal, and the Raymond Mfg. Co., Guelph, are makers of these articles.—Editor.

Patterson & Hilborn, Drayton, Ont., inquire where they could secure rubbers for the Oxford cream separator.

These rubbers, we are informed, can only be secured from the makers, the Oxford Cream Separator Mfg. Co., Woodstock, Ont.—Editor.

Electric Light Fixtures.—Tweedale & Co., Fredericton, N.B., ask for the names of manufacturers of electric light fixtures in Canada.

The James Morrison Brass Manufacturing Co., Toronto; Canadian General Electric Co., Toronto, and Robert Mitchell & Co., Montreal.—Editor.

TOOK THEM FOR RUBES.

A good joke is being told upon W. G. Francis, Harry Clucas and Wm. Burden, and other Toronto delegates who visited New York in connection with the Master Painters' Association convention at Baltimore, Md. Returning by way of New York, two or three of them met on Broadway, and essayed to cross this busy thoroughfare. They waited for about half an hour, afraid to take the risk of crossing, and then a stalwart policeman, seeing their predicament took pity on them, and said in a fraternal tone, "come across with me, boys. Don't be afraid! You will be as safe as you would be in your own village!"

TOOL HANDLE IMPORTATIONS.

In reply to a question asked in Parliament as to the number of hickory and ash handles for pitchforks, axes, hoes, hammers, imported into Canada during the year ending March 31, 1908, the Minister of Customs stated that D. shovel handles valued at $67,633; ash handles, $61,109, and hickory handles, $35,598, were imported during that time. The largest number of shovel handles came in through Gananoque,; St. Catharines imported the most ash handles, and Vancouver the largest number of hickory handles. The total duty on these goods amounted to $34,301.16.

Retail Hardware Association News

Official News and Correspondence on Association Matters Should Be Sent to the Secretary of the Ontario Retail Hardware Association, 10 Front Street East, Toronto, and Matter for Publication in This Department Addressed to the Editor of Hardware and Metal, Toronto.

THE TRIP TO MONTREAL.

Although only about one quarter of the members have been heard from the response to the request for their opinion on the advisability of arranging a summer trip to Montreal has been sufficiently large to warrant the executive in going ahead with the proposition subject to final ratification later on.

About forty members have stated that they will likely take their wives with them on the trip and about a dozen have signified their intention of going in single harness. With this expression of opinion there should be no difficulty in securing about 300 when the plans of the trip are definitely announced.

Many have expressed a desire to charter a boat and make the trip from Toronto to Montreal by water. This is hardly feasible, however, as August, the suggested time for the trip, is the busiest boat tourist month of the year and no boat company would grant special rates at such a time when they can get plenty of full fare passengers. Then, again, many of the members who would go live east of Toronto.

The secretary will look into the possibility of securing special railway rates going to Kingston or Prescott, with a boat trip down the St. Lawrence River and Rapids, and returning by all rail.

WHAT ONTARIO HARDWAREMEN SAY.

"I enjoyed the meeting at Hamilton very much, being greatly impressed with the address of Mr. Lariviere, every sentence being good advice and to the point, particularly the advice against over-buying for an extra 5 per cent., I have been trying to follow this and the other suggestions given. Will be very pleased to go to Montreal in the summer if a trip can be arranged, and will likely take the family."—W. T. Walker, Cobalt.

"As you are aware, our firm was one of the first to secure the rubber stamp, as below, and are pleased to say that we have had excellent results from it, nearly all the firms agreeing to allow us the cartage."—An Eastern Ontario Firm.

"A number of travelers have spoken to me since my arrival home, stating that their firms intend having an exhibit at our convention next year, and from what I can hear, the exhibits will be two to one in comparison with this year."—W. W. Chown, Belleville.

"Do you think that the Montreal trip would injure our regular annual convention attendance? We must and will have a bumper 1910 convention. The last was fine and we want more just like it."—W. W. Bennett, Gananoque.

"I think Hardware and Metal should take up this question of cartage in the paper. The wholesale do not appear to understand the situation."—M. S. Madole, Napanee.

"I am certainly well pleased that I attended the convention at Hamilton and it was indeed a record-breaker."—A. R. Dundas, Cobourg.

"I do not know whether it would be practicable to make the trip from Toronto to Montreal by boat. The front or rear half of a boat could be engaged by the Association and they could also hold one or probably two sessions en route."—J. E. Westcott, Ailsa Craig.

"The trip to Montreal, if it can be arranged, will be a good thing in that we will become really acquainted with one another. Friendships will be formed that will last for the rest of our lives. This trip would be more enjoyable if we could charter a boat and go by water. The being on the boat together would be the very best way to get acquainted."—A. Ballantyne, Brantford.

"I heartily endorse the idea of a summer meeting, to be held at Montreal, as it would serve a double purpose, viz., combining business and pleasure as the fact of having the privilege of taking your wife or lady friend should appeal to every member of the Association."—F. A. Hoar, Barrie.

COLLECTION LETTERS BRING RESULTS.

G. A. Binns, Newmarket, writes: "I notice by Hardware and Metal of March 6 that you received from "R. C.," Holt, Ont., the sum of $2. I presume its up to me to account for this error. I sent this fellow a notice some few days ago and no doubt neglected filling in my name."

It certainly proves the letters to be a very strong argument when people will forward money not knowing to whose credit it is to be placed."

"D. W.," Malvern, writes that he will send a post office order on March 15.

A blacksmith, now located in Alberta writes that he will straighten up his account owing to an Ontario hardwareman if he is given 30 days.

M. W. Connor & Son, Madoc, have joined the Ontario Association and have ordered a set of collection forms. William Kaufman, Almonte, asks what is the best method of making collections. If he will take the word of Mackie & Ryan, Pembroke, and dozens of other Ontario firms, he will do as the Madoc firm have done.

EXECUTIVE MEETING.

A majority of the members of the executive of the Ontario Retail Hardware and Stove Dealers' Association have expressed a desire to hold a meeting on Thursday, April 8, the day preceding Good Friday.

Members of the Association having business to bring before the executive are, therefore, advised to do so at once.

WILL NOT ALLOW CARTAGE.

The Canadian Wholesale Hardware Association, through their secretary, have written the secretary of the Ontario Retail Hardware and Stove Dealers' Association as follows:

"While this Association is always willing to confer with your Association, we might state that our members have re-affirmed their decision not to allow cartage from their warehouses to the station."

IS LABOR MERCHANDISE?

"A. B." asks. "Should wages paid out in tinshop when manufacturing stock be charged to dr. of merchandise account as being cost of goods, or go to dr. of loss and gain" through wage account. We always close wage account into loss and gain when closing our books?"

The secretary would say that the practice of "A. B." is wrong and that wages for plumbers or tinsmiths should be charged as merchandise, as such work is clearly part of the cost of the goods sold. For instance, a merchant takes a contract for a job. He buys the materials (on which he makes a profit) and he also purchases another commodity, the labor of a mechanic (on which he should also make a profit). The labor applied to the materials constitute the goods sold and the labor is as much merchandise as the stock used. And the same principle applies whether the mechanic is working on contract work or making up stock for sale.

The labor of a clerk is different inasmuch as he is employed to sell goods not to manufacture them. His wages could rightly be charged as an item of store expense.

If any reader holds a different view "A. B." would like to have them explain their views on this page.

CO-OPERATIVE ENTERPRISES FAIL

It is announced that Mr. Monk, M.P., will again attempt to secure the passage of legislation giving special privileges to co-operative enterprises. Last year, it will be remembered, Parliament passed the co-operative bill (through the influence of the Governor-General it is said) but the Senate prevented the legislation becoming law.

Experience in Toronto during the past year will hardly be quoted by Mr. Monk in favor of his bill. Half a dozen co-operative enterprises were launched, the shareholders being largely composed of working people who had belonged to co-operative enterprises in the Old Country. They were officered, too, in most cases by experienced men and last fall stores were started in all parts of the city. Hardly had the doors been opened, however, before the shareholders and officers began wrangling, and managers and officers were repeatedly changed. This week the climax came when four of the leading co-operatives closed their doors, to be followed shortly, it is expected, by those remaining.

Canada does not seem to provide suitable soil for the growth of the co-operative plant. And as the fruit grown on the co-operative tree in Great Britain is the lowering of the standard of living of the workers, it is well that the tree will not grow in this climate. Where workers form co-operative stores (and succeed) they are able to economize and live cheaper and where workers live cheap they are able to work cheap.

Just as Canadians oppose the introduction into Canada of Asiatics and Asiatic living conditions, so will they look with disfavor upon the introduction of systems likely to have an equally disastrous effect upon Canadian life.

WIND UP TIN PLATE COMPANY.

An order for the winding up of the Canada Tin Plate and Sheet Steel Company, Morrisburg, capitalized at $1,500,000, has been granted by Chief Justice Mulock, on the petition of the American Securities Company, a creditor for $78,000. Henry Barber, Toronto, being appointed provisional liquidator. The liabilities total $225,000, but the assets, it is said, may show a small surplus.

A winding-up order was asked for in October, but reorganization resulted in the formation of a new company, the Canadian Sheet Steel Corporation, capitalized at $700,000, to assume all debts of the old company, and 50,000 shares of the stock in the new concern were to be turned over to the shareholders of the old. Of the capitalization of the new company $320,000 has been allowed for the plant and property at Morrisburg (although it is said they could be duplicated for $200,000), $225,000 goes to clear off the liabilities and $150,000 is left for working capital.

A meeting was held at Toronto on March 11 to complete reorganization, but the names of the officers of the new company have not yet been disclosed. It is understood, however, that the direction of the company in future will be controlled by men entirely disassociated from those who promoted the company, and who were criticised by Hardware and Metal a couple of years ago.

Another effort will be made also to influence the Dominion Government to establish a duty on tin plate, black and galvanized sheets. Application has already been made to make the duty apply on British plate coming into Canada as well as on American imports, but as the Government has already taken a strong stand against imposing such a duty, besides having the experience of placing a duty on brass rods, sheets, etc., to assist an industry which failed to supply the home market, the request is not likely to be granted.

BUSINESS MEN AND THE COURTS.

That there is necessity for law reform that would cheapen the cost and expedite the work of legal machinery is quite obvious, but what is perhaps more important is the necessity for the exercise of greater forethought and caution on the part of business men and others before they take their troubles into the law courts.

Where knotty legal questions are to be unravelled it may be necessary to have recourse to the Courts, but, as a rule, matters of dispute between business men could be settled not only at less cost and more expeditiously, but better by referring the same to arbitrators instead of to magistrates and judges.

A great many serious and important commercial disputes between their members are often settled by Boards of Trade in the large cities on both sides of the Atlantic through the machinery that is provided for the purpose. And in small places in Canada where there are not Boards of Trade there are always to be found business men of common sense and fairmindedness qualified to arbitrate average business disputes.

It is better to trust the average business dispute to arbitration than to run the risk of being tangled and torn in the machinery of the courts of law.

AUTOMOBILE ACCESSORIES.

With the growth of the automobile industry and the lowering in the cost of good cars and their more universal use by people even of moderate means, will come a corresponding increase in the demand for auto-tools and accessories. For these the hardware store is the natural channel, and a field for profit, expanding as rapidly as automobile accessories is worth most careful cultivation by most hardware merchants insofar as the margin of profit in handling automobile sundries is as high as 50 per cent., and seldom below 30 to 40 per cent.

To start an auto sundries department need not involve a great outlay of money. Let the dealer start with a full and complete line of nuts and bolts, designed, so far as is possible, to meet mtotor car needs; rubber hose of various kinds, especially small sizes of special quality; copper rivets in a wide variety of sizes for use on brake bands and clutches; special insulated cable for high-tension wiring; copper and brass tubing; jacks suitable for automobile use; special automobile vises; open-end and other suitable wrenches; sheet brass; wire cable suitable for brake connections, etc.; tools of high quality and suitable design; brass polishes of numerous kinds; collapsible pails; funnels containing fine sieves, etc., etc., adding goods of this character as the demand increases. These are practically all goods which hardware stores will have in greater or less variety, and it will only be necessary at the outset to make

a special effort to meet the needs created by the automobile. By keeping these articles in stock it will be possible to get a share of the business from the garages, as well as from individual owners.

To the above list might be added: Spark plugs, which have now become reasonably standard; tire supplies, dry cells of full power, repair outfits, etc. Then, if demand justifies, lamps, horns, pumps, speedometers, tire irons, lubricating oils and grease for automobiles, calcium carbide for supplying acetylene lamps, and wire suitable for making automobile valve and other automobile springs. In cases where springs cannot be made the hardware dealer can take the order for them and have them made up by firms making a specialty of this class of work. This would save the automobilist trouble and aid in teaching him that the place to buy general automobile supplies is the hardware store.

CENTRAL BOARD FOR TRAVELERS

Probably as a result of the usual annual meeting of the different travelers' associations having taken place, there has been considerable talk lately about the old suggestion that the different bodies appoint a central executive board to look after the affairs of the travelers for their greater good. It is too bad that nothing definite along these lines has been accomplished, for the idea is admitted to be a splendid one. Probably it is because no one has given the matter really serious thought as yet that no action has been taken. Why cannot one of the five large associations of travelers we have in Canada bring this matter up at a meeting of the executive? The question might be discussed, and steps taken to find out how the other bodies feel—through their executive, of course. This would start the ball rolling, and surely it is not expecting too rapid progress to hope that the whole matter would be ripe for discussion at the next annual meeting of the associations.

Roughly speaking, there are 21,400 travelers in Canada belonging to the different associations, divided as follows: Commercial Travelers' Association of Canada, 8,600; Dominion Commercial Travelers' Association, 6,200; Northwest Commercial Travelers' Association, 3,200; Western Ontario Commercial Travelers' Association, 2,600, and Maritime Commercial Travelers' Association, 800. These figures are approximate. Supposing a central executive board of ten, composed of two members from each association were formed, would it not be a fine institution? After all, the interests of the traveler in Halifax are those of the knight of the grip in Winnipeg, except for local considerations, and most assuredly a representative executive board would wield a powerful influence for the betterment of conditions among the travelers generally.

The voice of an executive representing 21,000 live business men would be heard with deeper respect than the voice of a similar executive representing but 8,000 members, or only 800. Railways, hotel proprietors, liverymen, business institutions, and people generally would be more impressed with the larger number represented, while criticisms and suggestions would carry greater weight than ever before.

Let somebody get busy right away and start the ball rolling, The man who makes the first move will start a mighty good thing.

APPLICATION TURNED DOWN

No Average Demurrage Plan for Dominion Merchants and Shippers.

A decision which has just been handed down by Commissioner D'Arcy Scott, assistant chairman of the Railway Commission, refusing an application by the Wallaceburg Sugar Company, of Wallaceburg, Ont., for an order establishing in Canada what is generally known as the Average Demurrage Plan, in connection with the penalization of consignees for delay in unloading cars has generally interested merchants and shippers.

Under the rules of the Canadian Car Service Bureau 48 hours are allowed for the unloading of a car, and a penalty of $1 a day is payable for any time beyond that period that the car remains loaded, the idea being to remove the danger of car shortage.

Under the average system, which prevails in Michigan, if a car is unloaded in less than 48 hours, the difference is credited to the consignee, and set off against any excess time that may occur in the unloading of other cars. This system the Wallaceburg people wished to have introduced into Canada, or at least applied to their own case, as they are brought into competition with houses doing similar business in Michigan, which adjoins that part of Ontario in which their works are situated. D. A. Gordon, manager of the Wallaceburg Company, argued that while they could regulate the number of cars ordered from the farmers who supply the raw material, they could not regulate the delivery of these cars by the railway, with the result that shipments often came together so closely that their unloading facilities were inadequate to the demands made on them. In this way considerable demurrage costs were liable to be occasioned.

In his judgment Commissioner Scott pointed out that in the case of exceptional conditions in which the consignee was not at fault no demurrage could be charged for time in excess of 48 hours necessary for the unloading of cars. These rules are interpreted not by the railway companies interested, but by the Canadian Car Service Bureau, and Mr. Duval, the manager of the bureau, swore that any decision in such a case was made as favorable to the consignee as was consistent with the rules. Mr. Duval added that the idea of demurrage was not so much to get money for the railways as to secure the quick return of the cars. The sum of $1 a day obtained for demurrage was only one-third of the earning capacity of the car, and it was not to the advantage of the railways to have their cars lying idle even when this money was being received from the consignee.

"In my opinion," says Commissioner Scott in his finding, "the Average System might have the effect of making a consignee dilatory about unloading so long as he had free time to his credit, and if he had not free time to his credit the circumstances would be the same as they are under the present rules.

"The intention is that, under the Car Service Rules each car shall be dealt with by itself, and without reference to the movements of other cars. This insures equal treatment of the smaller shipper or consignee with the larger one. But, if the Average Plan were in force, I can well see that an injustice would be done the small dealer. Suppose a dealer with a large capacity for storage received 50 cars of merchandise, which, under the Rules, he has 50 days to unload, and unloaded them all the first day. He would then have fifty days to his credit. The next day, he and a small competitor each received one car. The small competitor would have to unload in two days or be penalized, while the other could hold his car for fifty days free time, which might prove to be a very material advantage. It may be said that this is an extreme case. It doubtless is, but it shows how the Average Demurrage Plan might work out unless there were limitations upon it. Mr. Gordon suggested that the system might be adopted for those in his line of business only. I do not think it would be advisable at this early date to start making exceptions to the general principles laid down in the Car Service order, which has not yet been in effect for three years. These principles are, in my opinion, sound, and should not be interfered with."

The application was dismissed.

Hardware and Metal Markets

(For detailed prices see Current Market Quotations, page 66.)

MARKETS IN BRIEF.

Montreal.

Copper—Weaker.
Lead—Cut of 5c.
Spelter—No change.

Toronto.

Turpentine—Lower price tendency.
Copper—½c lower.
Lead—Unsettled.

MONTREAL HARDWARE MARKETS

March 12.—The volume of business done during the week has shown a good advance, and a strong shipping movement will be observable on the first of next month. Bookings, however, are still on the light side, compared with other years, and it is apparent that many dealers are determined to wait until the spring demand is actually upon them before they will order to any marked extent. Immediate delivery orders however, are good. The local trade has picked up well, and there is a good movement in sidewalk scrapers, and picks, and mattocks for clearing up the roads.

Housecleaning utensils are now moving in some strength, and dealers are evidently getting their stocks well assorted. Carpenters' tools are also feeling the commencement of the spring movement. A steady stream of goods are going to Cobalt and Gow Ganda, especially in miners' supplies, such as picks, hammers, drill steel, powder, detonators, and fuse. Builders' hardware is also improving. Egg crates are in good request for immediate delivery, while the booking in other spring lines, such as lawn mowers, harvest tools, etc., are, as we said, improving, although there is no rush by any means.

No important change in prices has been reported, and the markets generally seem steady.

BUILDERS' HARDWARE—A steady improving movement is noticed in builders' hardware. A good building season promises, and as stocks generally are on the light side merchants are getting their lines into shape. We continue to quote: Discounts on door sets, 50 and; 10; escutcheons, 50 and 10; escutcheon pins, steel, 50; brass, 55. Spring hinges, per gross, No. 20, $9.

SPRING LINES—Orders are steadily accumulating for delivery next month, although the number is not so great as at one time anticipated. Dealers are maintaining the cautious spirit observable last year. Egg crates are moving well for immediate delivery. Hose is also going well, likewise sidewalk scrapers and picks and mattocks for road cleaning purposes. Orders in the following lines are steadily improving: Harvest tools, lawn mowers, hose nozzles, lawn sprinklers, gardeners' tools, ice cream freezers, screen doors, green wire cloth, and poultry netting. We quote: Screen doors, stained, $7.80; grained, $8.10; poultry netting, 60 and 2½; green wire cloth, $1.70 in 100 feet rolls.

SPORTING GOODS—Orders in sporting lines are still without any strength. Cartridges are showing better swing, however. Guns and fishing tackle are about the same. We quote: Dominion rim cartridges and C.B. caps, 50 and 2½ per cent.; B.B. caps, 50, 10 and 2½ per cent.; Crown black powder, 18 per cent.

HOUSEHOLD UTENSILS — Spring cleaning accessories are in much better strength, and dealers are evidently sorting up their stocks well. Window-cleaners, washing machines, wringers, stove brushes, scrubbing brushes, clothes lines, pulleys, reels, polishes, brooms and pails have all shown stimulation. We quote: Carpet sweepers, $2 and up; sad irons, Mrs. Potts', No. 55, 75c; No. 50, 80c per set; asbestos, $1.50; cake makers, $17.25 per dozen; bread-makers, $18 per dozen and upwards.

MINERS' SUPPLIES—A good movement is opening out in mining supplies, and fine orders are being booked for Cobalt, Gow Ganda, and other districts. Picks, prospectors' hammers, crowbars and powder are moving well. We quote: Miners' picks, 17c a pound; prospectors' hammers 20c; pick handles, $1.85 a dozen; drilling hammers, 6c a pound; crowbars, 3½c; drill steel, 8c.

BOLTS AND NUTS—Bolts are moving well for immediate delivery. Stocks in dealers' hands are light, and construction work is rapidly improving. We quote: Discounts on carriage bolts, ⅝ and smaller, 70; machine bolts, ⅝ and less, 60, 10 and 10; coach screws, 75; stove bolts, 80 and 7½.

SCREWS—Screws are in better demand, and fair trade is opening up. We quote: Discounts at 85 and 10 off for flat head bright; 80 and 10 off for round head bright; 75 and 10 for flat head brass, and 70 and 10 for round head brass.

WIRE—Orders are moving well. There is no change in quotations, which are as follows: Plain wire, $2.30 base; barb wire, $2.65 in straight and mixed car lots, and $2.70 in small lots. Galvanized wire No. 9, $2.35 in straight and mixed car lots, and $2.40 small lots, f.o.b. Montreal. Coiled spring fencing, $2.65 straight and mixed car lots, and $2.75 small lots.

BRIGHT WIRE GOODS—Trade is showing stimulation, good orders being booked for immediate delivery. We continue to quote: Gate hooks and eyes, and screw hooks at 60 and 20 per cent.; stove pipe eyes, screw eyes, and square hooks, 60 per cent. Wire hat and coat hooks, 40c a gross.

ROPE—The reduction in manila seems to have stimulated buying, as good orders have come in during the week. We quote best manilla, 11c; British manilla, 9½c; sisal, 9c.

TORONTO HARDWARE MARKETS.

March 12.—Up to now the general feeling in the hardware trade has been anticipatory. At present these anticipations are being realized by good business returns. All the local jobbers report good trading being done and the far-away fields have this week been taking large quantities of general lines. British Columbia and the West have bought heavily and jobbers are more than satisfied.

The new mining regions in Northern Ontario have bought well during this week for immediate delivery, as it will be hard getting in the goods if delayed until the snow is off the ground. Older Ontario is placing orders, and while not crying out for immediate delivery some very fair shipments have already been made.

Prices continue firm and unchanged, which is to be expected under the pressure of a big demand. Travelers report trade opening up well in the country and say the call is for general and seasonable lines.

SPRING GOODS—Brisk demand continues, and some very satisfactory sales and shipments have been made. Household goods, summer lines, watches and general sorting-up articles are included in almost every order. While not so large in volume as two years ago the orders are more numerous and in the long run will loom up large at the end of the season.

SEASONABLE LINES—Jobbers are answering hurry-up demands for goods in the mining districts. It seems strange to see stoves going out as the warm season comes on, but they are needed up north, and with them are going shovels, picks, cables, chains and mining and construction tools. Snow shovels are relegated to limbo and but few ash sifters are in sight.

BUILDERS' HARDWARE—Increasing in demand are the various articles which go to make up this line. Ornamental lock sets have the best call, but many other goods, too, are much inquired after. A brisk building season ahead makes prospects look very bright for a big demand of builders' hardware.

HOUSEHOLD UTENSILS — Carpet sweepers, beaters, house-cleaning utensils, kitchenware, screens, etc., are beginning to be asked for and the inquiries increase from day to day. The orders going out for distant points include some of these articles and also refrigerators and lawn goods.

ROPE AND TWINE—Sales are slow again this week and interest seems to be very light. The price quoted last week, 11c for the best grades of pure

Manilla twine still holds the market.

WIRE—Unsettled, owing to trade conditions in the U. S., are all wire lines. The market quotations of the past month are the ruling prices of the week.

HEAVY GOODS—Fair business is being done, though the orders are light. Bar iron is yet $1.95. Stove bolts are 80 and 7½. Bright and steel wood screws, flat, 85 and 10 and round head, 80 and 10 per cent. Brass screws are flat, 75 and 10 and round head, 80 and 10 per cent. Brass screws are, flat, 75 and 10, and round, 70 and 10.

—

MONTREAL METAL MARKETS.

March 12.—With the primary markets showing weakness, local quotations have been affected, although only in the case of lead have quotations been uniformly cut. Despite shading in various quarters, the jobbing price of copper is being held at 14½c, although this cannot be maintained if the New York market does not improve. Imported lead has been cut 5c, making the price $3.65. Tin does not show any change, while smelter is as firm as ever. Jobbing houses report business as somewhat on the quiet side again, but first hands are shipping a good quantity of metal, which shows that wholesalers are looking after their stocks. Trade in spelter has been especially good.

All metals in the primary markets have shown a sagging tendency, but in spelter the decline is not unexpected, considering the steady way figures have advanced for weeks. With other metals showing such weakness a reaction is but natural. Tin has been very disappointing, and the upward movement which promised last week failed to materialize. Both the English and New York markets have been sluggish. Copper has been in a very weak state. Consumption has been poor, and it would appear as if the large consumers have enough to go on with for some time, and, unless business improves greatly, will not be in the market yet awhile. Europe is not taking anything like the copper it did, and although producers appear to be making no effort to sell, the market is naturally in a weak state. Lead is lower in the English market, despite the rumors of a big lead producers' trust. Cleveland warrants are down, and trade does not seem so good as it was in the Old Country. The United States steel and iron markets are now on a more settled basis, although prices are not uniform as yet. Buying is going on for immediate requirements, and it is now believed that the markets will show steady improvement sooner than was at one time anticipated.

PIG IRON—Trade is somewhat quiet and probably will be so until the opening of navigation. The advanced winter freights are still being paid, however, as stocks are very low in consumers' hands. We continue to quote: Middlesboro, No. 3, $19.50; Summerlee, No. 1. $21 to $21.50; No. 2, $20.50. Cleveland warrants have weakened since last week. Trade is reported not quite so good as it was in the Old Country, although futures are still at higher figures. The United States markets have not yet developed any definite level, and there is no authoritative information to go on as to the scale of prices generally obtaining. There is a better feeling observable, however, and although buying is still for immediate requirements, a better movement is expected shortly.

TIN—There has been no alteration in the jobbing price of tin, although prices are not held so firmly as they were and 31½c is still quoted. Business has been somewhat quiet, and there is at present no anxiety on the part of users to buy in anything more than hand to mouth quantities. The primary markets have not developed the strength expected, and in consequence figures have been affected. Tin, however, is a very disappointing metal, and there is no judging what it will do next. Consumption has been on the light side.

COPPER—The quotation of 14½c for ordinary jobbing lots has been maintained in the face of a weaker New York market. Wholesalers are not shading their prices without a struggle, and a fair trade has enabled them to hold their position. Unless things improve in New York, quotations will have to be cut. The English market has been on the weak side, and this has affected New York, where consumption is still poor. Buying of any magnitude has stopped, and with the falling off in the European demand, the market is in a weak state. The recent buying movement seems to have satisfied the large consumers. Despite figures, however, there is a hopeful feeling that copper may mend at any moment.

SPELTER—Spelter is unchanged, and quotations are still at $5.50. Business has been very good, and despite a sagging in England, the market here is firm. Prices at St. Louis are beginning to mend again, and the metal is still in the best position of any metal so far as the maintenance of prices is concerned.

LEAD—A sagging in the English market has affected quotations here, and a small cut of 5c is announced, making quotations for imported pig $3.65, Trail keeping its relative position of about 10c less. Rumors are being published in European papers of a world-wide trust in lead. It is said that a meeting was recently held in Paris of pig lead producing interests to arrange an international agreement to restrict production when the price of lead falls below a minimum price. The agreement, the rumor says, is world-wide, affecting the output of Spain, Australia, Mexico, Canada and the United States. It is evident from English prices that not much credence is being placed as yet in this report, and nothing can be learned so far as Canada is concerned. Such a trust is not likely, although it is not impossible.

—

The new Burrell, Johnson Iron Co.'s Works at Yarmouth, N.S., were damaged by fire to the extent of $100,000 recently. H&M

TORONTO METAL MARKETS.

March 12.—The local situation is much the same as a week ago. Iron and steel are unsettled and until the tariff changes in the U.S. are known definitely little business is expected to be done. Copper, while it has declined in price, shows a steadier buying feeling, and lead which was fairly firm a week ago went off color early in the week, but is again recovering itself.

In the U.S. the cut price in metals has led public opinion generally to believe it was merely a blind to offset any change in the tariff. Chas. M. Schwab now says the price war in steel will now end. He also predicts a revival in the trade before many months. To substantiate this, Pittsburg reports a great volume of small business, and the sales for three days early this month were greater than the whole February total. Many calls were for prompt delivery, showing that stock holdings were small. The new lead duties have not yet stirred up business to any appreciable extent.

The bursting of the steel bubble has been followed by freer competition for lead, copper and other metals, the markets for which have been controlled by powerful coteries, and these changes react more or less on the conditions prevailing in Canada.

PIG IRON—Quiet trading is passing. The orders are light and demand calls for immediate delivery. Prices are as usual, Cleveland, $22; No. 3 Middlesboro, $21, and Canadian foundry, $18.50. According to the American Iron and Steel Association report the production of pig iron of all kinds in the U. S. last year was nearly 10,000,000 less than 1907, and only 1,000,000 tons ahead of the small output of 1904.

COPPER—A decline of ½c is noted, the quotation this week being 14c. This price seems to have steadied the market and induced buying, as considerable business has been done. The trade is looking forward to improved conditions, but English copper buyers do not like the stocking-up done by U. S. interests. There production shows an increase of 32,615 tons. Mexico shut down some of her mines because of the depression. Electric interests say there is nothing to induce one to buy on the theory that prices are going higher, because prices will not advance while production runs in excess of consumption.

TIN—Quiet and unchanged in conditions and price is the situation in the tin market this week. 31c is the local market quotation. Reports state that there is a scarcity of ore in the East, while others aver that shipments are manipulated causing a decline in visible supply. At any rate, there is no cut in tin prices to sympathize with the drop in other metals.

LEAD—Still at $3.80 is imported pig. Conditions are unchanged, with a quiet market running. The new U. S. tariff has not yet stirred up trade very much. The weakest spot in this metal is the inactivity of the electrical business. The National Lead Co. has declared an open market in the U.S. and are out looking

for business. Whether the tariff changes effected this or not is conjectural.

SPELTER—The local quotation is still $5.50, with not much trading this week. Both receipts and shipments at St. Louis since the beginning of the year show decided gains over a year ago.

SHEETS AND PLATES—A steadily uniform selling line, with prices unchanged. The Tariff Committee in the U. S. have decided to retain the duty of 1½c a pound, and to remove the drawback on tinplate. Because of this the Standard Oil Co. threaten to remove their canning industry to Wales. Canning interests generally object to the removal of the drawback.

OLD MATERIALS—Old steel and iron lines are again stocking up. Demand is almost nil. Offerings, too, are quiet. Prices are unchanged and are trying to be held a little below the figure for new metals.

U. S. IRON AND METAL TRADES.

New York, March 11.—The Iron Age says: Announcements of wage reductions in the iron industry are becoming more numerous and others are about to be made. It is evident that this phase of the readjustment has only been fairly entered upon, and it may be expected that the process will be thorough, affecting every operation from the mining of the ore to the rolling of the finished product. The trade is facing the probability that the return of real prosperity may yet lead it over some rough ways. And in such a general readjustment as is now being discussed it is hard to see how the railroads and other important interests can escape.

There is unmistakably more activity in the iron and steel markets now that the trade has been able to get its bearings in a measure, yet there is such irregularity in prices as makes the situation in particular products far from clear. The attitude of the large steel companies toward semi-finished steel is a matter of conjecture. Some of them have a trade in billets and sheet bars with consumers whose product competes with certain finished products of other large producers. The tendency of prices in these lines is to narrow the "spread" of the independent producer. On sheets, for example, some prices recently made would bear hard on the mill that buys its steel in the market, if the new basis for sheet bars, which was announced from Pittsburg as "established" last week were maintained.

A number of steel manufacturers are quoting $23, at Pittsburg, for billets and $25, Pittsburg, for sheet bars on small lots business. Large contracts are known to have brought out lower prices than the above for billets. Railroad buying is still very limited. Structural lines show increased activity, but fabricators would like better assurances as to new work that must take the place of the long-pending business just booked. Prices show even sharper competition, and the 1.30c basis on plain material has been cut.

The pig iron market is not being seriously tested, but is shown to be weak by transactions for early delivery.

After the buying spurt the copper market has settled into dullness. The stocks of marketable copper in the country are shown to have increased 29,000,000 pounds in February, or to 173,284,000 pounds in March 1.

METAL NOTES.

It is understood the Eastern Pig Iron Association of the U. S. will on March 15 post notices reducing wages 10 per cent. Between 50,000 and 75,000 men will be affected.

COST OF PRODUCING COPPER.

In the March issue of the Engineering Magazine, A. Selwyn Brown gives the following estimate on the cost of producing copper:

"Until quite recently copper mining companies kept the cost of producing copper secret, and even to-day many of the largest companies refuse to publish their production costs. There are many variable factors entering into the costs and no general figure can be given to cover production generally. As, however, the average price of copper during the past twenty-eight years was about 13c per pound and copper mining is a lucrative industry, it is evident that the average cost of producing copper is below 13c per pound. From the carefully collected figures given the cost will be seen to range from a little over 5c to 11½c per pound. Notwithstanding the great improvements that have been made in recent years in mining and metallurgical methods and the consequent reduction in costs, there is still room for further improvements, and it is possible that within a few years 5c and 6c per pound will not be considered at all unusual figures as copper costs.

Hardware Trade Gossip.

Ontario.

The sale of the Canada Horse Nail Co., Montreal, has been postponed for two weeks.

The James Walker Hardware Co., Montreal, have secured the contract for furnishing all the hardware for the parliamentary buildings at Regina.

In the Montreal Wholesale Hardware Hockey Association last week, Lewis Bros., beat Caverhill, Learmont & Co. by 8 to 2, while the Canadian Fairbanks Co. beat Frothingham & Workman by 6 to 0.

Quebec.

F. A. Johnson, manager of the J. C. McLaren Belting Co., Montreal, was a visitor in Toronto this week.

Thomas H. Meiklejohn, of the firm of A. & J. Meiklejohn, hardware merchants, Harriston, died this week.

James Dandie, Streetsville, has purchased the tinsmithing business of H. A. Kemp, established some months ago in connection with his store.

Amongst the exhibitors at the Portland Cement Show at Toronto last week were the following: U. S. Steel Export Co., Montreal, B. Greening Wire Mfg. Co., Hamilton; Canada Wire Goods Co., Hamilton; Brantford Roofing Co., Brantford; Canada Metal Co., Toronto; Montreal Rolling Mills, Montreal; Galt Art Metal Co., Galt; Canada Foundry Co., Toronto; Belleville Portland Cement Co., and Lehigh Cement Co., Belleville; National Portland Cement Co., Durham; Canadian Portland Cement Co., Toronto, and Pilkington Bros., Toronto.

Maritime Provinces.

Welsford R. Morton, for nine years with A. M. Bell & Company, Halifax, and John J. Cragg, formerly of Cragg Bros., will open a hardware store at Halifax on April 1.

Western Canada.

Hopper & Larner, hardware merchants Kisbey, Sask., have dissolved. J. L. Larner assumes all accounts and pays all liabilities.

A SURPRISING QUESTION.

It is not always a guilty conscience that is taken by surprise, for sometimes the most innocent of men will start at a suspicious word. The following incident, which occurred in a hardware shop, is illuminating:

An elderly lady, dressed severely in gray and carrying what looked very much like a bundle of tracts, approached the counter.

A clerk hastened to serve her.

"What can I do for you, madam?"

She leaned toward him. "Have you —er—any little vises?" she inquired.

The Tourist Hotel Company, Kenora, Ont., are issuing bonds to the extent of $87,000 for the completion of their new hotel, which they hope to have ready for the coming season.

Quebec and Maritime

Activity at Steel Plants—Work on Coke Ovens in Prospect—Stove Foundry at Yarmouth Destroyed by Fire—Asbestos Shingle Company Buys the Radiator Works at Lachine.

HALIFAX.

March 8.—With the opening of spring business shows considerable improvement. The jobbers report that the travelers who are now on the road are sending in good orders, in fact, in much larger volume than was expected earlier in the season. Collections also show a slight improvement. Prices are fairly steady just now, but the indications are that there will be an advance. The only change noted is an advance of 25c per dozen in corn brooms. The rail mill of the Dominion Iron and Steel plant at Sydney is turning out at present an 85-pound rail order for the C.P.R. During the past two months an exceptionally high average in the quality of steel manufactured has been maintained, 98 per cent. of the finished material being passed by the inspectors. This record is said to be unequalled in any of the big plants across the border. Repair men are at work in the different departments of the plant getting the machinery in first-class condition for the big rush that is expected this summer. The staff at the plant is being increased as rapidly as possible and in a short time the force will have reached its full complement. Following the meeting of the Steel directors in Montreal, a boom is expected in construction at the plant. About two years ago foundations were put in for an extra battery of coke ovens and it is practically certain that construction work will commence on the ovens as soon as the weather conditions will permit. To "put in" a battery of coke ovens will require the services of upwards of eight hundred men, the majority of whom must be skilled men, and it will consume practically all the summer before the work is finished. Other additions are also spoken of in connection with the works.

Fire last week destroyed the works of the new Burrell-Johnson Iron Company at Yarmouth, N.S. The fire started in the oil room, which was situated near the machine shop. The fire also damaged the four-storey stone warehouse and other buildings on the wharf, filled with finished stoves and costly patterns of machinery, etc. The buildings entirely destroyed were the machine shop, engine and boiler house, stove-fitting shop, pattern shop draughting rooms and offices. The boiler shop across the street was badly damaged, as was also the brick foundry adjoining to the north. In the machine shop were the engines for a new tug, two large marine engines nearly completed, besides a large quantity of other machinery ready for delivery, all of which were destroyed. By the loss of the patterns the company will be greatly handicapped in completing their contracts. As a result of the fire 150 men are thrown out of employment, and nearly all of them lost their effects. The property loss is estimated at $125,000, on which there was only $10,000 insurance.—J. H.

ST. JOHN.

March 10.—The manufacturers in St. John are up in arms against the liability insurance companies and incidentally against the Provincial Government on account of the very great increase in rates charged by the insurance companies for carrying risks on the employes. In November last the Provincial Government made some important changes in the Workmen's Compensation Act, and it is claimed by the manufacturers that owing to the act being so open their insurance rates have been jumped in some cases as high as 400 or 500 per cent. F. W. Peters, of G. H. Peters, Sons, tanners, said their rate had been advanced from a 22-cent flat rate under the old act to 87 cents under the new act. James Pender, of the Pender Nail Works, said the increase he had been asked to pay was between 400 and 500 per cent. Many others who were seen also complained of the exorbitant charges. There is a disposition among the manufacturers, on account of the greatly increased demands of the insurance companies, to carry their own insurance, as they say they would soon pay out enough to settle any claims that might arise.

The manufacture of gasoline engines, especially for fishing craft, has become an important industry. There is also an increasing demand for them for pleasure boats and small tugboats. The firm of James Fleming, proprietors of the Phoenix Foundry, on Pond Street, who started manufacturing these engines a couple of years ago, report a growing demand for them and they have a very large number under way or finished and ready for shipment. The firm state that they have had more orders lately than they could fill. They find this branch of their business a most important one, giving employment to many hands and giving promise of expanding from year to year.

The Royal Hotel will also build a substantial addition to their present building, having purchased the Reynolds property adjoining them on Germain Street. The present wooden building will be torn down and a new brick structure erected. Thirty additional rooms will be added and about twenty of the number will be provided with private baths. Plans are now being prepared by Architect G. Ernest Fairweather. An addition to the Royal's kitchen is now under construction.

W. S. Fisher, of Emerson & Fisher, is in Sackville this week looking after the affairs of the Enterprise Foundry Co., whose new buildings are about completed.

John Keeffe, manager of the James Robertson Co., left on a business trip to Halifax on Monday night.

Alderman Rowan, proprietor of the A. M. Rowan hardware business, and Alderman John McGoldrick, dealer in heavy metals are among the delegation attending the Union of N. B. Municipalities annual meeting in Moncton this week.—W. E. H.

MONTREAL.

March 10.—At the first annual meeting of the Terrano Flooring Company, of Canada, a satisfactory statement of the year's operations was submitted. The following Board of Directors was elected: H. P. Douglas, F. C. Budden, W. L. Bond, Shirley Ogilvie, H. G. Eadie, H. E. B. Smith and F. G. O'Grady.

The property of the Canada Radiator Company at Lachine has been sold by auction to the Asbestos Shingle, Slate and Sheeting Company, of Ambler, Penn., for $63,000. The area of the property is eight acres. The purchasers will at once erect a plant of their own to carry on their manufacturing operations in Canada. The company is also engaged in mining operations at Thetford.

The accounts for 1908 for Thos. Robertson & Co., metals and heavy hardwarde, Montreal, to be presented at the annual meeting show that the net revenue for the year was £15,840, being a decrease of £19,983 as compared with 1907, and, including £35,246 brought down, there was an available balance of £51,086. A dividend of 10 per cent. is recommended on the ordinary shares, payable quarterly, and it is proposed to transfer £10,000 to the reserve fund, making it £60 000, and leaving £8,286 to be carried forward.

The Smith Hardware Company has been formed in Montreal to manufacture and generally deal in hardware, and hardware specialties, and in telephone instruments and other appliances involving the use of electricity. The capital of the company is $20,000, divided into 200 shares. The chief place of business will be in Montreal.

Several good displays of enamelware and other kitchen utensils in city stores

indicate the near approach of the spring season. From now onwards is a good time to display such lines because with the lengthening days the housewife commences to turn over her kitchen, and to rout out the articles that have borne the brunt of the winter and want replacing. The plan of a prominent hardwareman in the city, in regard to his windows at this season of the year, is to start with displays of kitchen utensils, such as enamelware, tinware, food choppers, bread-makers, etc., and then on to house-cleaning goods, such as carpet sweepers, wringers, washing machines, brushes, mops and pails, following this up with paints, and then into gardening displays and so on. He takes due time to go from one series to another, and changes the setting of the windows frequently, although not the goods. He gives each department a fair showing. It is always well to be in advance of the season. A display of enamelware is likely to call the attention of the housewife to the need of a pan just as soon as the actual shortage is felt in the home.

The Jas. Walker Hardware Co., St. James St., are showing a good window of enamelware. The display is well arranged, and is an object lesson in what can be done with such everyday articles as enamelware. The window looks neat and does what it is intended to do, that is, to attract attention of the passers-by and makes them think of deficiencies in the kitchens at home.—F. J. A.

Province of Ontario

London May Not Buy Niagara Power—Peterboro Industries Active—Brantford Merchants Object to Moving Market Site—Some Good Sales of Spring Goods Being Made.

PETERBORO.

March 10.—Kingan Hardware Co. is showing several windows that are quite in season. One is a display of muskrat traps, the other is an array of paints for spring work.

J. J. Turner & Sons shipped a large number of tents to Gowganda and Elk Lake last week. These are for retail men and will be sold to prospectors. They also shipped 54 tents to Cochrane, the junction of the Transcontinental and T. & N.O. railway. They are to be used by the men engaged in the construction work.

The spring briskness has not yet manifested itself in a very marked manner, but the feeling is that the real fine weather will open up the building operations. Hardware merchants report that business is running along in a sort of uneventful way, but the expectations are that work which has been spoken off will brighten up their business.

The Peterboro Hardware Co. have an attractive window of fancy handles, locks, hinges, etc., for doors, a forerunner of the spring building activities and as a hint to contractors and builders that the time is almost ripe for action.

The hope is being expressed that the next convention of the Ontario hardware merchants will be held in Peterboro. The business men seem to think that this city would be able to meet all the demands made upon it and that the visitors would find many things of interest here.

The city council has abandoned the idea of engaging a commissioner of industries, but the city clerk will be asked to give as much assistance in this way as possible, helping the manufacturers and power committees.

C. E. Dettman, of Waynesburg, Pa., will start boring for oil and gas in the neighborhood of this city in a short time. This intelligence was given to the farmers from whom a lease has been secured of their property. It is mainly an experiment, although some are of the opinion that a find may be made.

MacGregor & Reid, electricians, have opened up new show rooms over their store and have fitted them to show to advantage their stock of electrical goods and fixtures.

In a recent statement Frederic Nicholls, of the Canadian General Electric Co., is quoted as follows: "This company has secured more new business during the past two months than during the preceding six months, and we have more enquiries on our books than we have had since 1906, and are, therefore, looking to the future with confidence." This is of special interest to this city, their shops here having suffered with other industries from the conditions of the past year. This company secured the contract let by the Hydro-Electric Commission for the equipment of twelve stations on the transmission line. The commencement of this work will mean a renewal of the activities of the works here and will be a great benefit to the city.

H. T.

OSHAWA.

March 10.—The town of Oshawa is endeavoring to secure more help for Eaton & Co's. factory. There are not enough girls in the town to meet the requirements of the factory and it is feared the company may move elsewhere.

A deputation from the Ontario Ashphalt Block Co. of Windsor, consisting of Mr. Goodman, Toronto, Manager, and R. Baugham, President of Windsor, waited on the Oshawa council at its last meeting explaining the advantages of ashphalt blocks for street pavement purposes. Oshawa is contemplating extensive work in this respect. The Board of Works of Oshawa was authorized to receive tenders for a steam road roller, cement mixer and a supply of tile and sewer pipe for 1909. H.T.

HAMILTON.

March 10.—One of the most gigantic undertakings in connection with the retail hardware interests in Canada that has been undertaken in years is that of the Mills Hardware Company, which will erect almost a block of buildings facing on South John Street, and extending almost to Hughson Street, and from Hunter Street to Woodmarket Square. The buildings will comprise five stores, a central heating plant and a stable a block in length. The costs of the buildings is being withheld, but it is expected that they will run up to the neighborhood of $100,000. The whole scheme has as its origin the extension of the business section and the development of a large farmers' trade. But one store will be devoted to hardware and the other four will be rented for whatever class of trade the tenant may be engaged in. Arches will be built between them and temporarily bricked in so that at any time they may be removed, fire doors installed and direct communication established between all the stores. This would give a department store effect and would tend to centralize the farmers' trade so that it would not be necessary for those who come into the city via John Street to go any farther into the business section than the new block.

The buildings will all be of red pressed brick. The store building will be but one storey, but will be of considerable height. A feature of it will be that practically all the stock will be carried on the ground floor and the basement will be fitted up for the sale of the heavy hardware. The accommodation will be arranged so that everything that relates to the hardware trade can be carried in stock. The stores will all be heated from a central heating plant in the rear of the main building, the result being that there will be no fires in the building. The store building will be 121 by 120 feet and will be built with structural steel beams, which will be turned out by the Hamilton Bridge Works Company. The stable will be 122 by 30 feet, and will provide accommodation for all the delivery outfits of the Mills companies. Already the old frame buildings which were on the site of the new structures have been removed. The contractors for the main portions of the work are Howard and Webber, masonry; McKellar and Poag, carpentering; Hamilton Steel & Iron Co., structural steel. The buildings have been planned by Charles E. Mills, architect, father of Nelson Mills, manager of the Mills Hardware Company.

Work will soon be started on the $30,000 building for the Y.W.C.A.

The Whipple Horse Collar Company, of this city, has been incorporated with a capitalization of $100,000.

Owing to the exciting times here the run on the hardware stores has turned from door locks, etc., to revolvers. There have been so many shooting affrays, hold-ups and assaults that the average citizen feels impelled to protect himself. The result is that the hardwaremen are deriving the benefit.

The Frost Wire Fence Company will make an important addition to its plant within the near future. The firm is going into the manufacture of its own wire and will erect a wire mill for that purpose. The proposed new building will cover about an acre of ground, and with equipment will cost in the neighborhood of $50,000.

The Canadian Roller Bearing Company has assigned to C. S. Scott, assignee.

D. L.

CHATHAM.

March 9.—Spring goods are coming in pretty steadily now. Hardwaremen state that, with the roads in any kind of condition, they go out pretty fast, too. "Last Saturday." remarked one hard-

wareman, "I sold 700 rods of wire fencing alone." More recently, a man drove in intending to take out 1,500 pounds of stuff, but did not do so on account of the roads. A fairly quiet spell may be looked for till the muddy season is over.

Cephore Gore, for the past 18 months or so a member of the P. Cunningham & Co. hardware staff, has taken a position as expert with the Massey-Harris Co. Mr. Gore has had quite a few years experience in hardware, having formerly been with the old firm of A. H. Patterson & Co.

Into the midst of The Hardware and Metal man's chat with a local merchant, three little girls interjected themselves with the pointed query, "Have you got any blotters?" "We're just out," rejoined the hardwareman, regretfully. "If I had given them blotters," he added, after the youngsters had gone, "before five minutes were up we'd have had 25 youngsters in here after blotters. The way the contagion spreads is wonderful. I've known 50 children come for blotters right in a string."

W. H. Goodhue, of Ridgetown, has completed the instalation of a furnace in the Morpeth Methodist Church.

An addition to the Chatham Collegiate Institute at a cost of $15,000, will probably be made this year, in response to the peremptory recommendation of the Education Department.

At the meeting of the Water Commissioners last week, renewals of plumbing licenses were granted to R. McG. Coyle, C. R. Bowers, John McKay, J. H. James, Watt & Sons, Edward Mackness, J. C. Wanless, Campbell & Callahan, and Westman Bros. Ex-Chairman Sheldon favored the appointment of a plumbing inspector, and Mayor Westman stated that the City Council intended considering a plumbing by-law. Despite sproadic protests on the part of manufacturers, the recent regulation requiring water services to be metered was left untouched, though it is likely manufacturers will be given favorable rates.

The Water Department will provide facilities for repairing water meters at cost. This decision was come to on the suggestion of Mayor Westman, who was not deterred by the fact that he was in the plumbing business himself from thus cutting into a little side line.

Chatham has yet another plumbing firm. Mitchell Bros. are just now opening a plumbing shop at 179 King Street West, in the ground floor of the Alexandra Block.

Duncan Graves has taken a position on the tinsmithing staff of W. H. Goodhue & Co., Ridgetown.

Hargrove Bros., of Sombra, have sold their hardware and general store to D. Davis.

J. H. K. Pope, of the McClary Co., London, spoke at the banquet held in Blenheim last week in connection with the Laymen's Missionary movement.

The Wallaceburg Brass Works installed new machinery last week. The manufacture of tops for fruit jars of all kinds has been commenced.

D. H. Douglas, of Stephens & Douglas, was in Toronto on business for a few days last week.

Wilson, Son & Arnold, architects, Chatham, have prepared plans for an addition to the Tilbury Public School.—W. E. P.

British Columbia.

Building Permits Show Big Increase at Victoria and Vancouver — Paterson Roofing to be Made at Vancouver— Business Change at New Westminster.

VANCOUVER.

March 6.—Nothing shows better the activity that is agitating industrial life on the coast than the building going on. Last week the value of permits issued amounted to $107,555, while the returns for January place Vancouver in the second place among Canadian cities, being surpassed only by Toronto, and then only by $20,000. This activity in building is only a concomitant of activity in other lines. Real estate is going again like it was two years ago, and the big jump in bank clearings indicate a good all-round business.

One of the large buildings proposed is the four-storey fireproof structure to be erected by the B.C. Electric Railway Company, to be used as offices on the site of its present office building. It will cost $250,000. Plans are now being called for on a competitive basis.

G. Rundle, Vancouver, manager of the Paterson Manufacturing Company, of Montreal, states that the factory here will be in operation in a little over a month. An entire block has been purchased in Fairview, and tar roofing material will be manufactured. The machinery is now on the ground.

R. J. Cluff, managing director of the King Radiator Company, Toronto, was here this week on a business trip. He left for the East on Wednesday.

Another visitor was Sandy Green, of Green & Lester, plumbers and steamfitters, of Winnipeg. He and Mr. Cluff left for the East together.

An indication of the revival in the lumber business is the starting again of the Pacific Coast Lumber Mills, after an idleness of several months. "If things were not looking better, we would not start," was the remark of the manager to Hardware and Metal.

VICTORIA.

March 3.—Building permits for February amounted to $121,620, which is an increase of almost $50,000 on February of last year. For the two months of this year permits to the value of $200,760 have been issued.

The Provincial Government are issuing strict orders to have all trees sprayed and are taking steps to enforce their orders. Hardware men are benefiting by the large sale of tree spray, most of the local stores having window displays of spray, spray pumps, etc.

The Oak Bay municipality, adjacent to Victoria, has passed a by-law to abolish taxation on improvements, the taxes to be on land value only. A by-law was also passed making it compulsory for intending builders to first take out a permit from the council.

A new directory which has just been published, gives 12,202 names of individuals, which, on a low estimate of three people to each name to allow for women and children, gives a total of 36,606. Including Orientals the population is estimated at 40,000.

The outlook in the building line for March is very promising. Several large structures are contemplated which, with the Chambers St. school, will run well into $100,000 in values. The B. C. Electric Co. contemplate erecting a large storeroom at the Gas Works to cost about $8,000, and the Victoria Creamery Company are about to take out a permit for their new building on Broad St., which, with machinery and land, will amount to $35,000. In addition to these the Silver Spring Brewery Co. have out plans for the erection of a modern brewery and plant to replace the old building bought from the Fairall Co. There are also a number of dwelling houses at from $2,000 to $8,000. So it looks pretty healthy, outsiders say that we are moving some.

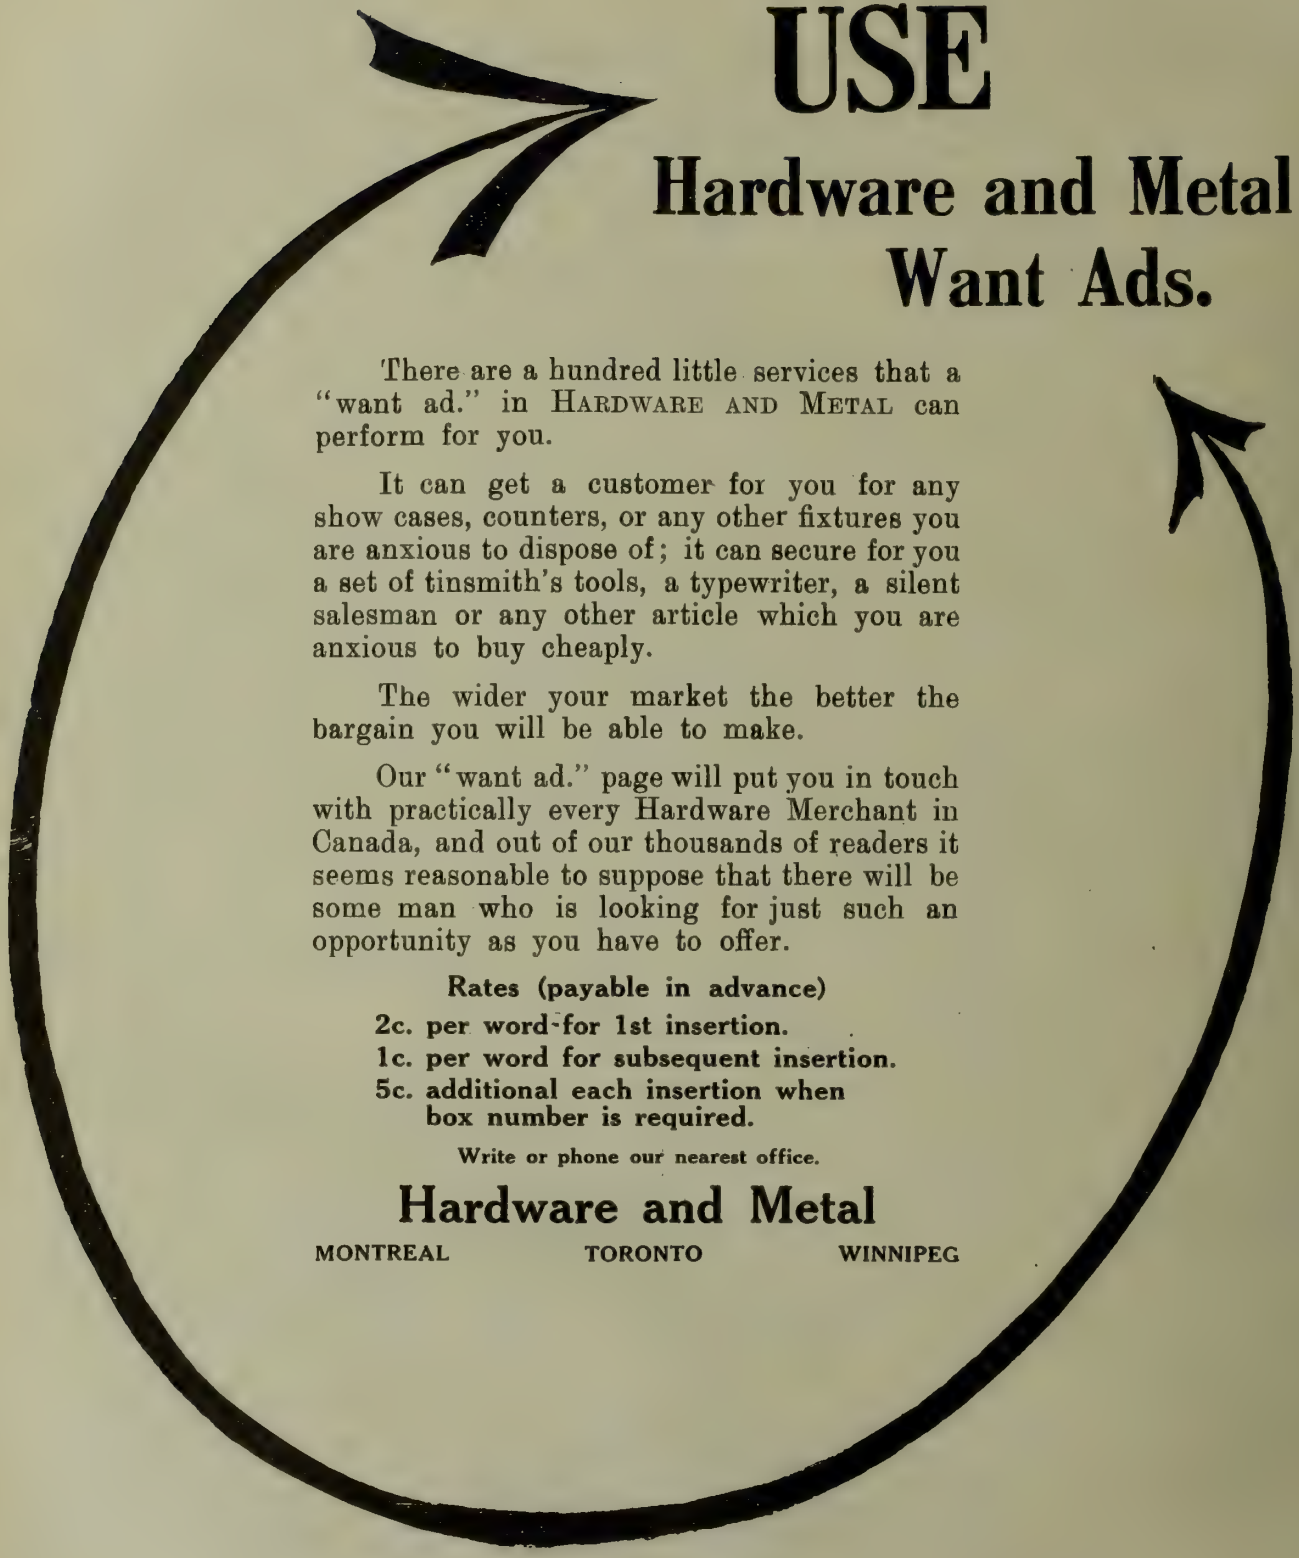
In the near future another big block is to be built if the plans of Balfour, Smye & Co., Hamilton, Ont., go through. This firm manufactures Tartan brand canned goods which have a large sale in the West and in order to handle their business a six-storey block is proposed to be erected as a distributing house for the coast.

Gardening is now in full swing here in the farthest West and hardware men are busy with spades, rakes and hoes.—W. B. C.

NEW WESTMINSTER.

March 6.—The Fruhling dredge has at last arrived from Europe, and will be utilized as soon as she is ready for deepening the channel between this city and the sea. The distance is about sixteen miles, and it is proposed to have a minimum depth of thirty feet. This will be a fine thing for industries. Many have already established here, and with a safe channel down the Fraser, the almost endless waterfront in the neighborhood of this city, will be available for sites for all kinds of purposes. They would have not only connection with two railways, but also deep sea shipping facilities. The Fruhling dredge was used at Stettin, Germany, by the Stetting Shipbuilding Company a year ago, and when purchased by the Dominion Government was engaged in deepening the channel at Hull, England, It is practically new.

The hardware firm of Hardman, James & McClughan has been dissolved. A. Hardman has retired, and it is not stated what business he will follow in the future. James & McClughan will continue the hardware business.



USE

Hardware and Metal Want Ads.

There are a hundred little services that a "want ad." in HARDWARE AND METAL can perform for you.

It can get a customer for you for any show cases, counters, or any other fixtures you are anxious to dispose of; it can secure for you a set of tinsmith's tools, a typewriter, a silent salesman or any other article which you are anxious to buy cheaply.

The wider your market the better the bargain you will be able to make.

Our "want ad." page will put you in touch with practically every Hardware Merchant in Canada, and out of our thousands of readers it seems reasonable to suppose that there will be some man who is looking for just such an opportunity as you have to offer.

Rates (payable in advance)

2c. per word for 1st insertion.
1c. per word for subsequent insertion.
5c. additional each insertion when box number is required.

Write or phone our nearest office.

Hardware and Metal

MONTREAL TORONTO WINNIPEG

CONDENSED OR "WANT" ADVERTISEMENTS.

RATES.

Two cents per word first insertion; one cent per word subsequent insertions.

Five cents additional each insertion where box number is desired.

Contractions count as one word, but five figures (as $1,000) are allowed as one word.

Cash remittances to cover cost must accompany all advertisements. In no case can this rule be overlooked. Advertisements received without remittance cannot be acknowledged.

RULES FOR COPY.

In addressing replies care of HARDWARE AND METAL don't fail to give box number.

Replies addressed to HARDWARE AND METAL boxes are re-mailed to advertisers every Monday, Wednesday and Friday.

Requests for classification will be followed where they do not conflict with established classified rules.

Orders should always clearly specify the number of times the advertisement is to run.

All "Want" advertisements are payable in advance.

AGENTS WANTED.

This is the problem of many manufacturers who are anxious to get a foothold in Western Canada. It will be easily solved if HARDWARE AND METAL is given the opportunity to solve it.

MANUFACTURER, hardware specialty wants agents for Ontario, New Brunswick, Nova Scotia, on commission. Selling wholesale and retail hardware trade. Box 802, HARDWARE AND METAL, Toronto. [12]

UNITED STATES firm manufacturing a fine line of sheet metals and sheet metal products, such as corrugated sheets, corrugated roofing, roll roofing, metal shingles, also complete line of galvanized buckets, pails, wash-tubs, etc., are anxious to secure good Canadian agents for Montreal, Toronto and Winnipeg. State lines already carried and address Box 814, HARDWARE AND METAL, Toronto. (13)

ARTICLES FOR SALE.

Don't keep any fixtures or tools around your store for which you have no further use. They are worth more to-day than they will a year hence. Don't keep money tied up which you could use to secure discounts from your wholesaler.

SECOND-HAND tinners' tools. For list apply to Box 807, HARDWARE AND METAL, Toronto. (12)

SITUATIONS VACANT.

You can secure a "five-thousand-a-year" manager, or a "five-hundred-a-year" clerk, by stating your wants under "Situations Vacant."

HARDWARE SALESMAN WANTED—A man capable of doing business with jobbers direct from the factory. State age and experience; must be furnished with very best references as to habits. Box No. 809, HARDWARE AND METAL, Toronto. (12)

TRAVELER or experience in the Stove and Furnace Business for the Provinces of Quebec and New Brunswick. Must speak English and French. Address Box 786, HARDWARE AND METAL, Toronto, stating experience, salary, etc. (tf)

WANTED—Buyer and manager for cutlery and sporting goods department of wholesale hardware house. Apply, giving full particulars, H. 9, HARDWARE AND METAL, Montreal. (tf)

WANTED—Hardware clerk, must be good stockkeeper and salesman. Apply stating age, experience and salary expected, to Peart Bros. Hardware Co., Regina, Sask. (13)

WANTED—Experienced young man for retail stove and tinsmith business with $2,000 or more to invest, salary given, interest guaranteed and share in profits. Will sell business if desires to purchase now or later. Box 811, HARDWARE AND METAL, Toronto. (14)

MISCELLANEOUS

ADDING TYPEWRITERS write, add or subtract in one operation. Elliott Fisher, Limited, 129 Bay Street, Toronto.

A MARKET OF BUYERS, backed up by money to spend, is open to you in the Busy Man's Magazine. Every territory in Canada is represented. If you have something to sell, something you want to buy, a condensed advertisement in the Busy Man's Magazine will put you in touch with the classes you want to reach. Four cents per word will carry your message from Atlantic to Pacific. Send copy of your advertisement along with order to cover cost of insertion. Your announcement will appear under a special heading, BUSY MAN'S MAGAZINE, Montreal, Toronto, Winnipeg.

HIGH CLASS COLOR WORK; Commercial Stationery, Posters. The Hough Lithographing Co. Limited, Office—No. 3 Jarvis St., Toronto, Telephone, Main 1576. Art, Good Workmanship; Business Methods.

IF INTERESTED in a Duplicating Machine for getting out circular letters, reports, price-lists, etc., or for printing various office forms, write for booklet and samples of work. The "POLYGRAPH" is the newest, latest, and best, and sells for a lower price than the others. Is unexcelled by any similar device on the market. F. W. Tenney, Canadian Sales Agent, 123 Bay Street, Room 116 Stair Building, Toronto, Can. (tf)

IF YOU are looking for a side line to add to your business there is none better than COLUMBIA GRAPHOPHONES. Double Disc Records (which means two records for a single price) and Indestructible Records (that will not break or wear out no matter how much you abuse them). The Columbia Phonograph Company is the only firm that manufactures both Disc and Cylinder Machines and Records, therefore, a Columbia dealer has the advantage over all others, as he can furnish his customers with what they want, while his competitor has to sell them what he has or lose the sale, which he generally does where there is a Columbia dealer. Are Columbia goods so d in your town? If not, why not? Do you want the exclusive agency? (remember exclusive). You had better write to-day or someone else in your town will read this advertisement and beat you to it. A postal will bring catalogues and full information free. Write to-day. Do it now. Toronto Phonograph Company, Limited, Exclusive Columbia Jobbers, 40 Melinda St., Toronto, Canada.

7,217—National Cash Registers were sold during May, 1908. That's more than were sold during May, 1907. The National Cash Register Company, F. E. Mutton, Canadian Manager, corner Yonge street and Wilton avenue, Toronto.

NOTICE—Users of Pitner Gasoline Lamps are warned against being induced to purchase parts of other makes of lamps to be used on the Pitner. The most vital part of any lamp is its generator, and the Pitner generator has been granted a patent in Canada, the United States and other countries, on the principle of its improved method of generating gasoline vapour. Supplies and parts for the Pitner lamps can be received by return mail by applying to our representatives or direct to THE PITNER LIGHTING CO., Limited, 36-38 Lombard St., Toronto, Ontario.

THE RELIABLE LIGHT will light your store 100% better than gas, electricity or acetylene. 600 candle power light costs 1 cent per hour to operate. Thousands in use. A safe, reliable, pure white light of intense brilliancy. Write for booklet M. The Rice, Knight Mfg. Co., Limited, 40 Lombard Street, Toronto.

BUSINESSES FOR SALE.

Somewhere in Canada is a man who is looking for just such a proposition as you have to offer. Our "For Sale" department brings together buyer and seller, and enables them to do business although they may be thousands of miles apart.

HARDWARE BUSINESS FOR SALE in one of the finest farming sections of Ontario. Two railways. Stock about $4,500. Good reasons for selling. Address Box 782, HARDWARE AND METAL, Toronto. (11)

WELL established general hardware business in prosperous eastern Ontario town surrounded by excellent farming district. A good opportunity. Good reasons for selling. Box 812, HARDWARE AND METAL, Toronto. (12)

STORE FOR RENT

NEW STORE to rent in Galt, Ont., opposite the Post Office. One of the best locations in town. It is now under construction, will be completed the first of April, 1909. Size, 40 ft. front, 100 ft. deep. Fine basement under whole building. For particulars address J. C. Deitrich, Box 915, Galt, Ont. [12]

Dept. 288 NATIONAL SALESMEN'S TRAINING ASSOCIATION, Chicago, New York, Kansas City, Minneapolis, San Francisco.

WESTERN CANADA HARDWARE MARKETS

Corrected by telegraph up to 12 noon Friday, Room 511, Union Bank Bldg, Winnipeg.

Winnipeg, March 9.—The wheat situation has been the leading interest for another week and bids fair to hold the centre of the stage until navigation opens at least. Winnipeg is at present a narrow and easily influenced market, so that it goes up and down with almost equal rapidity. It broke Thursday and Friday and showed on Friday night a drop of 4½ from the high point of the month for May, but on Saturday, with apparently no reason, it rallied 2c. This was mainly on a big buying order of one brokerage firm and was supposed to be for one local speculator only.

The high prices of the earlier days of last week certainly increased the receipts passing Winnipeg, and though lines of elevators report that receipts are still light, they are certainly increasing. There seems always wheat to be dug up once the price is high enough.

The advance in prices has put a serious check on export trade, but some fifteen to twenty loads was worked on Friday night, and was sold on the bid received on offers sent out on Thursday when the market was at its high point, by Saturday morning cables were so much lower that with the reaction of 2c it was impossible to do business.

The milling trade presents some interesting features. Pretty close inquiry goes to show that both of the largest milling companies still need to buy wheat and a good many are speculating as to whether the failure to agree to put up the price of flour in proportion to the recent advances in wheat, bears any relation to the fact that they need more wheat and have been waiting for the slump. It was pretty generally understood they were buyers on Friday when the market reached its low point and indeed are buyers right along when there is any break in the market. Reports reaching here from Ontario indicate that the stocks of Ontario millers are lower than usual and that they, too, have been hoping for a slump in Western wheat prices.

Autumn Damage to Wheat.

The U.S. Government report of Monday is being awaited with considerable interest as the recent crop news from the winter wheat states has been bearish, or rather more bearish than expected. There are a good many Winnipeg grain men touring in the south at present, as is usual during February and March and letters and wires from them indicate that damage to winter wheat is really serious. The damage being largely that, at the time the wheat was planted the ground was so fearfully dry that a very large quantity, many thousand acres, was blotted out and never replaced. In many parts of the winter wheat states the weather continues extremely dry and some of the most conservative of the Winnipeg dealers, who have been quietly gathering information for some weeks, hold a very unfavorable opinion of the winter wheat crop. The condition of the United States winter wheat crop is unquestionably the leading factor in whether our wheat will or will not go higher.

Oats have continued to develop interest during the week and the outlook is strong. The demand from Ontario has increased very materially and there are also many inquiries from the West from railway contractors.

The enormous amount of railway construction planned for the coming summer has stimulated interest in both oats and horses.

Ontario Horses Go West.

Shipments of horses from Ontario have been heavy of late and there have been one or two auction sales at which the prices realized were good but the best trade is being done quietly in the big sale barns. One house sold 45 horses in less than a week and the demand is certainly good. Dealers complain that they cannot get as many good heavy horses from Ontario as are required for the Western trade.

The movement in the direction of railway construction has helped the price of hay also, but only for freshly baled hay. Hay that was baled in the fall with the view of supplying lumber and wood camps continues a drug on the market and many who speculated in the baling of hay will lose considerably. The long spells of extremely mild weather have also materially lessened consumption among the farmers themselves.

Millinery Openings.

It is a far cry from oats and hay and horse to millinery openings, but all have their place in the situation in the West just now. The spring openings of both the wholesale and big retail houses were all held during the past week and the department stores also held openings of spring costumes and suits. Wholesale men and retail alike agree that it has been the best opening season for several years. The weather was exceptionally fine and mild, there was a large attendance of milliners from country points at the wholesale openings and they bought largely of good stuff. Retail men declare also that this spring the amount of orders actually placed on the opening days was exceptionally large.

Spring millinery and suit openings are generally considered a pretty good barometer of trade conditions and certainly the barometer showed a strong upward tendency in the volume of trade.

Government Owned Elevators.

It looks very much as if the Roblin Government, which prorogued this week, wanted to shut off inquiry into many of their little doings which have been actively pushed by the Opposition, as there is still a large amount of business that has not received adequate attention and the session was exceptionally short. The present attitude of the Roblin Government is to throw the whole onus of the ownership of elevators on the Dominion Government. The argument has been hot along this question and also along the line of compulsory education.

In the matter of the Government ownership of interior elevators, in spite of the monster petition presented to the Government asking for them, there are not lacking signs that the more intelligent and thoughtful of the farmers are in no haste to have this question decided off the bat. It involves too much and is too radical to be dealt with in a hurry. The chief indication of the awakening of farmers along that line is the increasing number of letters on the subject to the daily and weekly papers.—H.

Winnipeg Hardware Markets.

Values are stable on the local market at present, there being no quotable changes of interest this week. Orders for spring and summer delivery are being booked in large volume and the turnover this spring will be the largest in the history of the West. Builders' hardware is in special request.

Price Quotations.

WIRE—Barbed wire, 100 lbs., $3.15; plain twist, $3.40; staples, $2.90; annealed wire, $2.90 base; oiled, 10c extra; bright iron, $3.10 base; brass spring wire, 29c base; plain galvanized, wire, 6, 7, and 8, $3.50; No. 9, $3.10; No. 10, $3.60; No. 11, $3.70; No. 12, $3.30; No. 13, $3.40; No. 14, $4.25; No. 15, $4.75; No. 16, $5.

FILES—Arcade or Eagle, 70-10-5 p.c.

SOLDER—23c per lb.

WRINGERS—Royal Can., $38 per doz.

CHURNS—45 p.c.

ROPE—Sisal, 11c per lb.; British manila, 12c ; pure manila. 15c.

BUILDING PAPER—Plain, 62c per roll ; tarred. 78c per roll.

LINSEED OIL—Boiled, 80c; raw, 77c per gal. in barrel lots.

AMMUNITION — Primers, $1.55 per M.; loaded shells, English and Canadian make, 12 gauge, black, soft, $19 per M.; 10, $23.65 ; 12, smokeless, chilled, English, $25; 10, $29 ; 12, Canadian, $24; 10 Canadian, $28; shot, drop, $7.50 per 100 lbs.; chilled, $7.90 buck, $8.30; 28 ball, $8.70 ; powder, F.F., Hamilton, $5.25 per keg.

EDMONTON.

March 5.—Trade has been fairly active during the past week, mild weather for the past three weeks seems to have stimulated business and there is a good demand for rope, bolts, nails, bar iron, blacksmith's supplies, building paper, and clevises. Barb wire is moving freely and a great deal better than this time last year. Ready roofings are also in much better demand than a year ago.

The City of Edmonton is awarding contracts this week for iron pipe, lead pipe and brass goods for the waterworks department.

The Provincial Government is placing an order for approximately 40,000 lbs. of steel bars to be used on the new Parliament buildings.

Lundy & McLeod, Edmonton, have sold their hardware business to the Chown Hardware Co., also of Edmonton.

A. T. Chambers, of "The Fort," made a flying trip to Edmonton this week.

R. B. Wilkinson, Content, was a visitor to Edmonton for a few days.

K. R. Morrison, Morrison & Bryenton, Spring Lake, was an Edmonton visitor this week.

T. Breen, of Fowler & Breen, who have hardware stores at Wetaskiwin and Sedgewick, was in the city early in the week.

H.

CALGARY.

March 4.—Business for the past couple of weeks is improving greatly. The weather has been very mild, and all the contractors are preparing to commence their spring work, also finishing up all kinds of outside work which they were unable to do anything with during the cold spell. There are also quite a number of Americans in and around the city at present prospecting and are making enquiries regarding all building materials.

W. H. Waugh, of the Comer Hardware Co., accompanied by Mrs. Waugh, left for his former home at Summerside, P. E.I., on Thursday last to attend the funeral of Mr. Waugh's father, who passed away on the morning of Feb. 25.

Any person wishing to have an insight into Calgary, and to possess fifty-six pages of first-class reading matter, should not delay in securing a copy of the anniversary number of the Morning Albertan, issued Monday, March 1st.

Your New Letter Heads.

Messrs. Barry & Butler,
Allentown, P. Q.

Gentlemen:-

I have your letter of the 15th inquiring if we can give you any assistance in the preparation of your new letter heads. We most certainly can. In order to help our agents have more attractive and tasteful stationery we have prepared a number of special designs, not only for letter heads, but for bill heads, statements, envelope corner cards, checks, etc., in one and two colors. I am enclosing samples of these designs and if you will select the ones you desire and state the exact wording you want to have appear, we will be glad to have the type matter set up and furnish you with electrotypes all ready for your printer to put on the press.

Many printers, especially in small towns, have not the facilities for getting up attractive stationery, and often the merchant is compelled to send out stationery that misrepresents him and creates a wrong impression of his store. By taking advantage of our stationery electros you can always be sure of neatly printed and up-to-date stationery, and your local printer should also give you a better price for the work, as he will not need to set up any type.

Yours very truly,

C. C. BALLANTYNE.

BUILDING AND INDUSTRIAL NEWS

For additional items see the correspondence pages. Information is solicited regarding building and industrial news, the incorporation of companies, establishment or enlargement of mills, factories or foundries, municipal waterworks and sewerage systems, railway or mining news, etc.

Municipal Undertakings.

Simcoe, Ont., ratepayers have passed a by-law authorizing the instalation of a waterworks system.

Tenders will be received until March 23, 1909, for the proposed waterworks system at Burlington.

Meaford ratepayers have passed a by-law authorizing the instalation of a waterworks filtering basin.

The Hamilton sewers committee will procure more land for the proposed west end sewage disposal works.

Fort Erie ratepayers will vote on a by-law to authorize the raising of $50,000 for waterworks purposes.

Estevan, Sask., ratepayers will probably vote on March 12 on by-laws to raise $30,000 for fire protection purposes.

The Roberts Filtration Co., of Philadelphia, Pa., has been awarded the contract for the instalation of a filtration plant at Edmonton, at cost of $16,500.

A new main sewer will be constructed at Sarnia.

Industrial Development.

A sawmill will be erected at Sturgeon Falls, by Oscar Rusk.

The Albion Brick Co., Vancouver, will build a saw and planing mill.

A large cement works will be established at East Kootenay, B.C.

The Atikokan Co. intend starting up their blast furnace at Port Arthur in the spring.

The Meridan Britannia Co., Hamilton, will erect a three-storey addition to their works.

The Ogilvie Milling Co., of Montreal, is contemplating establishing a branch mill at Sudbury.

The Lethbridge Brewing and Malting Co. will erect a $75,000 malt house during the summer.

The Davidson-Ward Lumber Co. are erecting a 20-machine shingle mill at Loughborough Inlet, B.C.

MacVicar & Heriot have prepared plans for a factory building to be erected for J. Eveleigh & Co.

The International Harvester Co. will erect a four-storey brick warehouse at Calgary and another large warehouse at Saskatoon.

C. E. Deakin has the general contract for the erection of a new warehouse and office building at Montreal for W. J. McGuire & Co.

Joseph Perreault, of Montreal, has awarded the contracts for the erection of the Campbell Manufacturing Company's new warehouse in Ville St. Louis.

The Vancouver Pipe and Foundry Co. will erect a large foundry in the southern part of Hastings townsite, B.C. The proposed building will be 150x75 feet.

Plans are being prepared for the erection of some important buildings at Regina during the coming season. Among others, a large structure for the Heintzman Piano Co. will be erected.

The Edinboro' Timber Co., Vancouver, capital $200,000, has been granted a British Columbia charter to manufacture lumber, run sawmills, make sashes and doors.

The Canadian Packing Co., whose plant at Pottersburg was recently destroyed, have secured a site in London, on which they propose to establish a public abattoir.

Another new industry is the Welland Stove Works, which has just been organized. Plans are ready for a factory building, and 50 hands will be employed beginning June 1.

The plant of the Fraser River Tannery Co., New Westminster, has been sold to the Swift Packing Co., of Chicago. The plant will be greatly enlarged and operated to its full capacity in the near future.

The Keystone Engineering Co., Toronto, are contemplating locating at Wiarton. They state if satisfactory arrangements can be made they will employ from 150 to 500 men and pay $100,000 annually in wages.

Indications point to a speedy commencement of work at the steel works, Cobourg. The machinery has now arrived and is being placed in position. An 80-foot crane is in operation and used in placing the machinery.

Railway Development.

An electric railway is proposed to be built from Medicine Hat to Calgary.

The Canadian Pacific Railway will construct a branch line from St. Mary's to Stratford. The distance is 23 miles.

The Moose Jaw Board of Trade has received word that the G.T.P. will probably construct a branch to Moose Jaw from Regina this year.

The Tillsonburg, Lake Erie & Pacific line is said to have been acquired by the Canadian Pacific, and that road is seeking authority to build from Ingersoll to Collingwood.

Public Buildings.

A town hall will be erected at Lanigan, Sask.

About $100,000 may be spent for new schools at Lindsay.

An addition will be built to Harkins' Academy, Newcastle, N.B.

Oshawa ratepayers have voted the sum of $20,000 for a new high school.

Municipal buildings to cost $10,000 are proposed to be built at Estevan, Sask.

A Roman Catholic church and school will be erected at Lacombe, to cost about $65,000.

Winnipeg hospital commission has made a report recommending that the general hospital be enlarged.

The Port Arthur City Council have accepted a grant of $30,000 from Andrew Carnegie for a public library.

The congregation of the Lethbridge Baptist church is contemplating the erection of an addition to their church this year.

The N. B. Provincial Government has promised financial aid towards the construction of a tuberculosis hospital at St. John.

Plans have been prepared for the erection of a new two storey school building at Prince Albert, to be erected by the Separate School Board at a cost of $8,000.

Tenders have just been taken by George Rankin, Hamiota, Man., for the erection of a Presbyterian church at Oakner, Man.

The contract for the new building for the Halifax Children's Hospital has been awarded to Walter Lownds at about $15.000.

A proposition is before the London Board of Education regarding the erection of a technical school in conjunction with the collegiate.

Roland W. Lines has been instructed to prepare plans for a new 16-room high school building, to be erected at Edmonton this year at a cost of approximately $75,000.

Darling & Pearson, Toronto, are revising the plans for the Faculty of Education and Pedagogy buildings, which will be erected this year, on a smaller scale than previously intended.

Residents of Westboro, Woodroffe and Ottawa West decided to erect a school building at Westboro and a smaller building at Woodroffe, to be completed by Oct. 1, cost not to exceed $18,000.

Sydney, N.S., school committee recommends the construction of a new and thoroughly modern academy with as little delay as possible. It is estimated that the sum of $50,000 would be required.

Smith Bros & Wilson, Regina, have been awarded the contract for the erection of the land titles building at Saskatoon. The contract price is $26,700. Work on the building will be started in the spring.

About $100,000 will be expended in repairs, new buildings, etc., at the provincial hospital, at St. John, N.B., which was recently badly damaged by fire. A separate building of brick and stone will be erected for the heating and lighting plant and laundry.

Raymond, Alta., ratepayers decided that another election would be held to vote on raising money to build a 12-room school building. Plans had previously been prepared for an 8-room building, but it was found that this would not give sufficient accommodation. Estimated cost of 12-room building is given as $30,000.

New Companies.

The Reflecting Awning Co., Montreal; capital, $20,000; to manufacture awnings and window shades. Incorporators R. King, H. Cartier, J. L. Richard, Montreal.

The J. J. Wilson Mfg. Co., Ottawa; capital, $20,000; to manufacture shoe and stove polish. Incorporators, J. J. Wilson, W. H. V. Hooper, E. P. McGrath, Ottawa.

H. L. Bowers, Ltd., Port Hope; capital, $40,000; to manufacture building, foundry and sanitary supplies. Incorporators, H. T. Bush, A. E. Pipher, H. L. Bowers, Port Hope.

Rondeau Gas and Oil Co., Kingsville, Ont.; capital, $100,000; to produce and refine natural gas and petroleum. Incorporators, S. L. McKay, B. Jasperson, Kingsville; L. G. Neely, St. Mary's, Ohio.

Empire Fence Export Co., Walkerville; capital, $10,000; to manufacture wire, wire fencing and products of wire and iron, as well as machinery. Incorporators, M. Church, Detroit; J. W. Coatsworth, R. P. Hall, Walkerville.

IVER JOHNSON

Truss Bridge  Bicycle

Dealers

like to sell the Iver Johnson Truss Bridge Bicycle because it remains sold—proof against "come backs." Our **Agent's Proposition** is worth looking into, for the man who would make good money on a good proposition.

Riders

prefer it because it is the most durable because it is made of the best materials by the most skilled mechanics in the world. Costs moderately in the beginning, nothing for repairs if not mistreated, and costs least, therefore, in the end.

Send for Free Catalogue

It illustrates the 1909 models and shows why the Truss Bridge is so popular among dealers and riders. It is a text book on bicycles.

Novelties for the Hardwareman

NEW STEEL SHINGLE.

Hardwaremen and tinsmiths are taking a new interest in metal roofing this year for many reasons, not the least of which is Hardware & Metal's oft-repeated commendation of this line as a profitable one for the dealer to push. Many of our readers are already familiar with the construction of several of the different galvanized steel shingles being made and they will be interested to know that a new article of this kind has recently appeared.

The "Galt" steel shingle was invented and patented in 1908 by The Galt Art Metal Company, Galt, who

Galt Steel Shingles.

are now installing an elaborate plant for the manufacture of the "Galt" shingle and are prepared to back it to the limit as a trade winner.

It is claimed by the manufacturers that the shingle is weather-tight under all conditions—that the construction of the side and end locks will keep out the most penetrating storm.

Figure 1 is an enlarged view of the top of the side lock. This end is closed by a blow from the hammer after laying and positively prevents wind driving rain or snow through the roof at this point. This closed end valley is an exclusive feature of the "Galt" shingle and is a very real improvement.

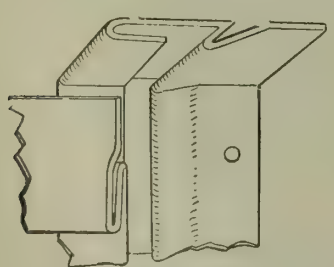

Fig. 1.

Figure 2 is an enlarged view of the bottom of the side lock and shows how the end lock is carried past the side lock to the edge of the shingle without a notch or opening of any kind. As the cut shows, the "Galt" shingle is embossed in a bold Gothic Tile pattern

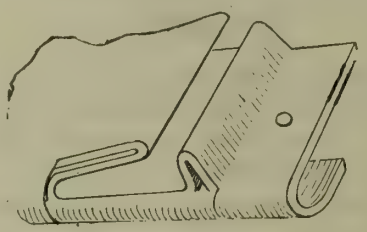

Fig. 2.

and presents a very handsome appearance on the roof. Because "Galt" shingles are laid without cleats, notches, rivets or solder the makers claim that they are the most easily applied.

Readers of Hardware and Metal can secure samples and full particulars of the "Galt" shingles by writing the manufacturers.

NEW HARDWARE STORES.

Frank A. Child, Hardware & Iron merchant, of Matheson, intends opening a new branch store at Cochrane, and is expected in Toronto next week to purchase his stock.

J. E. Mosley, hardware merchant, Huntsville, has shipped a stock of heavy hardware and miners' supplies to his new branch at Gow Ganda. Jno. Duncan has been placed in charge. The firm has been dealing in heavy hardwares for some time.

Catalogues and Booklets

Manufacturers or jobbers sending printed matter for review, should draw attention to the new lines listed; and retailers sending for catalogues or other matter, should write on their regular printed letterhead and mention this paper to make clear that they are in the trade.

Ready for Fishing Season.—Wm. Croft & Sons, Toronto, realizing that the fishing season is near at hand are advising the trade to stock up. They have issued an illustrated catalogue devoted to fishing tackle, which, they say, are the kind needed. The firm also deal in hammocks and sporting goods generally, and they invite hardwaremen to write for their catalogue.

"Mist-like Spray Sprinkler."—What is claimed to be a perfect lawn sprinkler is "The Fountain Sprinkler," made by the Standard Stamping Co., Marysville, Ohio. The holes in "The Fountain" are not merely holes punched in a round box to let the water out, nor a group of straight round streams working with mathematical precision; but a natural shower of spray, like mist, whose results are said to be perfect. A sample for comparative test will be sent post paid to any dealer at the wholesale price.

Improved Washing Machine.—J. H. Connor & Son, Ottawa, are makers of the "Connor Ball Bearing Washers," and have issued a booklet which tells about them. This machine swings on ball bearings, assisted by two coiled steel springs. The tub is detachable from the framework and stand, and the wringer stand is very solid. Unlike other washing machines this one has a rack for holding the basket to catch the clothes as they come from the wringer.

Trust the Truss.—The Iver Johnson Arms & Cycle Works, Fitchburg, Mass., use the above catch phrase to attract attention to their wheels, and invite requests for their free catalogue, illustrating their 1909 bicycle models, and showing particularly the good points of their "truss bridge." This bridge is a double-tube arch holding rigid the framework of the Iver Johnson bicycle. Hardwaremen are invited to look into their "agent's proposition." This bicycle is claimed to be made of the best materials by the most skilled workmen, and at moderate cost.

Model Saw Catalogue.—One of the most voluminous and complete lists of goods ever received by Hardware and Metal is the 1908 hardware edition of E. C. Atkins & Co.'s saw catalogue. It is a green-covered, red-trimmed, cloth-bound book, of 256 pages, and every article enumerated therein is illustrated and described by picture and word. The head office of the works is at Indianapolis, Ind., and branch houses are located in all the larger cities of the United States. The Canadian factory is at Hamilton, and an excellent picture of these works is the principal illustration of the book. A private telegraphic

New Atkins Saw Catlogue.

code for ordering Atkins' goods is not the least useful chapter in the book, and besides treating of saws, saw tools and mill specialties, about seventy pages of the catalogue are devoted to other articles handled by hardwaremen and made by the Atkins company. A complete index for ready reference is placed at the back of the book, and a supplementary list of additions and changes is enclosed.

News of the Paint Trade

THE SPRING CAMPAIGN.

In preparing for his spring campaign the paint dealer should pay particular attention to his advertising matter. Advertising, properly handled, is like the enveloping movements of a successful general, it wins the battle. As we have before pointed out, the paint demand needs cultivation. The public generally are not yet properly educated to the value of paint. Until they are shown by repeated hard knocks what can be done by the expenditure of a few dollars, they are inclined to dismiss the matter of paint from their minds until one day a neighbor's house becomes resplendent in its new coat, and then a hurried visit is made to the nearest paint store or the matter is left over until next year.

It is the dealer who must put before the consumer the value of paint in such a way that the latter is made to think of paint a long while before the time for painting has come. The attempt must be made in no half-hearted manner. The educative work must be done, as we have said before in this journal by a follow-up campaign, and, as this takes time, the dealer must start in at once. Advertising matter is silent salesmanship. It is always working for the store, and the dealers in sending out his circulars, or what form of advertising he may decide upon, is preparing sales for himself all the day round.

In these circulars, the merchant should draw attention to the value of paint, to its preservative qualities, as well as its merits as an investment pure and simple. Point out that the building, implement, or fence in need of paint is costing the owner more than the price of several paintings. If you can bring this home to the consciousness of the man who is unknowingly bearing this cost, he will not hesitate to put off painting. Point out the good percentage of interest involved in painting. A landlord by spending a few dollars adds hundreds to the value of his property as a selling proposition. Do not forget the interior of the homes. Paint is a disinfectant, and it is a beautifier. It makes an ugly corner look cheerful. Interest the wife, and you will interest the husband. But all this can not be done by single efforts. The dealer must follow up one circular by another, and get the district so impregnated with the thought of paint, that when the snow melts and the warmth comes to the land the first thoughts of the community shall be of paint.

It is well for the dealer to make himself acquainted with every case of paint needed within his district, and knowing the cases, he can concentrate every effort upon them. If possible a personal canvass is the best method of rounding up the districts, but a busy dealer has not always the time for this, or a reliable assistant at hand to send out in

his place. But a spirited advertising campaign, and a plentiful use of the matter supplied by the manufacturer is a good substitute. Paint sales breed paint sales, and the first customer will soon be followed by another. The great point is, in all this, that there should be no procrastination. The merchant must strike at once and strike often if he wishes to make his spring campaign successful.

GOOD WINDOW DISPLAY.

An effective and easily arranged window display can be made with cans of paint and specialties, bright colored ribbons, and show cards. The cans are placed on a flower stand or small table in the centre of the window space about three or four feet back from the glass. The show cards are grouped on the floor of the window in such a manner as to be easily read. See that cans and cards are not huddled together, but placed in pleasing positions. Then tie a ribbon to each can and let it lead down in a graceful curve to its corresponding show card. It may be necessary to cross the ribbons, but if each is of a different color there will be no difficulty in following them with the eye from card to can and vice-versa.

The effect of this display, says an exchange, when properly arranged, is striking. The bright colored ribbons attract the attention of every passerby. The show cards, of course, describe the goods, but may have much or little lettering on them, as desired. For example, the show card on which a ribbon is attached leading up to the can of mixed paint may be lettered "Our reliable house paint," and similarly for floor paint, porch and screen paint, varnish stain, etc., or the goods may be more fully described and their virtues dilated on. The main object, however, is to arrest the attention of the public, and this the ribbons, cans and cards will do, if tastefully arranged.

Paint and Oil Markets

MONTREAL.

March 12.—The cheerful feeling noted last week is more than ever in evidence, the trade generally being quite optimistic as to spring business. Orders are no longer being held back to await shipping instructions but are now marked either for immediate shipment, or the latest the 1st of April. While paints, colors, varnish, stains, and enamels are now sold in increasing quantities during the winter months, it requires the strong light of the spring to show up most effectively shabby, weather-stained, surfaces. Hence, the spring will always be the great rush time of the paint trade. That the coming months are to be no exception to the rule is evidenced by the development of trade, and the encouraging reports being sent in by the travelers.

TURPENTINE—With unusual uniformity, turpentine quotations in the South show little variation. This condition gives confidence, and with the fair amount of consumption now in evidence, quotations locally are unchanged. We continue to quote 58c for single barrels, net 30 days.

LINSEED OIL—Buying seems to have been removed from the arena of speculation, and the inquiry is of a nominal character. There is no change in quotations. Raw 1 to 4 barrels 59c; 5 to 9 barrels, 58c; boiled, 1 to 4 barrels, 62c; 5 to 9 barrels, 61c. Strictly net, 30 days.

GROUND WHITE LEAD—Orders have been very heavy during the past week. While this may be only spasmodic, it is hoped that it is but the commencement of a much better demand than has been experienced for some time past. As a result of the improved trading, the market is firm and quotations are unchanged. Strictly pure, $5.50 to $6, according to brand, and No. 1, $5 to $5.50 f.o.b. Montreal.

RED LEAD—Red lead shows improvement, after a long period of quietness, and the market is in better strength. We quote: Genuine red lead in casks, $4.50; in 100-lb. kegs, $5; in less quantities, at $6 per 100 lbs.; No. 1 red lead, casks, $4; kegs $4.50, and smaller quantities, $5.50.

COLORS—As is only natural at this time of the year, the shipment of colors is experiencing a good lift up, and all lines are feeling the improvement. Window greens, ochres, and vermilions especially, are showing a vigorous movement.

VARNISH—All lines are reported to be in fair demand, and as gum, turpentine and methylated spirits are cheap, buyers have much confidence.

PARIS GREEN—The call for Paris green is only light, the market seemingly having been thoroughly canvassed. There is no change in quotations: 1-lb. packets, 100 lbs., in case, 21c; 1-lb. packets, 50 lbs., in case, 21½c; ½-lb. packets 100 lbs., in case, 23c; 1-lb. tins, 100 lbs., in case, 22c.

WHITE ZINC—Owing to the improved trade conditions, white zinc is in fairly active demand at unchanged prices. Dry V.M. Red Seal, 7½c; Red Seal, 7c; French V.M., 6c; Lehigh, 5c; white zinc, ground in oil, pure, 8½c; No. 1, 7c; No. 2, 5¾c.

PUTTY—A slight improvement is reported in the shipment of putty. Stocks being large, and well assorted, no difficulty is being experienced in fulfilling orders. We quote: Standard putty, 880-lbs., in casks, $1.65; in 100-lb. drums, $1.90; bladder putty 400 lbs. in barrels, $1.90; in 100-lb. cases, $2.05; in 25-lb. drums, $2; 25-lb. tins, $2.05; 12½-lb. tins, $2.25 f.o.b. Montreal.

The House Cleaning Season

Now so close at hand makes the householder and the hardware dealer alike think of

MOORE'S HOUSE COLORS

They are always ready for use, come in almost any shade desired, represent the highest quality of excellence, cover surfaces better and have greater hiding power. Moore's is a pure linseed oil paint. The pigments are durable and are always given a thorough grinding. The colors are true. To the dealer Moore's House Colors mean a growing profitable trade; to the consumer they mean economy, reliability and satisfaction.

Ask about our color cards and prices.

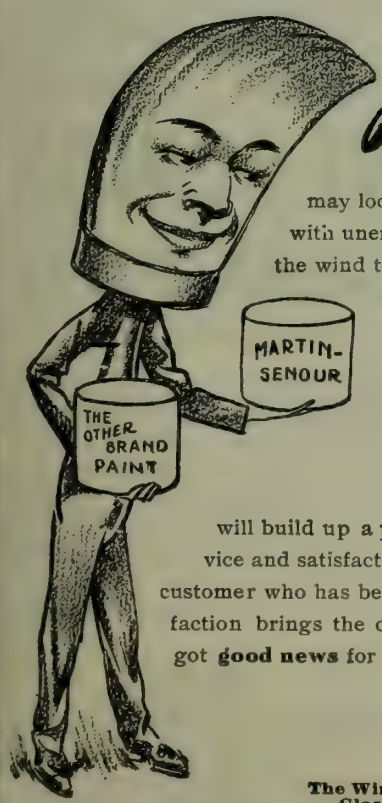
Just Compare Values



You can't settle the question of quality by a glance at the outside of the can. Most paints may look alike even after the cans are opened. But **"Old Daddy Time"** shows up the difference with unerring certainty. He hates deceptions. He punishes shoddy. He makes his sun to shine; the wind to blow; the rain, snow and dew to descend and the paint has got to be **"right"** that can withstand the force of these darts.

Durability is the test of quality—the proof of the purity of paint—and the yard stick that measures the economy of cost to the consumer.

Martin-Senour Paint

100 PER CENT PURE

will build up a permanent business for the dealer, because it is durable paint. Measured by years of service and satisfaction it is the most economical paint made today. No amount of explaining can satisfy the customer who has been disappointed. **Martin-Senour Paint** leaves nothing for the dealer to explain. Satisfaction brings the customer back for more of the same kind. If that's the kind of customers you want we've got **good news** for you, for we can tell you how to get 'em and hold 'em. Write today.

TORONTO.

March 12.—A steadily improving condition prevails in nearly all paint lines. The outstanding features, if there are any at all, are the firmer tone of oil and the easier tendency in the price of turpentine. Orders are coming in satisfactorily for April delivery, and these include a great range of paint supplies. Paris green is pretty well booked up now, though the green will not go out in many cases until May.

Factories in Western Ontario, especially, are enlarging and opening up in new lines, and they are calling for many articles handled by the paint supply houses. Brushes, glue, chamois, oakum and other goods are fairly free in demand. The building prospects in country and city are encouraging and painters expect a good working season.

One thing particularly noted in the buying of paints is that as the overcautious feeling wears off there appears to be a change in the method of buying as compared with that in vogue in the past. Hardwaremen are not now placing the big spring orders they once did; preferring to stock up more lightly and come to the buying centres more frequently. By this means they are enabled to have more ready cash on hand for emergencies should any such arise.

TURPENTINE—A range of prices running from 58c to 60c prevails, although the majority of supply men are keeping the market at 60c and letting some business go by. That business, however, is not much, as there is very little demand for turps. this week. Two to four barrels are at 58c and 59c; and 5-gal. lots are still at 65c. Prices may even up again at the low figure.

LINSEED OIL—Very firm, with a tendency to a higher price is the situation as regards oil. The present market quotations will likely hold for a week longer at least. Demand is good, due, no doubt, to the stimulus of advancing markets. 59c and 62c are the prices of single barrels for raw and boiled respectively; 5-barrel lots being quoted at 1c less.

GLASS AND PUTTY—March is the quietest month in the year for glass lines. Stocks are low, but demand is almost nil, and this condition in consequence keeps prices easy. Putty is called for in future delivery orders, but at present is a trifle slow as a seller.

WHITE LEAD—Travelers are coming in with rumors of cutting in lead lines, but the local houses deny they are the culprits and say they do not know who is doing this reaching for business at lower prices than the prevailing market quotations. No. 1 is $5.40 to $5.65; pure white, from $5.80 to $6, and a superior line is offered at $6.25. Genuine red lead is quoted at $4.50 for casks and $4.75 to $4.80 in 100 lbs.

PARIS GREEN—Booking for the season is about over, although one local house reports the placing during the week of one of the biggest orders for years. Orders generally call for delivery not before April, and not a few are deferred until May. Quotations are the same as last week, barrels at 20½c and 25-lb. drums at 21¾c.

STAINS AND VARNISHES—Demand is increasing in these lines after a rather quiet winter. April 1 will see large quantities of stains and varnishes going out. Prices continue firm and unchanged.

PETROLEUM—Very good demand exists. Prime white is 13½c; water white, 15½c; and Pratt's astral, 17½c.

SELLING PAINT.

The problem of selling paint successfully is more easily solved than the average hardware dealer is likely to think. The methods used in pushing the sale of one line of hardware may be effectively adapted to others. Dealers should not think that the paint department is something entirely different from others, calling for unusual skill in salesmanship and advertising. As a matter of fact, the hardware merchant is helped more by the manufacturer in his paint sales than in any other department. The knowledge gained from years of manufacturing paints is at his disposal. Many houses get up plans for selling campaigns for the retail dealer, in addition to numerous attractive hangers, posters and other effective advertising matter. The manufacturer goes more than half way in helping the dealer.

To start with, the paint department has these advantages. Then if the dealer follows out the suggestions with as much persistence as he does the selling plans of other lines, he has a working basis which should bring him first-class results. Some dealers who have their various lines of hardware well displayed have to go down cellar when a customer asks for paint. Or perhaps he has to brush away the cobwebs under a back counter and dust off several cans before he finds one with the right label. The customer looks on and guesses that he will buy his paint at a store where sales are occasionally made. Of course, if paint is hidden, nobody is going to know that the dealer has any to sell. Now that paint is put up in attractively labeled cans, there is no excuse for not showing it.

Paint deserves a generous share of the show windows, and with the different colored labels, cans and attractive posters of well-known paint houses, it lends itself readily to striking displays. By fixing in mind the selling points furnished by the manufacturer and gathering information from salesmen and customers who have used the goods the dealer can greatly increase the sales of a profitable line.

PAINT NOTES.

The Toronto Board of Education has awarded the contract for painting the new Fern Ave. school to J. Phinnemore at $1,025. Mr. Phinnemore also has the contract for painting the new Girls' Home building at $395. Blackburn & Sons have the glass contract for the latter structure at $546.

The Master Painters' Association of the United States and Canada will hold its annual convention at Peterboro in July next.

Amatite ROOFING

Something Back of It

AMATITE is easy to sell because it offers better value for the money than any other ready roofing.

It can be profitably retailed for less than any other roofing of more than half its weight, so that the man that wants a good roof at low cost gets Amatite.

Case's Grain Store, Colchester, Conn.

It is made with pitch, the greatest waterproof material known and so it appeals to the man that wants durability.

It needs no paint the real mineral surface takes care of that and the "no painting" feature of Amatite appeals to everybody. Back of the forces that sell Amatite is the HEAVIEST ADVERTISING CAMPAIGN in the business, which is "going some" these days. We help the dealer by giving him samples, booklets, electros and signs for his own advertising. Write For Particulars.

DISSTON SAWS

are THE STANDARD by which the MERIT of all others are JUDGED

The Blades of the **Disston Brand Saws** are of a High Grade Crucible Steel, made in their own Steel Works, specially tempered, rendering the blade tough and elastic, permitting the bending of the points of the teeth in the operation of setting, and at the same time sufficiently hard to admit of a cutting edge that can readily be sharpened but not easily dulled. The blades are ground an even thickness on tooth edge, properly tapered for clearance and the teeth are of such shape as to enter into and **Cut**—not tear—the wood.

The Handles of the **Disston Handsaws** are specially adjusted to the blades to give the correct "hang" or pitch to the saw when entering the work—each handle being separately fitted to its blade. They have a comfortable grip, make the saw feel light and well-balanced, the saw feeding into the work with the minimum wrist pressure.

It is upon these points of practical merit the **Disston Saws** have achieved their popularity.

Prompt Attention Given to Mail Orders.

COVERTITE ROOFING

We Couldn't Improve the Roofing So We Improved the Package

Each Roll of Covertite Roofing is now equipped with metal ends, held on in such a manner that the most severe handling cannot dislodge them, yet they are easily removed when the roofing is used. It is impossible for the ends to be torn off in transit and the caps, nails and cement which are packed in the core of each roll lost out, as is so often the case with other packages.

Start the season right with a good Roofing

COVERTITE

is the best roofing in the best package ever placed on the market. Our name is on every roll which is an absolute guarantee to dealer and user. We will fill a small trial order at quantity prices. You can have all one square rolls if you like. Made in 1, 2 and 3-ply thickness. The first reliable dealer in each city to place an order gets the business for roofing.

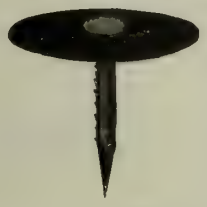
THE QUICK SHIPPERS

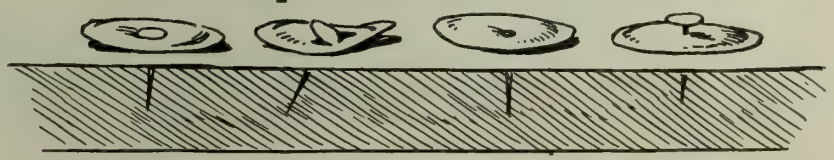
The Days of the Old Style Roofing Caps are Numbered, Read About

Simplex Roofing Nails



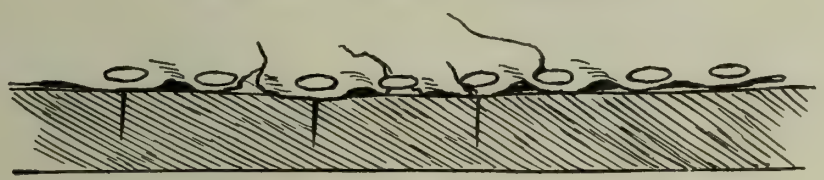
ONE PIECE NOT TWO PIECE

The Cap and Nail Trouble



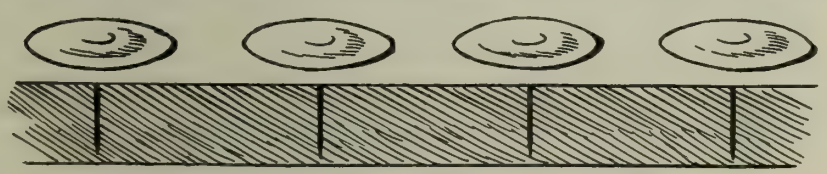
1. It takes time and costs money to assemble caps and nails.
2. The number of caps and nails never match.
3. The holding of caps with one hand and the nails with the other in steep and dangerous places calls for a third hand to hang on with.
4. There is always a chance for a leak where the nail goes through the tin cap.
5. The thin tin caps soon rust through.
6. The thin tin caps curl up when the nail is driven, and leave no bearing on the roofing.

Small Nail Trouble



1. Four times as many nails to drive to get the same surface under the head.
2. The wind strain causes the roofing to tear away from the head.
3. Briefly, four times the cost of applying the roofing in time and nails.

No Trouble—Simplex Roofing Nail



1. Quickest to lay—a money saver.
2. Thick heads resist rusting.
3. Head is curved.
4. Edge will not curl when driven.
5. No leaks around the head.
6. All in one piece.
7. Four times head area of a large-headed nail.
8. Stems smaller than stem of large-headed nail, thus do not split roof boards.

Blundell PARIS GREEN

Spence & Co.'s

BULLETIN No. 158

In a report headed as above made by A. G. McGill, Chief Analyst at the Laboratory of the Inland Revenue Department, Ottawa, address to W. J. Gerald, Esq., Deputy Minster of Inland Revenue, particulars are given of analyses of samples of Blundell Spence & Co.'s Paris Green taken at random for Government test purposes from Halifax to Victoria. The samples contain an average EXCESS over the Government Standard of 5.70 per cent. Arsenious Acid and 2.80 per cent. Cuperic Oxide. In every case the Green is pronounced by the Chief Analyst "Genuine.' THE EXCESS NAMED IS GREATER THAN THE AVERAGE EXCESS OF ALL OTHER MAKERS' SAMPLES. THEREFORE WE SAY THEIR PARIS GREEN IS THE STANDARD BY WHICH ALL OTHER MAKES SHOULD BE JUDGED.

IF YOU WANT A COPY OF BULLETIN No. 158 WE CAN SEND IT TO YOU.

Blundell Spence & Co., Ltd., have been established since 1811. They have made Paris Green for 60 years but did not seriously attempt to place their production on the Canadian Market till last year. THEY HAVE COME TO STAY.

Sold in ½-lb. and 1-lb. round cardboard cartons; 1-lb. lithographed tins; 25 and 50-lb. drums; 100-lb. kegs and 600-lb. barrels.

Prompt Attention Given to Mail Orders.

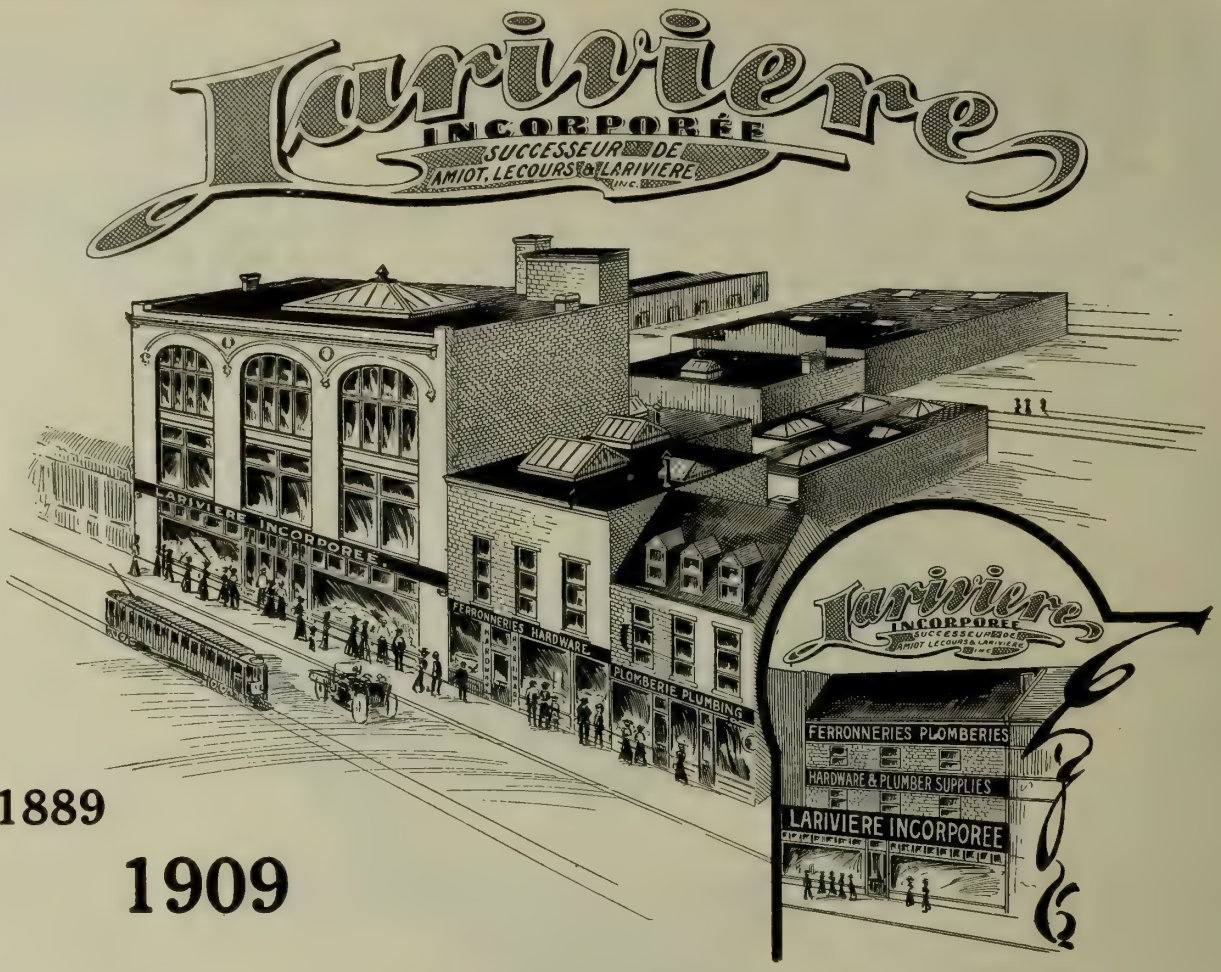
OTTAWA TORONTO **MONTREAL** CALGARY VANCOUVER



This Picture Represents

Twenty Years of Development—Twenty Years of Success

On the next page a brief history is given of how this success was accomplished.

All great institutions have been all through history the lengthened shadow of one man. This business is just the lengthened shadow of **one man, Mr. Fred. C. Lariviere,** the president and promoter of it.

Here is a man whose genius for organization has reached a small climax. His personality is so strong that it is almost impossible to prevent him from being elbowed into **public prominence. Still time alone will tell. His concentration to-day is on the business over which he presides.** What **Lariviere Incorporated** may be in the years to come will be based on the development of Montreal and of Canada.

The headquarters of this firm are talked of all over the trade in Canada. No hardwareman of any sense would miss meeting Mr. Lariviere; neither would he miss seeing the stores and warerooms as there, many new pointers are available to any man. Without any idea of boasting, the Lariviere premises are unrivalled in Canada.

Lariviere Incorporated, Montreal

TWENTY YEARS OF SUCCESS

"Lariviere Incorporated," Successors to Amiot, Lecours & Lariviere (Inc.), 1889-1909.

There are links in the chain of every business success which must be forged of nerve and perseverance. There are gaps, which only nerve and perseverance can bridge. Nerve to believe the things we think. Perseverance to do the things we plan.

When in October, 1889, Messrs. Albert Amiot and J. E. Lecours started in the hardware business, with a capital of $418.78, and a stock valued at $2,000 payable in eight monthly instalments of $50.00 each and 16 monthly instalments of $100 each—few business ventures on earth, presented possibilities smaller and less alluring. With their nerve and perseverance they began quietly to build a business for themselves, which to-day stands as a monument to initiative and perseverance.

On the 1st of January, 1892, Mr. Fred. C. Lariviere the actual president of the concern, joined the two successful partners to establish the firm of Amiot, Lecours & Lariviere. In January, 1902, the firm was incorporated, under the name of "Amiot, Lecours & Lariviere Incorporated," with Mr. Lariviere as its president. Mr. Amiot as managing director, and Mr. J. Ed. Charbonneau as director secretary-treasurer, with a paid up capital of $100,000, which amount represented the earnings of the firm since its organization. Since 1902 6 per cent. yearly has been paid and over $40,000 placed to reserve.

The public had placed its confidence in this mercantile house to such an extent as to assure its permanent development inasmuch as during the year 1907, and 1908, the sales averaged over $1,700 a day.

As the business grew it was decided to increase the capacity of stores, warehouses and offices, in order to satisfy the customers of the firm, comprising the largest patronage of any establishment of its kind in Canada. As Mr. Lariviere well expressed himself: "Our business is to serve the public honestly, to give entire satisfaction to our customers at whatever cost to us. Such is the secret of our great success.

So, from the outset, the firm's policy has been to foster its trade by means of reliable goods at reasonable prices, a policy which proved successful.

All alterations were made with a view of systematizing the work and of facilitating prompt deliveries. The employes were provided with toilet rooms, dressing rooms, and with a reading room, capable of accommodating 150 persons and other improvements were inaugurated for the betterment of conditions under which employes work, and for their health, comfort, entertainment, amusement and contentment. In the reading room, half hour talks are occasionally given by chiefs of departments on subjects relating to the business.

These lectures followed by smoking concerts by the staff of the firm, assisted by outside talent, especially secured for the occasion, are bound to create better relations between employes and to increase their efficiency. The welfare of the female employes has also been looked after, and their large and well-appointed assembly room and annexed kitchen, beautifully decorated, roomy, well ventilated and lighted, reflect credit not only on the firm, but also on the architects, Messrs. Asselin and Perron, who have designed these improvements in a manner far beyond the dreams of the most convinced idealist.

All this, however, is not philanthropy, but, as the president has said: "It is reciprocity of treatment, with greater efficiency as its prime motive.

Whatever the motive, it is obvious that this treatment of employes will increase their interest in the business, increase their efficiency and create a friendly and favorable mental attitude on the part of the present and future clients of the firm.

Yet the ambition of the directors is not quite satisfied. They wish to create a technical library for the use of the employes where they will be in a position to acquire practical knowledge concerning their business; for although experience is necessary it is the combination of theory and practice, which leads the faithful employe to success. The library already exists on a small scale. The best magazines on commerce and industry together with technical work devoted to the hardware and building trades; plumbing and allied subjects are found on the shelves of the library.

MR. F. C. LARIVIERE.

Another conception—and not the least—of the company, has been to develop among the employes the habit of economy by placing them in a position to participate in the profits of the firm for which they work and to which they apply knowledge, experience and good will.

From the first of October 1908, the firm of Lariviere Incorporated succeeded to the firm of Amiot, Lecours & Lariviere Incorporated. This change in name did not imply, however, any change in the direction nor in the administration of the company, nor in the list of shareholders which remains as follows: John E. Goodman, John G. Nelson, F. X. Desrivieres, P. H. Delcourt, A. S. Daly, Arthur Contant and Alphonse Nadeau, all faithful co-workers, interested in the success of the firm. The estate of the late Mr. Amiot is still interested in the company to the same extent as Mr. Amiot's interests appeared in November, 1902, at the date of his death.

The avowed policy of the firm remains the same—"to give satisfaction always and at whatever cost"—one inaugurated by Mr. Fred C. Lariviere, and to which the firm attribute its success.

The branch of "Lariviere Incorporated" situated at No. 10 Craig Street, a few doors west of St. Lawrence Boulevard, was remodelled last fall and placed under the management of two heads of departments of the company—A. S. Daly and P. H. Delcourt, these two having absolute control over its operations.

Here again we see the realization of another element in the policy of this firm. They believe in developing self-reliant business men, by continuously giving them responsibilities of increasing importance, multiplying their interest and stimulating their loyalty, by affording them the opportunity to do things absolutely on their own initiative.

Fred C. Lariviere, although recognized as one of the keenest business men of the metropolis, a man who made a reputation by his systematic, painstaking attention to his business, yet Mr. Lariviere has not neglected public questions and as a member of the Chamber of Commerce and in other capacities he has been on many occasions of sterling service to the commercial interests not only of Montreal, but of Canada, Mr. Lariviere is president of the "A. C. Lariviere Co." of the Colonial Fluid Beef and Specialty Co., of the Choral Association of St. Louis de France, vice-president of the Chamber of Commerce of the District of Montreal, and director of the Montreal Canada Fire Insurance Co.

Although a very busy man, Mr. Lariviere has always remained most sociable, suave and considerate, qualities which have brought him so many staunch friends and customers. Commercial travelers are always welcome at his office, more so if they have an interesting business proposition to make.

The success of the firm in the past is sufficient warrant of its future. From modest beginnings the firm has attained, through different stages, an enviable position among our leading business enterprises. With vast experience, a wider field of action, practically unlimited capital and a staff of efficient, experienced and devoted men, anxious to make the firm of "Lariviere Incorporated" the most successful in Canada, the future looks bright and promising.

HARDWARE AND METAL WANT ADS.

CAN

Switch You on the Right Track

If you have any proposition of interest to Hardware, stove and tinware dealers, clerks, travellers and manufacturers, a want ad. in Hardware and Metal will solve it for you.

Surely it is worth 25 or 50 cents to find some man in another city, or another province, who is looking for just such a proposition as you have to offer.

Don't wait for something to turn up, you have probably been waiting now a month, or it may be a year—A thing begun is half done. **We can Switch you to the man you are looking for, but you must take the first step.**

Do you wish to buy a second hand set of tinner's tools?

Are you an employer looking for employes; or a clerk, wishing to secure a position as traveller?

Have you an old counter or show case for sale?

Do you wish to sell your business or take in a partner with some ready cash?

Try a want ad. in Hardware and Metal. The cost will be small.

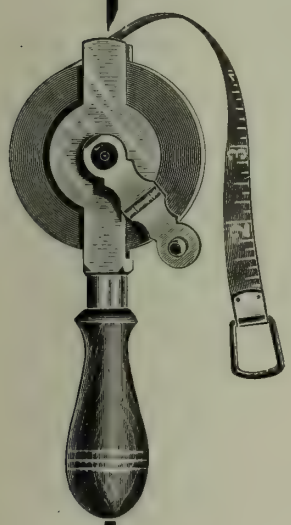
Measuring Tapes and Rules



¶ Each one is made to sustain the reputation gained through a quarter century's honest endeavor to improve. In accuracy, durability and beauty of design they are unequalled.

¶ The coming season will be a banner one, and the wise merchant will see that his stock is complete. Get in line by writing for our catalog. It's the foreword to big sales and handsome profits.

¶ If you haven't heard about our new method of marking steel tapes, send for circular. It's a wonderful improvement, and the clinching argument to many a sale.

THE LUFKIN RULE CO. OF CANADA, LTD.
WINDSOR, ONT.

The only manufacturers of Tapes and Rules in Canada

The Galt Art Metal Co., Limited

Manufacturers of High-Grade Sheet Metal Building Materials.

The House which still has confidence in The Hardware and Tinsmith Trade.

Our Policy of contracting with The Trade in each locality to sell our goods as an "exclusive agent" is rapidly making good.

From present indications 1909 will be a record year for building operations in both city and rural districts and Hardwaremen must awaken to the fact that the profitable business of supplying Metal Roofing, Siding, Ceiling and Lath, etc., for these buildings should belong to them.

The man selling "The Galt Kind" is easily in a position to monopolize this business in his locality.

He has, first of all, a line of goods which cannot be equalled in Canada or excelled on the Continent. He also has at his disposal the services of our large and efficient sales staff and the assistance of our advertising and correspondence departments.

Last and most important, he has a binding agreement with us, whereby we undertake to supply him with goods at prices which will meet all competition and to protect him interritory and quotations.

In short, we agree that if the Hardwareman will use his best efforts to further the sale of "The Galt Kind" in his locality, we will make his business in this line pleasant and profitable.

The "Galt" Steel Shingle

which is our leader this year, for **weather-tight locks, handsome appearance** and **easy laying** is pronounced by roofing experts to be the most perfect article yet produced. It locks on all sides easily and quickly without cleats or notches, has top and side nailing flanges and is embossed in a bold Gothic Tile design. The material and construction of the "Galt" Shingle make it impossible for it to leak, rust or work loose on the roof. The "Galt" Shingle will make money and reputation for some one in your town this year. Will it be you?

"Galt" Expanded Steel Lath "Classik" Ceiling
"Art Metal" Siding "Galt" Corrugated Steel Sheets

The most profitable line to handle. If you're not already selling it get catalogs and samples.

CANADA

THE CANADIAN LOGGING TOOL CO.,
Sault Ste. Marie, Ont.

GENTLEMEN,—

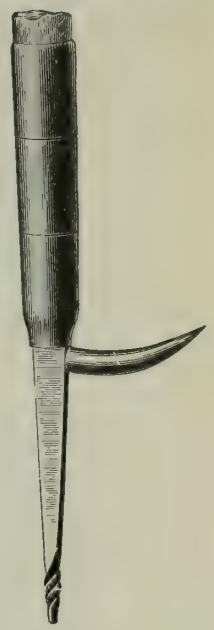
We send herewith orders for 20 dozen Peaveys, which please ship promptly as per instructions on orders.

This brings our sales of your tools since the New Year to considerably over $1,000.00. Our Mr. Richardson reports that the tools of your make sent out during the past season are giving satisfaction.

He is looking for a brisk demand as the season opens up.

Yours truly,

MOORE & BROWNE, LIMITED
ROBERT MOORE, President.



Our sales are more than 100 per cent. ahead of last year and the above letter is only one of many similar letters we have received from our customers.

Our factory is running full capacity and orders are already booked for a Big Spring Business.

The largest dealers in Canada buy our goods because they know the

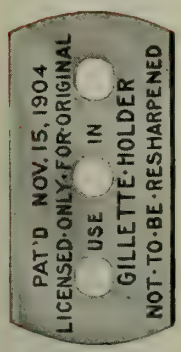
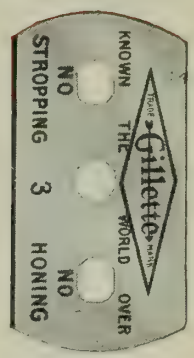
TRADE Gillette MARK

KNOWN THE WORLD OVER



The All-The-Year-Round Money Maker



All seasons are good for the GILLETTE Safety Razor. Make your GILLETTE business a steady source of income. Keep your stock on display. Let your store be known as a GILLETTE headquarters.

It is astonishing how many sales can be made by courteously suggesting the GILLETTE to your customer and explaining its qualities. Tell your customers your own experience with the GILLETTE. Most of them know it by name, but many are not posted on what the razor will actually do. Show them what it means in comfort, convenience and economy.

You will find it pays to tell every man who enters your store about the GILLETTE. The only limit on sales is the enthusiasm you and your staff put into your talks.

What about signs and trade helps? Have you plenty for the store and windows? Have you cuts for your local paper? Liberal supplies of good advertising matter are freely dispensed to promote sales.

Your energy behind such a live and well-known proposition as the GILLETTE will increase your profits.

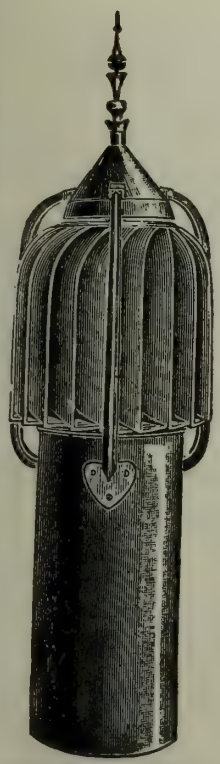
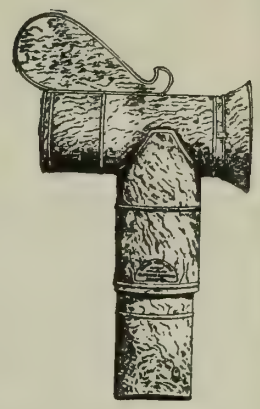
The Secret of Health In Modern Building Life is VENTILATION





Our two ventilators, the **"J. W. Harris Rotary"** and the **"Zephyr"** have been making money for the dealers and the users of them for years. It is only COMMON SENSE after all.

For schools, theatres, big parks, convents, etc., these articles have become a BUILDING NECESSITY.

THERE IS A PLEASING PROFIT FOR THE TINSMITH OR HARDWAREMAN TO get after the local building trade and hold it. New buildings are now going up. Get out among the Contractors and Architects. They WILL SPECIFY our Ventilators, because they never fail and give perfect satisfaction.

HERE ARE SOME TESTIMONIES. THEY SPEAK FOR US.

CANADIAN PACIFIC RAILWAY COMPANY,
Montreal, June 1st., 1900.

J. W. HARRIS MFG. CO., Ltd.,
MONTREAL.

GENTLEMEN:—

I have your letter of the 21st inst., stating that we have for a couple of years, used the "J. W. Harris Rotary Ventilators," on the East End Station and on Windsor Station, etc., and asking me if I would be kind enough to tell you if they have given satisfaction.

I would say in reply, that the "J. W. Harris Rotary Ventilators" at the Place Viger Station and Windsor Station, are doing the work required of them in a highly satisfactory manner. At the Windsor Station, they take so much air out that at times, they have to be shut off.

Yours truly,
P. Alex. Peterson, Chief Engineer.

Montreal, June 7th., 1901.

J. W. HARRIS MFG. CO., Ltd.,
MONTREAL.

GENTLEMEN:—

I have been using your "J. W. Harris Rotary Ventilators" on several houses in this City with the best results. The tenants, of these houses declared that your Ventilators are of great advantage to them. I also installed two (2) 18 in. on my stable and I can say that your Ventilators cannot be surpassed by any to take out the sweating or the bad smell in any room.

Yours truly,
F. D. Monk, 58 St. Frs. Xavier St.

Uni ersity of St. Joseph's College,
Westmoreland, N.B., Dec. 15th., 1905.

J. W. HARRIS MFG. CO., Ltd.,
CITY.

DEAR SIRS:—

I am enclosing cheque to cover sight draft for Ventilator.

You are requesting me in your letter of the 28th ult., to let you know our opinion re "J. W. Harris Rotary Ventilator," Well! the best guarantee of satisfaction I can give you was, when I ordered another this Fall in addition to five we had before and which have been placed on our College for a number of years.

Yours respectfully,
A. D. CORMIER, Procurator.

Write us for particulars and let us send you book of testimonies and rates.

CAPEWELL
HORSE NAILS

The best made anywhere, and the fastest and most satisfactory blacksmiths' selling line of any on the market.

Quality

We will not talk about **QUALITY,** because every horseshoer in the land has used **CAPEWELL HORSE NAILS** and the vast majority are using them exclusively. **THEY KNOW.**

Manufacture

We will not talk about manufacturing facilities and systems, as it is well known that we are the only concern in the Dominion making horse shoe nails exclusively and able to concentrate the whole of our efforts on the perfection of our product.

Service

But we do want to say a few words about the kind of service we are in a position to render our customers, jobbers and retailers. We are not content with selling them a carload, 100 boxes or 20 boxes of **CAPEWELL HORSE NAILS,** as the case may be. Our salesmen, all picked and able men, cover the country regularly and systematically. They create a steady demand for **CAPEWELL HORSE NAILS,** which quality and satisfaction maintain and increase. We see to it that the nails we sell you are marketed promptly and to your satisfaction. We prove all our statements and look after your interests, not spasmodically, but all the year round. This kind of service is expensive and costs us a good many thousand dollars per month. But the volume of our business warrants it, and it is the only kind of **SERVICE** that counts.

By virtue of what we have done, and what we can continue to do in an ever-increasing degree, we solicit your business.

How Sam Wise Sent the Sales Temperature Up

(Copyrighted, excepting the moral)

He had moved into the store after buying the stock at a sacrifice, and was sizing things up.

The air was chilly and Sam was surprised on examining the thermometer to find it was down to 40.

He thought that if the word "sales" was written at the top of the thermometer it would also answer the case for the business turnover.

Yes, he would take the thermometer as a guide for his course of action.

Badly Run Down

The store had a cold appearance in the meagreness of paint, slow-movingness of clerks, and bad regulation of accounts.

But—Sam was convinced the real source of the "cold spell" lay in the "brand" atmosphere—he never in his life saw such a mixture of stoves, old, semi-old, unknown, antiquated. The stock was a good rival of the Sphinx.

Sam put on his coat, said good-night to the clerks, and closed the door. He felt rather downcast, and wondered if he had exercised good judgment in buying that fellow out.

Thinking over the outlook, possibilities of success, the changes necessary to be made, he was led to dig up some of his predecessor's old mail, and in examining this came across a certain envelope.

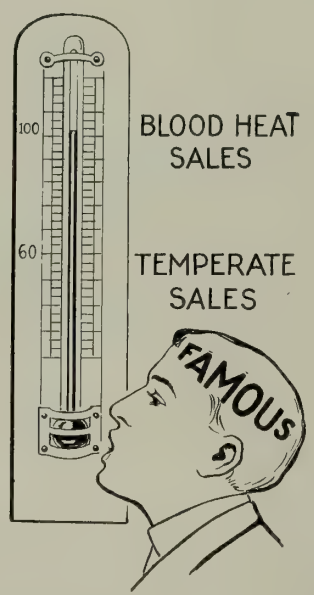
A Discovery

Sam woke to find himself "Famous." The envelope he had come across had a trade-mark "Famous" in the corner.

Sam Wise knew there was a sixty-one years' record back of this trade-mark, and he figured out that that was just about what he required as a cure-all for his troubles.

His Early Training

He remembered when at school how he used to breathe on the



quicksilver and send the temperature up. Somehow he thought a "Famous" breathing on his sales thermometer would send more "heat" into the cash book, and he knew that **McClary's "Famous" Stoves, Furnaces, Enamelware** in his store would beget that necessary "breathing."

So the first order was sent.

Next day he posted up this notice.

"Get Ready, Boys! We're 'Famous' From Now On."

Commences Campaign

After Sam Wise received his consignment of goods he was taken in charge by the advertising department of the McClary Co. He received a letter containing suggestions for window display, a request for prospects in his territory, an assortment of tasty literature, attractive cards for his store walls, a salesman's manual, some retail ads. and electros, received notice that his name would be placed on the store window in beautiful white letters, and that the greatest newspaper campaign conducted by a single company in Canada would be swung in behind him.

All this FREE.

Next day the town paper came to hand, and behold Sam's name appeared at the bottom of a large advertisement as "Sole agent for Bissville."

On the Mend

The temperature did go up.

Mrs. Charlton dropped in on Saturday morning and said, "Mr. Wise, I have been approached to buy such and such a range, but I intend to see the McClary line advertised in my paper."

"That's right, madam, and if you will step back here I'll demonstrate one of these ranges to you."

Sam cut loose on his enthusiasm, quoted the facts he had read in his

How Sam Wise Sent the Sales Temperature Up

(Continued)

manual, and while he didn't land the order that Saturday he landed it another Saturday.

Then Sam's chief clerk told him how he had seen Cy. Grovenor on the street reading a letter from the "Famous" people telling him all about a base-burner, and that "Sam Wise was the man to buy from."

An Unfounded Fear

Sam's store was beginning to feel good and warm, and the sales book had rosy cheeks, when Mrs. Wise said, "I am afraid, Sam, we are going to receive a setback. The steel range peddlars are in the next town."

The words were scarcely out of her mouth when in dropped a letter from the "Famous" people, telling Mr. Wise the exact location of the peddlars.

Following this came a consignment of special steel range literature to be circulated in the territory.

That week's paper contained a special advertisement telling the people to buy from legitimate dealers, and Sam received a copy of a letter sent to the clerk of the municipality requesting an enforcement of the license law regarding peddlars.

A Profitable Vow

Then Sam figured out:

"These **McCLARY** people are big people. They have many acres of plant, branches in leading centres, a virtual population of their own at London, accurate manufacturing methods, and effective shipping facilities. Their reputation for unvarying quality, and their scientific advertising methods, **SELL THE GOODS FOR ME.** I wish I had come to them earlier in life. Then I would have had a good bank account by now. But you bet I am 'McClary' from this day out."

And his wife said "Amen."

Gurney Oxford Line

This year, is on the high road to greater success.

We have originated a unique plan—entirely in the stove man's interests—those who have become acquainted with the details are enthusiastically in line. Everyone says, "Splendid idea"!

Send us a post card without delay – our traveller can also give you interesting facts—in any case—don't under any circumstance place your order until you know our proposition.

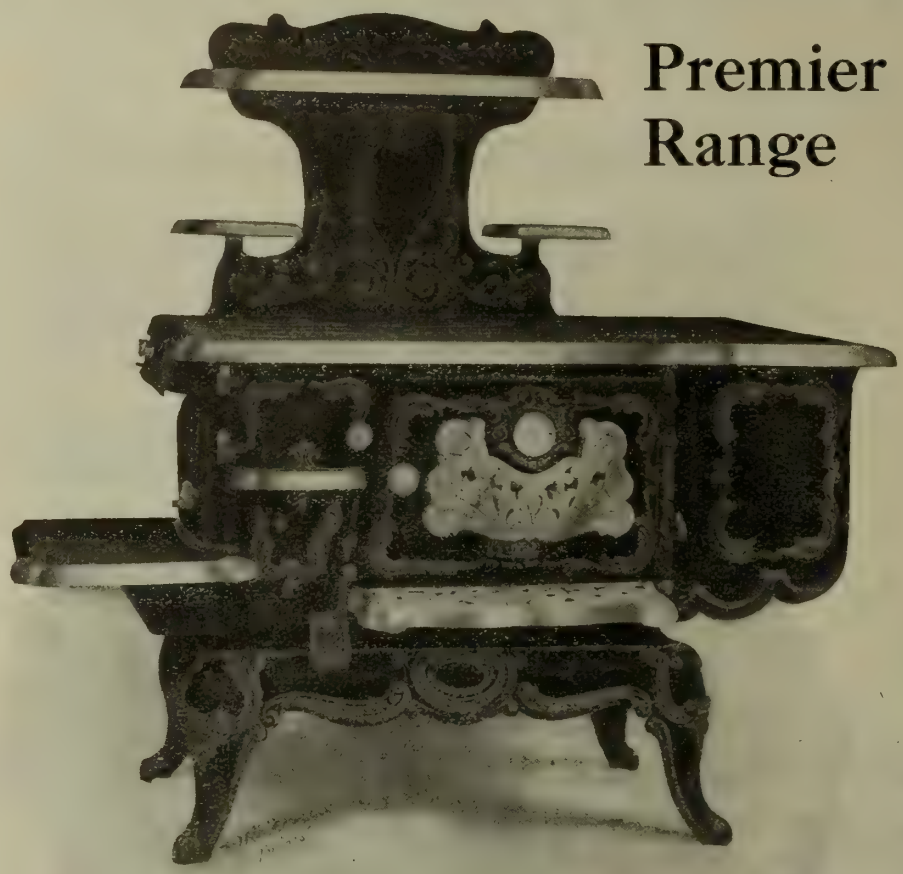
THE STERLING



Premier Range

A Money Making Proposition for You

If you have a high grade Range fitted with Reservoir and High Shelf which you can sell for $35.00 and make as large a profit on it as on another Range which you must sell for $45.00, then you have a good proposition for yourself, and an exceptionally good one with which to meet any competition which you may have.

This is what we can offer you with the STERLING PREMIER Range.

We will guarantee it, so that you will be relieved from any risk.

We want you to have our catalogue and prices. Write for a copy illustrating our line of Ranges, Heaters, Furnaces, Etc.

The Down Draft Furnace Co., Limited

Galt Ontario Canada

EMPIRE STOVES & RANGES

SUNBEAM

The Sunbeam has features peculiar to itself. The oven door is balanced by a weight instead of the usual spring ; there is a check damper behind the ash-pan ; the front key-plate has special lifting device ; the direct draft damper is something quite new, and Copp's patent lower hot closet is a most valuable improvement.

The general appearance of the Sunbeam is most attractive—all ornamentation is of the new type.

Three sizes—16, 18, 20-inch ovens. All 13 inches high.

SILVER QUEEN

The Silver Queen is a very attractive Range and is up-to-date in every particular, and where large size is not required, will prove a rapid seller as well as a most desirable range.

It is also fitted when desired with Copp's Patent Hot Closet—this is a steel drawer directly below the flue. It very greatly aids sales, and is a good profit-maker.

Two sizes—16 and 18-inch ovens. 12 inches high.

W. J. COPP SON & CO.

Fort William, Ontario.

A Lantern With Merit

"BANNER" Lanterns are made of heavy IX Tin, throughout and well finished.

OIL WELL is extra large with double-seamed bottom, thus preventing liability of leaking.

FOOT is also seamed on which keeps bottom up sufficiently from ground to prevent it rusting out or the lantern upsetting if placed on rough gound.

LOCK. This is a patented automatic device which never fails to hold up the globe and is easily released. It also raises the globe high enough to permit removal of burner to trim or replace wick without taking off the globe.

GUARD is strong and substantial and constructed so as not to come in contact with the globe, thereby eliminating breakage.

EYELETS are made of brass and inserted to give a finish as well as strength to the opening where the bail enters.

FEEDER SCREW is extra large for refilling oil well. The burner opening should not be used for filling as it allows oil to lodge in the central draft chamber, thus attracting dust and interfering with brightness of the flame.

RUSTING. The hood, oil well, and upper globe retainer are seamless and drawn from heavy tin. This drawing process makes the surface susceptible to rust. We therefore sweat it over with pure tin to prevent rusting.

STRENGTH. The most exposed parts are embossed or corrugated to give them strength.

DRAFT. There is just the proper amount of draft with a perfect wind cut-off. No unnecessary openings to interfere with the draft or to become receptacles for dirt.

GUARANTEE. Every "Banner" Lantern is guaranteed wind-proof.

BANNER TRADE MARK

Ontario Lantern & Lamp Co., Ltd., Hamilton, Ont.

BANNER TRADE MARK

SUPERIORITY OF LAMP BURNERS

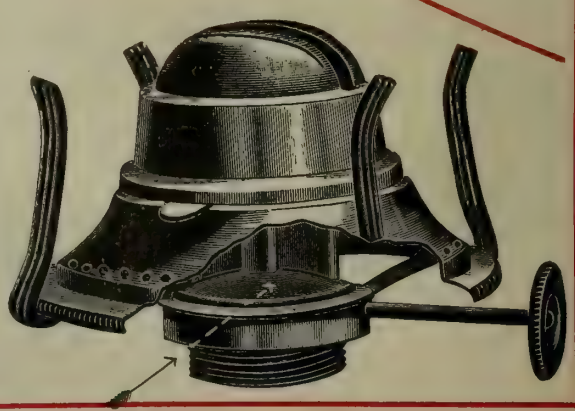
All our well known makes of Lamp Burners such as, "ONTARIO," "CANADA," "BANNER," "CLIMAX," "HICONE" "SECURITY," and "BING," have the screwpart covered over with a cap which prevents the accumulation of dust, charred wick and matches, dead insects, etc., thus becoming saturated with oil and liable to catch fire or clog the wheels.

GUARDS are strong and substantially put on. The lower ends are securely fastened to the body of burner and are also clamped on in such a way that they cannot pivot around as they would if only held by a rivet.

RATCHETS are forced onto the shaft so they cannot become loose and do not require soldering.

MATERIAL. We use the very best quality of brass obtainable and every burner is lacquered so as to retain the bright finish.

GUARANTEE. Every burner of our manufacture is fully guaranteed.



Talk About Steel Ranges

Have You Seen Our "MERIT"?

The Lowest Priced Range on the Market. Let us tell you about it.

There's money in it for you and lots of it. It sells on sight. Absolutely new.

Here is a Fine Seller Also!

It is a plain High Grade Range and will catch the eye of wealthy and particular people.

Every detail of finish and workmanship is the best available and is backed by our Guarantee.

Every one is positively a perfect baker.

When you think of heating problems think of us. We have a dainty book on heating systems that will solve all your heat difficulties. Let us tell you about our never failing Calorific Hot Air Furnace. It makes friends for the dealer and gives your store the name of head-quarters for heating.

TORONTO MONTREAL

Some Strong Maxwell Sellers

On this page we are showing some of the "Maxwell" Hardware Specialties that have been making money for dealers throughout the country for many years. Some of them are recognized "best sellers" in their line.

On the opposite page are some of our newer goods which are bound, in time, to become as popular as the older ones.

Favorite Churn

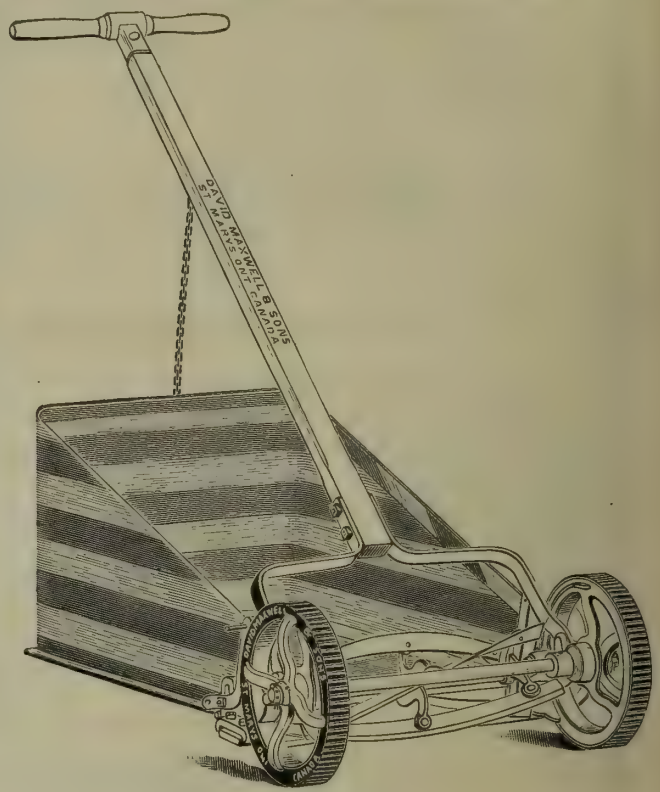
Favorite in fact as well as name, more "Favorites" being sold than all others combined. Made in eight different sizes, churning from ½ to 40 gallons. Improved foot and lever drive, roller bearings, bolted trunions, attachable links, superior finish.

Puritan Washer

Thousands have been sold within the last few years and the "Puritan" is now recognized as the leader in the trade.

Wheel Barrows

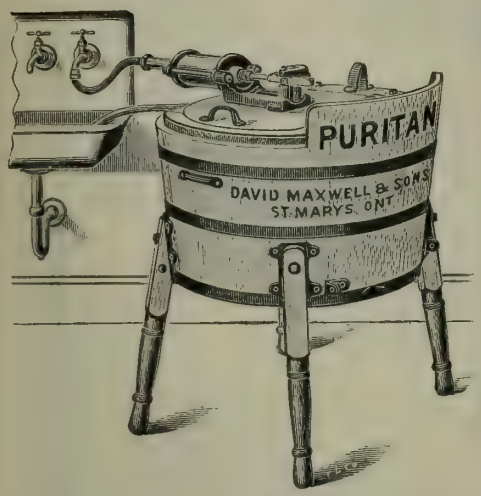
Made in nine different styles, from the strongest type of farm or general purpose Barrow to our latest new light Garden Barrow, and Steel Tray Mortar Barrow with Steel Wheels, Steel Legs, Steel Braces, etc. See Garden Barrow on opposite page.



Lawn Mowers

With or without Grass Catcher attachment, made in sizes from 8″ to 22″ in width, wheels from 8″ to 11½″ in height, three to six knives, suitable for all classes of customers.

Our New Hardware Specialties



Puritan Motor Washer

Amongst recent additions to our line of Hardware Specialties is our Puritan Motor Washer. The Puritan Motor is of the simplest internal construction, works under less water pressure and is less liable to go out of repair than any Motor heretofore constructed.

New Royal Mangle

A new machine only recently placed on the market; up-to-date in every particular, quality and finish unsurpassed.

"Spotless" and "Blue Belle" Washers

Are of the rubber type of machines and are improvements in the lines of Washing Machines acting on the rubber principle.

"Blue Belle" Wringer

Is a strictly high grade finished machine sold only with five year guaranteed rolls; superior in finish and having no equal either in Canadian or imported machines.

THROW A SPRAT TO CATCH A MACKEREL

You can't fish without good bait.

It's not the cost of the bait, but the knowledge of just what bait to use to catch the kind of fish you are after.

A want ad. in HARDWARE AND METAL is the right kind of bait to use when you have any proposition of interest to Hardware, Stove and Tinware dealers, clerks or travellers.

The cost of advertisement will be very small compared with the results you will secure. 25c. or 50c. per insertion will pay for a want ad. which may prove worth dollars to you.

Every day you delay you are handicapping your business.

If it is a set of tinner's tools you have to sell, why not get them out of the way and get the money for them which you can use in your business?

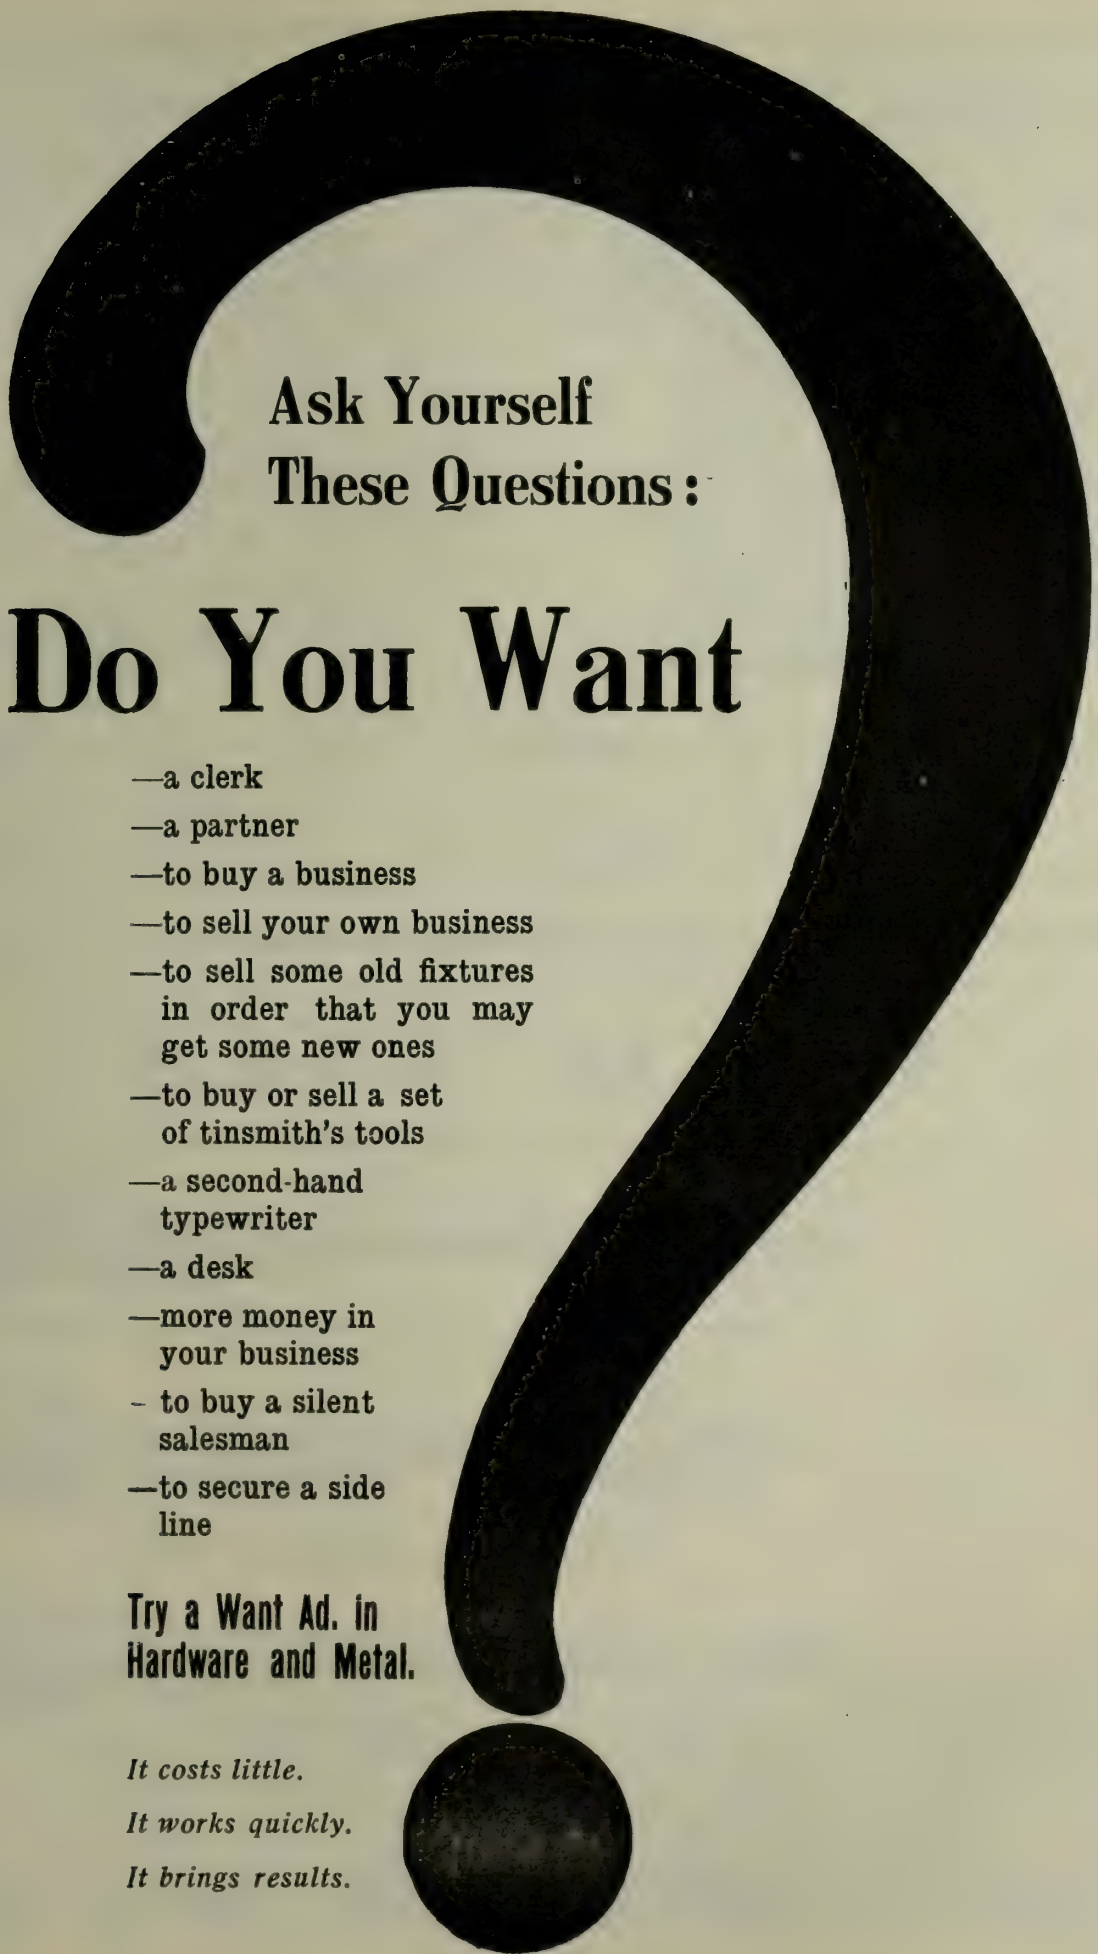
If you want to sell your business, let the men know about it who would be interested in buying it, and you will realize a higher price than if you only negotiate with two or three people.

If your proposition has anything to do with the hardware trade, try a Want Ad. in HARDWARE AND METAL. Address our nearest office.

HARDWARE AND METAL

MONTREAL: 232 McGill Street TORONTO: 10 Front St. East

WINNIPEG: 511 Union Bank Building



Ask Yourself These Questions:

Do You Want

—a clerk

—a partner

—to buy a business

—to sell your own business

—to sell some old fixtures in order that you may get some new ones

—to buy or sell a set of tinsmith's tools

—a second-hand typewriter

—a desk

—more money in your business

– to buy a silent salesman

—to secure a side line

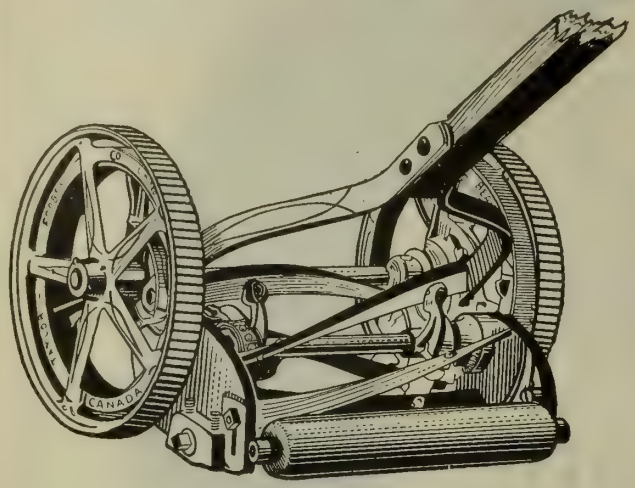
Try a Want Ad. in Hardware and Metal.

It costs little.

It works quickly.

It brings results.

We Could Not Improve the Mower So we Improved the Painting



—They are beauties—"The Woodyatt" and "Empress" are mechanically perfect. We could not add to the quality or the features of their construction even if we put a dollar a-piece more on the labor on each mower. This season however they appear in the very finest tints of paints attainable and are attractively decorated.

NORTH BROS. MFG. CO., Philadelphia, Pa., U.S.A.

The STEWART No. 1

It's the Greatest Horse-Clipping Machine on Earth. If other manufacturers do steal the patent they don't know how to operate it.

It takes something more than just copying the shape of the machine to duplicate the qualities of the Stewart. It takes more than pilfering the patent. It requires the knowledge of the manufacturing process—"the know-how" and experience. It requires **good** materials—better than competitors are using. Above all, it requires knowledge of the manufacturing process—the knowledge that only ourselves possess.

Our 25-Year Guarantee Helps Hardware Dealers Sell More Stewarts.

The Stewart No. 1 represents the embodiment of all that's good in horse-clipping machine construction. No other is so compact, no other runs as easily or is as simple to operate. No other can possibly have the wonderful durability of the Stewart.

So thorough is it in construction that we know it will last a lifetime. But to be absolutely definite we give a 25-year with each machine. We insure the user against having to spend a penny in repairs for a quarter of a century. Every machine sold in 1909 is a safe proposition until 1934. The purchaser and dealers do not need to take any risk.

The gears of the Stewart are made from cut steel made file hard. To further insure freedom from breakdowns we enclose gears, and other working parts, in an oil bath which reduces friction and wear. We furnish, with each machine, a good supply of highest grade flexible shaft and equip it with the world-famed Stewart one-nut tension clipping knife.

We want to explain our proposition to Dealers.

We ask the discriminating dealer to write for particulars of our proposition which increases the sale of Stewart Horse Clipping Machines through hardwaremen.

We appeal to their common sense to sell the **best** machine—the most reliable machine—the machine that purchasers will tell their neighbors about.

Every horse owner in Canada has been told to buy a Stewart from his local dealer. To help you make the sale we are prepared to supply you with individual advertising and complete advertising literature. Please write at once and get acquainted.

The Schultz Bros. Co., Limited

Brantford, Canada

We Create Sales for Canadian Dealers

for Wheeling Sheet Metal Products

And Here's the Way We Do It:

——Direct Advertising to contractors and consumers.
——Store Advertising for Hardware Dealers.
——Effective "trade-bringing" window displays.
——Co-operation of our selling force with dealers.
——The best line of High Quality goods in the world, *at reasonable prices.*

Our line is extensive and varied. At our great mills we have every facility for manufacturing QUALITY goods AT PRICES TO SUIT THE BUYER AND DEALER. We offer special inducements on Galvanized Roofing and Roofing Supplies, Ceilings and Galvanized ware.

Wheeling Old Style Roofing Plates

Stamped with our trade mark.

Wheeling Old Style Roofing Plates is the best selling proposition being offered to the trade. These are made, in various sizes and weights, by the OLD METHOD PALM OIL PROCESS, a special process which we found insured the maximum of durability. Each sheet of this roofing is stamped with our own brand and weight of coating, resquared, inspected and packed. This product is positively unexcelled by any on earth.

Wheeling Metal Shingles

Wheeling Metal Shingles are good sellers, and pay a good profit. They are ornamental, fireproof, weatherproof, inexpensive and are rapidly replacing other methods of roofing. Write us about these.

Encaustic Enameled Metal Ceilings

This is positively unique for durability, appearance and ease of erection. By a special process the colors are burned on and the sheet enameled both sides. This renders it practically indestructible and gives ceilings a porcelain-like surface. This appearance lasts indefinitely. We are the largest manufacturers of metal ceilings on earth and will co-operate with hardware men on the selling of this product.

Conductor Pipe and Eave Trough

Wheeling Conductor Pipe in one piece without cross seams—all in ten foot lengths. We can furnish it both round and square when desired. We supply this pipe of Galvanized Steel, Galvanized Charcoal Iron, IX Terne, Old Style Terne, and Cold Rolled Copper.
Wheeling Eaves Trough is made of practically the same materials as our conductor pipe and is supplied with either single or double bead. We make it in ten-foot lengths without cross seams.

Galvanized Ware

Attention of hardware dealers is called to this line of Galvanized ware; comprising water pails, wash tubs, garbage cans, oil cans, coal hods, etc. These articles are made in various styles and at various prices. We have something special to offer hardware dealers in the way of prices and discounts.

Special inducements are offered to manufacturers' agents in all distributing points throughout Canada

WHEELING CORRUGATING CO., Chicago, Ill.

About Our Paper and Its Staff

The four chief outposts of Hardware and Metal are London, Eng., New York, Chicago and Winnipeg, with lesser links in the chain including Manchester, Eng., Paris, France, Zurich, Switzerland, and Vancouver, B. C. All of these are manned by qualified business representatives reporting regularly to the Montreal and Toronto offices, to which are also attached a corps of correspondents located, amongst other places, at Halifax, St. John, Ottawa, Kingston, Peterboro, Hamilton, London, Fort William, Brandon, Regina, Saskatoon, Edmonton, Calgary and Victoria, as well as a staff of twenty subscription agents, each in charge of a district which he thoroughly canvasses for Hardware and Metal.

There is that about the word "outpost" which makes its application very appropriate. It not only suggests activity on territory occupied, but, also, a keen eye on perspective. That thought ought to merit some reflection on the part of readers and advertisers in Hardware and Metal, since the most satisfactory service in their interests is the objective point. "Good enough" is not, from Hardware and Metal's point of view, good enough for them. Greatest efficiency depends among other things, upon able representation in the most important centres.

Hardwaremen need never go a-begging for information or a handshake in any city where Hardware and Metal has a representative, as a visit to our offices, no matter how brief, from manufacturers, merchants, buyers or salesmen will always be regarded with the greatest pleasure.

J. M. McKim, chief of the London office, and European manager, is a Toronto man. Fifteen years ago he joined the staff of the MacLean Publishing Co. He was assigned to the London office eight years ago, and has been successful in that important field.

R. B. Huestis, who took charge of our New York office two years ago, was with the wholesale firm of A. B. Book & Co., Halifax, N.S., for eight years, subsequently covering Canada from ocean to ocean as the representative of a banking institution.

J. P. Sharpe, of the Chicago office, studied law for two years in Manitoba University. Taking up general brokerage, he identified himself for seven years with the bus'ness activities of the West, and about a year ago became the Chicago representative of the MacLean Publishing Co.

A thorough training in mercantile methods through his connection with a general store in Western Ontario was the initial stage of the business equipment of F. R. Munro, of the Winnipeg office. In 1903 he graduated from Toronto University, and for fifteen months was engaged first in editorial work, and later on advertising on Hardware and Metal at the Montreal office. In 1904 he took charge of the Winnipeg office.

Editorially, Hardware and Metal has been strengthened by the addition of men who are specialists in their respective lines and it is planned to add many new features to the paper as opportunity offers. Several commendations have been received from subscribers who appreciate the Retail Association page, the British Letter, and the Tinshop Pattern department, while the number of subscribers who are sending inquiries to be answered in the "Letter Box", is steadily increasing. The "Letter Box", in fact, bids fair to rival the "Want ad" page in popularity.

Suggestions from readers as to how Hardware and Metal can be made more serviceable to the trade will always be welcomed by the publishers.

This Year's Cover.

A distinct departure has been made in the cover design adopted for this year's Spring Number. Our artist has, we believe, engraved a picture unique in the history of trade newspaperdom. There may be some minor points which are criticizable but taking the design as a whole it is suggestive of the most modern ideas in retail hardware store salesmanship and display. Our cover designs, in previous years, have been designed to illustrate some feature process in the foundry end of the trade and having made such a wide departure from precedent, the editor would appreciate an expression of opinion regarding this and other features of this Spring Number.

What Subscribers Say.

"We would not be without Hardware and Metal for $100 per year if we could not duplicate it. Your paper is worth that sum to any hardware merchant."—Bond Hardware Company, Guelph.

"No hardware clerk should be without Hardware and Metal."—G. A. J. Hendry, Russell, Man.

"Your articles on window dressing are very much in place and the effect is noticeable in a good many stores that have been sloppy heretofore."—R. Bremner, London salesman, Canada Paint Company.

TRADE PAPER'S DUTY TO READERS.

Some one has said that the trade paper holds a brief for its readers and is published in their interests. That as the Paint, Oil and Drug Review points out, is the difference between the trade paper and the house organ—the latter holds a brief for the house that prints it. Publishing a trade paper looks like a simple matter, but it is not as easy as it looks. Anybody with a font of type and a printing press can print a paper, dedicate it to the trade and thus become a publisher, but he will still be a long way from success. Nothing but the work of years will put his publication in a position where he can say of it, this is the representative journal of the trade. It takes more than printer's ink to make a trade paper.

The first duty of a trade paper is to its readers—to the trade which it represents. Why? Because the readers pay all the bills. They pay as subscriptions about the actual cost of the white paper, but they also pay all the cost of the advertisements and more, for no advertiser can continue in business unless he makes a profit on his advertising. The readers of the trade paper, therefore, support not only the paper but, in a sense, its advertisers as well.

The trade paper which best serves its readers is the best medium for advertising, for the very reasons above stated; and, indirectly, the buyer profits also, for through the columns of the trade paper he learns where he can buy the best goods for the least money. The largest manufacturers are the most persistent advertisers. Their goods are the best for the money because they can be produced cheaper in large quantities, and are of the best quality because it does not pay to advertise inferior goods, only the best commanding a steady sale. Thus both advertiser and subscriber profit by the trade paper, which puts them into communication with one another, to their mutual advantage.

SUCCESS DEPENDS ON PATIENCE.

The hasty man seldom wins. He sets a fast pace at the start but he usually lacks the stamina to last until the finish.

This applies to business as much as to athletics.

How often we hear of men failing to make a success of a new department they have established in connection with their business. They bought a stock or hired a man to look after the work. They put a small announcement in the local paper and then because a good trade did not develop at once they concluded that the department was not a success and closed it up.

Patience and stamina are required if the merchant is to succeed. A demand for a new article or a new department must be created, must be built up by steady plodding.

An excellent example of how an Ontario hardware merchant created and made a success of a farm implement department in connection with his business is given in an article in this issue. An increasing number of hardware merchants are adding an implement department and putting a man on the road to canvass for roofing, stove, implement and general business and a careful reading of the article will repay any merchant.

STUDY THE FARMERS' INTERESTS

One of the points emphasized at the banquet tendered the members of the Ontario Retail Hardware Association at Hamilton was the wisdom of hardwaremen helping in any movement to improve the conditions under which the farmers in their neighborhoods live.

Reference was made by several speakers to the good work done by farm instructors in the counties where they have been placed by the Ontario Government. By helping the farmers to adopt scientific methods in cultivating their land and by encouraging good road and rural telephone movements, merchants in country towns and villages are assisting themselves as much as the farmers.

Develop a farm community, prosperous and contented, with good roads to use when they want to visit town, or phone lines to use in cases of immediate need or when weather conditions are unfavorable and co-operative stores or mail order houses will find it difficult to undermine the merchants whom the farmers have reason to recognize as their friends and co-workers.

Too many hardwaremen allow their sun to rise and set on the four walls of their store buildings. An increasing number, however, thanks to the lessons learned by attending the Retail Hardware Association conventions, are broadening out into more useful and enlightened citizens. They are learning the value of co-operating with others in their own line of trade and it is but a short step farther to a realization of the advantages of being recognized as public spirited citizens interested in every movement to help build up the community.

When a farm excursion is run to Guelph to look over the Model Farm, when a good roads movement is proposed, when a rural telephone line is promoted, when a new market, a live stock or an agricultural show is suggested the far-seeing hardwareman will not be hanging on behind the movement with a grudgingly given contribution, but rather will he be found on

the train to Guelph making friends with the farmers or in the centre of the progressive movement wherever that centre may happen to be.

THE VALUE OF ENTHUSIASM.

If there is any one quality we need in order to sustain ourselves at the top notch of business efficiency, it is enthusiasm.

You may know your business thoroughly, you may have everything your own way, but if you lack enthusiasm you lask the one thing that makes for progress.

Enthusiasm keeps a man plugging away at his job when others would quit. It keeps him going at full speed when croakers say that he hasn't a ghost of a chance to make good. It turns defeat into victory when the battle has gone against you. Enthusiasm characterizes the man who never knows when he is licked.

Keep at it, and don't get discouraged. Nothing worth while in this world comes easy, but enthusiasm will land you where you want to be, if you keep hammering away until you get what you want.

COLLECT ACCOUNTS PROMPTLY.

With the spring season close upon him, the retail merchant should make a strong effort to get in his back accounts. The real interests of his business demand such a course. To take full advantage of his coming trade opportunities the dealer wants to concentrate all his energies on his selling force. There should be no extraneous worry to distract his attention. It is therefore essential that all outstanding accounts should be cleared up, so that he can feel satisfied that this part of his business is in good shape.

The merchant should remember that he is not in business to lend money without interest, and yet that is what he is doing in the case of outstanding accounts. The money is owing and should be paid, but unless the merchant goes after it with determination it certainly will not in the majority of cases be paid. The longer an account is allowed to run on, the more reluctant a debtor is to pay it.

The merchant should have no hesitation in pressing for what is his own. There is little fear of offending a customer who intends to pay, and the man who kicks at a just reminder is the man whose trade is not worth having at any time because he probably never meant to pay if he could avoid doing so. A merchant very often forgets that the success of his business depends not upon the amount of trade done, but upon the profits, the profits in turn depend upon the prompt rendering and prompt settlement of accounts, and there the great secret lies. A merchant should also remember that other merchants are pressing for their accounts and getting paid, and why should he loan his money longer than the other men. If the consumer does not pay his bills, the money will probably go into mining stocks, which now are being speculated in so freely all over the country. What chance will the merchant have of getting his over due money when the consumer finds that he has been bitten by a wild cat mining proposition.

Outstanding accounts should be gone after with determination, and at once, and the merchant should not only do this, but he should make the resolution that in future he would collect his bills promptly every month. Paradoxical as it may seem, the customer in the end is grateful to the merchant who presses for his accounts, for it brings the former to realize the extent of his obligations, makes him more careful in future, while the receipted bill gives him feelings of thankfulness that the account has been paid. In turn the manufacturer and the jobber should be equally insistent. In is only business, it is only just, that prompt payments should obtain from the manufacturer down to the consumer. And in the determined carrying out of this rule, nobody will get hurt in the process, while greater trade prosperity will be assured.

THE ASSOCIATION WAY.

The wise and prudent dealer will interpret the "signs of the times" and adjust his business to the new conditions. This is being gradually done, some localities making better progress than others. Some must hustle or the real enemy will capture the local trade, which means ruin and defeat. To fight successfully we must first recognize the true enemy, and then plan and carry out a winning campaign.

In a town are two hardware firms. There is plenty of trade in the community to support both and it is foolish to believe that either can drive his competitor out of business or sell all the goods that are needed. Yet this is exactly what dealers are trying to do in many of our smaller towns. While this bitter local fight is going on, the real enemy, the catalogue house, is, almost unnoticed and unopposed, stealing a large portion of the most desirable and profitable trade of the community.

No one is to blame but the dealers themselves, and they can never stop foreign encroachment on their trade until some sensible, practical, friendly alliance is arranged for mutual defence and protection. It is a mistake to blame the farmer for buying of catalogue houses. They are sensible men and will buy at home if you show them in the right way that, all things considered, you can serve them equally as well. It is a mistake to fight your neighbor with cut prices and shut your eyes to the catalogue quotations. You always have a chance at orders filled in your own town, but when they go to Toronto or Winnipeg the business is worse than lost.

The "association way," as the National Harware Bulletin says, is to get together ; to harmonize and adjust local differences ; to rise above petty jealousies and trickery ; to work for the general progress and prosperity of all instead of crawling into your business shell and wasting your energy in snarling and snapping at every person who happens to handle the same class of merchandise.

The association spirit is sensible and it's right. You know it, but do you practise it ? That is the question. If there is a Retail Hardware Association in your province your place is on the inside. If an association has not yet been formed you will show wisdom by helping to organize one.

TRIMMING A PRICE CUTTER.

A year ago when competition was quite stiff for a certain line of goods one manufacturing concern quoted a price of $1 a dozen on an article, a competitor going him a shade better by quoting 90c per dozen. An astute buyer used the second quotation to get the first company down to 85 cents, then getting a bid at 80 and finally placing the order with the first company on a 75 cent basis, the manufacturers soon finding that they were losing 15 cents a dozen, notwithstanding they could produce goods cheaper than their competitors.

When the year was nearly over the same buyer notified the salesman that they would soon be in the market for the year's requirements. The salesman went up and asked how many dozen they wanted, but before giving the figure the buyer said he would have to bid lower than last year. The increase would be several thousand dozen. The salesman replied : "We will quote you 65 cents per dozen, but you must sign a note right now that we won't get the order." It was simply a bid to get their competitors to fall into the trap which they did.

Now when the salesman for the first company gets an inquiry for cheap goods along that line he refers them cheerfully to the competing concern, knowing they are making the goods at a loss, and it is only a question of time before they must go out of business

The Business Outlook in the West

Not since the splendid business years of 1905 and 1906 has the hardware trade in the West experienced such activity as at the present time nor has the outlook been so bright for large increases. After a breathing spell of about eighteen months, during which trade was slack and money hard to collect, the West is once more in good financial shape: and perhaps the most profitable field in Canada in which to push the sale of hardware this year. Advance orders booked by wholesale and manufacturing houses thus early in the year are greatly in excess of orders booked in the corresponding months of any previous year, and the most conservative judges in the hardware business, the pessimists who are never inclined to expect prosperity, are of the opinion that the year 1909 will prove the biggest and most profitable year in the history of the hardware trade of Western Canada.

For that belief there is very good reason. During 1908 every hardwareman bought sparingly. A partial crop failure in 1907, the collapse of the real estate boom and a combination of other circumstances had brought about a state of affairs that was the opposite of rosy. Business was slack and there was little money in the country. The manufacturing and wholesale houses were not pushing for business in the West, under the circumstances they did not want it. As a result the wholesale hardware sales in the West suffered a big decline in 1908, as compared with previous years, and the stocks carried by retailers were less on December 31, 1908, than at the close of any other year in the last decade.

Market Big, Stocks Light.

In the meantime the most profitable crop in the history of the country had been harvested, threshed and partly marketed. The farmer had money at the close of the year more than sufficient in most cases to pay his debts—the farmers in the older districts have a good cash surplus and many wants to be supplied. The hardware retailer thus has a big market to supply and the goods must be bought this spring, as his shelves were almost empty at the close of the year.

Immigration declined during 1908 because it was well known that business conditions were not satisfactory and because the small crop of 1907 was not a good advertisement of the opportunities in the West. There is, however, every reason to believe that the present year will see a large addition to the producing population of the prairie provinces. The first arrivals are already in the country and the railway and steamship companies are preparing for a larger traffic than in any previous year. These new settlers are so many new customers to be supplied with goods and they add to the value of the western market.

New Towns on the Map.

Railway extensions are planned on a large scale for the present year. The Grand Trunk Pacific will complete its line to Edmonton before the close of the year and big extensions are under way for the Canadian Pacific and Canadian Northern. Thousands of miles of railway are under construction at the present time and the large expenditure of the railway companies means the putting into circulation in the West of many millions of dollars.

During the last twelve months many new names have been added to the map of the western provinces, each name indicating the nucleus of a new town along a new line of railway. Many of these new towns along the Grand Trunk Pacific have already given evidence of substantial growth. They are not mere names upon the map ; although only a few months old they are thriving retail centres serving the farming population that has followed the invasion by the railway of the richest agricultural district of the West. Into each of these towns goes the pioneer hardwareman, who soon builds up for himself a profitable retail business. This new territory offers splendid opportunities for the man who knows something of the hardware business. On small capital he can in a short time build up for himself a very profitable business.

The Cash System.

The bane of the retail hardware business in the West, as indeed of every line of retail business, has been the credit system. Happily, this evil has been largely overcome and the retailer has the hard times of 1908 to thank for this more than his own efforts. The money stringency of last year made it practically impossible for the retailer to do business on a credit basis. The banks and the wholesale houses were pressing him for payments and he simply could not, if he would, let goods go out of his store on credit. Most dealers were glad to take advantage of the situation to shake off the incubus of the credit system and the result has been that in all parts of the West merchants are now conducting their business on a strictly cash basis. Sad experience has taught the evils of the credit system and it is not likely that, with the return of good times, many dealers will again allow themselves to be swamped with book accounts. The cash system has come to stay with the majority of the progressive dealers of the West.

Hard times did the West this good service, and, with the return of prosperity, the business of the country is on the right basis. The western market will absorb large quantities of hardware this year and conditions are such that the manufacturer who goes after western business this year will find it extremely profitable.

HAVE ONE PRICE TO ALL.

Nothing undermines a customer's confidence in a retail merchant more than to discover that he has two sets of prices—one for him and another for the other fellow. He may be on the "ground floor" but he isn't sure of this as he has learned that you show favoritism.

A member of the staff of Hardware and Metal wanting a casement window fastener not long ago, went to a Toronto store making a specialty of builders' hardware. The clerk behind the counter asked $1 for a certain line but the customer suspected that he was being "done" and, declining to buy, returned next day, when a different salesman asked 75 cents for the identical article on which a price of $1 had been set. The double dealing weakened the firm not only in the mind of the customer but in that of the architect in charge of the house under construction.

Another instance of a similar nature occurred in the same store last month. A swivel was wanted to repair a Yale lock and the clerk had to telephone downstairs for the price. The office asked a question and the clerk replied, "Oh, the right price," showing that the price was made to suit each individual case.

The man behind the counter should know the goods he sells so that questions will be unnecessary. He must, too, if he hopes to succeed, maintain one price to all alike, as when people lose confidence in a clerk or a store they are likely to transfer their business elsewhere.

BRIGHTEN UP.

It is good policy to occasionally repaint the front of the store, and have the old signs re-written. An air of brightness takes the place of the old dull hues, and the effect is not merely pleasing to the passer-by, but causes favorable comment on the enterprise of the shopkeeper. "Smith must be doing well ; I see he is having the whole of the shop-front re-painted," somebody will say.

Now, it may be that Smith is not doing very well. His business may be

causing him a little anxiety, because his expenses continue high, and there are too many dull days for his liking. But Smith is wise enough to know that if he wishes his business to prosper, he must let it be seen that he has confidence in the public and himself. It is useless for anyone to stay in business unless he has confidence.

MARKET OUTLOOK BRIGHTENING.

With quiet confidence—a confidence born of an intelligent appreciation of the country's trading prospects—merchants generally are looking forward to, and preparing for, the opening of the spring campaign. There are signs all the way round of a strong developing movement in commercial activity. The stock market is gathering firmness, money is more free, while foreign investors are ready to listen to any project that promises a fair quid pro quo for their money. There is this great solid fact to encourage everyone—the improved conditions of our great farming community resultant upon last year's bountiful harvest. Old obligations that pressed so heavily upon the farmers have been liquidated, the bubble of land speculation that helped in the disasters of 1907 has been pricked, and all energies will be directed into their proper channel—that of the land. Buoyed up by their success last year, farmers will put more energy than ever into their work, and scenes of activity and exploitation will be witnessed throughout the country that have never before been approached. Mining, too, will be pushed forward with greater determination. The passing of the snow will see still more striking developments in Cobalt, further exploitation of Gowganda, and the possible discovery of other fields of wealth, while the staple minerals, iron and coal, will show increased outputs.

The building trade promises to be unusually active. Architects have been busy all the winter on plans, and if only half of them materialize, this will be a splendid building year. The shelving of many plans last year, owing to want of confidence on the part of landlords, helps to improve the situation this spring. Labor is cheap and material cheap. In fact, landlords may not have for many years, if ever again, better opportunities for building. The prosperity that we expect of 1909 will soon alter the aspect of affairs so far as the landlord is concerned.

The slow re-establishment of trade conditions in the States must have a strong sympathetic effect upon business here. We are so closely allied, in a business sense, with our neighbors that we are bound to feel her good times as we do her bad ones. The opening of the steel market will, no doubt, greatly stimulate trade there, when things have settled down, So far as the metal market is concerned, it is certain that steady prices with an advancing tendency would greatly stimulate buying in Canada and such a situation can only be produced by an improvement in the States.

But above all there is this important fact to be considered in taking a survey of the prospects for the spring, and that is the economy that was practised by consumers last year. Not only did the large public concerns, the railroads, etc., cut down their purchases, but the individual likewise. We venture to say that farmers, mechanics and, in fact, all classes of the community, never stinted themselves as they did last year. Necessities were considered luxuries, needed improvements to farms, businesses and private houses were put to one side as impossible in the circumstances. It is recognized now that extremes of economy were practised that were absolutely absurd, and that the situation, instead of being alleviated by such procedure was only aggravated by it. There is, however, this great satisfaction now—the coming of the re-action.

Are the retail hardwaremen adequately preparing for this improved demand? Are they making such arrangements that they will be ready for the customers when they come into the store? It must not be forgotten that one district alone will not be affected. The whole country will feel the movement. Not one merchant, but many, will be wanting goods promptly, and the dealer who has left off ordering his stock until he can more accurately gauge his requirements may find himself held up in his shipments. And this would be fatal. It is the merchant who is ready with the goods, and not the man who is on the point of ordering who will reap the most benefit from the improved demand. The cautiousness that was exercised last year, with some reason, may incline some merchants to be overcautious now, when circumstances are different. They should take a hint from the manufacturers and the jobbers who are in all directions preparing for a strong revival in the demand.

That this demand will come we feel certain. Every indication points that way. Prices are the best barometers, and they are slowly steadying.

MERCHANTS SAVE MONEY.

For the past four years the merchants of St. Marys have been working together on a practical plan which means a saving to all concerned—the saving, in the case of some merchants, amounting to as much as $300 per year.

The plan is simply a general parcel delivery system—the contracting with a horse owner to deliver all parcels for the merchants who are in the scheme. The contractor is a farmer and he hires four boys and supplies four delivery wagons, one for each of the four wards. and each wagon makes four deliveries daily, at nine and eleven in the morning and three and five in the afternoon, with a nine o'clock delivery on Saturday nights. Customers know when the deliveries are made and they know they must order in time if they want the goods.

For the service each merchant makes a weekly payment to the contractor, in proportion to the number of his deliveries. For instance, some having a country trade with few town deliveries pay as low as $3 per week, while such men as grocers pay as much as $7 per week. But at this the grocers figure that they save easily $1 per day, or $300 per year, as it would cost them double their present expense to maintain a horse and wagon.

The St. Mary's Hardware, Limited, state that while they recognize the worth of the plan they find it advisable to maintain their own delivery wagon owing to their having to deliver many stoves long distances from town.

The plan is worth considering in every town or village, and in many cases the hardwareman will find that he can use the service and save almost as much as the grocer or drygoodsman.

TAKE A DAY OFF.

It will pay every merchant to take a day off once in a while and visit a strange town to study the methods of doing business, the way windows are dressed and the arrangement of the various departments in the stores.

A retail merchant may be in a rut and not know it—a whole town may be unprogressive in fact and the hardwareman be but a product of his environment.

Some, of course, make an annual visit to the nearest large city but a merchant is more likely to pick up an idea in a town of 5,000 or 10,000 than in a larger city.

Take your day off among a class of people similar to your own townsmen in taste, necessities and environments. Take it, not in a spirit of rivalry or criticism; neither take it with the idea that nothing good or worthy of imitation can be found in your own town. Study your lesson with a desire to learn; with a desire to make your own town better in the future if it is behind the times a little at some points, and to appreciate it all the more heartily wherever it is found to be in the lead. And always remember that there are others in this great old world who can excel us in some ways, and who will surely do so if we fail to keep alive.

What is the Good Will of a Business?

If You Were to Sell Your Business To-morrow What Should You Realize for Your Good-Will?—Views of Several Canadian Tradesmen on This Important Subject.

GOOD-WILL OF A BUSINESS.

By G. W. Brock.

Good-will, which is described as the custom of any trade or business, may be such an evanescent, intangible, uncollateral thing that in a sense it is like prospects, opportunities or ambition, which may or may not be realized. It cannot be weighed and must, therefore, remain to a certain extent an unknown and unget-at-able quantity. It is vastly different from a stock in trade of which an inventory will carefully record every article and its value while the bank books and ledger of a business will afford a purchaser a definite idea of the turnover, the width and worth of the constituency served, the probable number of customers, etc. Invoices and price lists will furnish a buyer with some conception of the class of goods which are mostly called for and turned over frequently but, in the sale or transfer of a business, the one thing, which must remain unknown to the purchaser to a greater or less extent, is the good-will. On this some men place a very high value while others view the matter in a different light and proclaim that the good-will except in rare instances is worth little or nothing in itself. Of course, if there is no opposition to the particular business and the man, who runs a grocery, a dry goods store or a hardware establishment, has very few or weak competitors, the good .will of his business may be very valuable but, if the rivalry is strong and aggressive, then what? The whole matter assumes a totally different aspect and the worth of the good-will has to be largely determined by circumstance, the growth and prosperity of a town or district and the wealth, requirements and thrift of the community.

But cases which can of themselves be regulated and sized up accurately in such a matter as a good-will are few. Take an average retail business in an average town doing a fair turnover and what is the good-will worth then? Supposing there are about as many competitors as the town will stand and a dealer for some good reason—ill health, family affliction, or other interests which he has in hand, desires to dispose of his stock, or perhaps it may be that he has made enough money on which to retire,—what is the good-will under these normal conditions worth?

At the recent convention of Hardware Dealers in Hamilton the question was referred to by one or two speakers who had scored success in the management of their businesses. One man said that the good-will should represent the amount of stock ordinarily carried; that is a business with a $20,000 stock should have a good-will equally as valuable. Another speaker asserted that the good-will of a retail store was worth ten times the net annual profit which means that, if the enterprise was clearing $1,500 a year, the good-will might be estimated at $15,000.

It must be understood, in the discussion of this subject, that no such thing as a franchise or monopoly is being considered or a business, which has grown so strong by long years of establishment and progressive methods in its particular line, that it has developed such proportions as to be practically unassailable. In such an event it is generally conceded that the good-will would be as valuable as the stock or plant itself or even more. Ordinary conditions and an ordinary business in an ordinary town are under review at the present time.

It would be preposterous to say that the good will of a retail store was worth the amount of stock carried in a case like this. A hardware man told of selling his business at 105 cents on the dollar and retiring to a farm. In a year he took the business back at 75 cents on the dollar, a depreciation in value of thirty per cent. The year before he had sold he had a cash turnover of $45,000, with book debts amounting to $17,000 more as a legacy of several years business. His successor, let the business run down to $18,000 total business in his year, and the former proprietor, acquiring the store again, a year ago, has managed to increase this by $17,000, making it $35,000. And recently this retailer bought out his opposition at 100 cents on the dollar, the opposition's clerk immediately opening another store.

What was the good-will of this particular business worth? The casual observer will answer that it was worth practically nothing to the man who got the stock and store as he did not make a success of running the business.

Then does not the good-will of a business resolve itself into the fact that its valuation depends largely on the purchaser, his fitness, experience, methods, system, foresight, aptitude and vigilance. If he has not these qualities to such a degree as the man, whose interests he purchased, then the good-will, if he pays anything for it, is really a loss to him and is as invaluable as non-dividend paying stock—in fact a great deal worse, for the stock in an industrial concern, which is not now earning anything on the investment, may do so some day, but a good-will is not an asset, unless there are brains, energy, concentration and ability behind it. In other words, the value of a good-will in a retail store appears to depend to a great extent on the qualification of the buyer, his grasp of the situation, his talent to satisfactorily meet the wants of his customers, and his foresight in ministering to and anticipating their needs.

One man succeeds in a certain store or locality, where, perhaps, a dozen others have failed, and so it is with a good-will; the dollars and cents represented by it depend very much on the purchaser himself and not so much on business, its connection and clientele as one might at first glance suppose.

Take another case. A shrewd, smart and active stranger comes into a town and goes to a dealer who desires to sell. The negotiations progress satisfactorily so far as the rate on the dollar and the value of the stock are concerned. This is all agreed upon, but the seller then says: "I have been in business here so many years and I have the best trade of the town. It is practically all cash and the profits last year amounted to $3,000." Would the good-will of the business be worth $30,000? The purchaser, when asked this amount for the intangible and uncertain asset called "good-will" balks and says: "I will not pay you a cent for it." Or he agrees to allow the seller very little, and the deal is declared off. The intending buyer then calmly sizes up the situation and says: "I have the necessary capital and experience to start business right here and, after looking over the field, I think it presents a fair prospect of success." He leases a store in the vicinity of the man from whom he was going to buy and commences business with a well selected and representative stock. His premises are bright and attractive, he advertises judiciously and thoroughly, and his goods are clean and reliable and his system excellent. He is content with a moderate profit; he keeps all promises and deceives no one. His method of doing business is aggressive and progressive; he wins new customers every day and holds their trade. In a year or two he has corralled a fair share of public patronage in his own particular line and is making money. What is the good-will of his competitor, whose stock he thought of buying, then worth? Nothing at all.

It would seem, therefore, that the value of a good-will of an ordinary retail business depended more on the powers, insight and capability of a purchaser than on the business itself.

WORTH VALUE OF STOCK.

By C. F. R. Taylor.

The value of the good-will of any firm on the event of its being formed into a stock company would of course be covered by the life and individuality of the business. For instance in the case of a business that had gone on for the last five or ten years and merely held its own I would not consider the good-will as valuable as one that was showing an annual increase in turn over and profits.

The good-will of a firm should be worth as much as the stock carried, providing it is as full of life and up-to-date as it can be, and with a good future. The value of the good will is I think identical as Mr. Lariviere sees it. He says it should be ten times the net profits of the year, and I compute that a business ought to double in value every ten years so that we hold exactly similar views.

When our firm sought incorporation it was not with the idea of infusing in more capital nor was it to be on a basis of selling out. Both the members of this firm who hold 99¾ per cent. of this business are hale and hearty, but should anything unforeseen overtake either of us I should be very sorry to have had my nineteen years of white slavery in a hardware business turned over to some individual with some money to invest at one hundred cents on the dollar based on the hardware stock. That is why we put in a good fair allowance in our business for good will. While we are not out to declare large dividends the amount of good-will you claim resolves itself down to the amount on which you want to pay dividends, and dividends are only paid on the amount of stock issued and not on the amount of your charter.

Of course when I say that the good-will is worth the amount of the stock I mean to represent the real stock which is bought and sold. I do not by that mean to include fixtures, tools in the plumbing shop, buildings, real estate, etc., etc. This would make considerable difference in some cases.

ONE TO FIVE YEARS NET PROFIT.

By W. T. Levack.

Good-will is the probability that old customers will continue to patronize the same establishment under different ownership. In an ordinary retail business it is a rather doubtful asset, consisting largely in the personality of the owner.

In the retail trade the public are attracted to the store that has the best goods, lowest prices, most modern methods and which gives fair courteous treatment. In hardware, where a customer as a rule can see for himself if he is getting exactly what he is paying for, the circumstances that would give a business a good-will value under these conditions would be that there might not be enough business for another store, and that the present owner had a strong hold on the trade by reason of long years of agreeable business.

The question the probable purchaser has to decide is, whether to enter into competition for a share of the business or buy the present concern, including the good-will. If he adopts the latter course he must follow the methods of his predecessors and improve them if possible in order to hold the customers, thereby earning the value of the good-will and at the same time warding off new competition.

The basis upon which good-will should be valued, in my opinion, following the above view of the situation, is, "How long will it take to place a competing store on a profit paying level with the present owner?" Whatever that sum may be is the value of the good-will to the buyer. If he estimates it would take, say, three years to place himself on a substantial paying basis, the good-will of the business of the present proprietor is worth the average profits of the last three years, because the buyer can take over the concern and have a profitable turnover from the start, besides. probably saving himself considerable wear and tear of mind and body in building up a new business.

From one to five years average net profits according to each particular case would be the value of the good-will in prosperous concerns.

Viewing the subject from the standpoint of these remarks it should not be a very difficult matter to arrive at the value of a retailer's good name. One trouble is the seller is usually too high and the buyer too low.

A factor that reduces the value at the present time, is the fact that there are so many openings in the Canadian West that a buyer would not have to pay for goodwill unless for personal reasons, he wished to locate in a certain locality.

The statement is made that where there is no opposition the good-will is valuable. I would say it is valueless because there is the opening for a man that knows his business, and where the field is fully covered the good-will is valuable if the establishment is in a healthy condition, as an intending competitor would find it necessary to buy an existing business, and would have to pay what it would be worth.

Again it is said that the value of good-will depends largely upon the qualifications of the buyer. If that view were taken the purchaser could say: "The good-will is worth nothing as I may not make a success," which would be a rather absurd position to take. It would mean to the seller that he would receive no compensation for years of work in holding the customers. The buyer purchases with the knowledge that it depends upon himself whether it is worth what was paid for it.

Referring to the example where $30,000 was asked for a firm's reputation, in my opinion, it was worth two year's net profits to the intending buyer, because it took him two years to establish himself, which by buying the good-will at above valuation he could have had a first-class trade and also been rid of his competitors. He would have received back the $6,000 paid out, and saved the work and care of working up a new business. The good-will of the older firm would be of little or no value after the new comer had secured a firm foothold, unless the former were able to hold their own.

If $30,000 had been paid for the name it would mean that over fifteen years would elapse before the amount would be returned to the investor, with interest at the yearly earning rate of the business, viz., $3,000. The good-will would therefore be paid for on the basis that it would take fifteen years to put an opposition firm on a paying foundation.

General principles cannot be applied to all cases, in valuations of this kind, each business would need to be considered on its own merits, its trade, and the personality of the owner. We recently had the instance of a defunct bank securing $150,000 for its good-will, and that was only a fraction of what it was worth.

The subject assumes another aspect when applied to wholesale houses, financial institutions, franchises, etc.

TEN TIMES AVERAGE PROFITS,

By Fred C. Lariviere.

Good-will in Webster's Imperial Dictionary is defined: "The commercial advantage possessed by any business, due to its established popularity, reputation, patronage, advertising, location, etc., over and beyond its mere stock or capital; friendly feeling or influence exerted with the view of transferring the custom of any shop or trade to a successor, the right and title to take up a trade or business connection, purchased of an out-going tenant or occupier."

Whether commercial or industrial good-will has to be valued on its own

merits. Instances are as varied as there are businesses but all are estimated in proportion to revenue. I believe any one having fully studied the question would not venture an opinion except in a general way.

Commercial good-will differs from that of manufacturing industries because in the latter are included trade marks, patent rights and formulas. It may be for the manufacturing of specialties which sometimes take very little capital and bring very large returns.

In buying out a competitor and assuring yourself of the sole control of certain articles, you may pay a very high price for what may be termed good-will, but you are simply buying out competition.

The organization of a concern is one of the principal factors in the value of good-will. If it is a one man business it has less value than if organized in such a way that the owner may be able to entrust to his employes that administration of his when away.

One example of the unreliability of estimates of value of good-will is the case of two manufacturers of certain lines in the hardware trade, who had between themselves over 75 per cent. of all goods sold. They amalgamated and are now doing no more than 55 per cent. of all goods sold in that particular line. This would show that the value of the good-will of any establishment is of much less value to a competitor than to the purchaser who intends to continue the business and who buys it as a going concern.

When the Ogilvie Flour Mills Co. placed their stock on the Stock Exchange it was learned that the value of the good-will, trade marks and formulas was estimated to $1,250,000.

In England the intrinsic value of the plant of Guinness's Porter was $100,000, but it was capitalized at $700,000 because the revenue was sufficient to pay a good dividend.

What was the value twenty years ago of the good-will of Morewood & Co. for their "Lion" Galvanized Iron and the Tupper Co. for "Bradley" Tin? Hardly anything else could then be sold. Morewood sold to John Lysaght, Ltd., who discontintinued the "Lion" brand to sell "Queen's Head" and Tupper & Co. are no more in business. To-day the value of the good-will of these two concerns is null.

It is not long since that Wade & Butcher was the only reliable firm for razors. Their good-will so far as the Canadian market is concerned was of much greater value twenty-five years ago than to-day.

Licenses for retailing liquor in the City of Montreal sold for $1,500 before the passing of the law limiting the number to 400. One of the last transfers recorded shows that $29,000 was paid for the license alone outside of stock and fixtures.

Who could estimate the value of the good-will of Joseph Rogers & Son for cutlery, Roger & Gallet for perfumes, Fry's chocolates, Pear's soap, Disston's saws, Maydole's hammers, or Spear & Jackson files and saws?

This proves without doubt that the value of good-will is particular to each case.

At the Hamilton Convention I said that in my opinion the value of good-will could be estimated at ten times the average net profits of a business, due allowance having been made for the interest on capital invested.

To make this clear let us take the case of a business with a capital of $100,000, producing a net profit of $10,000. From this deduct 6 p.c. on $100,000 or $6,000. The balance is $4,000, multiplied by 10 p.c. will equal $40,000 value of good-will. Now the following year the same profit is made, and the interest on $40,000 at 6 p.c. will give $2,400, leaving a balance of $1,600 to be added to reserve. This amount of $2,400 is not an excessive remuneration for the creating power of a business that can give at once to a new comer such revenue.

INCORPORATING A RETAIL BUSINESS.

Some of the advantages of joint stock companies with limited liability over the individual, the ordinary partnership or the partnership with silent partner, are given below by Fred. C. Lariviere, Montreal, in answer to a question asked at the Retail Hardware convention at Hamilton in February:

Bankers and business men prefer dealing with a joint stock company as the paid-up capital (if all the stock subscribed is fully paid) cannot be withdrawn or decreased, although it may be impaired by loss. They are better secured in case of death, sickness, disability, or even bad conduct of one of the principals, for such a man may be dismissed and cannot force the refund of his shares from the other shareholders.

In an ordinary partnership a member may ask, on giving due notice, the dissolution of the firm, although the withdrawal of this partner may greatly affect the credit standing of the firm, and, in some cases, absolutely ruin it. In a joint stock company a member can only sell his shares to another and the capital stock remains unchanged. The same principles apply in the case of death.

In ordinary partnership the whole of a merchant's wealth is liable, not only for the liabilities of his firm in regular business transactions, but for all accidents which may be caused by the carelessness of one of your employes to himself or your customers such as an elevator accident, touching electric wires or in the handling of cases of goods or the runaway of your horse. He is also unguarded against errors of judgment in agreements or contracts, either through haste, inexperience or inadvertence made by himself or partners or employes.

In joint stock companies a man is only responsible for the amount of the shares he has subscribed for and if, paid up, he has nothing more to lose.

Joint stock companies facilitate the management of a business. If more capital is required, the directors can issue new stock and sell the necessary amount of shares without admitting a new partner or partners as with regular partnership agreements.

If a merchant thinks he has too much interest at stake, with joint stock companies he needs nobody's consent to sell his stock. Ordinary partnership requires mutual consent of partners and a new agreement.

If you wish to interest your son in your business, in a joint stock company, you can transfer a few shares to him without asking permission. In a partnership consent of your partners must be obtained.

Property Unsafe.

In a joint stock company you insure all your property, not invested in your regular business, against all liabilities connected with the company's debts.

If you have shares in a joint stock company and wish to borrow money you transfer your shares as collateral security and effect the loan. In ordinary partnership you cannot use your partnership interest to borrow money.

By incorporation you double your borrowing powers without affecting your individual credit. You can also interest your best employes with the object of keeping them satisfied to remain with you.

In case of death your interest in joint stock companies will be much more valuable to your estate or family than it would be in ordinary partnership, for in these when dissolution occurs you lose all the value of the good-will of the business to which you may have contributed very largely, and the value of good-will is shown by the large prices paid when large corporations amalgamate.

Incorporation is the newest and safest method of doing business.

Arno A. Bittues, managing director of the Gillette Safety Razor Co., Montreal, was in Winnipeg recently calling on the trade and was a welcome visitor at the Winnipeg office of Hardware and Metal.

The Model Retail Hardware Store

Its Location, Construction and Equipment—Plans and Pictures of Canadian Stores—Description of Ingram & Davey's Store at St. Thomas—Some Features Worthy of Duplication—Should Counters Be Abolished? — The Builders' Hardware Sample Room.

By Weston Wrigley.

As it would be impossible to design a model hardware store suitable alike for the village of two thousand and the city of two hundred thousand inhabitants a middle ground will be taken and after pointing out a few important essentials to all stores, reference will be made to the tendencies in the trade to-day with illustrations of some of the modern features adopted in Canadian hardware stores.

"Where will I locate my store?" is the first problem confronting the man who has decided to establish a retail hardware business. It is essential that a central location be chosen, one where large numbers of people congregate. In a small town the main corner, in a small city near the postoffice or market and in a large city on one of the main streets near a street railway junction, near the business centre, or in the suburbs where building is active and new residences are being furnished. If corner lots are not too valuable for drug or grocery stores they should not be too expensive for hardware and house furnishing stores, as the corner building provides ample opportunities for the display of goods and the live hardwareman can make as good use of show windows as any other class of merchant.

The hardwareman who is facing the problem of construction should look farther than his local architect's office. Most hardwaremen have to suit their stock to a store already in existence, but he who is fortunate enough to be able to suit his store to his stock should not hesitate to spend one or two hundred dollars and a fortnight's time in gathering ideas before building. Ask the editor of Hardware and Metal and the jobbers you deal with for the names of some stores worth seeing and, if possible, visit some of the good stores in the neighborhood of Rochester, Chicago or St. Paul, the names of which can be easily learned.

A Type of the Counterless Hardware Stores Now Being Constructed in Large United States Cities.

The store building should be as nearly fire proof as possible and equipped with the latest devices in the way of shelving, display cabinets, oil pumps, cash registers, etc. Then special lines pushed by the store, such as metal ceilings, should be used in order to display and show faith in the goods. Brick is, of course, the most popular material for the building, but where it is not ob-

tainable metal siding and roofing should be considered both from the standpoint of a low insurance rate and the advertising to be gained by its use. Catalogues and prices should be obtained from the companies making Bennett metal shelf boxes and Warren shelving, cabinets, etc., before fitting up the store. Both for general appearance and economy in handling the goods the best equipment will prove the cheapest in the end.

Lighting and Heating.

In planning the windows attention should be given to the lighting of the store as well as displaying the goods. The window should, of course, be enclosed and as near air tight as possible to keep the goods free of dust. Ventilation must be provided through the outside window frame to keep the glass from frosting over in cold weather. With the air in the window at the same temperature as on the outside there will be no frosting and this can be accomplished by cutting a row of wide holes at the bottom of the sash and another row of smaller holes at the top. The inrush being greater than the outgo the circulation should be ample and to avoid dust coming into the window during the summer time a sliding damper may be arranged to close the holes except when required in frosty weather. If gas lights are used additional ventilation must be provided, otherwise the window will become heated and moisture formed on the glass. A false ceiling in the window with prism lights above will provide a lot of light in the store while experience has shown that the floor of the window should be from 24 to 36 inches above the street level. Lights should be hidden as far as possible.

To obtain the best results in lighting the store the effect from various shades and reflectors should be considered. This is particularly important in lighting show cases or windows. The ordinary tin or porcelain shade reflects the light downward, but gives the effect of unevenness or streaks. The new glass prismatic reflectors distribute the light more evenly and wherever desired. To get the best results, it must be remembered that the ordinary incandescent lamp of 16 candlepower, throws this only on the horizontal; the light it throws downward is very much less. It is important therefore to have the proper reflectors which will distribute the light where it is required, and thereby reduce the cost. The upright mantel lamp greatly reduces the consumption of gas. The inverted burners are an improvement as some of them give two-thirds more light downward than the old upright ones. A comparison of the cost of electricity and gas shows that electricity will cost about 40 per cent. more than gas.

If the building is to be used exclusively for store purposes steam heating will give satisfaction, but if living quarters are located over the store hot water or hot air heating will be preferable according to the size of the building.

Silent Salesmen and Show Cabinets.

The modern tendency in store equipment is undoubtedly towards making the hardware store as neat and attractive as a jewelry store for women customers. The old time hardware store was more like a warehouse than a place of business. The walls, the ceiling, the floor, the counters, the front of the store, everywhere in fact, the goods were in a jumble with the shopkeeper the only holder of the key to the puzzle. To-day hardware merchants spend thousands of dollars in store fixtures alone and returns justify the investment. To-day, the counter is being pushed to the back by the silent salesman and as will be seen by the accompanying picture from the "Warren system catalogue," in some stores in the United States the counter is being eliminated entirely except in the section devoted to putting up and shipping parcels. The first impression and the ease in selecting the goods required counts for a lot in making sales to customers and it must be admitted that a store fitted up with the latest in silent salesmen, wall cabinets, sampled boxing, etc., is in a better position to sell goods than one with counters and open shelving. The saving of the clerk's time, the ability to quickly estimate the stock in hand, the educational effect on and inspiration received by the selling staff and the preservation of the stock are all strong arguments in favor of the use of modern store fixtures.

A Store Without Wall Counters.

REST ROOM FOR WOMEN.

Among the many developments of modern merchandizing is the increased provision for the comfort of women customers. Reference is made elsewhere in this issue to the fact that Ingram & Davey, St. Thomas, have provided a toilet room for the use of their women customers, most of whom are likely to be residents of the city. But if city women find such provision a convenience how much greater is the need of such arrangements for the farmers' wives who are away from home for the largest part of the day and who frequently have long hours of waiting before the farmer concludes his business and is ready to return home.

It is claimed that the women buy from two-thirds to three-quarters of the goods sold at retail. Should it not be to the merchants' interest, therefore, to make things as comfortable as possible for their best customers? Any plan adopted to encourage and make easy the visits of the women, and especially those who are handicapped by the necessity of bringing children with them, will make popular the merchant or set of merchants who combine together to supply this need.

The James Hardware Co., Richland Centre, Wisconsin, about a year ago installed a ladies' rest room in their basement with a door leading direct to the street, thus avoiding the necessity of a woman coming through their store to reach it. In this rest room they placed a small stove with a tea kettle for heating water, a couch, rocking chairs, a table with magazines and periodicals, a cradle for babies, a lavatory, with brush, combs, etc., and closet. On very busy days they employ a girl to look after the bundles and watch the children while the mothers are shopping, and they claim that to say this has paid 500 per cent. on the investment is putting it mildly. "James' Rest Room," is the headquarters for nearly every farmer's wife in the country while they are in town. They meet there to chat and visit, they bring their lunches and make themselves perfectly at home. Many are so grateful that they have offered to donate wood, etc., for its maintenance, but these offers are, of course, declined.

If this firm, acting alone, can do this other merchants in Canadian towns can do as much. In places like Barrie, where there is a local hardware association, the different hardwaremen might co-operate in establishing a "Hardware Rest Room," one supplying a gas or oil stove, another the cooking utensils, etc. Or, better still, invite a plumber, a furniture man, a bookseller and other merchants to join in supplying the needed articles and contributing to its maintenance hanging up a card in the room and making an announcement in the local papers as to what firms are furnishing the room. Still another plan would be for the Board of Trade or some other local organization to manage the room as a civic institution.

But the important thing to remember

is that merchants in country towns have an opportunity to grasp in supplying a need which ordinary humanitarianism calls for. Just as cities have a duty to perform in supplying public lavatories for its citizens and the transient population, without forcing them to visit saloons, public buildings or departmental stores to answer the calls of nature, so have country merchants, individually and collectively, a similar responsibility resting upon them.

Ingram and Davey's New Store at St. Thomas

One of the finest buildings erected in Canada for retail hardware purposes is the new store occupied the last week in February by Ingram & Davey, St. Thomas. The firm had been conducting two stores, one in the west and another in the east end of the city, but both have now been merged into the fine new building on the corner of Talbot and Southwick Streets, shown in the accompanying illustration. Arrangements were completed for a photo of the interior, but as there were a couple of hooks in the wall cabinets on which goods had not yet been hung, the firm declined to allow Hardware and Metal's photographer to take a picture. A floor plan gives an idea, however, of the store arrangement and the layout of the various classes of stock.

The store building is three storeys in height and 42 feet wide, facing on Talbot Street, with a depth of 115 feet to a lane on Southwick Street, a bridge crossing the lane to a warehouse 42x40 feet and two storeys in height. Red brick was used in the construction work, with an inner lining of white brick, the walls being unplastered. A Taylor Forbes low pressure steam heating system has been installed, together with a complete fire system, with 100 feet of hose on each floor. A very handsome ceiling, supplied by the Metallic Roofing Co., Toronto, for whom Ingram & Davey are agents, was installed by the firm's own workmen, Paroid roofing being used on the roof. The 30-inch cornice used on the building was also the work of the store's staff. N. L. Darrach, St. Thomas, was the architect.

The central entrance provides two large show windows eight feet in height to a false ceiling and entirely enclosed by sliding glass doors, the floor being quarter cut oak. The window is ventilated by wide slots at the top to prevent the glass from frosting. Fixtures of five 100-candle power electric lamps, with hollowphane reflectors, light the windows, an arc lamp being used for outside illumination in addition to the city lamp on the corner. Above the false ceiling prism glass is used to provide light for the store, eleven four-mantel Humphries (Kalamazoo, Mich), lamps supplying artificial illumination.

Six ten-inch steel columns, supporting twelve-inch eye beams support the floors. Wilcox traveling ladders are used on both walls. A time clock records the employes' working hours. Eighteen hundred feet of speaking tube connects the various departments. Two cash registers, one a six-drawer and the other a three-drawer, with a "want" register attached, are to be used, the sales of each department being registered as well as those of each clerk. The Copeland-Chatterson loose-leaf system is used in the office and a catalogue cabinet, supplied by the Office Specialty Co., Toronto, takes care of the books of reference.

Money in Fixtures.

The site and building, according to Mr. Davey, cost $35,000, and probably $5,000 more was spent in store fixtures. Entering the main door, for instance, five eight-foot plate glass silent salesmen with marble bases are seen, while to the right are three ten-foot salesman of the same type, making 70 feet or at $10 per foot, $700 worth of silent salesmen supplied by the Dominion Office and Store Fixture Co., London.

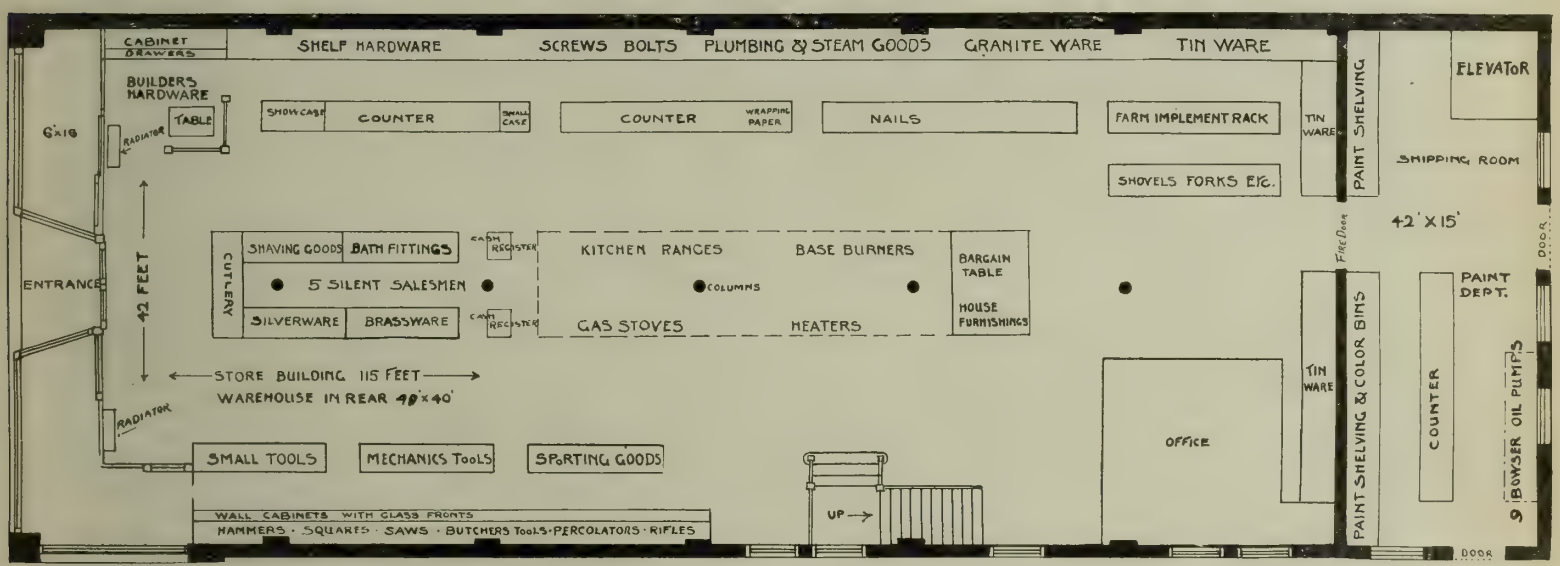
Behind the three last mentioned is 38½ feet of glass cased wall cabinets enclosing, hammers, squares, saws, percolators and sporting goods, above the cabinets being drawers for storing stock, with the base below fitted with glass sliding doors showing samples of tools. This wall is suggestive of the Warren system of hardware shelving.

On the opposite side a small enclosure is designed for use by architects and house owners selecting builders' hardware, samples of door sets, locks, window fasteners, etc., being carried in glass cabinets, and drawers, with table and chairs for catalogues, etc. To the rear of this runs a series of three counters backed by a large wall of shelf boxes, each bearing a sample of the articles contained. Boxes from the old store were used by re-facing with oak to match the new fixtures, but this was a rather questionable saving.

The store office occupies a commanding position, with plenty of light, the woodwork being set off by expensive panelling.

Rest Room for Lady Customers.

In the cellar large stocks of plain and fancy glass are carried, the cutting



Arrangement of Stock and Fixtures in Ingram & Davey's New Store at Talbot and Southwick Streets, St. Thomas.

table being under the corner window and particularly well lighted. Wire nails are also stocked down stairs, an electric elevator made by the Scott Machine, Co., London, providing the means of raising and lowering them. Lavatories for the men are also located in the cellar.

The second floor contains several important features, among these being a ladies' lavatory and dressing room for the use of customers. Later on it is planned to add a rest room, fitted with rockers and writing table and supplied with the latest magazines. Another notable feature is the show room, 16x30 feet in size, for fire places and lighting fixtures. Twelve sample mantels, tiled complete, are shown. The gas and electric fixtures are connected up to boards suspended from the ceiling by rods. By this means the connections for the fixtures are easily changed and the fixtures removed without trouble. Baths, basins, closets, brass goods, bath room fittings are also shown on this floor, together with a line of babies' and dolls' carriages, toys, etc. A sample bath room and a model kitchen may be added in the future as suggestions to intending builders.

The third floor is used as a stock room, all goods received being carried up by elevator and checked off here before going to the different departments for sale.

Paint Department.

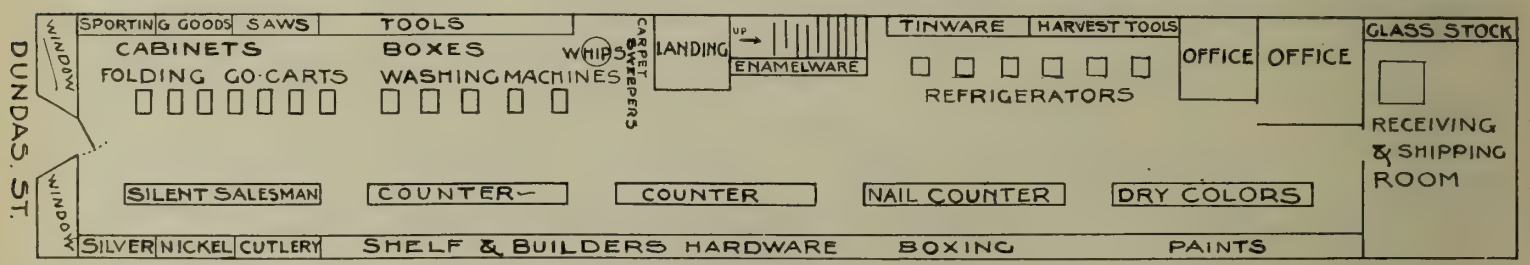
Separated by a fire wall from the basement to the second floor fifteen feet at the back of the ground floor is used as a paint department and shipping office. A battery of nine Bowser oil pumps has been installed with tanks for benzine and gasoline outside the building. As shown in the floor plan a counter runs along the wall near the street door, the entire wall space on one side being given up to shelving for ready mixed paints, stains, etc., in the various sizes. "Elephant" and "100 per cent. pure" paints and Berry Brothers' varnishes are stocked. A feature of this department is an arrangement of bins for colors under the shelving behind the counter, each bin being 14 inches wide, 24 inches deep and 32 inches high, holding about one barrel each. A steel chain allows the bin to be pulled out at the top when stock is required. The bins are hinged to the floor thus making them permanent fixtures. It is suggested, however, that if loose pin butts are used the entire bin can be more readily removed and weighed during stock taking. Experience has shown also that the bin will balance better and be pulled out with less effort if a false bottom slanting toward the front is built in the bins.

Ingram & Davey's New Hardware Store at St. Thomas.

Warehouse and Workshop.

Across the lane in the rear of the store is the work shop and metal warehouse, 42x40 feet in size. The ground floor is used for storing heavy goods and teams can drive into and turn around in the space used for light goods, such as wheelbarrows and ladders. Up stairs is a large and well lighted work room for the tinsmiths and plumbers, with a full equipment of tools and machinery for doing all classes of work. Racks are provided for sheet metals and other stocks required and a tackle and pulley is available for handling any material which it is found inconvenient to raise on the elevator and truck across the building. The floor is cement and on two sides is a cement pit parving from six to eight feet in depth, in which iron pipe, bar iron, steel rods, etc., are stood on end, the various sizes being separated by rods driven into a scantling in the wall. Racks are also used for storing tool steel, band and hoop iron, soil pipe, etc. Blacksmiths' supplies, horse nails and shoes, wire and wire fencing are also kept in stock here with the ceiling space used for light goods such as wheelbarrows and ladders. Upstairs is a large and well lighted workroom for the tinsmiths and plumbers with a full equipment of tools and machinery for doing all classes of work. Racks are provided for sheet metals and other stocks required and a tackle and pulley is available for handling any material which it is found inconvenient to raise on the elevator and truck across the bridge connecting the workshop with the second floor of the store.

St. Thomas is a city of 14,000 inhabitants and is connected to London by two steam and one electric railway. Much trade is undoubtedly diverted to the larger city by the electric cars, but the erection of such a well equipped hardware store in St. Thomas should help materially in holding the best class of trade at home. Ingram & Davey's effort to supply St. Thomas with a thoroughly modern store ought to be, and undoubtedly will be, appreciated by the citizens of the Railroad City as well as by the farmers in the surrounding country.



Floor Plan of the Purdom Hardware Co.'s New Store at London.

LONDON'S BUILDERS' HARDWARE STORE.

The Purdom Hardware Co., London, who moved into new premises on Dundas street a few months ago, have a very attractive store and being devoted almost solely to builders hardware, shelf goods and house furnishings display cabinets and shelf boxes have been installed on both sides of the store in the front section. The store is equipped with two bright windows and make a feature of window advertising. Running through from one street to another the store has a great depth and a very complete stock of builders' hardware and mechanics' tools is carried.

Three floors above and a basement below are used for storage purposes, the company doing a large jobbing trade with hardware and general store merchants in the district near London. Travelers also regularly call on the builders and contractors, and with a complete stock available locally, the special builders' hardware houses from Toronto find it hard to get business in competition with the Purdom Company.

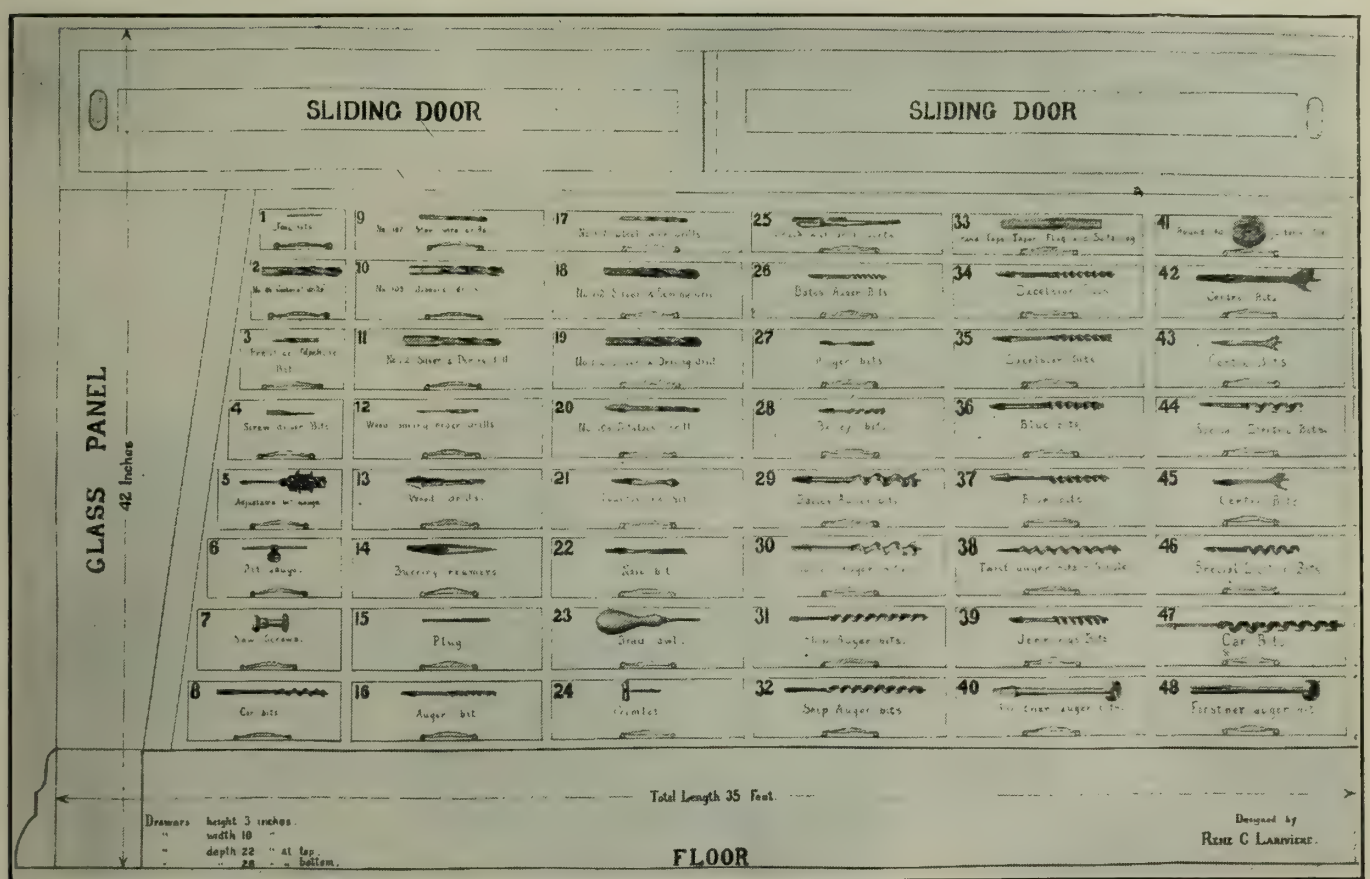
If the 1910 convention of the Ontario Retail Hardware Association is held at London retailers who want to see a well arranged and attractive hardware store will do well to visit this store.

Can Counters Be Dispensed With

By Fred C. Lariviere.

I believe that counters of "Modern Designs" are an ideal in the hardware stores ; and by modern designs I mean glass show cases disposed in such a manner as to serve as a silent salesman and yet provide ample space inside to instal the stock of the samples shown.

In the accompanying photographs of the tool department of our establishment, it will be noticed that the showcases serve also as counters and stockholders. The goods displayed are fastened to the inclined surface with oilcloth binding and the glass in the front is removable, being placed in a frame divided into drawers for holding the stock of the articles sampled in the silent salesman. Each sample is price marked in plain figures and the location of the stock is also given. Each drawer is also numbered and a picture of the article is shown above the drawer pull. Thus the selling of an article is simplified. The customer has no difficulty in selecting from such a spacious silent salesman the article he wants, and on the other hand the clerk can at once place the article before the customer without any trouble or disturbing the silent salesman. In addition, by these



Rear View of Silent Salesman, Showing Method of Storing Stock with Samples Shown in Each Drawer.

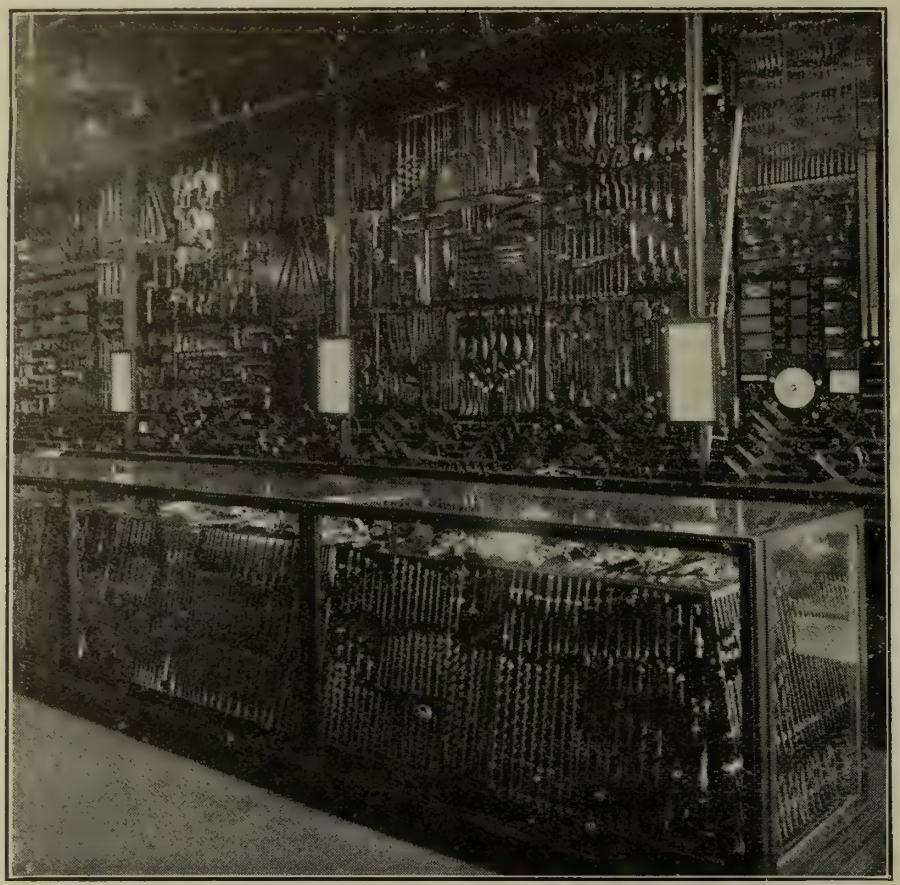
head to the supports by dowels at the bottom and Canada turns on the sides and top, the inside is made of ½-inch basswood covered with black velveteen, on which are placed the samples.

Realizing the advantages of having the stock placed conveniently near the line displayed, thus preventing the confusion and long delay attendant upon the salesman seeking any article wanted among a lot of miscellaneous goods elsewhere, we have designed the large counter having an inner structure with top and sloping sides, this forming the silent salesman. The back of the counter is compartments the stock is kept in the best of order.

Our counters permit the clerk to show the goods required advantageously and at once replace the goods to their proper drawer. They also offer a rest for the arms, and thus make the customer feel more comfortable and more inclined to look over what you have to offer, and when waiting throws his eyes down to the display if the counter is of glass.

Another advantage counters have is the room available to show a large range of goods for comparison. This is

impossible, otherwise. It is also a certain satisfaction for the customer to see the goods he has selected wrapped up before him.



Combined Silent Salesman, Counter and Stockholder in Lariviere's Store at Montreal.

The only cases in my mind where counters must be dispensed with is where much floor space is required for bulky goods as stoves, refrigerators and other goods of same class, but in that case shelf space must be provided for shelf goods which is a better paying porposition than the goods above enumerated.

MODERN STORE AT VICTORIA.

About three years ago Messrs. Griffin, Greenshaw, Aitken and Randall, Manitoba hardwaremen, purchased the business of Nicholles & Renouf, established in 1885 at Victoria, B.C. Their first move was to modernize the store by replacing the old fixtures with an up-to-date equipment, this being followed up by the opening of a branch store with a stock of farm implements, wagons, etc. The retail store is situated on the corner of Yates and Broad streets and the branch on Johnson street. The store has three large plate glass windows, which are always kept artistically dressed.

Stretching the full length of the store is a wall of shelving any store might be proud of. In these shelves to the height of about nine feet are fitted tiers of boxes beautifully finished in oak with a sample of the goods contained therein neatly fitted to the outside. Above are the larger and bulkier boxes easily reached by means of a travelling step ladder.

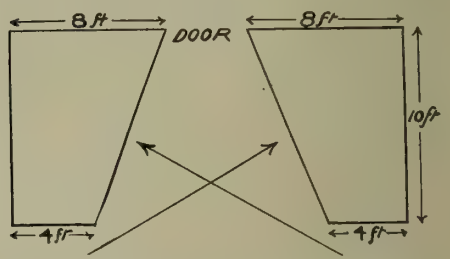
In front of this are two fine plate glass show cases and on the opposite side a silent salesman filled with tools, cutlery and plated ware. Behind this are arranged a fine line of stoves and ranges, with shelving neatly filled with enamel ware. At the back an elegant office has been fitted up, and taken altogether the store is certainly the handsomest hardware store in Victoria.

James Bell who is seen behind the counter was with the old firm almost from its establishment and his knowledge of local conditions has been a great help to the new proprietors.

B. C. Hardware Co.'s Remodelled Store at Victoria, B.C.

WINDOWS OF LONDON STORE.

Westman & Co., 121 Dundas street, London, in re-arranging their store after their recent fire, built their windows ten instead of the usual five or six feet deep leaving a very wide and deep entrance. The store is about 20 feet wide and it was felt that the deeper windows would make it possible to secure better results from the window displays.



Window of Westman's Store at London.

As is shown by the accompanying sketch the passer by gets a better view of the display from the sidewalk and, it is contended, is more likely to be attracted than if a side view had to be made to see a display fronting on the

street. Against this, the argument might be used that many passersby would prefer to examine a display from ehe sidewalk rather than by having to enter the doorway to get a near view.

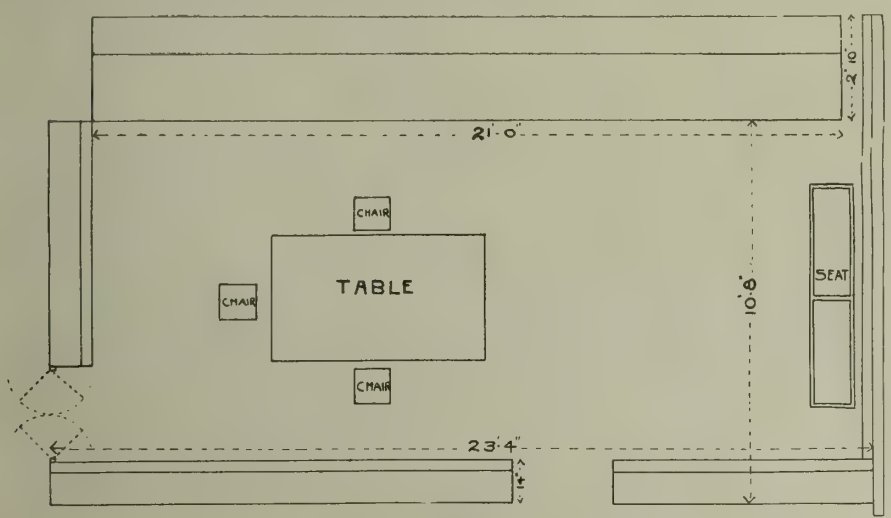
Mr. Westman, senior, has a novel idea which he has used successfully to increase the light in his cellar. The window light was interfered with by a joist which prevented the light from going farther than a few feet so, after experimenting with bright tin and a small mirror, he secured a long narrow looking glass which he set at a proper angle to catch the light and throw it under the joist and to the back of the cellar, by this means improving the light as far as 60 feet from the window.

A false ceiling has been erected over Westman & Co.'s show windows and prisms used to show light back into the store, this with a new metallic ceiling making the store quite bright. Samples of goods are displayed on a green baize covering to the doors enclosing plain shelving carrying a stock of builders' hardware and mechanics' tools.

Advantages of a Builders' Hardware Room

By F. Max Hill, Manager of the James Walker Hardware Co., Montreal.

In writing an article on a builders' Hardware Sample Room, our treatment must necessarily be from our viewpoint, and subject to our conditions. However, there are several points which must be considered by any merchant who is contemplating the handling of builders' hardware: 1st, The desirability of a display; 2nd, how to handle a display; 3rd, Its location in the store; 4th, the amount of space that should be allowed, and 5th, the treatment.



Arrangement of Builders' Hardware Department in the Walker Hardware Store, Montreal.

One of the fundamental principles recognized by all merchants is, that an article must be shown to be sold, and heretofore this principle has been carried out very extensively on everything except those articles that go into the finishing and furnishing of a building.

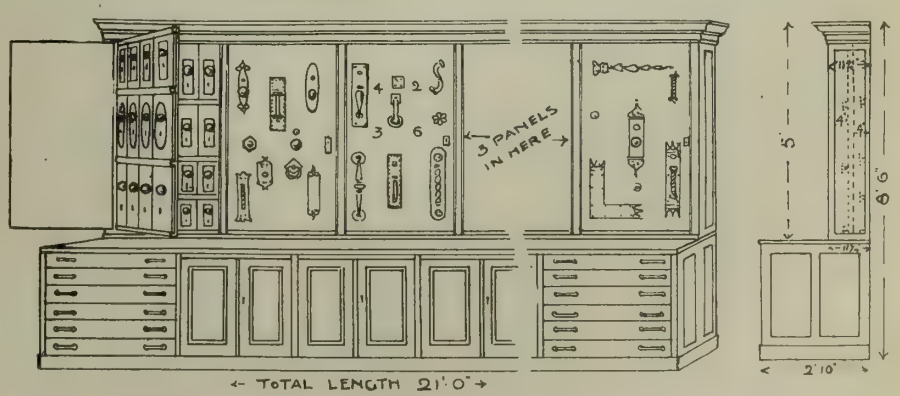
It has been customary to have a few mounted samples lying around on the counter, which become in time, much battered, and marred, and adding to the bad feature in connection with these sets, is the fact that the lock seldom works smoothly. To show other pieces, it is necessary to take your customer from point to point in your store, or even on the stock floors. You open up various packages, and through haste or neglect, fail to return the contents in their original condition, thus parts or screws may be lost with a consequent result of annoyance to your client. Realizing all these difficulties, you naturally come to the conclusion that concentration of samples muct be accomplished, and thus are brought to the second stage of how to handle the proposition.

It has become generally recognized in all trades that some one place or space devoted exclusively to the specialty that it is desired to push, will accomplish the greatest result and if this space can be more or less separated from its surroundings, the better and more striking it is. Note the treatment that your neighbors in the dry goods trade give to their store and try and realize that this is the result of modern conditions and the outcome of much thought and foresight. You then will appreciate your own opportunities and not hesitate to act on them.

Your third step is to consider location, and at once you are brought face to face with the fact that square foot area represents dollars and cents. Forget the latter for the time, and only think of the impression you wish to make on your customers and the eventual result to you in economy of time in handling them. Certain features are essential in locating this space, or room, that is, prominence, light, and accessibility. In our judgment, you should devote space near the entrance of your store, for builders' hardware is an attractive exhibit when handled properly, and the goods being profitable should be pushed to the fullest extent. Another reason for its location as above is, that artificial light does not show the surface finishes in their true color, and it is essential that the goods look the same to your client as when applied to his residence. A mistake often made is to place this room on an upper floor, which has to be approached by stairs or an elevator.

The amount of space that you should devote is debatable. We believe that good results can be obtained by using a space next to a wall, and approximately 12 by 20 feet. Such a space will permit of an exceptionally large display and still leave room for a large table in the centre, three chairs and at one end a settee.

To illustrate our point, we show herewith our wall case, which contains al-



Builders' Hardware Display Cabinet in Walker's Store at Montreal.

most every sample that we carry. The counter portion is 34 inches deep and contains 12 drawers and 5 cupboards. We devote one drawer for locks, putting them into a frame with the faces up, so that they can be seen and easily removed. Two drawers are given to butts, they being placed in slots which receive the leafs, but leave the knuckle projecting above the surface of the wood. We show all types and sizes and finishes that we carry. Two drawers are arranged for door pulls, which are sampled on panels, so that they can be removed for display purposes.

The balance of the drawers are used for displaying closet hooks, drawer pulls, cupboard turns and catches, espagnolettes, pulleys, etc. Above the base we have seven cupboards, each 12 inches deep Each cupboard has two doors, one inside of the other and both pivoted as shown in the sketch.

On the surface of the exterior door we fasten permanently, very ornamental escutcheons and knobs, door pulls, hinge plates or door knockers, in fact, anything in house trimming hardware that will attract the eye and look harmonious. On the inner doors, we place cleats so spaced that we can insert panels containing front door trim, which are easily removed. On the extreme inside we also place cleats which are arranged for inside door trim. Each panel has a label on the back which from the color denotes whether we have same in stock, also the selling prices. By this arrangement of cupboards, we are able to accommodate a large variety and yet occupy but little space. Furthermore, the samples being vertical and in a tight cupboard, do not accumulate dust and hence remain clean. In the cupboards below the counter we have shelves with panels on edge and upon which we mount store door handles.

To separate the space, we have a partition about 4 feet high, formed of palings or balusters with heavy caps above. This serves to make a nominal distinction between room or general store, but not enough to cause any customers any hesitancy in entering and using the room. We have a dark green cork linoleum on the floor of the room to help keep it cleanly, also the furniture is of a special character and is in harmony with the rest of the room.

A hardware merchant cannot invest a few hundred dollars in a way that will bring quicker results than by arranging a room such as we describe. It will mean an expenditure of from $250 to $500, but it will cause more favorable comment and give greater advertising than by any other method.

The Arcade Hardware Co.'s Store at Forest, Ont.

METAL SIDING ON FOREST STORE.

A well known store in Western Ontario is the Hardware Store at Forest, the manager being Reg. Scott. Situated on one of the main corners in town and covered with metal siding the store has a striking appearance, and with a large floor space and four good windows for displaying goods there is every opportunity to catch the trade of both townspeople and farmers. "We have used the Metal Shingle and Siding Co.'s goods on our store and in many stores and residences in town and have found the use of these goods has led to a great many sales. We have had a great trade in metal goods, especially corrugated galvanized iron, having secured all the large contracts for these goods in this locality," writes Mr. Scott in reply to an enquiry as to their experience with this class of trade.

"We change our windows every Monday morning showing seasonable goods. We advertise in the local papers and use large sign boards in the country. Our business is about half cash and half credit and have been very successful with collections. Our special lines are Martin Senour paint, Staunton's wall paper and Ideal wire fence. We endeavor to keep the store very clean from cellar to garret, displaying goods in silent salesmen, we having a large cutlery case in the centre of the store. We keep all seasonable goods to the front and clean them out at very special prices and do not let dead stock accumulate.

"We have found wall paper one of our best lines, carrying a $500 stock and by giving it a share of our attention we clean it out every year selling remnants at any price to clear, two bookstores and one hardware selling the line in opposition to us. It goes well along with paint and makes more paint business. We get the women in our store and I guess wallpaper helps.

"Keeping continually after business," concludes Mr. Scott, "with just dealings, with an attractive and comfortable store, and plenty of stock, is the success of our business."

Cash System Being Generally Adopted

Hardware Merchants in Ontario and Western Canada Making a Success of Selling for Cash—Smart Customer Taught a Lesson by Ontario Hardwareman—Methods Used in Introducing the Cash System and Running a Store Without Books for Credit Business.

By G. B. VanBlaricom.

There is one ideal system in business and that is to buy and sell for cash.

How happy, how pleasant, how satisfactory things would be if every buyer paid spot cash. What a vast amount of expense would the merchant save—no book-keeping outlay, no collecting department, no bad debts, no book accounts whatever—in short, no losses. He would know exactly at all times just where he stood and what he could reasonably undertake—or in other words, how far he could launch out. How many disappointments, how much worry and anxiety, how much loss of time he would escape if every person paid as he went. It would enable the hardware merchant to take advantage of all cash discounts which means that he would be in a position to sell goods cheaper. His best patrons would thus save money as well as himself.

There is no gain-saying the fact that the fellow who pays cash is directly or indirectly handing over a certain amount for Mr. Slow Pay and Mr. No Pay. The purchaser on credit generally gets his goods at the same figure as the cash customer and, where that system prevails, some naturally inquire what use, advantage or benefit is it for the cash customers to hand over his good hard coin? What does he gain over the credit buyer? Apparently nothing, whereas he thinks that he might as well have had the use of his collateral several months. But this is another phase of the whole matter and the cash system is being dealt with more from the storekeeper's standpoint than that of the consumer.

Uncollectable Book Debts.

Mr. Hardwareman, you perhaps have done a credit business for years. Why do you not introduce the cash system? How many thousands of dollars have you on your books that is not collectable, the parties having moved away, disaster overtaken them or some other unforeseen cause intervening? Do you not wish you had that money gathered in? But it is useless to express such a desire, as you know it is next to impossible to get bank notes out of some men. Many who have the money won't pay, and others who would pay have not the wherewithal.

Two hardware dealers from different towns who gathered at the recent Retail Hardware Association convention at Hamilton, were holding an animated discussion on this point.

"My!" exclaimed one, "I have $9,000 book debts, and if I could get this money how many new lines of business I could go into. I would add a large stock of sporting goods and would lay in a quantity of metal roofing, buy in car lots I would also add about twenty feet to my store, as my premises are terribly crowded. I would reduce stock in certain slow-going lines to make room for the rapidly moving ones. If I had that cash * * * * * but there is that if—"

"That's it," replied his friend. "I am clear of all your worries. I do not grant credit at all and, as a result, I always have a little spare money in the bank to avail myself of "snaps" whenever I see a favorable opening."

There may, in certain localities, be special or sporadic reasons why the cash system should not prevail in the hardware trade, the same as there are exceptions to every rule, but generally speaking conditions are the same. It is with the general state of affairs and not upon isolated examples that the experiences, results and benefits of the cash system in this article will be based.

Credit System Defended.

Occasionally you hear a man defend the credit system and he talks along this line: "I lose very little if any money through the credit business—in fact, I prefer it to the cash if I know a man is good pay. I hold the trade of a man who buys on credit whereas with the casual cash customer—well! he is here one day and with some one else the next. You are never sure of his patronage and a cash customer frequently thinks that he should buy at his own price simply because he is paying out money then and there. The cash customer is generally a kicker, and is not willing in many instances to allow a retailer a fair living profit."

The observations may be true to a very limited extent but nine out of every ten merchants who are doing a cash business, will refute these statements as unworthy imputations cast upon honest, square dealing, careful buying farmers, contractors, tradesmen and citizens.

As pointed out, there may be local or individual reasons applicable in general why you cannot do a strictly cash trade, but with fully ninety per cent. of hardwaremen throughout Ontario, there is no real, valid or substantial reason why they cannot do a cash business—so far at any rate as general hardware is concerned. It may not be as feasible to inaugurate spot cash in the heating and tinsmithing departments where contracts are taken or the job is spread over some weeks, but generally the reasons which might here intervene have no direct application to regular hardware lines.

Where, then, is the fault? It is with the dealer himself. He is presumably afraid of losing life-long customers, fearful that the other fellow will spirit them away or else he lacks decision and backbone—cannot say no firmly and politely; in other words he is kinder to the public than to himself.

The hardest word in the English lexicon to pronounce, paradoxical though it may seem, is that little monosyllabic "NO."

Pay Cash for These.

Did you ever hear of a man who thought that he could get theatre tickets and pay for them just when he pleased? Do you ever ask the railway ticket agent to let you have a ticket on time and remark: "I will pay you as soon as I sell my wheat in the fall or receive my money from the cheese factory. Do you read of any individuals getting postage stamps, street car tickets, express parcels, meals at hotels, trips on boats, shaves or shoe shines without paying the price then and there for the privilege or service. Why then should persons, well able to settle for goods, get axes, shovels, rope, wire, paint, putty, glass, nails etc., on credit? No reason whatever if the dealer makes up his mind that he is not going to allow an ancient, timeworn, obselete system to go on any longer.

A frequent excuse given by dealers against changing from credit to cash is that farmers cannot pay every time

when getting goods. The fact is that they can pay better than any other class. Did any dealer ever know of farmers selling their grain, hay, horses, cattle, chickens or anything else on six months' time? And yet, if you permit it, farmers will ask you to sell them your goods (which represent cash, labor and raw material, just as much as their produce does) on credit, to be paid for when they feel like it. It is not a fair division of burden, and dealers who give creedit carry the heavy end.

An absurd practice quite common among country retailers is "carrying" the farmers from spring until fall, and when Mr. Farmer "pays up" make him a present. He has not done the retailers any favor, but rather the retailer should receive the tribute for carrying the account without interest for six months. A "good" collector will impress upon the customer in a nice way so as to cause no offense that the customer is the favored one and make him so appreciate it that he will continue trading there. If any one is to have presents it should be the cash customers. Some hardware retailers buy half a gross or more of good quality pocket knives for the farmers, to give out when they "pay up" in the fall thus paying a premium in the fall for carrying the account without interest, to show how the "carrying of the account" is appreciated, instead of the farmer showing his appreciation for having the account "carried" and for favors extended.

Credit business or cash business is but a matter of education. If a farmer has been taught he can buy goods on long time he will continue to ask for credit, even with money in bank or in his pocket. And this same man who has been educated to credit will not pay for his purchases until forced to do so. On the other hand, if a dealer has established a reputation for selling only for cash, no one asks him to extend credit. Men who want his goods always manage to have the necessary amount of cash, or are willing to give a bankable note when purchases are made. A credit-giving dealer is asked to sell goods as close as competing cash stores and mail-order houses. Customers who want credit in most cases demand cash prices.

Grocers Get the Short End.

James Chalmers, Palmerston, Ont., had all the hopes and fears, the doubts, dispairs and misgivings that any man ever had before he entered upon a strictly cash system. To-day he would not return to the former order of things for $1,000 in cold cash. A strange feature about it all is that a few weeks after he dispensed with credit and nailed "cash" to his mast, his competitor, who, at first, had declined to join in the move, followed suit.

Mr. Chalmers was one of the happiest men at the recent hardware gathering in Hamilton. "Why," he said, "do you know the grocers of Palmerston are berating me. They say, 'Chalmers, you are a corker.' A farmer will come in to buy groceries and tell the grocery man that he will have to charge the goods as he (the farmer) cannot pay. The grocer will look up in surprise and the yeoman will observe: 'Of course, I have a little money, but, as I have to get some hardware before I go home you will have to give the groceries to me on time. You know that hardware is cash.' And the poor grocery man sighs and wishes just then that he were the lucky hardwareman across the street."

Taught Customer a Lesson.

Not long after he began the strictly cash basis of business there were three or four customers seated around the stove talking one evening when a customer entered and asked for some rope. Mr. Chalmers cut off the desired quantity, wrapped it up, and laying it down on the counter, said to the man whom we will call Cook, "That will be a quarter, please."

"Oh, that's all right," jauntily rejoined Cook, "just chalk it down."

"Oh, no! Things are different now. I am doing a cash business," declared the dealer."

"Oh, well," observed Cook, "this little matter won't hurt your system."

"But you can't take that rope until you first hand over twenty-five cents. I treat all alike. Do you not see that sign up there? 'We do not give credit. Please do not ask for it.'"

"Oh, that's all right," quoth Cook again with a knowing look to those around the stove, "I have seen signs like that before."

"Well, I mean just what the sign says," continued Mr. Chalmers.

Cook threw down the rope, declaring, as he made his way to the door, that the hardware dealer was the meanest, tightest and smallest-minded man he had ever run across. He continued his tirade of abuse amid oaths and curses, Mr. Chalmers keeping his temper all the while. As he got near the street, in the midst of his denunciation, the attiude of the rope buyer seemed to change suddenly and he said with some pride, "I have no use for you and your cash system, Chalmers, when you will not trust a man with twenty-five cents worth of rope. D—— you anyway! I am not like a man who hasn't a quarter to call his own. I have money and don't you forget it." And with this remark he threw down the amount of the purchase on the counter.

Mr. Chalmers reached out for the coin and leisurely put it in the till. Taking the rope he threw it to one corner of the store behind the counter.

"Give me my rope," demanded Cook.

"I will give you your rope if you call around in four months' time," coolly asserted the retailer.

"I want it now," shouted Cook. "I have paid you your money. What more do you want. Do you want rope and money too, do you?"

"No, not just exactly," rejoined Mr. Chalmers, "but, as I told you to call around in four months and I will give you the rope, but not to-night!"

"I want it now—this minute," ejaculated Cook. "I can't wait four months for it. I have given you your money and what more do you want anyway?"

JAMES CHALMERS, PALMERSTON.

Whose Amusing Experience with a Customer Who Wanted to Buy on Credit is described on this page.

"I will do just exactly as I said," firmly continued the hardwareman. "Call around in four months and I will hand you the rope."

Cook gazed in astonishment and, evidently catching the meaning of what Chalmers was doing, exclaimed in a passion, "Chalmers, that is the meanest trick you have ever done in your life."

"I know it," calmly acknowledged the merchant. "But look here, Cook, that is the way you have been serving me for years and I have not uttered a word of protest. You would come into the store, get some little article, walk

out, and, in many cases, I have had to wait four months and longer for my pay. As long as you did it it was all right, so you thought, but now, that the shoe is on the other foot, you squeal and call me all sorts of names when I ask you to wait four months for your goods after you have paid for them, but I could wait that long and much longer, and of course it was all right. It seems to make an awful difference with you when our relations are reversed. No sir! the days of credit in this store are done and everything is cash from this out and you may as well understand it first as last."

Mr. Chalmers then walked to the back of the counter and got the rope from the spot where it had landed when he first declared Cook would have to wait four months for the article. He shoved it over the counter to the man who had created such a storm about paying twenty-five cents for it on the spot. Cook took the rope and, hanging his head with shame over the fuss he had made and the bitter language he had used, he made for the door, speaking not a word. He probably had a vivid object leesson on how he had been treating the hardware dealer all these years.

Over $7,000 on Books.

Speaking of how he introduced the change from credit to cash, Mr. Chalmers said: "I was losing money heavily and I came to the conclusion that I would have to do something or get out of business. It was not that I was not seelling enough goods, but I was not getting in the money for them. I sat down one night and thought the whole thing over and, with many apprehenesions, decided that I would start the cash system of doing business. I had over $7,000 on my books. I simply was up against it and had to get money. I had read several articles in Hardware and Metal on the cash system and went up to Kincardine to consult a hardwareman there as to how he had introduced the change from credit to cash and how it worked out. I got many pointers and came back to Palmerston fully determined to begin. That was a year ago last December. I made up my mind to keep a stiff backbone and inserted advertisements in the papers to the effect that I would begin the cash system in two weeks' time. I also told my customers of my intention. Some thought it would be a good thing, others smiled indulgently and a few doubted if I was really in earnest. On the last day previous to the introduction of the cash system I did about $440 worth of business, over $400 of which was credit and the remainder—$40—cash."

"The next morning I went to the shop with some doubts about the wisdom of the move I had made but fully determined that, having put my hand to the plow there would with me be no turning back. I was resolved to go ahead at any cost, knowing that circumstances could not be much worse. I naturally expected a falling off in the volume of trade—how much I did not know. I only knew that I was on the cash line and there I was determined to stick. Well, after the first week or two I opened my eyes when I found there was practically no difference in the amount of goods I had sold and I came to the conclusion that most of our difficulties are a deal worse a distance off than when we approach them. I steadily refused to extend credit to any one and treated all alike, no matter whether rich or poor, good pay or slow, it was all the same to me. A strange fact occurred here that my opponent, who had refused to join me in the move, also inaugurated the cash system about a month after I did. Where we were scarcely on speaking terms, now we are the warmest of friends and are both in attendance at the convention. And the cash system evidently brought this about for we realized that our interests in this respect were mutual," continued Mr. Chalmers. "I have now had the cash system exclusively in operation in my store for about fourteen or fifteen months and I tell you honestly that I would not go back to the old order of things again, not if a man was to offer me one thousand dollars in cash at this present moment."

"At first, in order to induce the people to pay cash, I gave a five per cent. discount on all goods. This reduction got things going nicely and then all was smooth sailing except in a very few instances. Since I began the cash system I have been able to take advantage of all discounts given the trade—a thing that I was never able to do before and I am selling goods below what I did in the old days of credit because I can afford to give my customers the benefit. At the same time, I am making more money for myself. I tell you honestly, I am a happy man now. I have money in the bank to meet all demands, and the life is not worried out of me thinking of where the cash is to come from to meet my bills. I have been able to take a large sum out of the bank for personal expenses besides—a thing I could never do when selling on credit. I paid out $890 the other week in one cheque for binder twine, whereas I formerly had to settle as best I could, because the farmers owed me for the twine. Things are different under the cash system."

"With eavetroughing and other contract work," went on Mr. Chalmers, "my customers know that this means cash just the same as goods in the store. I know before hand about how many feet of eavetrough will be required for the job, and I give the foreman a card on which this is stipulated. When he is through he fills out the time taken for the work and material. The man getting the job done settles with the foreman, then and there, and receives a receipted bill, or, if he is not at home, the statement is left, with the distinct understanding that he will pay it the first time he is in town. He invariably does so as the farmers know that when I say cash I mean cash—and not time, and I had no difficulty in collecting my money as soon as outside work was done. If it is builders' hardware, and it is not known exactly how much will be required, I have the buyer sign a contract to pay me on a certain date for all goods got up to that time. This I present and get the cash for on the day specified. With carpenters I make them sign a note which I can deposit in the bank at the end of each month. Large contractors sign a contract to pay me on completion of a house or barn; or, else we set a time when they are to give me money for all the goods got up to that time. This agreement is in writing—no promises. Sometimes I take a note—it all depends on what the contractor prefers—and this I hold and am able to realize on at the bank. I keep no books whatever, and since doing a cash business I have been able to do without a girl in the office and am saving several dollars a week in wages. I might give you many more facts and advantages of the cash system, but I have already talked too long," declared Mr. Chalmers. "I want to add that I would sooner go out of business than revert to the old order of things."

Other Ontario Experiences.

D. Brocklebank, Arthur, started the cash business on the first of April last. He got out a booklet announcing the fact to all his customers and also inserted announcements in the newspapers, making the fact known as widely as possible. Many old accounts on the books have since been collected. The inauguration of the cash method did not come as hard as he had expected, merely requiring a little stiffness and firmness at the start. "But we have got our business to-day where we give no credit in hardware. In plumbing and eavetroughing, Mr. Brocklebank does not take a man's order unless he is prepared to pay cash when the job is completed. "Our business during the first month that we adopted the cash basis," continued Mr. Brocklebank, "showed a falling off of about five per cent., but

in November, December and January last it showed an increase. I would not go back to credit. It is much easier doing business on the cash basis and more satisfactory, especially after the first six months."

A. R. Dundas, of Cobourg, is a firm believer in the credit business as the dealer gets greater profit. A merchan had to be careful to whom he gave credit and watchful in the collection of his accounts. "I would like to know," he continued, "how you are going to do a strictly cash business in the heating and stove line. You send your men to put up a stove and the party who gives you the order, is not at home when the job is finished. How are you going to get spot cash in that case? I have been in business for eighteen years and I do not think in all that time I have lost $500 in bad accounts and I know that I have made more by the credit system than I would have under the cash. I have made a bigger margin on goods sold on credit than on those sold for cash. As I said, you must be careful to whom you give credit and be watchful of your books and accounts."

Lost the Builders Trade.

Fred. G. McBrien, Toronto, read the articles in Hardware and Metal of March 21, 1908, advocating the cash system, and, having $15,000 on his books and a dull year in prospect, he decided to make the plunge without delay. In April he notified all his customers that in future no goods left the store unless paid for. It was hard, he says, to close down on the builders who owed him money, but he decided that he must treat all alike. Mr. McBrien's business was largely in builders' hardware and supplies, as is instanced by the fact that he placed an order for $1,700 worth of nails in June, 1907. How did the change from credit to cash affect this trade? It sent it elsewhere as in 1908 his nail business was not much more than one-tenth the volume done in 1907.

"I dropped the builders' trade and commenced to push specialties and housefurnishings," said Mr. McBrien, "and I found I could make three or four times the profit in addition to getting cash for my goods. Then I devoted my attention to making collections and kept buzzing about the men who owed me as a bee hovers around a clover field. I took some vacant lots from one builder and I got others to build some cottages for me. I got another to paint my home. Another gave me some diamond rings and one paid my life insurance for three years on a house deal he had with an insurance agent. I did everything I could to clean up my books and now have only $2,300 left uncollected. And during the year I only had one 40-cent brush go out without the cash. I used to keep a girl to attend to the books and I've saved this expense during the past year.

"Then I have never lost a cash discount since I started selling for cash only last April and now I am planning to enlarge the store and add good lines of cutlery, sporting goods, enamelware, refrigerators, washing machines, and a complete stock of screens. I had no money to build additions when I was selling builders' hardware on credit.

"My store will be 140 feet deep and as mixed paint is my best selling line, I will put my paint department near the back so that customers will have to pass the other counters before getting what they want. In this part of the city most of the people are mechanics who are

FRED G. McBRIEN, TORONTO,

A Youthful Merchant Who Has Successfully Adopted the Cash System.

building their own homes and they do their own painting."

Mr. McBrien is an enterprising young man 22 years of age, he starting in business when he was 17. In addition to his retail business he takes an active interest in politics and has twice come within a few votes of election to the City Council. Now he is planning to launch out as a manufacturer and is erecting a factory 60x100 with two storeys, which he will equip with machinery to make wire nails and probably tacks. The factory is located on a site adjoining the C.P.R. tracks and will commence operations during the coming summer.

Some Strong Cash Arguments.

A. C. Gourlie, Wetaskiwin, Alberta, who in April last decided to give up the credit business and go in for cash alone, got his idea from reading Hardware and Metal. Previous to adopting the new system, Mr. Gourlie sent out the following circular to every one of his regular and probable customers:

> Dear Sir,—On and after May first next we are going to change our system of business by doing away with all credit and installing a strictly cash system.
>
> After years of experience by merchants who are doing only the cash business they find that the customers are better satisfied, for a few of the following reasons:
>
> 1st. If the merchant gets cash for his goods, he can pay cash for same and save the cash discount. Therefore he can give the customers the benefit of the discount.
>
> 2nd. The cash system will enable you to buy your merchandise much cheaper in our store than you can from the catalogue houses in the large cities.
>
> 3rd. The customer has the advantage of selecting his goods right at home thus saving errors which often occur when buying by mail.
>
> 4th. Under the credit system the Good-Pay-Man has to make up for the losses of the Poor-Pay-Man and also for the man who does not pay at all. Therefore under the cash system every man is on the same basis.
>
> 5th. There are many other advantages to the customer and merchant. The difference between our cash and credit prices will range all the way from five to fifteen per cent.
>
> We are going to mark our stock down to the lowest possible cash price.
>
> By this cash system we can cut down expenses, do a safer business, and therefore save the public money by trading in our store.

Many Inquiries Received.

Hardware and Metal has received numerous inquiries, particularly from the West, as to how to go about starting a cash system, what methods to employ, etc. These queries have been pretty well answered in the foregoing interviews. As to whether a man can do a strictly cash business in Alberta one dealer writes: "I would like your advice and opinion on this question. Can a strictly cash hardware business be carried on in this Province successfully? This is a new settled country and has not some of the advantages of an older one as farmers are not as a rule so well to do."

The best answer that can be given is that each man will largely have to determine matters in his own individual case and size up the situation carefully. Once having begun a new order of things the inaugurator should never

turn back. A good safe rule to follow is: "Be sure you are right and then go ahead."

How System Works at Goderich.

M. W. Howell, Goderich, is strongly favorable to the cash system. He says: "The cash system was started by my predecessor, but from my observation it was was not lived up to very closely. I find now that while we do not do a strictly cash business that the long credit system is very much a thing of the past. Some of our accounts have stayed on our books for more than the current month for simply lack of time to give towards collection.

"Things are a great deal better than they used to be. I do not think it wise to make a hard and fast rule that no goods shall go out unless the cash is paid down. When a customer asks us for credit, we look him over and usually we know something about him. Our question to him is what amount do you want and then we want to know when he can pay. We let him say his time. If it is too long we cut it down to what we can do. Then we note this on the account, and if not paid promptly we follow our customer up. We get a note as often as possible and make a difference in price for extra time, and cover discount on same. I strongly advise showing as often as possible the advantage to the customer of paying cash."

Other Experiences.

H. J. Morden & Co., Colborne, Ont., give to every customer a ticket on each dollar's purchase. This ticket is worth five cents in trade at their store. They would not think of reverting to the old system. At the time of starting this method nearly two years ago, they also offered five per cent. discount to every person who called and settled his account before June 1, 1907.

A. E. Code, Morden, Manitoba, began the cash business in March, 1907. He rendered every account on his books to show that he meant business. At first the situation was rather odd. "We held our old customers pretty well, but some took offence," says Mr. Code. "There is nothing in the credit system except emptying your shelves and waiting entries upon your books. Under the cash system all are treated alike. Refusing to sell a man under the credit system is the same as telling him he is dishonest and incapable of paying and practically an insult. When you have the cash basis the man recognizes that he is up against a system. It is less awkward to refuse under cash than credit, and you must draw the line somewhere. Many dodges are resorted to to get credit but you will soon get on to them all."

H. T. Kirk, New Westminster, B.C., writes that there are wide disparities of fortune among the buying public and that makes it hard for the merchant to carry out his credit system thoroughly. How often a small buyer will purchase on credit, then when the bill is presented will find fault and go elsewhere. We make no exception in the matter at all. We refuse credit to all alike."

Could Get Along Without Credit.

Two years ago Theodore Miles, hardware dealer, Kamsack, Sask., adopted the cash system and has had many customers tell him that they are glad he started for they have been able to get along nicely without credit."

"I insist on getting cash from every customer," he writes, "and I can see no reason for making any exceptions. I would not make an exception for a man who is unable to pay and I see no reason for making an exception for the man who has the money. The better the customer the more reason why he should pay at once. I adopted the cash system on my own initiative and had no agreement or understanding with my competitors."

Some General Conclusions.

Thus Hardware and Metal might go quoting from the experience and insight of hardware and other merchants in various parts of the country. With scarcely an exception, those who have struck out boldly and embarked on the cash route, have never expressed a desire to return; neither have they suffered from loss of business. On the contrary, many bear evidence with respect to the increase in trade. It requires strict impartiality, ability to adhere to a decision and a little vertebra, but after the first few weeks it is plain sailing, though often the worst storm is encountered shortly after leaving port.

Every move in business is slowly but surely confirming the soundness, sanity and superiority of the cash system. For much of the educational work the mail order houses are responsible. They have educated the farmers to pay cash, and in order to prevent their business slipping away, the retail hardware hustler has found that he too had to modernize his system, pay cash and get cash for his goods, take advantage of every cash discount and sell at a reasonable price, turning his goods over quickly and keeping his stock within reasonable bounds.

This is the up-to-date system and the business man, in a progressive centre, has to be up and doing if he wishes to survive. If as much attention was devoted to buying, window dressing and advertising as is directed in looking after the books and collection of accounts under the credit system, what a change would result and how much more beneficial the effect. Advantage after advantage might be enumerated in favor of the cash method, but all these have been fairly well viewed in the foregoing references.

All Depends Upon Firmness.

In inaugurating a change from cash to credit some hardware merchants have endeavored to get their competitors to enter into an agreement of mutual interest, but whether he is acting with others or himself the merchant must have backbone. The way to begin a cash business is to announce in the press and by printed letter to all customers that on and after such a date all sales will be for cash only. It is also advisable to have placards to this effect conspicuously displayed in the store. In making the proclamation the rigid nature of the rule should be emphasized—at least no loop holes of doubt should be left. Stress should be laid upon the fact that by buying and selling for cash, no bad debts will be incurred and patrons will be given better value for their money. All sorts of dodges will be resorted to at first by wily customers to obtain credit, but the hardware merchant has only to stand firm in every case and these difficulties will soon pass away and undesirable or unprofitable customers be weeded out.

Each year witnesses more and more retailers adopting the cash system. They will all come to it in time. The credit system is antiquated, effete, obselete, unsatisfactory in character and unprofitable in results, is, generally speaking, as the stage coach is alongside the swift-moving express train; or the slow ascension of stairs by climbing when a rapid elevator is ready to lift you to the highest flights. The cash system is the elevator which to-day is boosting the standard and tone of business and placing it on a plane where there is discernable that port to which all business men are sailing—the port named—"SUCCESS."

It is a good plan to always have some reading cards presenting the good qualities of the goods displayed or of the policy of the store in each change of window.

If possible show the actual merits of the goods you sell. For instance, take an old kitchen or butcher knife that has been ground down to a thin back, give its approximate age, when bought of you, etc. Lay it beside a new knife of the same size and make. Call attention to the price and quality. Such simply displays make the most effective selling arguments for your goods.

The Value of Newspaper Publicity

Special Sales Advocated to Develop Interest in New Stores—Experiences of One Man Who Made Good—Should Change Ads Regularly and Not Be Afraid to Quote Prices.

By W. F. Ralph.

The gist of a great many retail hardware advertisements appearing in Canadian newspapers might be summed up like this:

> "Brown & Smith. We carry a complete line of hardware, stoves, etc."

Now, the question is, does it pay to spend money in giving such a piece of commonplace information to the public? That much is generally taken for granted. People expect that a man in the hardware and stove business will carry a full line of hardware and stoves—what's he in business for?

The statement of such an obvious fact has little in it of suggestion—which is the vital spot of good advertising. It may, indeed, have enough of suggestion in it to remind a man who knows he needs a saw that he does need a saw. But to the man who has not got a saw, and has to borrow one from a neighbor whenever he wants to cut a board, it conveys no suggestion that it's up to him to buy a saw.

General statements in a retail advertisement have little selling value. The thing that pulls business—that never fails to pull—is a distinct offering or suggestion of real value.

Offer a bargain, and watch the people respond! In a general way, the cutting of prices to any large extent is an evil thing. All the same, an occasional cut on one or two lines as the basis of an advertisement, with other lines going at the usual prices, will give surprisingly good results. People come for the bargain; some of them go away with it and nothing else; but many buy the bargain article and a number of other things as well.

Special Bargain Sales.

As you well know, large city stores have a regular bargain day each week which people have been educated by advertising to expect as regularly every week as the arrival of Sunday or any other day. And these bargain days are the real thing, the special prices advertised are really special for that day only. Otherwise the people would find it out, because "you can't fool all the people all the time."

Special bargain sales are quite as feasible and possible to the hardware merchant in the small town as they are to the big departmental store of the city.

A writer who has made a distinct success of the hardware business in a town of eight thousand people, against the competition of several stores which had been established there years before his arrival on the scene, gives some of his experiences in the conduct of special sales. He asserts that his success was accomplished by doing things differently. Without in the least "knocking" his competitors, and without introducing general "cut-price" methods, he succeeded in out-distancing his competitors a long way in the race of business.

Must Not Misrepresent.

His policy was, "Money back if not satisfied," and he lived up to it; but he took care never to misrepresent his stock. He was truthful and his advertising was full of concrete facts. He opened his store with a special sale of granite coffee pots, bought specially at auction for the occasion, upon which his net loss was six cents per pot. But the sales along regular lines, at regular profits, more than made up his loss. He advertised that he would give away ten dollars' worth of goods to the person whose name appeared on a card to be drawn on the morning of opening, printing a coupon blank in his ad, which was to be filled in and mailed to him by those desiring to enter. The first card drawn in the morning got the ten dollars' worth of goods. His special coffee pot sale filled the store and the sidewalk outside with women, and every one of the 200 coffee pots was disposed of.

From time to time after his successful opening he advertised special bargains and in every case his efforts were crowned with success. Apropos of special sales he says:

A properly-timed, well-advertised, real, live, special sale, will in most cases accomplish a two-fold purpose. First, it brings the store prominently before the people; second, it gives your store an added prestige and leaves the stock and room fresh for the new stock that is constantly appearing. But to successfully operate a special sale, it must be borne in mind that the sale must be special in the fullest sense and meaning of the word. The hardware dealer must preserve his reputation on those special sale occasions as well as in the regular course of business. Therefore, if you expect to operate a special every now and then, you should educate your trade to look upon them as real, live "special sales."

Another very necessary thing in successfully operating special sales is that of display. In making your store ready to impress properly those who respond to your advertising and accept your invitation, do not overlook the importance of your store and show window arrangements. The modern way of retailing hardware is to ask people if they want to buy—not only by means of spoken, printed and written words, but primarily by a tasteful display of your goods. The ideal hardware store arrangement is the one that comes as near as possible to showing all one has for sale; that not only shows all the goods, but that shows the goods so arranged and displayed as to suggest new wants and needs to all who enter your store.

And so it is also with your advertising. Correct special sale advertising must go further than mere price and description. Most people only wake up to the fact they want a thing when they actually want it. Special sale advertising of the right kind must have what psychologists call the "direct command"—go-and-buy-it-NOW arguments. It should not only describe the tools, but put them in the readers' hands and get them started and show him how well they work.

Special sale advertising that appeals only to immediate needs and desires is just skimming the cream of the demand—selling only to people who are right up against their needs and not able to get along a day more without the article. The present attitude of the average man and woman is one of economy—of getting along with as few things as possible.

Bought for Special Sale.

Therefore, your special sale advertising must not only describe, but also ask the reader if he intends to borrow tools all his life, or to do without tools when he can buy a complete assortment for the price of a saw alone.

On account of the quantity of tools, it was a condition of my order that the tools would be packed, each assortment

in a separate pasteboard box, with an appropriate label on each box, and in addition I was to receive the loan of 100 empty boxes for display purposes, and during the special sale day one show window was entirely given up to displaying these tool assortments.

This window was arranged as follows: For the sides and background I built a wall of the empty boxes two feet high. For the centre piece I erected two pillars made out of the empty boxes. This was done by placing one empty box on top of another to the height of three feet. These pillars or columns were then placed at angles to each other in the following shape Λ; on top of one of the columns was grouped a row of hammers, and on the other a line of rules.

In the bottom centre space of the angle I placed a pile of the carpenter's pencils.

In front of the column I then grouped a row of the awl and tool sets, alternating with the handles and tools, the latter grouped in a semi-circle.

At the front end of each column, facing the sidewalk, I hung a saw. In the top centre space, between the two columns, I placed a card sign with the following in large, distinct lettering:

DON'T BORROW THESE TOOLS AGAIN!

5 Tools for the price of a Saw alone.

1 Good Saw . . .	All for
1 Good Hammer . .	
1 Boxwood Rule . .	$1.50
1 Awl and Tool Set	
1 Carpenter's Pencil	

On sale Saturday only as long as they last.

In presenting this tool assortment to my customers my method was something like this. When a customer came in I would pick up the saw and while showing it up I would say to him, "Now, the regular price of this saw is $1.50; but to-day I am offering the complete tool assortment for the price of the saw alone." Continuing, I would proceed to give him a talk on the convenience of having the tools nicely packed in a neat box, so they would always be handy when wanted.

Sold Thirty Dozen Tool Sets.

The sale took instantly and about 4 o'clock I was entirely sold out, but continued to take orders until 10 o'clock that Saturday night, each customer being required to leave a deposit of 50 cents.

I sold, all told, 30 dozen sets or 360 tool assortments. They cost me $12.96 per dozen and yielded me a net profit of about 40 cents per set. All in all, this was one of the most successful sales I ever conducted, from a profit standpoint.

I think one trouble with the average retail hardware man is that he is somewhat timid about talking enthusiastically about his goods. He seems to think it will get him into trouble. There is no way that I know of for a new man to secure confidence quickly as to make the statement that if the article is not entirely satisfactory and exactly as represented, it may be returned and the money refunded. I would strongly urge every retail hardware man to adopt this policy. It may be some consolation to you to remember that experience shows that the more quickly and cheerfully the money is refunded in the first few instances, the sooner the requests for refunds become few and far between.

A good special sale is a powerful "Sales Mogul," but not a "Cure All." It will not cure poor management, neither will it stop poor buying wastes, and except in special cases, it will not indefinitely continue to sell inferior goods. But if rightly advertised, it will spread the merits of your proposition; it will bring your store to eyes no matter how distant, and in that way make your goods accessible to your trade and multiply your business; in a nut shell, it will help to bring you and your trade together.

Never Repeat Ads.

The most successful merchants are those who make every day something of a special. They never let the same ad appear twice running. They never let an ad go to press without making some definite suggestion, or without stating prices on the lines offered. Take the Mathewson ad here reproduced. Think how lifeless it would appear if the priced items were omitted. It would

Reduced From Two-column Size.

contain little of suggestion. This is a good ad, generous in size, well written and well set up.

Probably the reason so many badly written and badly composed ads appear is because the advertiser does not attach sufficient importance to their preparation, and leaves it off until the publisher makes the last call for copy and the ad is thus hastily written and no time is left for the submission of a proof from the compositor.

The mere writing of an ad should consume very little of a merchant's time if it is written with the mind made up about what to advertise. Careful consideration should be given to a proper selection of the lines to be offered. Once this important item is attended to the subsequent writing of the copy for, say, a ten-inch, double-column ad, will not consume more than half an hour of an intelligent person's time.

Advertise as You Talk.

After you have made your selection of offerings take a piece of wrapping paper and a pencil and imagine you have a customer in front of you, and write down your remarks. Deal with one article at a time. Supposing the articles you are going to advertise consist of food choppers, graniteware and washboards. Start telling the features of the food choppers to your imaginary customer, something like this: "These choppers are very simply made, consequently easy to take apart and clean. The knives are self-sharpening, and there are four sizes of knives with each chopper. A very handy thing for the kitchen, is a food chopper, saving waste by making dainty dishes possible out of scraps of food that you might otherwise throw away. And the price—just $1.10 each."

Follow the same tactics with the graniteware and the washboard. When you have completed this, read it over carefully and see if you can make yourself more intelligible by altering, inserting or omitting a word or two here and there. Then compose a suitable headline or opening sentence, or both, such as: "Interesting to Housekeepers. Here is an opportunity to secure some excellent values in kitchen and laundry utensils. Read the list and note the prices; and, remember, we guarantee the goods to be satisfactory in every way or we will cheerfully refund your money."

Underline the words you desire to appear displayed—generally speaking, the headline, the names of the articles and the prices will be quite sufficient display.

Then send your copy over to the newspaper office and ask for a proof. When the proof comes, examine it for errors and see that it is neat and attractive in appearance and properly displayed. If there are any errors note them on the margin and return the copy with a request for another proof. When the proof returns with the errors corrected mark it "O.K." and send it back to the publisher.

Attend to these little details in plenty of time and you will find that very little time is consumed in doing it and your advertising will certainly bring results.

Scott, The Master Merchant

Proprietor of General Store in Wisconsin, Provides Rest Rooms for Men and Women and Stables for the Farmers' Horses—Believes in Service And Advertising.

By Thos. Dreier.

George E. Scott, of Prairie Farm, in Northern Wisconsin, six miles from a railroad, has built a store the like of which can be seen nowhere else. Thirty thousand dollars was its cost, and it was built in the centre of a three-acre plot of ground upon which many hundreds of dollars were spent in landscape gardening. The store itself resembles a California mission, and one looking at it would take it to be a library or some college building. Yet it is "just a country store"—a place where men and women and children are sold the necessities, and a few of the luxuries, of life.

Scott preaches his business gospel from this text: "Quality of Goods and Excellence of Service." To him the mail order bugaboo does not exist. He gives satisfaction. And, you know, the merchant who wraps every article in satisfaction most certainly makes of each customer a link in an endless chain for the bringing of more customers.

In the Scott store special rooms are provided for customers, in which the women may lie down and rest after their long drive across the prairie, and where the men may gather and talk as men somtimes like to talk. In the women's room is found hot and cold water, towels, books and magazines, couches, easy-chairs—everything that is needed for the comfort of those hard-working women of the farms. The store itself is airy and light and clean. No posters desecrate its walls. Its floors are always clean. Behind the store is a barn in which the teams of all customers are sheltered free of cost. Around the store are no posts to which unthinking farmers may tie their beasts in the winter cold.

Guide to Customers.

And the result of all this is that Scott gets the trade and is making money. He finds it pays big dividends in dollars and cents, not to mention the satisfaction which comes to a man who is engaged in doing certain work better than it was ever done before. Scott has been sent to the Legislature year after year without a single vote registered in opposition. What a record for a successful business man! To his customers he is a guide, philosopher and friend. To him they tell their troubles, and from him they get help.

Let merchants everywhere learn the lesson that Scott teaches so successfully. Let them all learn that the only reason mail order houses succeed is because there is a need for them. If country merchants can serve their customers better than mail order houses can serve them, and if they advertise so that the home folks may know of this service, the mail order houses will be forced to quit. Let us not fear to look this matter squarely in the face. The mail order houses have not all the good on their side. Neither have the smaller merchants. Both can improve.

The question before us then is: Will the merchants improve enough to overcome the lead which the mail order houses have undeniably secured? Scott did. He won and is winning. "Service"—in this sign he is conquering.

STORE PAPERS.

Many retail merchants find it of advantage to issue store papers in which they advertise their stores and business more extensively than is possible in a local newspaper. It is best to devote part of the paper to interesting reading matter of a general nature and to fill up the rest of the available space with advertising, store notes, etc. Stories, poems, anecdotes and other interesting matter may be obtained either in plates ready for the printer, or the paper may be ordered partly printed with this matter and partly blank for the advertising matter.

In many cases it is advisable to publish in every issue items about people, and other local happenings. Anything which will cause the people to read the paper carefully and afterward preserve it for future reading makes excellent material for the general interest pages.

The advertising portion may be partly in display and partly in the form of reading matter describing goods for sale and above all quoting prices on them.

As in every other kind of advertising the value of a store paper cannot be judged from a single issue, and no merchant should begin the issue of such a periodical unless he is able to continue it for a sufficient period to test its value.

It's easier to make a bluff than it is to get other people to stand for it.

Most men are cheerful givers when they have a chance to hand out advice.

Every time the average man makes a fool of himself he proceeds to advertise the fact.

The man who does nothing puts it all over the rest of us in one respect. He never makes a mistake of any consequence.

Hardwaremen Live Window Trimmers

Enterprise Shown by Hardware Clerks Throughout Canada in Arranging Novel and Attractive Displays—Western Canada Hardwaremen Particularly Active in This Form of Store Publicity—Illustrations From Digby, N.S., Bracebridge and Acton, Ont., Regina, Medicine Hat, Macleod, Revelstoke and Vancouver.

Systematic Display in Vancouver Store

Displays Changed Weekly With a Special Window of Tools Every Saturday Afternoon—Monthly Feature of Builders' Hardware — Sporting Goods and Other Seasonable Displays.

By R. B. Bennett.

That window displays are a necessary adjunct to keeping store and are direct business getters is now recognized in all lines of trade. They are on a par with newspaper advertising if conducted on the same principle. What people want to know is the price of a certain article at a certain time. If it meets their present demand, and the price is satisfactory a sale results. There are few people who have not some "want" on hand, and if they see the opportunity they buy. Whether the opportunity is displayed in a newspaper or in a window makes little difference. The window has the advantage in that more space is offered in which the article may be shown, instead of an illustration, and with the price tag affixed a prospective buyer may at once see if it suits. Even in the hardware business there is abundant room for display, and the success which has attended systematic display by J. A. Flett, Limited, Vancouver, shows what can be accomplished.

The windows of this company are not particularly large, being ten feet wide by five deep, but the displays are arranged with particular care, are attractive, and every article is priced. They are just the same as posters. They may not reach as many people as a newspaper, but the cost is at the minimum and being on one of the principal streets thousands view the display in a week.

Display windows on the coast, following perhaps the styles in vogue in Eastern cities, are arranged with the door in the centre, on a line with the rear of the windows. This gives good light and view space for either side. Another innovation is now being made by those who have large fronts, and which is possible only in such cases. This is to have narrow show windows on either side, while in the middle is a rectangular space, glass enclosed, with a traveling space all around. This furnishes a view from all sides and is especially desired by the purchaser. Doors are on either side, so that the display is forced on the view.

As this style requires considerable room, it is not permissible in the hardware store of J. A. Flett, Limited. Still, very good utilization is made of what space there is. With two windows, ten by five, one on either side of the door aisle, one is reserved for displays of sporting goods. For instance, in one week during the latter end of February was an exhibition of old army rifles. These attracted a great deal of attention, being ranged vertically at the rear and horizontally on the bottom, with a cluster around some ammunition. The price, $6, was prominently displayed. A man interested could see at once the main points of the rifle, and if the price suited, he could have the weapon explained inside the store. The sporting displays are, of course, made in season, and when the matter is uppermost in a man's mind he is struck by the crystallization of his

Sporting Goods Display Arranged by Roy C. Gilmour for J .A. Flett, Vancouver

thought in the window. Naturally, he turns and inspects. C. L. Birtch, who has charge of this department, belongs to several athletic clubs, which is an additional business bringer.

The development of ideas has not as much opportunity in the sporting window as in the other, where the hardware displays are made. One good idea is to have on every Saturday afternoon a display of tools. On the Saturday afternoon half holiday and in the evening, when workingmen are on the street, this display greets the eye. One time, it will be carpenter's tools, another mechanic's, and perhaps a general line, but the article is there, and the price, too, and the workingman is always looking for the next Saturday. This special event has been as good a winner as anything, and reaches right toward the man who wants something and who does not want to spend all his time going from store to store enquiring about prices and comparing qualities. It is doubtful if anything is more satisfactory, either in newspaper, poster or window advertising, than the showing of prices on the article.

Once a month a display of builder's hardware is made, so that the latest importations of the various articles used in this line about a house or office can be seen, not only by the builder and architect but by the man who may be building or about to build. He is able to casually note any improved devices, which he might never think of unless he saw them. With the price attached, he realizes that the best and most convenient costs no more than the old style. Such displays gives a merchant a reputation for modernity, and if a man wants a particular thing, he may say to himself, "Well, I saw such a thing at so-and-so's, very likely he will have this, or at least know about it."

What might be called "an animated window" has been tried with success. This was in the instance of the Gillette safety razor. This was the automatic working figures of two men, showing the old style of shaving and the new style. That this kind of display is good was evidenced by the crowds that blocked the sidewalk, especially on the Saturday evening. Another such window is in prospect, to be made by the manufacturers of the "red devil" bit. It is claimed for this piece of hardware that it will bore through anything. If a nail is in the way it bores through as if no iron were in its path, and if necessary a hole may be made through brick. If one read of this in a paper, the remark would be, "Oh, that's all very well, but I would like to see it." When he sees he will believe, and accordingly this display, which will be on hand in a week or two, is being anticipated with a good deal of interest. The success of these displays, which might more properly be called demonstrations, leaves little doubt as to results, which are direct and material.

Flett & Co. have a special window dresser in the person of Roy C. Gilmour, who a year ago won second prize in Hardware and Metal's holiday window competition for a store at Almonte, Ont., and last Christmas duplicated his former success by winning second prize with one of Flett's holiday displays. They change their displays every week in the hardware window, apart from the regualr Saturday afternoon display of tools and, if possible, a specialty is made of one line. The displays are supplemented by newspaper advertising at the same time, so that if one's interest is aroused by the paper talk, the article may be viewed from the street. This leaves nothing to be desired, and is a complete way of reaching a customer. Although one may have displayed the suggestion, "Welcome to inspect without buying," few shoppers care about taking up a clerk's time without an intention of buying something. With things in the window, they can be seen, and while one may not intend purchasing just at that time, the fact that it meets the requirements of something that is wanted may win one over.

Qualities Required by Window Trimmers

Some Valuable Suggestions for Hardware Clerks Who Desire to Develop Their Abilities in Arranging Displays That Will Attract Attention and Sell Goods.

By John E. Hardy.

Speaking from a psychological point of view the successful window trimmer of to-day should be endowed with the following faculties, well developed, viz.: Imagination, inspiration, originality, color, balance, constructiveness, individuality and patience.

Imagination enables him to picture in his mind the work he wishes to do, without putting his thoughts on paper. Some trimmers recommend that a plan of the display be developed before placing the exhibit in the window. With imagination well organized it is unnecessary for him to do this, but instead he will picture in his mind's eye the general plan of his exhibit, and this is sufficient for the start.

Inspiration enables him, after that start has been made, to place the various articles to be used in the exhibit where they will show to the best possible advantage. All this comes to the trimmer, as he builds up his display just as new ideas come to the mind of the artist as he paints his picture.

Through originality the trimmer makes a display that is distinctive in design and style and that does not show the earmarks of imitation.

Patience, and lots of it, enables the trimmer to carry to a successful conclusion many a tedious piece of work, that he would otherwise leave out of the display. Patience without doubt is one of the greatest assets a trimmer can possess.

Balance concerns the placing of articles used in a display so that the exhibit will not appear to be one sided, or top heavy at any particular point. A well balanced display is absolutely necessary at all times. A proper interpretation might be, "A place for everything and everything in its place."

The day is not far distant when the hardware window trimmer, as he is now termed, must be something more than a mere trimmer. He must add the qualifications of a decorator. A color scheme of draping the bare walls of a window with either cloth or paper will tend to bring out the beauty of an exhibit and make it more attractive to the general public, than the old style of trimming. Harmony in color is another valuable asset to possess.

Importance of Background.

Show windows that have a solid background have a decided advantage over any other style of window, for without question the background of a hardware window is the foundation on which is built the successful and up to date window display. Fully two-thirds of the time occupied in putting in an up to date display should be spent on background work, so it may be attractive and magnetic enough to stop the passerby and make him feel that he wishes to gain by closer inspection what he cannot obtain by a casual glance. Painstaking care must be exercised in placing articles in the background exhibit, for any discrepancies are more noticeable here than in any other part of the display. "What's worth doing at all, is worth doing well," applies particularly so in this instance.

Do not try to see how many articles you can crowd in a display, but instead place everything so that it may be thoroughly inspected by the beholder.

Lighting is another matter of importance. An over-lighted window is as bad as a window without sufficient light. Use frosted globes where a quantity of electric lights are to be used; and where they meet the eye directly, see that they are of low candle power. There are other artifices used to tone down a window display, and to give it that soft or mellow appearance which adds greatly to its general attractiveness.

It should be the earnest endeavor of every window trimmer or decorator to increase the advertising value of his displays by making them of a superior quality. The possibilities along these lines are limitless. It is possible that he may be handicapped on account of expense, but the earliest moment that he can show his employer that he is getting value received, so much sooner will the handicap be removed. It is exceedingly hard at times to judge whether any particular display is paying its way or not. This may be gauged somewhat by the increased sales throughout the year, but even this is hardly a fair judgment for though windows may draw the business into the store, it rests largely with the salesmen on the floor whether it is taken care of, and whether a sale is made

"Picture displays" possess an advertising value not found in any other style of trimming and the impression on the observer is more lasting.

Not every one can trim and decorate a window without some practice; nevertheless it should be the ambition of every window trimmer or decorator to master his art. It is never too late to make a start. If you have any inclination for such work start at once. There is plenty of room on the ladder of success for good hardware window decorators. You will not find it crowded. At any rate, start climbing. Any one who has a fair knowledge of the hardware business with the added qualifications of a good trimmer and decorator cannot fail to be a greater monetary value to a firm than if he be but an ordinary salesman.

FISHING GOODS SCENE.

A very realistic fishing window was shown last summer by the Hudson's Bay Company's store at Macleod, Alberta, the display being put together by W. H. Jeffery, manager of the hardware department of the store. A large front view of the display was supplied, but it could not be reproduced satisfactorily and consequently the side view only is shown, this giving a practical idea of the construction of the display. The background was a painted scene which appeared very realistic, Mr. Jeffery's artistic work not being shown to its best advantage in the illustration.

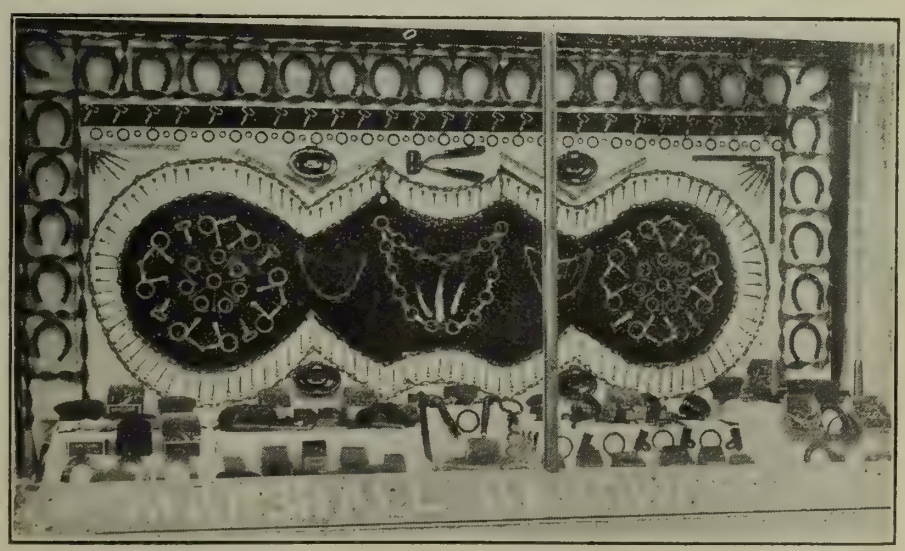
The background is representative of an ideal mountainous trout fishing ground, and as will be noticed, one of the streams of running water leads up to the back of small mountain built in the foreground. The stream in reality emerges from the front of this rock-faced hill, and finds its way down a winding river bed between bolders and over falls, disappearing as mysteriously as it appeared. The banks and surrounding valleys are covered with green colored sawdust, making a good representation of grass. A boy is to be seen on the bank fishing, while below the falls the river is spanned by a suspension bridge, made entirely of hardware, upon which is seated a boy of darker hue, plying his hook and line. In the running water of the river were a number of live minnows, which added life to the display. A tent is shown in the distance, while along the banks are scattered reels, lines, baits, flies, grasshoppers, poles, etc. The bed of the river was made of sheet rubber packing.

Scenic Fishing Tackle Display Made in the Hudson's Bay Co.'s Store, Macleod, Alberta.

BLACKSMITH'S WINDOW.

A very practical window display arranged for the Marshall Hardware Company, Medicine Hat, this spring by Herb Doane, is shown in the accompanying engraving. Blacksmiths' supplies were featured and dealers will agree that a very attractive window has been made of what would usually be considered one of the hardest lines to show to advantage.

Around the top and sides is a border of horseshoes and in the centre is a triple shield set in a border of chain and horsenails, nearly every article of blacksmith and saddlery hardware being shown in the display.



Blacksmiths' and Saddlery Hardware W indow at Medicine Hat.

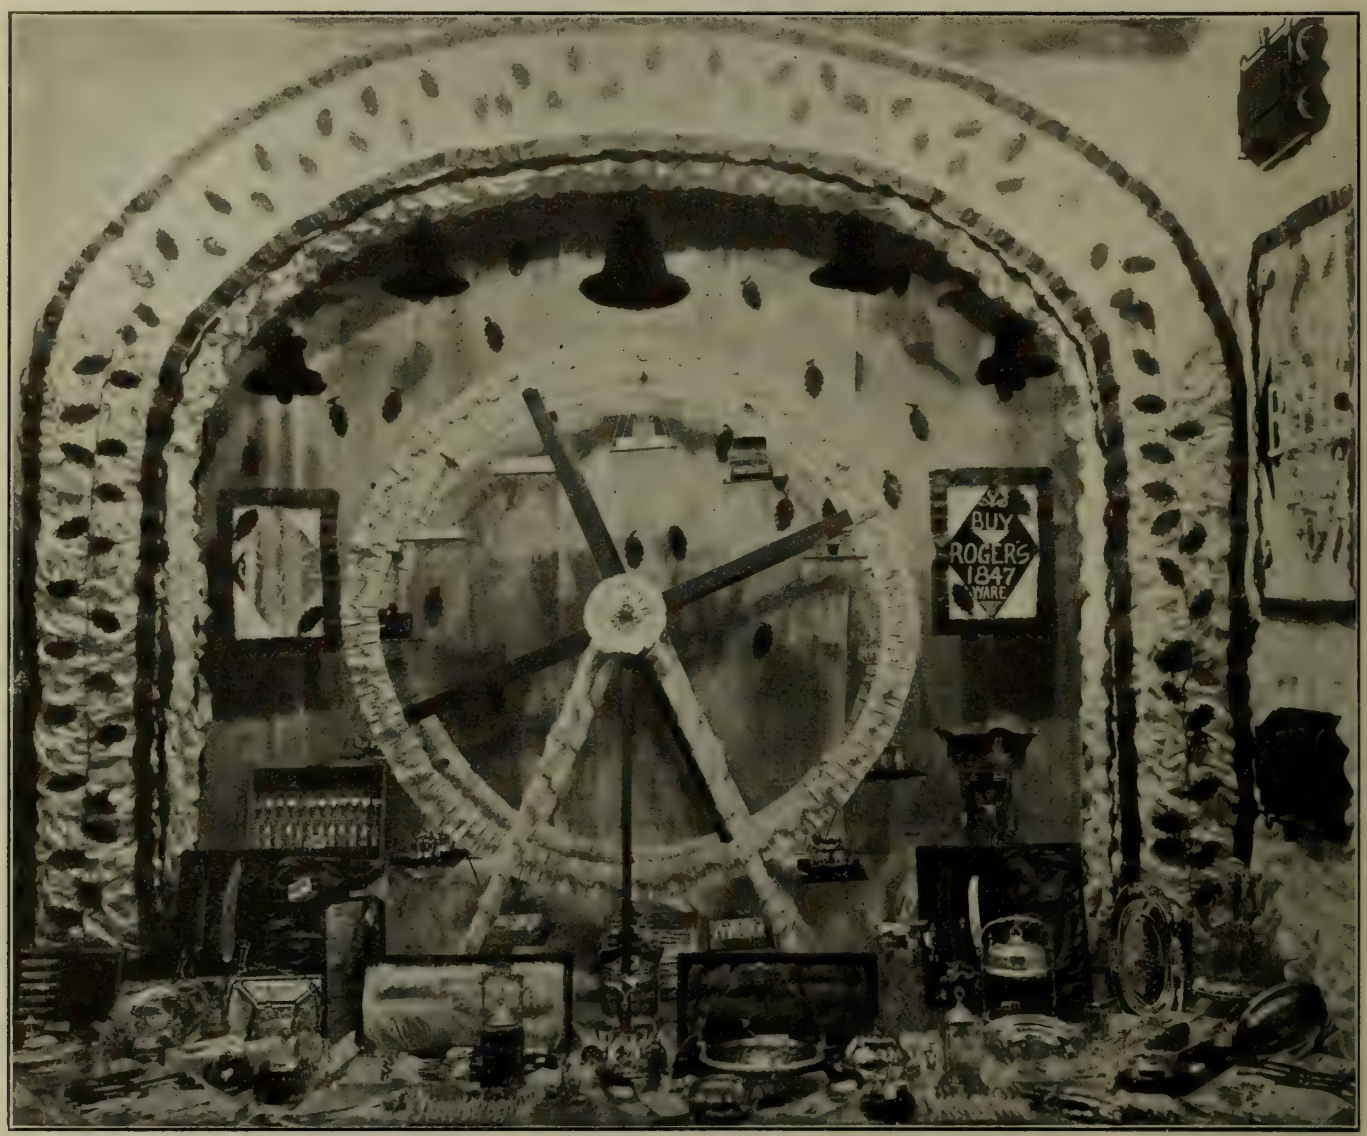
Prize-Winning Display of Christmas Goods

A Ferris Wheel Mechanical Window at Regina Made Many Sales — Eighteen-Year-Old Clerk at Bracebridge Arranges an Excellent Display — Acton Hardwareman Uses Santa Claus Figure to Good Advantage.

In Hardware and Metal's recent holiday window competition for towns under 10,000 population, the first prize was awarded to H. Flowers, a former Chatham, Ont., clerk, for a mechanical window arranged for Peart Bros.' Hardware Company., Regina, the central features being a large arch and a Ferris wheel connected to a small motor in the basement.

The color scheme of the window was green and white, green being used for the border and white in the background, holly and paper bells being also used to complete the setting. The trimmer very wisely, too, avoided placing any goods to detract from the wheel, the background and wall being practically free of goods. The display on the floor is well balanced and price marked and the window is an admirable combination of attractive and selling qualities.

The Ferris wheel carried fourteen trays or cars each carrying samples of silverware or cutlery. A small motor in the basement caused the wheel to revolve at the rate of three times a minute, the belts being invisible from the street. The wheel was kept in motion day and night, and at all hours there were many spectators watching the wheel and studying the display. Peart Bros. give the display credit for moving a lot of goods which otherwise might have been left on their shelves.



Holiday Window Arranged by H. Flowers for Peart Bros., Regina. Awarded First Prize in Hardware and Metal's Christmas Competition.

In awarding the prizes, it might be added, the judges considered that a window having features calculated to draw customers to the store, had considerable advantage over a display without such qualities, although it had good selling power. As a rule, a trimmer who dresses a window to attract attention arranges a companion window in which seasonable stock is displayed and priced in such a manner as to encourage onlookers to enter the store.

Bracebridge Clerk's Fine Effort.

An altogether different type of a window was awarded second prize, it being the work of Peter McNaughton, an 18-year-old boy with less than three years' experience in the store of J. L. Fenn & Sons, Bracebridge.

A year ago special mention was made of a display, arranged by H. J. Marshall, for Geo. W. Ecclestone, Bracebridge, and again this year Mr. Marshall was a close

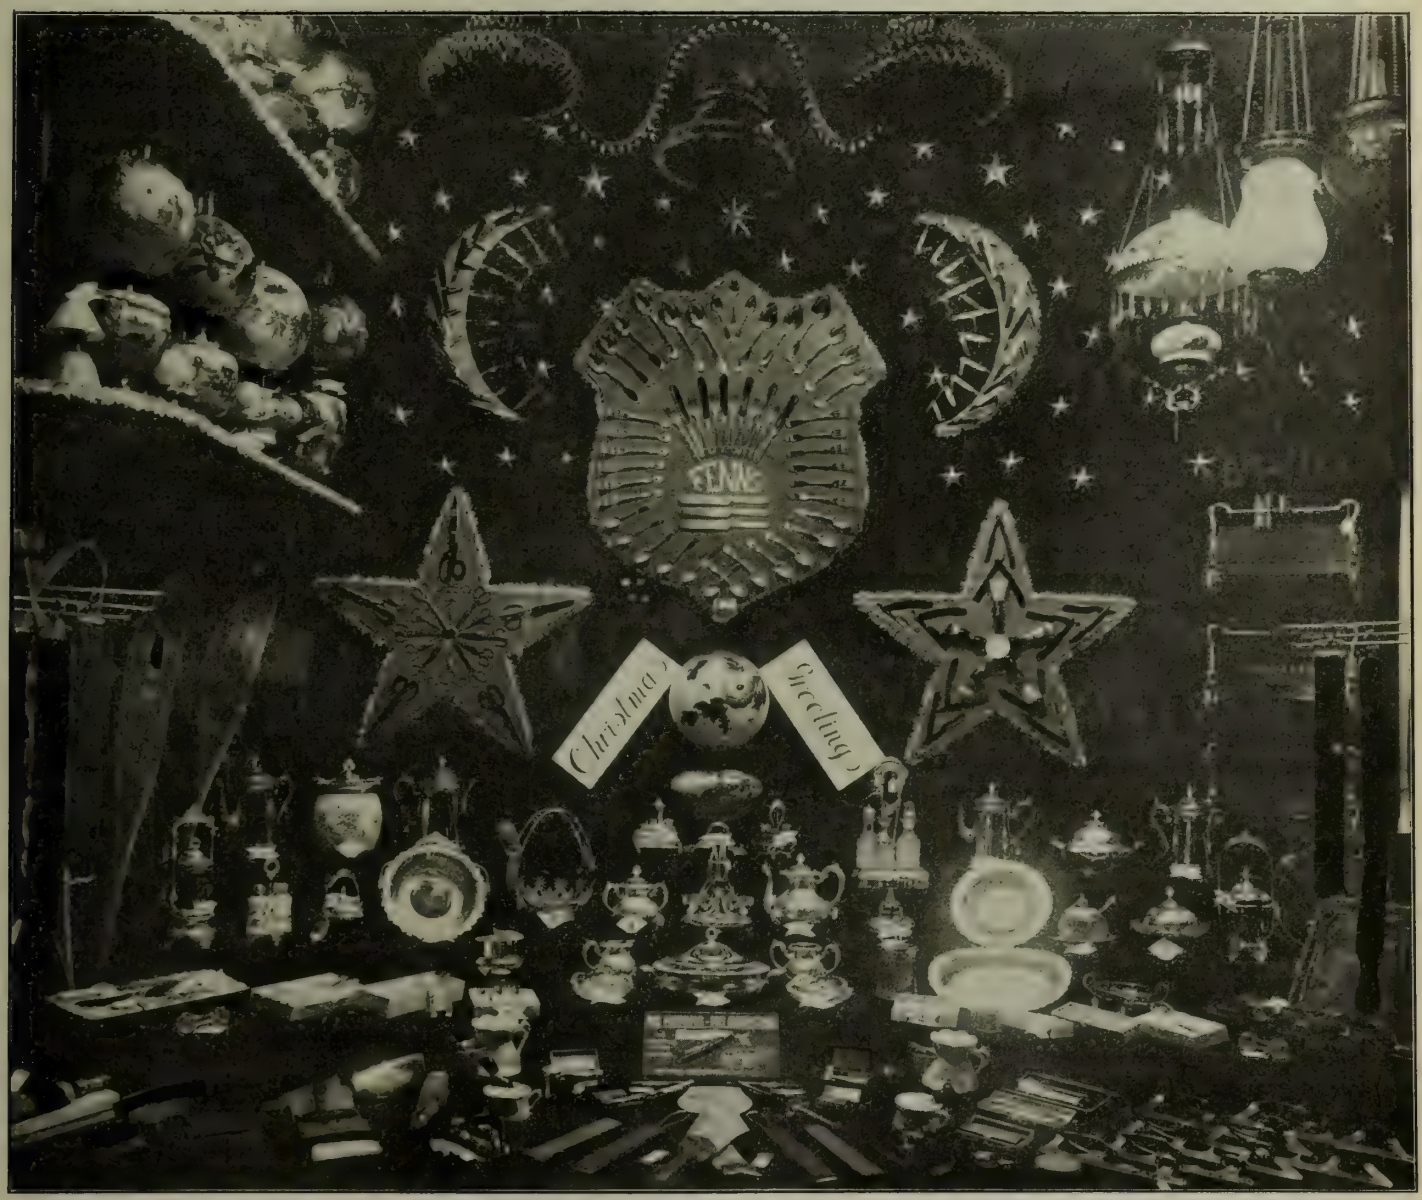
runner-up for one of the prizes. Bracebridge, with a population of about 3,000, therefore, stands in a class by itself for enterprize in window advertising. As Mr. McNaughton says: "Great interest has been taken here in all lines of window dressing. My window attracted many to the store and has more than paid for the work in arranging it. Even if I fail to secure a prize I will profit by the experience."

vicability of some of the articles as holiday gifts.

The use of the shelves in the window might be criticised, but, on the other hand, the paper bells and sleigh bells, the stars used to lighten the dark background, the crescents carrying pocketknives, the shield showing table cutlery, the stars showing the scissors, razors and shaving brushes, and the orderly, uncrowded yet comprehensive showing

one to a special display to attract attention and the other window to a showing of silverware and cutlery, designed to interest buyers and suggest suitable and serviceable gifts for each member of the family.

The window illustrated was awarded third prize, it being considered one likely to attract the attention of both old and young and bring much custom to the store. A mantel was constructed of



Holiday Window Arranged by Peter McNaughton for J. L. Fenn & Sons, Bracebridge. Awarded Second Prize in Hardware and Metal's Christmas Competition.

The window, as will be seen, has a black background and is well lighted every article displayed standing by itself without a suggestion of overcrowding. Most of the articles, too, are priced and few passersby would fail to stop to admire the neatness and ingenuity of the arrangement, and as the power of suggestion is strong few would go away without being impressed with the ser-

of silverware, case goods, brushes, shaving mugs, strops and razors, skates, etc., on the elevated steps at the bottom are all worthy of appreciation. The lamps, sweepers and snowshoes, too, do not jar the harmony of the balance of the display.

A "Santa Claus" Display.

R. F. Johnstone, Acton, Ont., in arranging his holiday windows, devoted

wood and building paper chalked off to resemble bricks, a fireplace being built below and a mirror resting above, stockings hanging on the mantel and a figure of Santa Claus completing the Christmas Eve picture. In the window was also placed an assortment of articles suitable for gifts, the use of the opposite window for cutlery and silverware avoiding the temptation to over-

crowd. Price tags were, of course, used on goods wherever possible.

The photos of the Regina and Bracebridge windows submitted were about 5x8 inches in size, but the Acton views were too small, being only post card size. All were taken at night, the exposure being from 20 to 30 minutes.

Holiday Window Arranged by E. B. Swackhammer for R. F. Johnstone, Acton. Awarded Third Prize in Hardware and Metal's Christmas Competition.

BATTLESHIP OF HARDWARE.

One of the neatest battleship displays Hardware and Metal has seen in any publication or window is that shown in the accompanying illustration sent by G. H. Brock, with C. B. Hume & Co., Revelstoke, B.C. The hull is, as usual, constructed of two Maple Leaf cross-cut saws, 7 feet long, decked in with boards cut to fit. The main deck-house was a savory roaster, the smoke stacks being two short pieces of 1½-inch pipe, and the funnels four 1½-inch elbows and 6 ¾-inch elbows for the deck house. The masts were iron rods with spools of copper wire strung on them, with firing tops made of a funnel and a mouse trap on top with 303 British rifle cartridges for guns. The main turrets were a pudding dish of two sizes, with hose nozzles for guns. The side turrets were a pudding dish cut in two hung over a rail and 303 cartridges for guns. The davits were hacksaw frames brought up through the deck, with Mrs. Potts' sad irons for boats. The rail was brass Jack chain strung on spring clothes pins. The anchor was a ½-inch bolt with a mining rail clip, large key ring and dog chain attached. The sailors were small china toy men.

ARRANGEMENT OF MECHANICAL DISPLAYS.

By E. T. Skinkle.

There is no other merchant who can get such good results from mechanical window displays as the hardware man. In fact the hardware window is about the only one in which moving displays can be used to good advantage. Motion has a distinct value in attracting attention to a window. Every one has in his makeup a certain amount of curiosity and will stop before a window in which part of the display is in motion. Even the busiest man will pause long enough to take a look and once his attention is caught there is a good chance that the window may suggest to him some needed purchase that would have been forgotten otherwise. But mechanical windows can easily be overdone. They should be used only occasionally and they should be constructed with the view of attracting attention to the merchandise on exhibition rather than to the mechanism itself. The mechanical device should be made either to carry part of the display or it should operate in such a way as to demonstrate the working of the displayed article. A trimmer who has any mechanical ingenuity can devise a great many moving displays that will help his windows to sell goods.

Reducing Speed of Motor.

He will need a ⅛ or ¼ h.p. electric motor, but the remainder of his machinery he can make himself providing he is at all handy with tools. To use the motor in practically every display, a speed reducer will be required to bring the revolutions down to the requirements of window display. Very satisfactory speed reducers may be bought for a small sum. They are constructed with a cog wheel about six or eight inches in diameter which engages a worm that is turned by the motor. The gears are held in a light cast iron frame. This device has the advantage of absolute certainty of operation and occupies very little space.

Another form of speed reducer can easily be made by any trimmer. It consists of a series of large wheels. A cord passes around the hub of the first wheel and around the circumference of the second one. This makes the second wheel revolve much more slowly than the first one. By adding other wheels

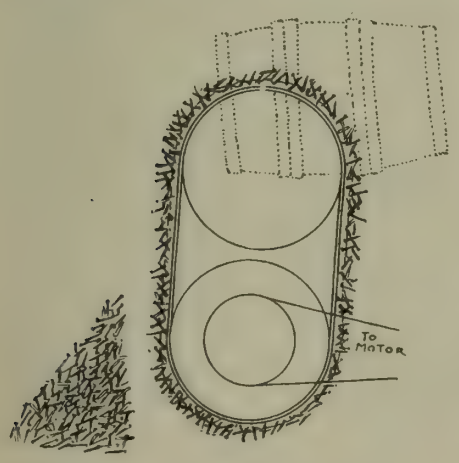
in the same way the revolutions may be made as slow as desired. The only objection to this system is that the large wooden wheels take up a great

Mechanical Nail Display.

deal of space. This, however, does not matter if there is plenty of room under the window.

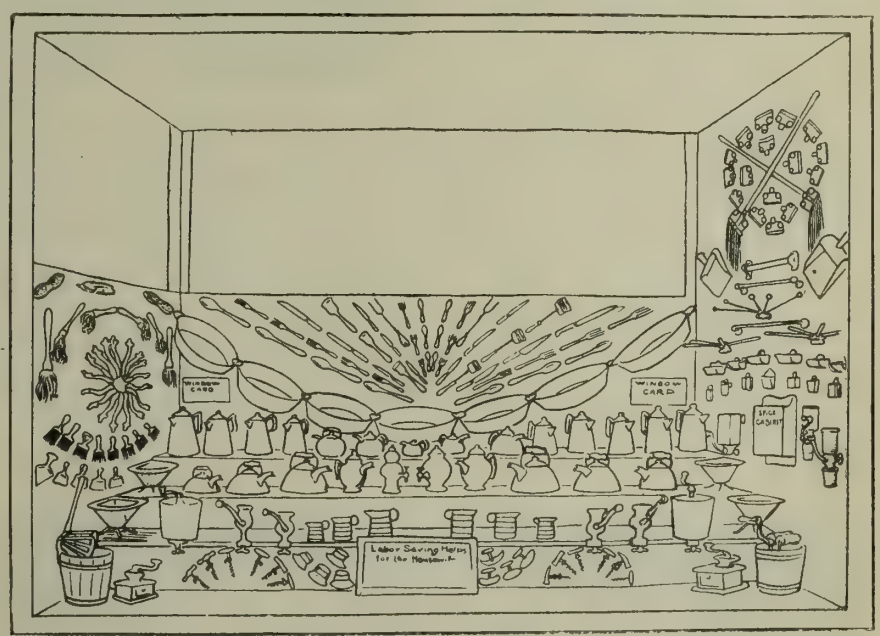
Moving Display of Nails.

Hardwaremen do not often display nails in their windows, yet they might do so once in a while advantageously. The sketch shown illustrates the centrepiece for a display of hammers and nails. The kegs are arranged at the back of the window somewhat in the manner shown in the drawing. On the floor in front is a great pile of nails and above is a keg from which a constant stream of nails is pouring. If properly constructed, the illusion will be perfect. In the picture illustrating the side view is shown the simple mechanism. Two wheels or drums about eight inches wide are placed one above the other and around them is run a wide canvas belt. To the canvas is fastened a section of flexible wire poultry netting. Large wire nails are fas-



Sectional View of Nail Display.

tened with fine wire to the netting. They are tied on as thickly as possible and each should be tied tightly, as it might otherwise fall off and interfere with the mechanism. In tying the nails some of those near the middle of the belt should be allowed to dangle loosely as that will give them the appearance of falling when the wheels revolve. When the belt has been finished, cut away a nail keg so that it will fit over the top wheel, letting the front side of the belt extend out a few inches in front of the keg. Nails should be piled up at the sides of the cut keg to conceal the cut places. Now put a big pile of nails on the floor directly in front of the belt. They may be piled over a box and the back of the pile should be as nearly perpendicular as possible in order to bring the pile close to the belt. The speed of the motor should be reduced to make the wheels turn slowly. Viewed from the front this will make a mystifying exhibit. The steady stream of nails pours naturally from the keg, yet the pile on the floor grows no larger and the keg is never empty.



Suggested Display of Kitchenware.

In connection with this display are used cards showing a sample of every kind and size of nail carried in stock. These should be arranged in rows graduated from the smallest to the largest. The remainder of the display could be made up of hammers arranged on the floor and on boards at the back and ends of the window.

A KITCHENWARE DISPLAY.

This window, suggested by Hardware, depends on the arrangement of the articles shown for its attractiveness. Tinware and kindred articles do not, in themselves, make particularly attractive features, but they lend themselves readily to many variations of design and form which will catch the eye and hold the attention. The principal eye-catcher is the semi-crescent of dish pans strung across the back wall. Each pan is attached to its neighbor with fine wire, the handles interlocking. The pans are tipped forward by a wire running under the back rims. Above the pans rows of forks, spoons, knives, potato mashers, etc., are arranged. On the left wall may be displayed lid lifters, brushes, dish mops, wire brushes, pot scrapers, etc.; on the opposite wall mops and heads, towel racks, dust pans, soap dishes, coffee mills, etc. On the steps any number of articles may be attractively arranged. This display would prove valuable in a window used partly for light. Any dark background would set off the goods shown.

HOW TO PHOTOGRAPH WINDOWS.

Every trimmer should photograph his best efforts as the pictures come in handy for reference. Many times an old trim will suggest a new idea and unless you keep your photos you are very liable to forget them entirely.

Experience has proven that the best results can be obtained by photographing by night, providing the window is properly lighted and by making a long exposure according to the power of the lens of the glass or color of goods to be photographed. A window with sharp distinct contrasts, or one containing light colored goods does not need as long an exposure as a display of dark colored goods or one without sharp contrasts of light and shade.

A 15-minute exposure is enough for the average well-lighted window. A poorly lighted window, or one containing dark merchandise, will require a longer exposure—20 to 30 minutes is not unusual. During all this time the

camera is exposed people can pass to and fro in front of the camera without spoiling the photograph, provided they do not stand in one place for any length of time.

Sometimes the top of the window is lighted much more strongly than the bottom of it, so that the photographs come dark at the bottom. This can sometimes be avoided by placing two or three electric lights in the bottom of the window (extensions can be run from some of the sockets in the window), and so shielding them as not to shine directly into the camera. Always remember that the window must be lighted more strongly than any objects across the street, otherwise these foreign objects will be reflected unless the screen is used. Also remember that a long exposure can not be taken if there is even the faintest wind blowing, for the lightest shaking of the camera will blur the photograph.

MOVING DISPLAYS IN NOVA SCOTIA.

C. E. F. Dakin, of Dakin Bros., Nova Scotia, used two moving displays during the holiday season last December. In his left hand window he had a toboggan slide scene, the slide being built of wood, a canvas belt carrying the cardboard togoggan revolving on tins. Beyond the slide was a street scene to give the view the proper effect. The right hand window contained a Ferris wheel made of galvanized iron revolving on a stove rod. Six cars carrying passengers were suspended from the wheel.

Both slide and wheel were operated from a small water motor under the window, the speed of the belt to the wheel being cut down by a double pulley midway between the displays, the pulley operating both large and small on the one axle.

The windows are not enclosed, being merely separated from the store by wire netting. In each display the window was partly enclosed, but a much better appearance would have been given if a bunting or paper background had been built across the window four or five feet above the window platform. More attention might also be given to displaying seasonable lines likely to encourage customers to enter the store and buy.

The goods shown were price marked, some being shown on pedestals made of tin, everything in connection with the mechanical part being made in the store workshop by Mr. Dakin. Live newspaper advertising was done during the holiday season along lines laid down by Hardware and Meal.

Mechanical Ferris Wheel Display Made by Dakin Bros., Digby, N.S.

EVOLUTION IN NAILS.

It is supposed that the first nails were the thorns of the locust tree, some of which are eight inches long and as hard as iron. The use of fish bones was common before Noah's time, and in all probability the first of the commodores built his raft-scow with them. They were as long and strong as our metal string bolts. Wooden pins were employed also, being driven through holes burned by hot irons before there were crude augurs to bore them.

Iron nails were cut by machinery 100 years ago at the rate of 100 a minute to the machine. The wire nail industry started in 1886 and is now of colossal importance. Before cut nails were introduced all nails were hand forged.

We should have a hard time trying to get along without nails. They are so common that, like many other articles in common use, our makers of encyclopedias regard them as unworthy of mention. In the latest specialized work (seven large volumes) on carpentry and building there is nothing about nails.

Is anything of more importance than a proper selection of the little bits of metal that are supposed to bind securely together all the lumber used in the construction and decoration of a house?

It's easy enough to be pleasant
When life glides by like a song,
But the man worth while,
Is the man who can smile,
When everything goes dead wrong.

Taking Orders is Not Salesmanship

Strong Argument Presented Showing the Necessity of First Knowing the Goods and Then Using Brains in Selling Them—An Instance Where a Customer Intended to Buy a 15-Cent Article But Was Sold One Costing $1.75—The Treatment of Travelers.

Selling Goods by Talking Points

The Story of a New Product, Its Failure in the Face of Price Competition, and How a New Sales Scheme Saved It—A Lesson for Travelers and Salesmen in All Lines of Goods.

By E. L. Benjamin.

"They're good fixtures," repeated Jim Hanning. "There's nothin' the matter with these fixtures. If the salesmen can't sell 'em, is it my fault?"

"You're the head of the department—you're responsible." Radcliffe bit the words off short. "You said you could make a good thing of this fixture department. You haven't done it. I gave you a good shop, good men, good material. You're turning out the goods all right—but—"

The helpless look on the face of his big superintendent showed Radcliffe the futility of pursuing the subject further along such lines. Hanning was a good shop boss—none better. He could turn out good fixtures. He was a genius, in his way, at designing labor-saving machinery and short-cut methods of putting the work through. No waste in mechanical operation, no error in designing, no lack of shrewdness in buying raw material accounted for the present condition of affairs. But the department was a failure. Competitors were getting the orders.

Radcliffe, as the head of the National Company, one of the largest electrical jobbing houses, knew nothing of the fixture business. His salesmen had pointed out that other jobbers were making money in electroliers, and the year before, after only the most superficial inquiry, he had decided to enter the field as a manufacturer. Results were far from satisfactory. The competition was keen, the margin of profit insignificant. Finally the situation had grown so acute that he seriously considered closing out the line and accepting his loss. This idea was uppermost when he summoned Hanning to what the boys called the "grid."

"I don't know what's wrong. Maybe I'm too old," said the mechanic, speaking as much to himself as to his employer. "Business is different from what it used to be. Maybe I better quit trying to be a manager and go back to the bench."

"Jim, look here." Radcliffe shook his fist at the big Irishman. "This is no time to talk like that. You're no quitter and neither am I. The whole proposition gets down to this—either it is costing us too much to make fixtures or everybody is selling at a loss. We've been underbid on every good contract for the past four or five months. Yesterday we lost the Lakeside Building order—two weeks ago the Grand Hotel got away from us. On both those jobs we figured practically at cost. Now we're in the wrong somewhere. Are you sure you can't trim costs in the shop?"

"Not without taking it out of the goods." The superintendent was on his own ground now. He knew that his shop was right. Small economies might be effected, but nothing which would permit the National Company to meet the prices of competitors and retain any margin of profit.

"All right, Jim. Think it over. We've got to know the answer to this problem before the first of next month." The words were a dismissal.

That night a general letter went out to the National salesmen: "Look into the fixture business. Spend whatever time is necessary to find out why we are being constantly underbid. Compare our goods with those of all competitors and report fully."

Salesman Gets Interested.

When George Thurling, of Territory Number Three, read these curt instructions, he whistled, for fixtures embraced the one line which interested this erratic traveling man. As a salesman of wire, construction material and supplies, he was not a success. "Too blamed reticent," a customer said of him once to Radcliffe when the general manager called to straighten out a tangle, "too blamed reticent and too almighty superior."

But if he lacked in that boisterous good-fellowship which must mark the successful road man of a jobbing house, he made up for this in the greater accuracy of his information regarding the many lines he sold and more thorough knowledge of his customers' needs. This accuracy and thoroughness he had brought to the study of the fixture problem. He had compared goods and prices; he knew how and why contracts were let; and he knew how he could make money on them if he were given charge of the department with a free rein and fair support.

"If I write in to the house and tell 'em what I know, they'll think I'm crazy," mused Thurling as he studied the general letter. "If I don't report at all, they'll fire me. If I simply side-step the question and go on trying to sell supplies much longer, I'll either go crazy for sure or get fired anyway within a couple of months. I guess I'll go in and hit Radcliffe for a job in charge of the fixture department."

It was a bold step for the weakest salesman on the National force to take, but Thurling knew fixtures—knew them better than Hanning, who made them—and he knew the fixture sales problem better than Radcliffe.

"The man who said, 'Knowledge is power,' is going to have his theory tested pretty hard," he muttered, and having reached a decision, he tossed his clothes into a suit case for the journey home.

A Cool Reception.

Thurling's reception was no better than he had expected. Radcliffe was annoyed—Hanning sullen.

"Not a manufacturer in this district is making money on fixtures," was his first statement.

"Did you spend ten dollars to come up from Latonia to tell us that?" snapped Radcliffe.

"Nobody is making money and nobody can unless they raise prices. Nobody can raise prices except us."

"We're too high now." Radcliffe's tone would have warned any other man to back down.

"We can go fifty per cent. higher and get the business."

Radcliffe was now thoroughly exasperated. "What the deuce have you got up your sleeve? You talk like a man in a padded cell. How can we raise our

prices and get business that's slipping away because we're too high already?''

''Mr. Radcliffe, you once told me that all you needed to sell goods—any goods—was a talking point. You have no talking point in your fixtures. You're sending us out to fight cut-throat competition on a cut-throat basis. There are twenty fixture houses after every job we bid on. All any of 'em talks is price—price—price. And we talk price. The fixtures are bought on exact specifications, so there is no chance to trim a little profit out of the goods. What are you going to do about it?''

''What talking point is there besides quality and price?''

''Quality and price are not talking points at all in this line, as you well know. The specifications of the buyer take care of the quality. And our competitors seem to be taking care of the price. The talking point I have to suggest is—illumination.''

''What do you mean by that?''

''Talk about the light our fixtures give, not about the fixtures themselves. If we—''

''Bosh!'' exploded Hanning. ''I've been in the fixture business over twenty years and I never heard of such a thing, and—''

''And now you're up against it cold and stiff because your department is losing money and you can't help yourself.'' Thurling was beginning to warm to his proposition and the words came fast.

''The old fogies in the fixture business—and that means everybody doing business in these parts—have been selling bent tubing and spinnings and cast brass ornaments for the past twenty years and calling 'em fixtures. They think that's the whole proposition. Now, I know that we can get up a line that'll look a little different, that'll take only the new high-efficiency lamps, that'll be sold complete with reflectors which throw the light down on the floor instead of up on the ceiling.

Make Good or Quit.

''When we go after a contract, we won't talk quality and we won't talk price. We'll say, 'Look here; this fixture will give you twice as much light as the ordinary fixture and it will only take half as much electricity to keep it lighted.' We'll tell 'em how good the light is, how small their electric bills will be, how scientific the fixture is. We'l razzle-dazzle 'em till they forget all about price.''

Old Jim Hanning shook his head dubiously. Radcliffe studied his salesman.

''Isn't that a good deal of a confidence game?'' he asked, finally.

''Depends on what you call a confidence game. If you mean a skin game—no, for we can do all I say and more.'

''You see, Mr. Radcliffe, I've been studying this problem a long while, I'm not much of a salesman unless I have a good strong talking point. I'm not a mixer. I can't sell on my personality. But give me a line of argument—give me a foothold where the other fellow can't get in—and I'll sell fixtures.''

''What the trade wants is price,'' began Hanning.

Radcliffe turned on him sharply, ''Can you give us any better prices?''

''No, but nobody ever heard of a scheme like this. I never—''

New Ideas Caused Surprise.

''Jim,'' said Radcliffe, slowly, ''you've said enough. I'll admit this scheme sounds foolish—I don't like it a bit more than you do. But it's new and Thurling is risking his job to tell us about it. If he can show us a way to make this department pay, he can do more than you, for all your twenty years' experience. I'm afraid of new ideas, but I'm more afraid of dry rot. Go ahead, George, and tell us the details.''

There were not many details to tell. Thurling had studied his plan out at some length, but it was all vague and untried. He had a principle—that was all. Finally it was decided to make up some samples along the line suggested and try them out on the Crandell school board—the next big contract, and one which Radcliffe was sure the National Company could not get.

''Thurling,'' said the Old Man, as he gave the orders for the trial, ''you are a peculiar proposition. You bring in a fool scheme which you can't explain and ask me to back you to the limit. The Crandell school job is all you get. Jim will give you sample fixtures; the cashier will give you anything up to a hundred for expenses. Go ahead. If you don't win out, don't bother to come back—we shan't want to see you.''

When Thurling called by appointment upon the school board of Crandell there were with him several workmen carrying boxes, coils of wire and kits of tools.

Their appearance caused a mild sensation. Other fixture salesmen had come and gone, but none had more than the conventional portfolio of photographic reproductions of fixtures, views of well-known instalations, testimonial letters and price books.

''Gentlemen,'' said Thurling, ''I am not here to talk fixtures. I am not here to show you artistic creations in brass or copper. I am here to give you a demonstration of the science of illumination.

''This board thinks it is buying fixtures. It isn't. It is considering the question of illumination for the beautiful new schoolhouses of the progressive City of Crandell. And this question is divided into two parts—the lighting equipment and the cost of operating that equipment.

''I have studied your conditions here at some length. Last year, you paid eight cents per kilowatt for electricity. Your bills for current amounted to something over $18,000.

''I can give you better illumination—more light, better light—and save you fifty per cent. on your electric bills.''

''How?'' Schwartz, the proprietor of the city's largest department store, was chairman of the school board and his curt inquiry came like a pistol shot. He knew something about electric light bills. The cool statement of this young salesman touched an interest deeper than the lighting of the city school. If that statement were true it meant that he Schwartz, could save thousands each year in the lighting of his store. The others were no less keen. Each in his business wrote a fat cheque monthly in favor of the lighting company.

''How?'' repeated Thurling. ''That is what I am here to show you. I propose to demonstrate, here and now, the truth of my claim. If I prove it, I expect the school contract—a contract, not for a certain number of fixtures at a competitive price, but for scientific lighting equipment which will save you thousands of dollars in electric bills and give the children in your schools a quality of light which will not injure their eyesight.''

While he was still speaking, the workmen were deftly unrolling wire, bringing forth tools and equipment. A ladder was procured, packages which had been laid in the hallways brought in, and within a very few minutes one-half of the school room in which the board was holding its meeting had undergone a transformation. While his assistants hurriedly arranged the collapsible fixtures which they had brought, and hung them temporarily in place, Thurling outlined his plans and principles.

Secured Contract and Promotion.

He explained that the ordinary fixture is designed without reference to illumination and that the ordinary fixture-maker was concerned only in the problems of design and manufacture. The National Company, on the other hand, advocated, first a new electric unit in the way of a lamp which would give much more and better quality of light at less consumption of current; it offered fixtures designed to accommodate these new lamps and sold them fully equipped with scientific reflectors made to throw all the light downward evenly over a large area, making a combination which for efficiency and economy could

not be equalled. He pointed out that his company was placing at the Crandell board's disposal all the knowledge and experience it had gained in years of work in the electrical field and frankly stated that, while another fixture house might later offer to duplicate the National equipment, it was significant that none had heretofore suggested the use of any but the old-style fixtures, inefficient lamps and wasteful reflectors.

"In short, gentlemen," concluded Thurling, "the National Company comes to you with a proposition to supply foot-candles of illumination on the desks of Crandell's school children. Others offer you so many pounds of metal hung against the ceiling. Which will you buy?" '

A long black curtain had been hung by the workmen from ceiling to floor and extending down the length of the room. On the one side were the National's "illumination units"; on the other, the old fixtures. As Thurling put his question the electrician snapped a switch and the new lights blazed forth. The school board, sitting on a platform at the end of the room, gaped in astonishment.

Then began a session that lasted long after midnight—a session in which every detail of the equipment was examined and which ended in every member of the board pledging the contract to the man who at first seemed to have performed a miracle.

A more impetuous man would have wired Radcliffe of his success with the Crandell school board, but Thurling waited until he had the signed contract and then sent it with a characteristic letter:

"The enclosed contract seems to demonstrate that my plan of selling illumination instead of fixtures is correct. I am now figuring with Schwartz & Company for a complete equipment of their department store, and with Jackson, of the State Insurance Company, for the lighting of the new office building they plan to begin next spring. If I get these two jobs I will feel that there is something in the new sales scheme."

To which Radcliffe wrote a reply addressed to "George Thurling, Manager Fixture Department."

Salesmanship of Fifty Years Ago

The Clerk of To-day Faces a Different Proposition Than the Man Behind the Counter Met Half a Century Ago—He Must dress Windows, Keep Things Neat, Know His Goods, Advertise and Go Out After Business.

By F. J. Arrowsmith.

To the young salesman who enters the well-equipped hardware store of to-day with its various departments, its comprehensive stock, and its modern appurtenances, there is no feeling of astonishment as to the conditions with which he is surrounded. He has been born to the hardware store as he sees it to-day, just in the same way that he has been born to the electric street car, to the moving picture shows, and to all the advanced contrivances that are now part and parcel of our lives. When he reads of comparisons drawn between to-day and many years back, of historical pageants portraying scenes and customs of which he can hardly grasp their real features by reason of his modern environments, he is filled with astonishment at the many changes which have occurred in the speedy passage of time. His astonishment, too, would be even greater were he to realize that in the very industry in which he has embarked, innovations have occurred no less striking than those which publicity have shown him in other and more romantic directions.

Even the old hardwareman, who has nearly worked out his life in his trade, and who contrasts his store with the one he entered as a boy, is filled with amazement at the changes that have occurred within his ken. What then would it be to the young clerk, transported back to the days when window displays were unthought of, when the stock was a very small portion of what it is now, and when silent salesmen were unknown. We could go even further back—back to the time of the mullioned windows and the crude fashioned articles that passed muster as hardware in those times. But the alterations which have taken place in the past fifty years or so are more than sufficient to show how great have been the development and advancement of the hardware industry—a development and advancement equal to those which have occurred in any art or science. The hardware merchant yields to no man pride of place in progressiveness, or in that business acumen which leads men to take advantage of, and to profit by, the kaleidoscopic changes of the times.

Past Compared With Present.

It is hardly possible within the scope of an article of this description to describe all the changes which have occurred within the time of the older hardwaremen. But a few instances will easily show to the minds of the young salesman how very different are the conditions under which he works to those obtaining long ago. If he could imagine his brilliantly illuminated store, with its series of drawers against the walls and samples displaying so prominently the contents within, the sliding ladders making access quite easy, the silent salesman, the goods elevator from one floor to another, and the elaborately dressed windows reflecting the ornateness within—if he could imagine this store transformed into dimly lighted premises, comparatively speaking, with plain shelves holding packages of goods with the sample probably on the wrong side, the unattached ladder, the solid counters, the absence of glass, the few odd cases, the absence of elevator and the window filled in haphazard fashion with goods just to show that the store was a hardware one, he might perhaps somewhat realize the remarkable changes that have occurred.

Changes in Packages.

Probably one of the greatest and certainly most advantageous developments has been the alteration in the style of packing hardware. This is a point which seems to stand out most prominently to all hardwaremen. Neat pasteboard boxes with their distinctive labels were unknown in the earlier days. Shelf goods were put into paper packages bound by twine, with the result that they very soon lost whatever neat appearance they originally possessed. It took a smart clerk in those days to make a neat parcel of goods that had been broken into, and were consequently uneven in bulk. Even a resort to paper packing was not always effectual, and many a young clerk felt discouraged over the task so often set him. In fact, one of the qualities of a good clerk in those days was his ability to make a good parcel.

One of the older generation of hardwaremen recently said: "With the facilities given the young clerks to-day, and the way their salesmanship is aided, I do not think they are so strong in initiative as they used to be, nor do they have to work so hard. It is easier to sell nowadays than it was then despite the greater competition." This may or may not be generally true, but it is certain that present day clerks would not like to have the bother with the parcels that the older generation had. Screws for instance had no labels and distinctive grades. A sample was attached to the twine, and how often was the sample missing? The sharp ends of the various goods would inevitably find their way outside the packages. Can it be wondered that the difficulty of keeping the stock nice was almost insurmountable, and

that the shelves had a ragged appearance. The young clerk nowadays looking at the long array of attractive and easily manipulated drawers would not care to be responsible for the stock such as it was then, or be obliged to open half a dozen parcels to find the right grade article owing to the misplacing of the sample.

Some Goods Made Long Ago.

As an old-time hardwareman pointed out, in his days butts were all right and left, and the bane of his existence was to know what kind of butt it took for a door swinging away from you to the right or left. A modern bronze, thin bitted key, cylinder lock would have created a sensation, for then wrought locks were only sold. Horse nails were forged by the blacksmith, later they were made by machines, but not pointed, and this had to be done by the smith. Enamelware was unknown, and the well furnished kitchens were adorned by the brightly polished copper utensils of still earlier days. The only good saws, files, rasps and padlocks were made in England. The American tool trade was in its infancy. Contrast that state of affairs with the home and American production of to-day.

Evolution in Buying Methods.

The representative stores of those times could not have held half the stock that is now carred by the average hardwareman. Whereas one of a kind was then sufficient, half a dozen is hardly enough now. Many items, too, are shown that at one time were considered foreign to the hardware trade, such as wall paper, firearms, builders' hardware, as we know it to-day, silverware, cut glass, and other fancy lines. English goods in the earlier days had a supremacy that has departed. It was the habit of many merchants simply to go through an English catalogue and pick out a few lines that they wanted. Now they order here and there from the travelers as they come in from all directions. The field is widened, and advantage is taken of the fact. Tinware was then made by the tinsmith, now practically all that is used is made in the large factories. Picks, mattocks, wedges and crowbars were forged by the blacksmith. Roofing material was then not known, the only covering used being tin and sheet iron, while galvanizing was unthought of.

Development in Paint Department.

Especially, too, in the handling of paint can be traced a marvelous development. The odd corner of the store devoted to linseed oil, white lead and other ingredients was hard to keep clean, while it was impossible to make any show of the barrels, pails, etc. But the arrival of the ready mixed paints in their attractive tins, and the oil tanks and pumps made a great alteration. Instead of looking at his paint department as a necessary evil kept out of the way as much as possible he now sees in it a blessing. No longer an eye-sore to any clean interior, the paint department is brought forward as an attractive part of the whole display. The co-operation of the paint manufacturer, and the extension of the field by the domestic use of ready mixed paint, changed the whole aspect of the situation.

Sample Room for Builders.

The builders' hardware sample room, with its display of escutcheons, handles, rosettes and locks, etc., mounted on finished wood, was not thought of, while good stoves were at a premium. The holiday trade, too, was uncatered for. Watches, clocks and silverware were sold by the jewelers, while fountain pens, safety razors and electrical novelties had yet to be invented. The highly developed system which is now part and parcel of the hardware store, the concentration into departments, and the grouping together of homogeneous articles to expediate business, had not been developed. A till took the place of the imposing cash register, while English gold and silver were in circulation.

The window displays were then practically nothing more than a rough assembly of articles to distinguish the store. The value of an attractive display as an advertising medium was not realized, while as for regular advertising in the newspapers, no one ever thought it necessary, only occasionally when there was any damaged stock was recourse made to the publications. The stores then were very cold. Even now some of the older generation shudder at their recollections. Many of the businesses had no stoves at all, and only personal exertion kept the clerks from getting frozen. One of the largest stores in Montreal some fifty years back had only a small English stove to keep three storeys warm. Think of that, you young clerks who work in the genial atmosphere of radiators, warm air registers or well fired stoves.

Dealers Went to Market.

In those days there were few salesmen from the jobbing houses on the road. The calls were few and far between, and the dealer in the interim had either to order by mail, or make a tiresome journey to the jobbing house. Now even in the most outlying districts the vists of the traveler are common.

The trade a third of a century ago had not the advantage of the trade papers, and this wonderful stimulation and education to the young clerks was absent in those days. No industry is now so well catered for in the journalistic line as hardwaremen generally. Neither had the dealers then the advantage of the co-operation and the support of their retail hardware associations. The opportunities which exist now were all lacking, and the daily work was harder.

Sometimes earlier, but never later, than 7 o'clock in the morning, all the year round, were the stores open and the clerks at their post, while in the spring and fall the doors were never shut until 10 o'clock and later, while some of the jobbing houses in the busy season worked all night. Think of that, you younger generation, who start work, say at 8 o'clock and close at 6 or 7. As we said, the daily work was harder, the hours were longer, the comforts were fewer, the difficulty to make a sale was greater, and the wage was lower.

But the conditions bred energetic men to whom the hardware industry of the country owe a great deal. They were pioneers, and well worthy to be honored.

WORK WITH THE EMPLOYES.

Very frequently the proprietor of a store will be putting forth the best of his efforts to discover why there is lack of co-operation among his staff, but from the very fact that he must necessarily look at the matter from short range, he is unable to discover the weak point in his system. The secret of perfect co-operation consists in the fact that an employer, a manager or a clerk must work with the remainder of the organization. He must be with it in every move it makes, with it in every new venture, with it in his thoughts night and day. So many business men are content to simply talk to their sales force, to dictate and to order written instruction to their sales force, whereas, if they would shake off their robe of mystery, their exalted opinion which they hold of themselves and stand aloof from all their precedents and practices, they would immediately mellow up and would hold greater sway with their sales force.

An illustration of the effect of working with their help was recently shown in a gang of laborers who were tearing up one of Montreal's thoroughfares. The day was bitter and cold and the winds swept down across the street upon which they were working with a fierceness which caused the men to shudder. They started at their task of digging with considerable energy, but as the cold piercing winds chilled them through and through, they became less ardent. Their strokes with the pick and shovel were less frequent and gradually they found themselves thinking more about the cold than about the work upon which they were engaged.

The keen eye of the boss noticed this and rising to the sudden emergency, he immediately started a cheery air and urged each one of the laborers to join in. They did so with a will and as the single air changed to others equally familiar the picks and the shovels swung in perfect rhythm to the song they sang and in that way though simple fact that the boss was willing to work with them, the work for the day was cheerfully done.

The boss cannot always sing songs with his clerks, but he can work with the sales force in a thousand different ways.

Sextilis—A Hardware Store Junior

The Story of a Hardware Clerk in a Western Ontario Town—Some of the Live Qualities of a Wideawake Lad Who Uses His Brains to Secure Business for His Boss.

(By Victor Lauriston.)

It was the window display that first caught my attention. But for it I might have been quite a while longer in making the acquaintance of the lad. There was something so life like, so interesting, so utterly out of all proportion to the commonplace, dead, desolate hardware window in that display, that—well, I had to ask who was guilty of such a departure from the sacred traditions of hardware.

"Who dressed the window?" repeated the energetic young partner with the curly hair. "Why? Why, Sex."

"Sex," I ascertained, was the "recent" junior. At first sight and sound, I was impressed by the size of his eyes and the volume of his voice. He was a big, pink, clean lad, with an outwardly awkward look which bespoke a country training. But he wasn't from the country—had, I found, spent all his eighteen years, more or less, in town.

His window dressing talent developed shortly after he joined the staff. He undertook the work pretty much of his own initiative, and mainly because he wanted to be doing something all the time.

There are window displays and window displays. It is an easy matter to fill a window with attractive articles of hardware, and to group them neatly in regular array, like chessmen on a board; but it requires a certain indefinable art to inject into a window display that life giving quality without which a display is pretty nearly as useless as a postage stamp without an adequate supply of "gum-stickum."

"Sex" had that art. Just an instance: there have been any amount of window displays where hardware goods suitable for lumbering have been shown. Axes, cross-cut saws, hatchets, gloves, horse blankets, have been neatly displayed in very orderly style. But it was left to Sex to plank down in the very centre of his display several feet of log, with a cross-cut saw imbedded some inches in it, and a liberal sprinkling of sawdust in the vicinity to intimate to the passerby that the saw was in excellent working order.

Anyway, nobody else in that particular store tinkers with the window dressing department to any great extent, since Sextilis took hold.

The other day a certain young married lady went on a tour of the local hardware stores in search of a double chopping knife.

A chopping knife is a 15 cent article, utilized for instilling into apples, potatoes, vegetables or meat a close family resemblance to mincemeat. The chopping knife is usually single; a double knife consists simply of a couple of single knives braced together after the fashion set by the celebrated Siamese twins.

But enquiry, first at one store and then at another, failed to discover a double chopping knife. Single chopping knives were to be had in plenty, and at varying prices which told a sad tale of guileless pricecutting; but double chopping knives were as rare as hen's teeth.

And at last the shopping party landed on Sex.

Sex hadn't any double chopping knives. Yes—he had the single variety, but very few people bought them any more. What the lady wanted was an Universal food chooper.

And he proceeded to display the article, and explain its manifold benefits. Made in three sizes, three extra knives accompanying each chopper, operated with a minimum of effort—here he proceeded to illustrate the manner in which it was attached to a table and operated—easily taken apart and cleaned, capable of chopping anything from a button to a boa constrictor—and the price, only $1.75 for the medium size.

The eloquence of Sex quite took the chopping knife enthusiast off her feet. She ventured to protest that the amount was more than she had intended to pay. Whereupon he quickly resumed the thread of his story, showing the immense saving of labor over a 15 cent chopping knife. The chopper was indestructible, too.

"Take it home and try it," he added, suavely. "If you don't like it, send it back."

There was a faint protest that all the use for which the purchaser had intended the knife was to make a little mincemeat. Sex was ready.

"But this will chop everything," he urged. "You can take it and cut your mincemeat anyway, and if you don't like it, return the chopper and it won't cost you a cent. Shall we send it over."

The upshot of it all was that Sex sold a food chopper, retailing at $1.75, for the regular price, $1.75, where other clerks had been content to say that they hadn't any double chopping knives in stock. He sold a higher priced article, which was commendable enterprise from the standpoint of the housewife. Other hardware clerks had food choppers to offer, and didn't offer them. Sex did.

Keen Eye for Business.

I chanced to be in that particular store the other day. Not on a buying tour—I don't do the family purchasing, as a rule. I was chatting to the proprietor when Sex "butted in" in his most cheerful fashion.

"I'd like to sell you a pane of glass for that window of yours," re remarked.

I laughed, and was about to put him off until to-morrow, next day or the day after.

"I noticed it when I was over that way a couple of days ago," he added, cheerily, "and I said to myself, 'Here's more business for Wymore & Co.' And it will improve the value of real estate in the vicinity to put in a nice new pane of our unbreakable glass, instead of leaving the broken window stuffed up with rags."

He said all that. He wouldn't have said to some customers; but he knew his ground. I guess he guaged me pretty well, and came to the conclusion that a frontal attack would be at once effective and expedient.

The window was an upstairs one; he must have been pretty wide awake to notice it. I had bought a pane of glass to fill it; but the truth of the old motto about "the best laid plans of mice and men" was signally borne out by the untimely actions of the hired help, who put her foot through the pane before ever it had time to make the acquaintance of the putty.

I told Sex all this, and many other things indicative of a desire to postpone further investment in a commodity so precarious as glass.

"What size is the pane?" he rejoined, with urbanity unruffled.

I didn't know.

"The best way will be to have our man go up and take the window out and do the whole job," he said, placidly. "I suppose you will want double diamond."

Enquiry showed that double diamond cost more and was twice as thick; hence, emphasized Sex, far more durable. He waxed eloquent on the virtues of double glass. And I ended by telling him to go ahead, get the window and put in the same kind of glass as was in it before.

The work was done when I reached home. The bill was just 55c. And that included double glass.

"All that fuss over a 55 cent transaction?" you exclaim.

No—there wasn't much money involved, nor much profit. But Sex, true to his policy, made his sale, and sold the better article too. The same keen use of those big eyes of his will just as often land orders involving $55 as orders amounting to only 55 cents.

In fact, I am living in the fearful expectation that he will be buttonholing me one of these days with the annoucement that nothing would gratify him more than to replace my old shingle roof with something up-to-date in metallic or prepared roofing, and that he will not take "No" for an answer.

Sex is what is colloquially termed, "a mixer."

Not content with infusing life into dead window displays, selling $1.75 articles to people whose price limit is 15 cents, and keeping his eye peeled for business ranging in magnitude from a 55 cent window pain to a $400 plumbing job, he finds time to be "chief push" in at least two of his church organizations, and holds office in the Sunday School. And this means, not that he seeks the offices, but that he and the officers are both looking for one another at the psychological moment. So that he must have developed to a large extent in himself that great factor in all successful business—the capacity for annexing friends.

Last summer, when the baseball season was at its height, he was an outstanding spirit in the hardware boys' team, which wiped the dust up with many an opponent on the diamond.

In years to come, when he has a business of his own—whether obtained by hard work or by the equally traditional process of absorbing his employer's daughter—I daresay he will be a leading worker in the Retail Hardware Association, a clear headed member of the city council, Lord Mayor, and—well, everything that is usually doing in the fairy tales, and probably a lot more.

Selling Cutlery in Hardware Stores

Pointers Regarding the Manufacture and Sale of Knives and Razors by a Clerk in a British Columbia Store Who Has Made a Study of the Goods He is Employed to Sell Displaying Cutlery.

By W. B. Christopher.

A good stock of cutlery ought to be carried by every hardware store. It is, or ought to be a very profitable line of goods. It should not be, as it too often is, a side line, but a regular staple line always kept to the front where it can be readily seen, and no opportunity lost to make a sale.

The buying and selling of cutlery entails a great deal of care and skill. A buyer or salesman to make a success of it, must have a practical, or at least a theoretical knowledge of the cutler's trade. For instance, a customer comes in to purchase, say, a pocket knife, you show him several patterns; two of these may look exactly alike and yet the one be double the price of the other, if you can explain to him why the one is higher in price, if you can show him that you know what you are talking about, he will, invariably buy the better article. The same applies to all lines of cutlery. Put as much of your spare time as possible into finding out the "why" of things. One method of getting a knowledge of cutlery construction is to find out all you can from travelers who come direct from the factories, either from Sheffield or from the scissor and shear factories of the United States.

Study Your Goods.

Don't be afraid to ask questions. The traveler, if a good salesman will be only too pleased to tell you all he knows, as the better you are able to sell cutlery the more his sales increase. Take a good well-made Sheffield knife and one of inferior quality and carefully compare them, not so much as to finish, as a poor knife may be fairly well finished, but as to general get up and workmanship, the fitting of the springs and scales, the grinding and edge, etc. You will very soon be able to tell at a glance which is the better of two knives.

In table cutlery there are so many different grades of knives that it almost takes an expert to tell the hand forged from drop forging, or shear steel from ordinary cast, and, as in use these things make a great deal of difference, if you can show your customer just exactly where the value lies he is almost certain to take the best. It goes a long way to have, and to show that you have, confidence in the goods you sell, this you cannot have unless you can intelligently talk on the points of difference between your own good line and a cheaper line, possibly carried by a competitor.

In cutlery it is a mistake to sell a poor article just because it is cheap. Keep the best and hold your trade. There is no satisfaction either to your customer or yourself in a poor article. On the other hand there is a very great satisfaction to hand out a good sample of the cutler's art and know that it is as near perfect as the most skilled hands can make it.

Another thing hardware men must remember is,—in selling cutlery they are not selling nails, and to put on a good profit accordingly. When a man buys a knife or set of carvers he does not want another immediately, and besides cutlery ought to be made to help out the many lines of builder's and other hardware that are too often sold at, or very close to cost.

English and German Goods.

As to the relative quality of English and German cutlery. In pocket knives the English article is undoubtedly the best, mainly for the reason that in Sheffield all the best makers use the hand forged blades only, whereas in Germany the blades are drop forged, that is, forged by machinery. In machine forging the steel has to be heated to a much higher temperature than in hand forging, and the one blow of the steam hammer does not anneal and toughen the steel as the slower process of hand forging. The hand forged article is always more expensive than the one with the "Fly" blades, but the extra price is more than made up by the superior quality. It occasionally happens of course that the best blade is imperfectly tempered or is drawn or burnt in the polishing and so rendered too soft to hold an edge for any length of time.

In razors the Germans owing to their superiority in hollow grinding have, since the advent of the hollow ground razor, made a superior article and so have had a very large trade both here and in England. During the past few years, however, the Sheffield cutlers have mastered the hollow grinding to such an extent that they now turn out a razor equal in grinding to the best German.

It is in the hands of the finisher that a razor is sometimes ruined. In polishing, the very thin blades are held on wheels running at a high rate of speed,

the friction creates a great deal of heat and if the blade, ground as thin as paper, is left on the wheel a few seconds too long it is blued and rendered unfit for use as a first-class article. The blue mark can be polished out very easily and leave no traces behind, the razor can be sold as perfect when it is really of little or no use, as it will not hold an edge. With the best makers the greatest care is taken to prevent the drawing of the temper in polishing and any that are so spoilt are either thrown out or sold under another brand as seconds. So it will be readily seen that it pays to get the very best makes of razors.

In selling razors have a few of your best patterns that you can guarantee and always offer to exchange any that may not be perfectly satisfactory. Judge if you can what style and weight of razor will suit your customer's beard; and what is even more important see that he can strop a razor as more razors are ruined by improper stropping than by any other cause. In this way you will have little or no trouble with your razor trade.

Displaying Cutlery.

Keep a special case for cutlery and have the knives laid out neatly either on their boxes, or better still, have special trays made with spaces made for each pattern, covering the tray with a bright cloth or piece of velvet, a red or some color that will show cutlery off to advantage.

Occasionally make a special window display and do not wait until Xmas to do so. Put in as many patterns as possible to show the variety you carry, and you will be surprised at the effect it will have on your cutlery sales.

One thing be very particular about,—keep your cutlery clean. Always have a chamois skin in your show case and always wipe carefully the blades of every knife shown to a customer, whether he handles it or not, it won't do any harm to be sure and a sweaty finger mark left on a blade means rust and a consequent depreciation in value. A very little time expended on your cutlery case every day will pay you. Keep it clean and bright and tidy. "Have a place for everything and keep everything in its place."

Travelers Deserve Decent Treatment.

Two Examples of How Retailers Lost Opportunities by Failing to Extend Common Courtesy to Travelers—A Few Don'ts to Salesmen—The Passing of the Drummer.

By Weston Wrigley.

The story was told at a recent retail hardware convention of how F. S. Lovett, a Kansas retail hardwareman, happened to be in a nearby town one day last summer and having an hour to spare after concluding his business decided to call upon a hardware dealer whom he knew by reputation but had never met at any of the retail conventions.

Walking in he presented his card without receiving any reply, but after lingering a few minutes looking over the store he was approached by the merchant, who said:

"Well, Mr. Lovett, we can't do anything for you, if that's what you are waiting to hear me say."

"All right, Mr. A., I thank you very much, but I have not asked you for anything, have I?"

"No, sir."

"How much do I owe you for my standing room here?"

"Not a dollar, sir."

"All right, sir, I will finish looking over your store."

After returning home Mr. Lovett wrote Mr. A. drawing attention to the courtesy and saying that as he had evidently been mistaken for a traveler he wanted to point out that travelers have feelings and are entitled to decent treatment and it was only narrow-minded, hard-hearted and stiff-necked retailers who treated traveling salesmen like dogs while wearing a Sunday-go-meeting smile when talking to a customer. Mr. Lovett rubbed the point in good and strong, saying, that an intelligent traveler, though young, can often give valuable pointers to retailers old enough to know better than to know it all. Then he wound up by extending Mr. A. a cordial invitation an easy chair and a cigar if he ever found it possible to visit Mr. Lovett's store.

A Too-Common Fault.

Another case is that of a salesman doing missionary work for a manufacturing company, his plan being to canvass machine shops for orders at retail prices and then turn over the business to a local retailer who places a certain sized order. The salesman selected a retailer in a certain town and called to show samples and outline his proposition. The merchant promised to attend to him at once if he would lay out his samples on a rear counter. This the traveler did to the best advantage and after waiting half an hour went to the office, only to find that the merchant had gone to lunch and would not return until 3 o'clock.

"I am sorry to hear that, for I have to reach Waterbury this afternoon to keep an appointment," said the salesman.

"Suppose you have," ejaculated the office man, "the boss don't care nothing for drummers, for he says they needn't wait if they don't want to." The traveler's experience told him that the merchant, realizing that he had the representative store, felt that he could be a dictator to those who sought his trade. Taking his business card he wrote this note, which he left with the bookkeeper:

Dear Sir:

I did not come by appointment,
But I opened my samples by appointment,
And I leave without appointment.

Yours respectfully,
B———

The merchant swallowed his pride and telegraphed the salesman to come back, giving him the required volume to earn a 25 and 10 discount, but receiving only a straight 25 from the traveler, the manufacturer backing up its representative by refusing to give the extra 10, the retailer having to be satisfied with 25 off as long as he kept the agency.

Courtesy Always Pays.

There are still many retailers who make the traveling salesmen's lot hard by discourteous actions, cutting them off abruptly or curtly telling them they needn't open their case as there is nothing wanted. But the retailer of to-day is broadening out, his trade newspaper and the retail conventions are making him realize that it pays to be as friendly and courteous to a traveler as to a retail customer.

The best buyer is the man who has been a successful seller of goods providing, of course, he is able to be as thoughtful and courteous in buying as he was in selling. The successful buyer for a retail store must be a man capable of cultivating the friendship of the travelers as it is through this source that he can verify and turn into profit the market information he gathers by a study of trade papers. A knowledge of the goods and of the state of the market is essential and who is in a better position to explain the utility of new goods or the market tendencies than the salesman to whom these subjects are the chief topic of conversation from week end to week end. Then there are other kinds of information which can be secured from friendly salesmen. For instance, stocks of a certain class of goods may be getting short and a glut may be pos-

sible. The traveler who values his customers' confidence and trade will not give wrong information.

The merchant's credit is his greatest asset, whether he conducts a "cash at both ends" business or not and the statements of the traveler who calls on the merchant have much to do with the building up of a business reputation which is a decided advantage in periods of prosperity as well as during eras of dull times.

Some Don'ts for Travelers.

The experienced traveler has, of course, been the one in mind when writing the above, but even some of the experienced adopt methods which encourage some retailers to be abrupt and uncivil. Judgment must be used in all things and the traveler who is not considerate of the interests and feelings of the merchants he calls upon is not likely to be drowned in the milk of human kindness. Matters in this world are too materialistic to expect men to turn the second cheek while the first is smarting from a blow.

Be patient, of all things, and don't push yourself upon a merchant when his store is crowded with customers or his desk piled high with correspondence. Let your presence be known but bide your time. Or if the customer is slow in deciding what quantity to order help rather than hurry him to decide, and if you value his future business don't let him overload. If a customer is worth calling upon he is worth waiting a few minutes for. But expect him to keep his promises and be sure to keep yours, besides guarding against wasting his time. And if the "boss" is not in don't let the clerk or office employes use you as an excuse to "soldier." And, equally important, be honest with your own employer by fulfilling your engagements. If you are given expense money and are expected to cover some small towns, don't go to a telephone office and book a few kegs of nails over the phone when there is a good sorting order waiting for a salesman to call and get it.

Passing of the Drummer.

Evolution brings changes in road salesmanship as in every other sphere of life. The old-time drummer who used to go forth with a pocket full of expense money, a supply of cigars and a mind full of questionable stories has been side-tracked and it is painful to see the few of this type left trying to keep up with their more modern competitors for business.

Slapping a customer on the back and asking him across the road for a drink may have been a successful method of "taking orders" in the past but the modern salesman occupies the story-telling time in talking business, he knows his goods and if opportunity offers he passes some of the knowledge on to the merchant to be in turn told to the clerk. He, too, has an eye for business and instead of taking the orders given he is ever alert to suggest means of developing trade which may be profitable alike for both retailer and the house the salesman represents.

The Travelers' Last Trip

Far From Home at Christmas Time He Managed to Make the Round Trip and Close His Order Book Before the Holiday.

A True Story by J. R. Terrill.

The life of a commercial traveler is both hard and dangerous. He sells goods all day, and rides all night. An accident on the road may kill or cripple him. Exposure may develop consumption, or ill cooked food may make him a dyspeptic. He is assailed by temptations which would be powerless amid the restraints of home. But weariness of mind and body, and the necessity of being friendly with customers, often tempts him to do that which degrades his soul and enfeebles his body. He is to be congratulated if he goes off "the road" as pure and strong, as when he went on. Some do, and what is more, develop Christian character while exposed to the vicissitudes and temptations of the "drummer's" life. The incident referred to below is a true story that will appeal to all.

"I have taken my last order, I am going home," he said, as the clock struck the midnight hour. The nurse looked at the doctor with a significant glance, and whispered: "His mind wanders." Presently he lifted his feverish head from the pillow.

"Any letters from the house?" he inquired. "There ought to be letters here."

Then he slept, and in his sleep he was a boy again; babbling of fishing streams where the trout played, of school hours and romps with his mates. At twelve he suddenly awakened.

"All right!" he called in a strong voice. "I'm ready!"

He thought the porter had called him for an early train.

The doctor laid a soothing hand on him, and he slept. In his sleep he murmured, "Show you samples of our goods? I'm going off the road now. This order closes me out. The house has called me in. Going to have my first vacation, but I shall lose—time—time!"

He dozed off, and the doctor counted his pulse. Suddenly the sick man started up. "Give me a letter from home. Ellen always writes to me here. Dear girl! she never disappointed me yet. And the children! They will forget me if my trips are too long. I have only a few more towns to sell. I promised to be home Christmas—I promised to be home—promised——"

He slept again, and again awakened with a start. "No word from the house yet?"

He was going fast now. The doctor bent over him, and repeated in a comforting voice, the precious words of promise: "In my Father's house are many mansions. If it were not so I would have told you."

"Yes—yes," said the dying traveler, faintly. "It is a clear statement. It is a good house to travel for. It deals fair and square with its men."

The chill December morning dawned. The end was very near. The sick man was approaching the undiscovered country from whose bourne no traveler returns.

"I've changed my route," he murmured faintly. "The house is calling me in. Write to Ellen and the children that I am—on—my—way—home—it's in my sample-case—without money and without price—a good house; fills all its orders as agreed. Call me for the first train. I am going to make the round trip, and get home for Christmas."

They laid his head back on the pillow. He had made the round trip. He had gone home for Christmas.

THE TRAVELING MAN.

Wherever you travel, wherever you go,
Over the ice or over the snow,
Whether over water, whether on land,
There you'll meet the traveling man.

With fleetness of foot like the twinkle of an eye.
You'll have to be swift or he'll pass you by,
He is hunting for business thro' dust and thro' sand,
This is the life of the traveling man.

He is known for energy, for push and for vim;
Don't make any mistake, for it's certainly "him;"
The weak he doth help, but the strong withstand,
This is the pluck of a traveling man.

Hardware Merchants' Business Methods

How Guelph Merchants Deal With Slow Pay Customers—Figuring Net Profits — System in Handling Stock and Delivering Goods—Collecting Freight Claims From Railway Companies.

Dealing With Slow Pay Customers

Guelph Merchants Learn the Advantages of Local Merchants Uniting for Mutual Advantage—An Official Collector Appointed and a List of Dead Beats Printed.

By Stanley Nicholson.

There is no more perplexing question in all a merchant's long list of troubles than the "dead beat" question. As a matter of fact it is roughly estimated that the great army of "dead beats," and they're not only dead, but ice-cold accounts, have been the cause of failure in the cases of many enterprising and energetic merchants, and have brought about all too soon, that hairless spot on the heads of hundreds of others. How to meet this great and apparently increasing class of careless, thoughtless, and, in many cases, dishonest people, is a problem that it is up to the man of to-day to solve. Let him once get a satisfactory solution for this problem and at least 60 per cent. of his troubles will take unto themselves wings, for every merchant knows that it is one think to get a list of customers and sell a lot of goods, and quite a different proposition to keep the bad accounts off his books.

It seems that the Retail Merchants' Association in Guelph has at last found what merchants in other towns and cities want—a system of handling successfully the people who do not pay. Their system not only brings in to the members of the association accounts that have been looked upon as uncollectable, but prevents the bad pay customers from getting further and further into debt and going the rounds of the merchants in the town as bad pay people often do.

How the System is Carried Out.

The official collector system was established in Guelph last June. The Retail Merchants' Association there, after a lot of work and discussion, brought out their new idea. Their object was originally to appoint a collector to act as an official of their association, and to be recognized as such. They foresaw the advantage there would be in it, even in the saving of collection fees alone, and believed, that rather than let their neighbors see a recognized collector calling periodically at their homes, many of their delinquent customers would pay up. They finally decided that it would be better to have their officer paid a salary than a commission and selected for the position, in the person of an ex-storekeeper, D. A. Scroggie. The next question that confronted the association was their official's salary and how they were to raise it. They finally made a bargain with him to take over the work of drumming up their bad accounts for $700 a year. This amount, with the rent of the collector's office in the heart of the city, telephone fees, stationery, and other expenses, amounting in all to about $900, they decided to raise by taxing the merchants who would reap the benefits of the scheme.

A Collection Committee was appointed, consisting of the President, F. Waters; Secretary, H. O. Occomore; G. B. Ryan and J. A. McCrea. They got together and drew up a list of the eighty odd merchants who belonged to the association, assessing each man what they believed was a fair amount, or a fair share of the collector's expenses. Their assessments, ranged from $5 to $15 per year, according to the size of the firms that belonged, and the amount of business done by them. When this list was drawn up it was presented at a meeting of the association, and all the merchants who were satisfied with their assessment on the list, signed their names opposite their respective amounts. Some of the merchants did not at first think a great deal of the idea, and believed there was little to be gained by it. Enough fell in line, however, to make the thing go, and in a very short time the rest saw the advantage of it and began to fall in line. The scheme is now working with such success that the life of the delinquent in the Royal City is anything but a bed of roses.

Strong Point of the Plan.

The official collector of the association was not very long getting acquainted with the slow pay people of the city. While by no means the most welcome visitor at their homes, he was undoubtedly one of the most persistent callers they had. Rather than have him making official calls at their homes every week or so, many people who could not be persuaded by lawyer's letters or threats of suits to settle, settled with the "pesky collector" so as to be rid for ever of him. All kinds and conditions of accounts began to come in as if the merchants all possessed magic magnets and could simply pull the money out. When asked if the money had come in to such an extent as to pay the cost of the collector, President Waters very emphatically stated that in many cases the merchants in the past few months, which, after all, was only a trial, had received over ten times the amount they paid annually in fees—money that they had thought it was absolutely impossible to collect.

But this is by no means the strong point of the plan. The real value of the scheme was evidenced when the "black list" plan was adopted. The "black list" was what really opened the eyes of the stubborn delinquent and gave the merchant the greatest surprise of his business career. This is how it happened. The collector at the end of the first month, in addition to a report of the collections he had made, submitted a list to each merchant, of all the "dead beats" in the city. This list was a revelation. It showed not only how much money "Mr. Dead Beat" owed, but in how many different stores he had accounts. Then, the merchants saw really where they were at. They realized then why some customers had all at once started to deal very largely in their stores in spite of the fact that they lived in opposite parts of the city. They saw through some wonderfully touching hard-luck stories that they had heard, in a manner that set them thinking, and thinking hard. They awoke and were mighty glad of it.

Nor were they alone surprised. When one of those smiling, affable women would come into the store on which she happened to be sponging at that particular time, and with a superfluity of excuses, would ask to have a matter of five or six dollars worth of goods added to her "little bill," the merchant would quickly look her up on the list, and, finding that she had a dozen or so more "little bills," of $20 or $30 with other merchants around town, politely but sternly refuse her any more credit. The

woman, of course, would assume an attitude of indignation.

She would wonder how they "got wise" until in a day or so she would answer a ring at her door to meet the official collector of the association, not with one, but with all her local accounts. Then in a few brief, well chosen words, the collector would explain to her the system and the beauty of it in dealing with forgetful people. After several calls of this sort on the part of the tactful and persistent official the simple lesson of honesty, so long neglected, is generally learned and the delinquent finds that the only way to get off the list is to pay her way and she generally begins to pay.

Sometimes, when the amounts involved have been large, the families have decided to leave town, but the watchful collector keeps his eye on the moving van, and already in Guelph several parties who contemplated leaving the city have been met at the station and finally persuaded to stay a while and make a few sundry settlements. The collections alone make the scheme a paying one, but the black list feature of it is what does the merchant the most good. It warns him not to let the bad ones get any further in on the wrong side of his ledger. If there was not a single collection made the black list scheme alone would pay the merchants for the expense involved.

Collector Has Queer Experiences.

It was originally intended that the collector should wear a uniform, but so far it has not been found necessary. He is a very well known man about town. Some of the experiences of this man who knows the pay days of a lot of Guelphites, are interesting, and some very amusing. The merchants at their meetings and among themselves have many a hearty laugh over some of the reports that he makes.

On one occasion he called at a very fine brick house in the good residential section of the city. At first he thought he had made a mistake, but found that it was the place all right. As it was his first call there he went around to a side entrance and knocked at the door. The lady of the house happened to be bidding one of those long-drawn-out farewells to a lady friend who had made an afternoon call, and these conditions made it rather embarrassing for the collector, and rather more so for the lady of the house. He stated that he was the official representative of the Retail Merchants' Association, was kindly asked in and questioned as to what he wanted. He then stated plainly his mission. "O, yes, yes, of course, I intended to pay those accounts long ago, but kept forgetting. Wait a minute, I'll get you the money now." It was a good haul for the collector, for that woman had been forgetting for several years.

But the official does not always happen in at such an opportune time. Another woman, upon the occasion of his fifth or sixth call, threatened him that when he called again (that was if he had the nerve to call again) he would be met by her husband, who would not merely tell him to go. "That's good," was the collector's reply. "I would really like nothing better than to meet your husband and talk the matter over with him, for I am sure you must be getting tired of seeing me, and I am just as tired of calling, but it's my business to call and keep on calling till I get the money. That's what they pay me for you know. Next time he did meet the husband, but instead of being kicked out he was given a check.

Sometimes, he reports, they pretend they are out and do not answer his ring at their doors, but on such occasions, if he knows that they are not out, he calmly sits on the steps and fills in time going over his day's business until a delivery man or some other welcome visitor comes and gives him a chance to enter.

Taking it all through, the scheme is a wonderful success. Every merchant who is in on it is pleased with the results, particularly the black list part of it. To quote one of them: "It may not actually bring about the millenium, this official collector scheme, but it will help a whole lot, if generally adopted and properly carried out."

There is certainly no reason why it should not be a success in any town or city where there are merchants enough to make it self-sustaining.

System in Handling Hardware Stock

Forms Used in a Montreal Store—While Returns Hardly Warrant the Expense Many Retailers Desire Accuracy Even Though it Costs Money.

By Fred. C. Lariviere.

Believing that simplicity and uniformity are the two absolute qualities of any system to be successful, we have adopted in our business the following:

Every sale slip can indifferently be used for a credit or cash sale and the duplicate must remain in every book. No goods of any kind are delivered except on a sale slip or on an order from the clerk making the sale on which must be marked the number or numbers of sale slips.

Fig. 2. Sales Slip (Quadruplicate) Used for Team Delivered Goods. 7 x 8½

Fig. 1 is a leaf of a book of 50 sale slips made in duplicate and numbered 1 to 50. On these books are added the number of the clerk and consecutive number of his books up to 1,000, when we again begin at 1. These are used by our indoor salesmen only, who mostly sell goods delivered over the counter at time of sale.

The sale slip marked B. 13951 (Fig. 2) is one of a book containing 50 quadruple sale slips, which we try as much as possible to use for sales of goods to be delivered by our teams. These are used by our city salesmen, although our indoor salesmen have them also but seldom use them. The first slip goes to the shipping department, thence to the office; the second remains in the book; the third and fourth are used for delivery—one for the customer and the other one to be signed by the customer and returned by driver.

Sale slip No. 19851 (Fig. 3) is used by our out-of-town salesmen. At their request we have made the size as small as possible, so as to enable them to carry their sales book in their pocket. On this we glue a cost slip, as you will notice. This book is made in triplicate —the first goes to the house, the second to the customer and the third is kept in the book. These last two forms do not require the book number, as none are numbered alike; we put the salesman's number to help reference. On all forms extension columns are on both sides, right and left-hand. The left-hand is used for cost price and the right for selling price, and both are figured out and priced at the same time, so that the sales manager can, at a glance, when checking, detect any error either in cost or selling prices.

We have also added to these another slip. Fig. 4, used for the delivery of goods (by our team or parcel boy), sale of which is recorded on slip Fig. 1. After "Charged," near top line, the first number is number of clerk; second is number of sheet, and third is number of book. If bulky goods, such as washing machines, screen cloth rolls, etc., are to be delivered to the customer, the sale slip or an order on form Fig. 4 is sent to the head of the department, who checks off the goods he delivers.

Every sale is verified by another salesman and no goods are delivered without sale slip or order form bearing the number of clerk, slip and book. We believe that by this system we have been able to cut down to its lowest possible point

Mr *John Smart*

PLEASE RECEIVE FROM **AMIOT, LECOURS & LARIVIERE, INC.**

THE FOLLOWING GOODS

Fig. 4. Delivery Receipt Blank (Duplicate), 5½ x 5½.

the delivery of uncharged goods, unless the customer helps himself.

We would call the attention of your friends more to the principle adopted than to the forms we use, for these are made to conform with our different departments, as in addition to our retail business we have six men calling on architects and contractors; then we have our salesmen for our jobbing business.

Stock Records.

There are various forms of stock records; card or loose leaf are used extensively. Some classify goods alphabetically only; others classify by departments, then alphabetically, without regard to the source of production or from whom said goods have been purchased, although

same is noted as in form Fig. 5. The first column is to register from whom bought; the second column contains number and size; the third, stock on hand when installing the system; the fourth and following, the various purchases made and stock at end of each year; 9-3 in the second line, fourth column, means 3 prs. received in the eighth month, the year being designated by the color of the ink. 14 on the second line, fifth column, is the stock on hand at the end of the year, the color of ink indicating the year.

Others prefer record of stock on card or loose leaf under the name of the firm from whom goods are purchased without paying any attention to the class of goods, as in Fig. 8. The top line is used for the name of the firm, on the second the name, number and size of goods; to the left the date and number of order with the quantity under each heading, the check mark indicates that the invoice has been received. To this is sometimes added in lead pencil or different colored ink the stock on hand at various intervals with date.

In both cases proper delivery of goods

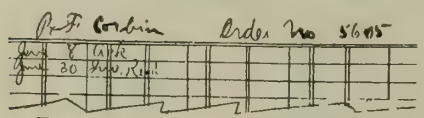

Fig. 7. 3 x 5 Card. "Orders' Diary"

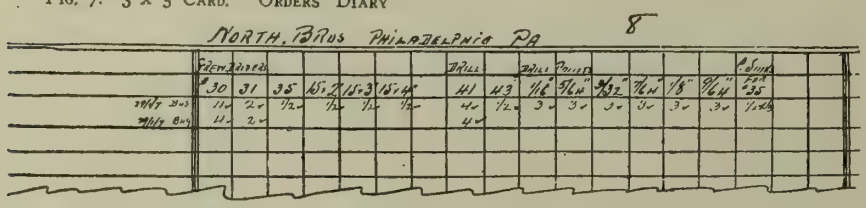

Fig. 8.—Record of Stock Loose Leaf Form 11 x 11 Inches.

ordered is taken care of by the duplicate of order form, Fig. 6. The expected date of acknowledgment of order and receipt of invoice is entered on a card, Fig. 7, called by us "Orders' Diary." Promises of shipment are also noted on these cards. In a drawer are placed the cards; this drawer contains indexed cards dividing each month and in each month are cards numbered 1 to 30 or 31, as the case may be. This is a following-up system, which can also be used for prospects, collections, purchase of seasonable goods, noting engagements and even for maturity of purchases.

In our opinion loose leaf, Fig. 5, is the best, for it permits us at a glance to see the various purchases of one class of goods, whether they have been purchased from one or ten houses. On forms, Figs. 5 or 6, could be deducted all sales and by taking stock you could see if it agreed with records. Returns would not warrant the expense this system would involve, unless the information is desired regardless of cost.

HOW TO FIGURE NET PROFIT.

By H. R. Wellington.

In every business a certain class of expense accounts must be kept, although the titles and arrangement may be particular to the class of business carried on. For instance, in a certain business where advertising is a special feature, it is desirable to open a separate expense account for advertising; then again, cartage or freight may be unusually heavy items and it is necessary to know the total amount expended yearly for each item. These expense accounts may be grouped under comprehensive headings, such as "Heat," "Power," "Water," "Light," etc., but the information gained by separate accounts for each heavy expense item more than compensates for the extra work involved in opening a few new accounts. A plan adopted by a number of large concerns who desire to have detailed information in regard to expenses, is to have representative accounts in the ledger and a special itemized expense book with twenty, or even thirty columns for classification, which book is written up each month from the book of original entry, thus giving the total expenses for each minute division monthly.

Expense of a Retail Store.

At the end of a certain period we find the total of the various expense accounts, after making allowances for (1) insurance prepaid, (2) stationery and sundry expense supplies on hand, (3) rent and taxes due, etc., to be as follows: Light $50, power $15, water $10, heat $60, rent $500, taxes $30, postage $25, stationery $30, salaries $3,000, express and freight $75, delivery $40, 'phone $20, wrapping supplies $30. These items may be classified as follows:

Heat, power, water, light	$ 135
Rent and taxes	530
Postage and stationery	55
Salaries	3,000
Carriage and delivery	115
Store expense	50
Total expenses	$3,885

The sales for the same period amounted to $40,800, the purchases of new goods $30,000. The stock on hand at the commencement (taken at cost) amounted to $7,000 and the stock on hand at the close, taken on the same basis, amounted to $6,500. The trading account therefore shows as follows:

Trading Account.

Dr.	
Stock on hand	$ 7,000
Purchases	30,000
Gross profit	9,500
	$46,500
Cr.	
Sales	40,000
Stock on hand (at finish)	6,500
	$46,500

The partners' share in the profits is simply a matter of arrangement between the partners themselves, but for the sake of illustration we will suppose that $8,000 has been invested in the business, and that each partner gets a salary of $1,000 a year. It has also been decided to charge against the profits interest at the rate of 6 per cent. on the capital invested. Our trading and profit and loss accounts would then appear as follows:

Dr.	
Total expenses	$3,885
Net profit	*5,615
	$9,500
Cr.	
Gross profit	*$9,500
Dr.	
Partner salary	$1,000
Partner salary	$1,000
Interest, $8,000 @ 6 per cent.	480
Balance credit profit and loss	*3,135
	$5,615
Cr.	
Net profit	*5,615

USEFUL LEGAL NOTES.

A note by a minor is void.

It is a fraud to conceal a fraud.

Ignorance of the law excuses none.

Signatures in lead pencil are good in law.

Notes bear interest only when so stated.

Principals are responsible for their agents.

A receipt for money is not legally conclusive.

An agreement without a consideration is void.

A promissory note dated on Sunday is void.

The acts of one partner binds all the others.

Contracts made on Sunday cannot be enforced.

The law compels no one to do impossibilities.

A note obtained by fraud, or from one intoxicated, is void.

If a note be lost or stolen, it does not release the maker; he must pay it.

How to Handle Freight Claims

The Essentials of a Successful Claim and the Importance of an Accurate Statement Outlined—Sample Form Used Successfully by the Granby Hardware Company.

By C. E. Max.

A claim should, in every instance, be based upon uncontrovertible facts substantiated by documentary evidence. By this I mean to eliminate all likes and dislikes and all displays of temper—be sure of your ground and then establish your claim. The simplest way to do this is always the best way, and the time to secure facts is at the time goods are delivered to you. You may have a claim for leakage and conclude at once that the shipper would not send a leaky package and the railroad company had no business to receive it if it did. Upon this assumption you might refuse to receive the shipment and throw it back onto the company's hands. When after a long and tedious fight for the settlement of this loss you finally agree to a careful examination of the package, it may prove that in crating this shipment a nail had been driven through the crate into the can and the leakage started by the jolting of the package in transit loosening up the nail hole, through which the contents was lost. It is plainly seen that the railroad company would not be responsible in this instance, and any reputable house would reimburse you at once.

It is better to spend ten minutes of your time investing the validity of your claim than ten hours fighting for settlement of an indefinite claim.

Claims for Losses and Over-Charges.

Claims are usually based upon loss or over-charges. A claim for over-charge may ordinarily be sustained by the mere presentation of the freight bill calling attention to the over-charge, but where a question of the proper classification of the goods arises the invioce may have to be referred to in order to establish the class of goods actually covered by the bill. You all know that a case containing several different classes of goods is subject to the application of the rate on the highest class.

When you order a bill of goods you are entitled to the bill of lading or a copy of the same, which should accompany the invoice. It is plain to see that this will facilitate your check of the consignment by comparison with the transportation freight bill, and should discrepancies, loss or damage occur in transportation, have notation made by delivering agent showing your exceptions upon face of the bill and you will have smooth sailing with your claim.

Now you have your freight or expense bill with the exceptions noted thereon by the agent, and this, with your bill of lading, showing usually a clear receipt, will form two important documents for your claim. To these add your original invoice or a copy of it (I invariably use a certified copy and keep the original at home), which makes the third indispensable document in filing a claim. Now make out a statement to the railroad company charging them with the amount due you and specifying plainly any facts pertaining to the claim, and these four documents will invariably bring you the desired results. Number your claim papers consecutively and keep a copy of these statements for future reference.

Should settlement be unreasonably delayed, follow up with tracer, which means a simple letter to the agent with whom you filed the claim, referring to the claim number and date of said filing. My experience has been that, where bulky correspondence is eliminated and as few words as possible used in filing a claim, the results are more satisfactory. Do not complicate your claim by trying to explain too many things. State facts, and the railroad company will do the balance.

Claim Blank Referring to Damaged Freight Shipment.

The Importance of Promptness.

Promptness is quite a factor in the success of a claim. I never delay the filing of a claim waiting for bill of lading. should that document be lost or not mailed with invoice, but start the investigation at once with a statement that the bill of lading will be produced later

and follow the claim papers. Promptness in every phase of business is, in my judgment, one of the important keynotes of success. A sluggish person in charge of your claim department would better be sent off to some watering place where he can take life easy and let some wide-awake person have a chance to make a success of that department, which I consider a very important end of any business. It is the balance wheel to a business and affects your annual report of earning to a very great degree, as it deals with every department of the business during the entire year. A well regulated claim department is an asset to the business outside of the claims which may be handled, as it will create a carefulness on the part of those with whom you have dealings which in itself is a protection to your business.

In instances of petty losses from cases or crates, be sure to find any evidence of the box or crate having been opened and have the delivering clerk or agent fully understand the matter, as his attitude will forecast the answers he will make to the company when your claim is referred to him. He may try to shift responsibility, but you want facts, and should he refuse to handle your claim properly, secure an outside witness to the condition, have him sign the statement with you, then mail the papers direct to the claim agent or general claim department of the road with an explanation for so doing.

Broken Castings.

Stove castings and miscellaneous castings are usually broken by rough handling or accidental fall. In such cases examine the package for any signs of rough handling, like the jam of a truck, etc.; then examine the broken parts for old cracks or flaws, which will be very important evidence in support of your claim and assist in placing the burden where it properly belongs.

The head officials of a road must be reasonable in dealing with the public, if they retain their prestige in this age of competition, and any agent or clerk, who is big-headed or insolent has a wrong conception of his duty to the patrons who give the road their business; but it is generally a very easy matter to bring about an adjustment of your difficulties if you will keep cool and note carefully the points mentioned.

Common Sense and Energy.

There is nothing mysterious in the handling of claims. You may substitute copies for original documents, but there is no substitute for the exercise of a little common horse sense and energy while compiling a claim.

Poor spelling, poor grammar and poor writing may be overlooked and your claim meet with success, but a claim based upon a false premise, with untruthful statements running through it, ought to be pigeon-holed. Hence I reiterate: The few essentials of a claim are: The bill of lading; freight or expense bill, with the delivering clerk's notation of any exceptions upon the face of the bill; the invoices or a certified copy. These and a plain statement of facts in the presentation of the claim will bring you a satisfactory adjustment. Be sure that the delivering agent has a proper conception of your loss or damage and so noted on the freight bill. The importance of this is apparent.

If your claim department is a bugbear of your business, just try the method of reviewing that part of your work the first thing in the morning and report results at the next annual convention of the Retail Hardware Association.

BUILDING A MAILING LIST.

A good name list of customers and prospective customers is a valuable asset to any merchant. The retailer in the country village can use such a list to as much advantage as can the largest city merchant. In small towns the merchant must usually depend upon the resources at his command to build up a suitable list of names.

One merchant who wished to secure a name list sent out his clerks during dull times to call upon the people in their own homes. These clerks drove about the surrounding country and secured the names of all adults, arranging them under the various headings—Father, Mother, Young Ladies, Young Gentlemen, Boys and Girls. To these were sent circulars describing goods appropriate to all classes. If a family contained only adults, the circular describing children's goods was not sent.

Another method of collecting names is to give a voting contest of some kind, and arrange the ballots that each person voting must record upon it his name, address and such other information which the merchant wishes to know.

Good names can also be had from assessor's and poll lists of the townships in the vicinity of the merchant.

Another method by which the names may be obtained at practically no expense is to prepare cards containing five or six ruled lines, and give one of these to each of the country customers when they call at the store to trade. Request them to fill in the information asked and return the cards.

Some merchants offer no inducement more than the promise that the names go to make up a mailing list and those whose names appear on the list will always be promptly notified of any new goods or special bargains on sale at the store. Some merchants hasten the return of the cards by offering some inexpensive gift for each one brought back properly filled out.

RAILROAD CLAIM BLANK.

Effective methods of handling damage claims against railroads for freight lost or injured in transit are of great interest to the trade. Both wholesale and retail merchants have many such claims to make in the course of a year, and the latter, since they usually maintain but a small office force, are especially in need of some simple but sure and comprehensive system for filing and following up their claims. Very often a claim is filed and then forgotten and lost sight of and the railroad company is not likely to be the first to take it up. Frequently, too, in making claims by letter, merchants will leave out some important details which will cause unnecessary trouble and delay an adjustment.

Having experienced these difficulties, Granby Hardware & Implement Company, has evolved a method which, since its adoption, has enabled the company to handle and collect damage claims with much success. A railroad claim blank is used, as shown in the accompanying illustration. This is about 8 x10 in. in size and is designed to cover every important detail, and after using it more than a year no reason has been found to change it. The blanks are arranged in duplicate with alternating white and yellow sheets and are bound in book form, so that a correct record of all claims will be kept in one place, where it cannot be lost sight of. The original white blank is perforated so that it can be torn out and sent to the railroad company. In making claims it has also been found important to send the railroad companies a duplicate or certified copy of invoice, bill of lading and expense bill; all other data are shown on the blank form, as illustrated.

CREDIT SYSTEM LOSSES SLIGHT.

A Western dealer who had also less than one per cent. of the credit accounts carried sends out monthly statements and has found it to be of great advantage.

"There was a tendency on the part of some of my customers to become indignant at my method of conducting the credit end of my store at first," he writes, "but after I fully explained the system I was endeavoring to carry out, and that they would thus be apprised of how their accounts stood at the end of each month, they grew to like it more and more. It has served the purpose of inducing people, who owe the store, to

pay up before their accounts grow too large. In conducting this system, I make use of a loose leaf ledger to good advantage. It has both white and yellow sheets for original bill and copy. A cash register is in use, also, and in it tickets representing the day's charges are placed, and these are posted the following morning."

Following is the specimen of a sample account used in this store. The original is sent to the customer the first of each month, a carbon duplicate being kept in the ledger until the page is filled, when it is filed away in a binder

John Jones, Windsor, Ontario.

Hardware Store Accounting

A Man, Who Has Made a Study of the Business End of the Hardware Store, Outlines Some Practical Ideas About Store System.

Each clerk should be required to make out a sale slip for every sale, whether it was a charge or cash sale. When these slips are placed in the register a record is made at the same time of the sale on the detail slip in the machine. At the close of the day each clerk goes to the machine, takes out his sale slips, foots them up and enters them on a slip called "Clerks' Daily Statement." In case his cash does not correspond with his cash sale he is required to make notation of same on his daily statement. After he has made up his cash he puts all the sale slips, together with his cash in a pocketbook in his drawer of the register.

After the clerks have all made up their cash, the bookkeeper goes to the register, takes off the detail slip and checks each clerk's business with this slip. By this method the clerks are made more careful. They know if they make any mistakes during the day that they will be detected when that day's business is checked up.

By also requiring a slip to be made with every sale clerks are not nearly so liable to forget to make charges. I find at the end of the year that my per cent. of profits has amply paid me for the extra time that it takes to make these slips out.

After each clerk's business for the day has been checked up by the bookkeeper, all the slips are put in the safe until morning, at which time they are taken out and posted to their respective accounts in a loose leaf ledger. In posting these saleslips to the ledger we are careful to note in the folio column of the ledger a letter designating the name of the clerk that made the sale. By doing this it makes it easy to refer to the sale slip should that be desirable at any future time.

After these sale slips are entered to the debit of their respective accounts in the ledger, we prove the entry by footing up all the sale slips for the different departments, and enter them to the debit and credit of the different accounts to which they belong, this entry being made on the journal. At the end of the month the totals of these columns are posted to the proper accounts in the ledger.

After the total of the sale slips are entered on the journal, they are carefully folded together with a detail slip statement, and the detail slip from the cash register and filed in a card index under the month and date to which they belong. At the same time we are careful to keep each clerk's sale slips separately, so if we have cause to refer to them to verify any entry, it can easily be done.

If an account was disputed I can look at the account and see that "A" sold the time disputed, and that it was sold on, say, January 23. I would go to card index file, take out the sale slips for January 23, run through them, and find A's slips, and if there had been a wrong entry made I would thus detect it.

Handling Cash Items.

I never allow any cash to be paid out without taking a voucher for it, whether the account is paid in cash or by check. If my drayman brings up a shipment of goods, he brings the expense bill along with the shipment. We take the bill and check up the shipment. In case there is any breakage or shortage, I have it noted on the expense bill before I allow it paid. If this amounts to enough to justify a claim being filed, I have the expense bill to show with the breakage or shortage noted thereon. This together with bill of lading, will be two important documents in favor of claim.

To these add a copy of your invoice, together with a bill for your claim, make a copy of same, and you have a claim complete. When you file same have the agent with whom you file it give you the claim number, make a note of it on your claim, and your claim is complete and ready to file away. I have a letter file in my desk that I use for these claims. Before filing away I make a note of the number of claim in my diary, which I keep on my desk. If I do not hear from the company at expiration of the time I have allotted for that, I write to claim agent, calling his attention to same.

When any of us take an order for repairs, we do so on a small memorandum book used for that purpose. This book has perforated leaves that can easily be torn out. For illustration: If John Jones comes into my store and wants F428 for his cultivator, the clerk to whom he is talking makes a notation on the memorandum book like this: Order F428 for (giving name of cultivator) for John Jones, etc. This he will tear out and lay on my desk. At some convenient time during the day I will order the repair, keeping a copy of the order, and file copies away in same file that I have on my desk for railroad claims, etc. When the piece and invoice comes in, I take copy of order, and pin it to invoice. If repair is not to be sent out, I notify party by mail that the repair for his cultivator has come in and for him to call for it. Now, in marking the repair, I do so with a shipping tag, putting on this tag the party's name, the date he was notified, the price of the piece, together with the freight or express charge, as the case may be.

MISREPRESENTATION.

Selling goods at a fixed price that represents profits to your house is salesmanship, but the man who is constantly cutting prices and seeking ways and means by which he can secure orders by manipulation and misrepresentation, contrary to the rules of his house, is not a salesman, and he will not only prove a disappointment to his customer but to both his company and himself as well. Never misrepresent your goods; when it becomes necessary to do so it is time to quit the business, or secure another line that does not require misrepresentation. We all make mistakes, but the man who persists in making them is either a fool or dishonest. We are employed to represent our company, not to misrepresent it. If you are right you can prove it; if you can't prove it, the chances are you are not right.

SYSTEM IN DELIVERING GOODS.

The Russill Hardware Co., Toronto, who do a large c.o.d. business in Toronto and the surrounding country, keeping four delivery wagons going during the summer and fall months, have a simple system in their shipping department.

Fig. 1 illustrates the delivery slip on which a customer's purchases are entered, the slips being made out in duplicate, one to be retained in the shipping office and the other to go out with the goods to receive the signature of the customer and then to be sent to the office for checking. Each slip is numbered consecutively.

ROPE THAT WON'T SPIN.

A non-spinning rope has been recently made for use in quarries, mines, and similar places where it is desired to hoist heavy weights with a single rope.

With the use of the rope of standard design the load has a tendency to rotate because the action of the weight is to untwist the strands, and this tendency must be overcome by the use of a guide rope, by which the load is controlled on its journey through the air. As a test a block of marble suspended by the single line was raised from a depth of more than 250 feet without making a half-turn in its ascent. No guide rope was necessary.

In the construction of this rope an inner series of wire strands is wound in one direction over a core, and an outer series of wire strands is wound in the opposite direction about the inner series as a core. The wires which make up each of the individual inner strands are twisted in the same direction as the lay of the strands, but in the outer strands the individual wires are laid in opposite directions to the lay of the strands. The number of strands required for the second or outer layer must, of course, be greater than the number of strands in the inner layer.

For this reason the inner layer has the wires as well as the strands all laid in one direction as described, thereby giving them a tendency to untwist much faster than if they were twisted in the direction opposite to the lay of the strands. The wires in the outer layer, being laid in an opposite direction to the lay of the strands, do not tend to untwist as fast as the inner layer. The strands in the outer layer, however, counteract the tendency of untwisting the rope as a whole.

When a weight is applied to the end of the rope the greater number of strands of the outer layer has a tendency to untwist in one direction, whereas the fewer strands of the inner layer have a tendency to untwist much faster in the opposite direction, and it is found in practice that these two actions almost perfectly balance each other.

HOW TO MAKE SHOW CARDS.

The first thing which a beginner in the art of show card writing must learn is the proper materials to use writes W. R. Sendlebach. Those which I have found the best are as follows: First, red sable brushes, Nos. 1, 2, 4, 6, 8 and 10. Second, coach paint, ground in japan. This paint can be had in any color and must be thinned with turpentine so that it will flow freely from the brush. Third, cardboard varying in "ply" or thickness. It comes in four, six, eight-ply. For a card 7x11 inches, or one-eighth of a full sheet, six-ply is necessary, so that the card will hold its own weight without curling. For cards 11x14, or one-fourth sheet, or one-half sheet, use eight-ply, and for a whole sheet use ten-ply. These materials are all that is necessary. One of the most important things for a beginner to learn is how to care for his brushes properly. If they are allowed to become dry and stiff after they are used they will soon be ruined, and if they are placed in turpentine when not in use—as they are by many card writers, they will speedily rot. When the artist is through using them he should wash them clean in turpentine and grease them with a little vaseline. This will keep them always soft and moist and preserve them for a long time. Constand practice is the one great requisite and not less than one hour should be devoted to it each day. The student should secure a good model of the Roman alphabet and take up the study of one letter at a time, never proceeding to the next letter until he has completely mastered its predecessor. By the time that he has done them all he will have become an expert.

Special Saturday sales are being conducted by some stores from 7 to 9 p.m. to catch the after supper trade of working people who are unable to shop during the day. The goods put on sale are such as will appeal to the popular trade. This plan usually meets with good success.

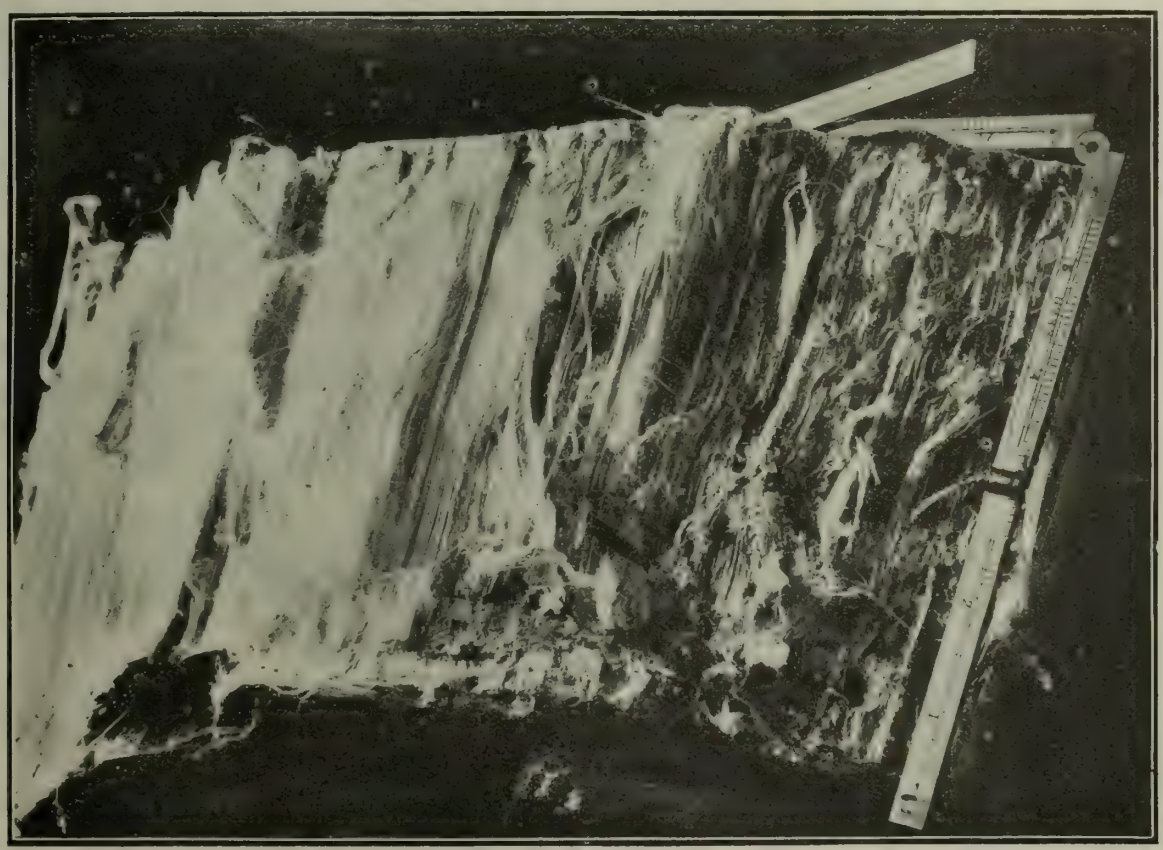
Quebec's Monopoly in Asbestos

A Description of the Greatest Mineral Asset of Quebec Province—The Markets of the World Controlled—The Peculiar Features and Properties of Asbestos—Its Mining, Milling and Manufacture and the Many Uses it is Put to.

By F. J. Arrowsmith.

In these days of newspaper publicity, of Government reports, and of industrial statistical information, the average Canadian naturally believes that he is thoroughly informed as to the part that the mineral development of his country plays in the commerce of the world. He knows of the growing percentage in production of iron, steel, coal, copper, etc., of the increasing rather than diminishing wealth of the Cobalt and other silver regions, and of the probability of much greater fields of mineral wealth as yet undiscovered. Day by day the vast and seemingly illimitable riches of his country are shown in convincing manner until his imagination becomes fired, and he sees his country not only supplying her own increasing industrial wants, but yielding up her treasures to the world, as in the case of grain, and commanding those markets at present not touched.

But amid all this knowledge as to mineral production, and amid all these thoughts as to Canada's day to come, there is one mineral of which very little account is taken, and yet this mineral—although in a way still in its infancy—has unobstrusively attained the pinnacle of commercial activity and won for itself pride of place in the world's market—we refer to asbestos.



Crude Asbestos Showing Length of Fibres.

Many Uses of Asbestos.

The hardwareman who sells asbestos engine packing, asbestos sad irons, asbestos mats, and asbestos lined ranges and stoves; the manufacturers' agent who handles imported asbestos in its various forms, and the builder who uses asbestos roofing, paper and asbestos plaster, do not generally know that although the manufactured article may bear a foreign stamp, the crude material came from Canadian soil—from the historical Province of Quebec. And the public generally, when they read of the developing usage of asbestos all over the world, when they sit in places of amusement, or work in modern business premises relieved to a large extent from the apprehension of fire by the free employment of asbestos, are, we venture to think, equally innocent as to the source of supply.

Astonishing as it may seem to be, the world is at the feet of Quebec, so far as asbestos is concerned, for fully 90 per cent. of the raw material used comes from this Province. The United States may be the largest manufacturer and consumer of asbestos products, but the

quantity of raw material mined in the country is insignificant. The total production for 1907, according to the annual report of the United States Geological Survey, was only 653 tons, valued at $11,899. Contrast these figures with the returns for Quebec as given in the latest mining report issued by the Canadian Government. The production of asbestos for 1907 was 62,241 tons, valued at $2,484,768, while for asbestic —the pulverized rock containing short fibres of asbestos, used chiefly for wall plaster—the total was 28,296 tons, valued at $20,275. When it is considered that up to a few years back the production of asbestos in Quebec was confined to a few close corporations, which accounts for so little being heard of the industry, and that the developing energy of outside capital was absent, these figures are astounding.

A Remarkable History.

The history of asbestos mining in Quebec is remarkable, although it may not have quite the truth-stranger-than-fiction features attached to the exploitation of gold in Coolgardie, of diamonds in Kimberley, or of silver in Cobalt—to give a few instances of the mining romances of the world. In each case the discovery of the mineral was accidental. In each case the discoverer had no idea that he would effect such a striking alteration in the balance of the world's mineral output, nor did he, in his greatest flights of imagination, dream of the growing cities and towns that would emerge phoenix-like from the working of the mines.

Asbestos in Quebec differs in a remarkable way from the other similes we have given in that its development has been effected under the silence of private ownership, and not under the full searchlight of public attention, and is, therefore, somewhat unique. The "Down Easter," with his Yankee strain, knows a good prospect when he sees it, and the original discoverers of asbestos properties were sufficiently alive to the value of their asset to keep it to themselves, so long as it was possible. They quietly shipped the raw material abroad, cornered the markets, and, we take it, quietly banked the money at home. Quietly, too, have towns and habitations grown up around this silently worked industry of the Eastern Townships; for it is in this beautiful and gloriously rich part of Canada—in the serpentine areas of its mountainous belt—that the asbestos fields are confined.

Thetford and Black Lake, for instance, some 30 years ago, had no beaten tracks; a railroad from Quebec was not thought of, and primeval nature still held the upper hand. But asbestos changed all this as grain changed the Northwest. The picking up of a peculiar piece of substance, which at first seemed like rock, and yet crumbled into fibres in the hand; the hurried journey to Quebec to have the stuff assayed; the start of astonishment, "You have found asbestos"; the taking out of mining rights; and the commencing of operations, altered the features of the surrounding country. Unbeaten tracks widened into roads, quarries gaped where animals had roamed in full security, and Thetford and Black Lake became in time thriving towns, with a population of some 6,000 to 7,000 inhabitants in the former case, and some 3,000 to 4,000 in the latter, all engaged and dependent upon asbestos mining. As mining develops—and the progress will be greater in future, judging from the exploitation now going on—so will new towns spring up and old ones extend, until Canada will look with pride to the busy hives of industries, the quarries, mills, and factories that the greatest mineral of Quebec has engendered. Private ownership no longer holds supreme sway. Public speculation has entered the field, with the result that the progressive element hitherto lacking will now be strongly enforced. New mines from time to time are being found. In fact, it is impossible to gauge the extent of the fields. The whole country in the asbestos area seems teeming with the mineral. It is thus practically certain that unless other fields as yet unknown, and as easy of access, are discovered, Quebec will long enjoy her present world's monopoly. Although only a few companies in Canada are engaged in the manufacture of asbestos, there is no doubt that with the development of production, and of consumption, greater strides will be made in this direction, and that from the mine to the home no outside hands will touch the material.

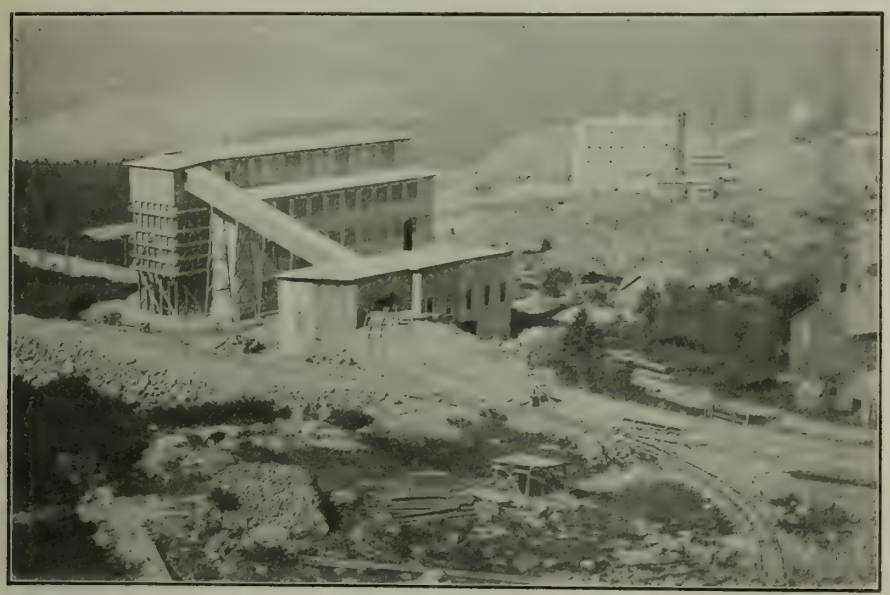
A Paper Made of Stone.

Although it is only within recent years, comparatively speaking, that asbestos has been used so extensively for general purposes, the material is no modern discovery. Its peculiar fireproof properties were known to the ancients, for we are told that in early times the bodies of the dead were wrapped in asbestos cloth to keep the ashes from the embers of the pyre. But despite this knowledge, the mineral has been the slowest in the development of its manufacture of all industrial substances. But the needs of modern times hastened its progress. Inventors began to realize how in a thousand and one ways its indestructibility under fire could be utilized, and as the supply increased, and the cost of production decreased, so the manufacturing of various articles developed, and marketing became more common.

Like all peculiar substances which are brought out in the first place as novelties, the housewife was, at first, somewhat incredulous as to the merits of asbestos. In fact, she only bought it with grave misgivings from the salesman, who himself knew little about the material of which the articles were made. Some twenty years ago, we are told, a Down East traveling merchant introduced among his bargains a stove mat which he claimed to be made of paper, and yet could not be burned—"a new kind of paper made of stone," he said, "the most wonderful discovery of the century." No wonder the people were skeptical of this paper made of stone, but the selling ability of the merchant was too strong for them. He aroused their curiosity to try this paper. They bought the mats, took them home, and tried them with many misgiving, excepting to see their money's worth go up the chimney in smoke. But to their surprise the mats stood the tests. A heated flat iron had no effect upon them, laid on the top of a red hot stove they remained unscorched, and when, as a final test, they were thrust bodily into the fire, their metal rims were twisted, but, wonderful to relate, the "paper" came out uninjured. Needless to say the peddlers' mats were declared good, and he was welcomed the next time he came round.

Asbestos was newer then. To-day it plays, in a great variety of forms, a very important part in the domestic and mechanical arts of every-day life. The list of its commercial application is surprisingly comprehensive, and develops in conjunction with the progress in mechanical and domestic arts. In fact, asbestos is used in many cases without any knowledge of the fact. The housekeeper who first made her acquaintance with asbestos as a stove-mat, now uses it as a stove polisher, as a sad iron holder, as a lamp wick, and as a fire pad under her gas burner, while her kitchen range and her stove are lined with it. Dwelling houses are fireproofed with asbestic wall plaster, asbestos roofing material, and asbestos paint. In office buildings and factories the steam pipes are overlaid with asbestos covering, and the boilers with asbestos cement. Machinists use asbestos yarn or wick for packing pisten rods and valve stems, and asbestos millboard as a joint packing. Electricians value it as a non-conductor. The modern theatre has fireproof stage curtains of asbestos cloth, and the best equipped firemen wear asbestos uniforms. Storage rooms on ocean steamships are lined with asbestos, and it is equally serviceable in

the domestic refrigerator. Chemists find asbestos fibre the best filtering medium, and because of its non-absorbing and antiseptic qualities it is valued in hospitals. In fact it saved many lives during the Boer War by preventing gangrene. It can be easily seen that a substance that fire cannot burn, that eating acids will not touch, is invaluable in every branch of life.



Dominion Standard Asbestos Company's Milling Plant at Black Lake, Quebec.

A Peculiar Anomaly.

Asbestos—a name which is derived from the Greek, and means unconsumable—in its crude state, is a curious substance. Nature has given us some peculiar anomalies, none more so than in this case. Between hard serpentine rock it shows, a green opaque substance somewhat resembling glass, and looking to be of the same consistency, and yet its hardness is only apparent, for a gentle rubbing transforms this rock into silky flexible fibres resembling cotton, and the more insistent the rubbing the more numerous become the fibres. The length of the threads vary, some have been discovered as long as 6 inches, but the bulk recovered is very much shorter, being between ½ inch and 2 inches or so. Asbestos crops out on the very surface of some of these Eastern Township hills, and the effect of human or animal feet treading upon the veins is to mat the asbestos and to produce a felt-like web. Long before the peace of these hills were disturbed by the blasting of dynamite, and the whirl of the machinery in the mills, the birds took advantage of this felt-like substance, and built their nests of it, showing an intelligent appreciation of its clean and substantial qualities.

What chemical action produces such a substance, how it came to be deposited or formed between the rocks, no decided opinion seems to be formed. It has been poetically described as the link between the mineral and the vegetable, and there may be more truth in that statement than many people believe. But there the veins are, however, whatever their origin, running through the green rocks in a zig-zag fashion, following no direct line, but offering up in their formation and peculiar characteristics a silent tribute to the wonders of nature.

No expensive apparatus is needed in the actual mining of asbestos, no need of tunnelling, although this has been attempted with varying success at one or two mines to escape the rigors of winter. The crop is quarried in the open as marble is worked, and the rock is taken down in a series of benches or terraces which vary in dimensions according to the sizes of the pits. The main essentials to render asbestos of economic value are, length, fineness and elasticity of fibre, tensile strength, and power of fire resistance. The Canadian article possesses all these qualities, hence the extent of its markets.

Mining, Milling and Manufacturing.

Although the first discoveries of asbestos were made in 1862 in the Des Plantes River region, followed in 1877 by discoveries in the Thetford and Coleraine districts, mining operations only commenced in 1878, and that on a very small scale. In the succeeding ten years the industry developed rapidly. No mechanical means were employed at the time to separate the smaller asbestos fibres from the adhering rocks, and it was found that only the mines which had a large proportion of crude asbestos could continue profitable operation, by reason of the heavy cost of cobbing the poorer varieties. Consequently, the industries in the middle nineties received a severe setback. Repeated experiments, however, on the part of those engaged in the industry evolved a method of mechanical treatment, which in the course of years has been improved, until at the present time every mine in the asbestos district is equipped with a complete milling and fibreizing plant. By this method of treatment all the smaller fibre, which in earlier years was left in the rock and thrown on the dump, is now saved. Since then, new uses for this short material having arisen, the total value of the mill fibre is at present in excess of the total value of crude asbestos produced, in fact, some properties which produce no crude asbestos are successfully operating.

Dominion Asbestos Company's Pit No. 1 at Black Lake, Quebec.

As we have said, the mining itself is a simple operation, although the fibreizing and manufacturing processes are complicated. Dynamite is employed to break up the rock, the pieces being sorted in the pit into crude, or long fibres—usually in the compact masses as

it occurs in the vein—and milling rock. The finer and larger the vein, the easier, it is, of course, detached from the rock. These products are hoisted separately in boxes by means of boom and cable derricks. The crude and the mill rock are sent to the cobbing sheds and mill respectively. The crude is cobbed by hand and cleaned, and is separated into two quality grades. The mill rock which ranges from 30 to 80 per cent. of the total rock hoisted undergoes a system of treatment which is peculiar to this industry. Hardly any two mills are alike in their method of treatment, although the general process is the same. The rock is sent to the mill bins, while the fines, or shorter asbestos, from the pit undergo a preliminary drying before crushing. This drying is either performed by rotary dryers, or by coils treated by exhaust steam. All the mill material is then sent to a coarse jaw crusher, passing thence to picking belts, and thence to a rotary crusher. The crushed rock is delivered to a shaking screen, and any fibre which may have been liberated by the coarse crushing is sucked from the screen by an exhaust fan. The rest of the coarse rock and fibre passes to either rolls or grinders, and is sent to another shaking screen, and the liberated fibre is sucked from this screen by another exhaust fan, while the rest of the coarse material passes to the cyclones or fibreizers.

While the method of coarse crushing may vary considerably in the different mills, the cyclone is used in the majority of the mills, and forms one of the integral parts of asbestos separating machinery. It consists of two beaters—of a screw propeller type, encased in a cast iron chamber—which beaters are driven at a speed of 2,000 to 2,500 revoluctions per minute in opposite directions. The material is fed to this chamber, and the whirlwind created by the beaters hurl the particles against each other, thus reducing them in size, and liberating the fibre from the rock. The material is discharged from the fibreizers to a shaking screen, and an exhaust fan sucks the fibre from the screen. The residue is sent to the dump. The fibre extracted is then sent to grading screens, and various other devices which separate the fibre into its various grades. The fine sand from all the screens passes to the dump cars. As might be expected with such a process, numerous changes are made from time to time in the design of new mills. Asbestic, which is largely used for fireproof plaster, is made from the ground up tailings of the mill.

Just Like Wool.

The manufacturing of the fibres into the various articles for which they are best adapted is a complicated process, but the initial preparation is very interesting and worthy of mention. The fluffy stuff from the mills goes to the carding room of the manufacturer just as though it were genuine wool sheared from a sheep, or pure cotton fresh from the plant, instead of a mineral substance that in its original state was mined like a lump of coal. A carding machine, similar to that employed in preparing wool, cotton, or flax fibres before spinning, has been adopted. By this means the fibres are straightened out, and their irregularities eliminated. A fly comb converts the stuff into unspun threads, which are then gathered into rows and condensed. The spinning of the threads brings the manufacture of the fireproof material to the point where it is woven into cloth, packing, and the other forms we have previously mentioned.

HOW SANDPAPER IS MADE.

Sandpaper, or, more truly speaking, glasspaper, is the chief abrasing material used in woodworking, and consists of strong paper coated with powdered glass. In the manufacture of glasspaper, first the glass is washed and sorted, and then broken very fine by stamps or other machinery. The glass chiefly used for best glasspaper is that from old port wine and stout bottles; this, when pulverized, is of a golden color. The different grades of glasspaper are numbered from 3 to 0 (and even finer), and there are corresponding sieves to divide the various grades, or to "size," as it is technically called. These sieves are numbered from 140 to 30, the numbers representing the number of meshes per lineal inch; the finer sieves are covered with Swiss silk, the remainder with woven wire. In this part of the process considerable care must be exercised, as one large particle of glass on a sheet of fine paper would scratch the work upon which it was used and would produce an uneven surface.

The placing of the glass on paper requires considerable skill and experience. The workman has delivered to him plain papers in reams of 120 sheets, each sheet making four sheets of ordinary size. The appliances used are a copper tank holding 56 pounds of glue, a table, a bench on which the sheets are laid to cover them with a cutting machine and a press for packing and tying glass, a hot plate for firing the sheets, a drying room.

A ream or two of paper is placed on the table, and the top sheet is coated with glue by means of a brush resembling a shoe brush, but with longer hair. The sheet is lifted by two corners and laid on the bench, glue side uppermost; the bench has a border standing up some seven or eight inches high on three sides, with a narrow fillet in front. Powdered glass is simply thrown or scraped over the sheet, which then is raised from one side so that the superfluous glass runs off on to the bench and is used again. The sheet is then placed on the hot plate, a hollow, flat, iron bench heated with steam; this causes the glue to boil up and thus securely fix the particles of glass on the paper. All this is done much more quickly than it can be described.

After drying, the sheets are cut up and arranged in quires and reams ready for the market. Glasspaper has entirely replaced the old-fashioned sandpaper; this was made in the same way as glasspaper, except that sharp, fine sand instead of glass was used. Custom, however, has perpetuated the name of sandpaper and we hear but seldom the name "glasspaper."

CEMENT SEWER PIPE.

Portland cement pipes were made in England probably as early as 1825, before the period when earthenware sewer pipes were beginning to be manufactured. Cement pipe of large size, with socket joints, are now extensively used in Germany, and they withstand not only the effects of a severe climate, but the chemical action of sewage. Moreover, they show an extraordinary endurance and remain perfect after a severe frost, when brickwork often fails. It is a material that can be worked and molded in any form and maintains its form when made. It is also capable of repair, which is a point of no small importance. These pipes improve materially by age, and at the end of a year or two they ring when struck with a clear metallic sound. The modern sewers of Paris are constructed of concrete. As early as 1869 thirty miles of concrete branch and main sewers had been laid in that city, and to-day throughout Europe both pipe and large sewers are, to a great extent, made of this material. In America the use of concrete sewers is now beginning to assume magnitude. Since engineers have become more conversant with the properties of concrete their hesitancy in establishing concrete is rapidly disappearing.—Cement Age.

A sign reading, "Have you forgotten anything?" placed on the door serves as a reminder to absent minded persons.

Heating and Housefurnishings

Some Practical Suggestions for the Stove Dealer, the Furnace Contractor and the Tinsmith—Enamelware as Wedding Gifts.

Keep the Store Trade at Home

A Western Retailer Explains the Lesson He Learned by Losing a Customer—Adopted a Plan Which Brought Him the Stove Trade in His District.

By J. L. Jarvis.

It is a great waste of time to sit around and knock because your customers send away for their goods to give their trade to the other fellow.

We live in a progressive age. The business life of even the small merchant is a struggle. Affairs move forward at a rapid rate, and the procession is passing every man's door at high speed. Unless he makes some attempt to stop it he will never be noticed by the procession.

Too many retailers believe that it does not pay to advertise. To some it is throwing money away. To others it is merely a matter of supporting the local printer.

Some people can never see a thing clearly until they are struck on the head with a club. I seemed to be one of that kind until I got it right between the eyes, and it opened both of them right at once.

How a Customer Was Lost.

I met Smith on the street one day and asked him if he didn't want a range. He told me he would want one pretty soon, for me to wait. Well, Smith was a good customer of mine. I had plenty of ranges to sell, and I considered that sale as good as made. But one day I chanced to be at the depot and I saw a steel range being unloaded. It had been shipped in from a neighboring town about 40 miles away. It was addressed to Smith, my supposed customer. I made it a point to meet Smith when he came to the depot after his range. Of course I jumped on him for not coming to me before he bought.

"Well, I suppose I should," says Smith, "but I saw Jones' big ad in the newspaper, and it struck me just about right. He showed a picture of the stove, told how it was made, how it operated. He told all about it and the price there in plain figures. My wife read the ad over, and we talked about it, and finally decided that it was just what we wanted. So we ended by sending him a check for it."

In defense of my position I asked him to walk over to my store, look at my ranges and see how much less his cost than mine. This was mighty poor consolation, when the deal was made. But to please me he came over to the store. When he saw my price he acknowledged they were the same as Jones' prices, and I had the same identical make that he had bought.

"Now, if you had come to me in the first place," I said, "you would have bought the same range and saved your freight."

"But I never knew that," answered Smith. "You never took the trouble to tell me anything about your ranges."

A Selling Plan That Won.

That sort of opened my eyes. So I began to watch the depot, and I found there were a lot of people in my town that did not seem to know that I was in business at all. I simply got desperate. The first thing I did was to use a full page in the local newspaper. I gave a full description of my stoves, and quoted the prices in bold figures. In connection with this I gave some extra inducements. I made a clear proposition to give away one range on a certain day to the person that held a lucky number.

All it cost anyone to enter the contest was to come to my store and give me his name and address. In return I gave him a number. The only restriction was that only one in a family could have a number. It was further provided that on the day the drawing was to take place, which would be advertised, the lucky number must be presented inside of thirty minutes after it was called. This meant I intended to have my store crowded, and get my money out of the range in advertising.

The first day that I advertised that the drawing would take place it rained and poured, but there were 2,000 people blockading the entrance waiting for the appointed hour. In taking their names, when distributing the tickets, I found out all about their needs in the stove line. Then I used this list as a mailing list. That first year I sold 40 ranges. Did it pay?

I followed up the free range offer with a gasoline stove, and in the fall with a heater. Now I have turned the tables. I am doing the shipping act instead of the other fellow. And there is not a family living within 50 miles that does not know that I handle ranges and stoves, what kind they are, how they are made and what the prices are.

They say a young tiger is harmless so long as he does not get a taste of blood. The first year of successful advertising was a taste for me. The next I did was to supply myself with a couple hundred electrotypes, which I secured from the manufacturers of my lines. Then I started in to run whole-page ads which were changed regularly for three years. I advertised everything in my store from a 5-cent cookie cutter to a threshing machine.

Some merchants have said that they would think it would be pie for my competitors to know all my prices. I go at it just as if I had no competitors, and my experience has convinced me of this fact, that when a man comes out with his prices in bold type the other fellow cannot keep up with you fast enough to cut them, or else he hasn't the nerve to spend the money on advertising his cut prices. And if he does not advertise he is harmless.

Quoting Prices Wins Confidence.

Here is an illustration of a fellow who did not have a chance because he did not advertise up to my standard. Last fall I advertised a cornsheller for $7. My competitor did the cutting act. He had the same sheller. He put it out on the sidewalk and marked with a rough card, "Only $6.25." His sheller stood there to my knowledge for three months. During that time I made my newspaper talks strong and sold more than a dozen. Now why did the people come to me and pay 75 cents more than he offered to sell it for? There is only one reason. The people read my description and it gave them enough confidence in me to know that my price was fair. They knew I was giving them full value for their money and they came to me and bought their goods.

Here is a point: I am a vigorous advertiser. For the last three years I have made an increase on my sales of

33 1-3 per cent. every year. Does it pay to advertise?

I have no trouble with the catalogue houses. The more I go into the question of losing trade through the mail order houses, the more I am convinced that the local merchant is to blame for the presence of the catalogue houses. Their great success has been attained through their advertising. If their advertising will build skyscrapers in Chicago, I figure that the same kind of advertising for me will at least put a new glass front in my store.

The time has come when all retail merchants must advertise. Advertise until it hurts your pocketbook, and then keep on advertising until it stops hurting. And one thing is sure, it will stop, but that does not mean that you should stop advertising.

TIME RECORDS FOR TINSHOP.

Illsey Bros., Red Deer, Alberta, are using what they consider a very satisfactory system of keeping track of the time and material used on tinsmithing or plumbing jobs, these being adopted after others had been used unsuccessfully. Three of the forms are reproduced, together with their explanation of the workings of their system:

The time sheet (Fig. 1) shows at a glance how a record is kept of the date of order; by whom given; character of work; quantity and class of material to be charged; workman's and helper's names; number of hours each, and a few other items of value when making entries in the office. This time sheet, or as we should call it, job slip, can be used in connection with the time report (Fig. 2) which is a weekly one, and a very close check can be kept on the men. It is also a benefit to the employe as he receives every cent to which he is entitled, as shown by his reports. A special book is kept in which entries are made weekly, or, if necessary, each day. By using this sheet, the exact cost of material and time is before one at a glance, and almost every job can be made to show the exact results as soon as it is completed. The use of this sheet will inspire men to look after their

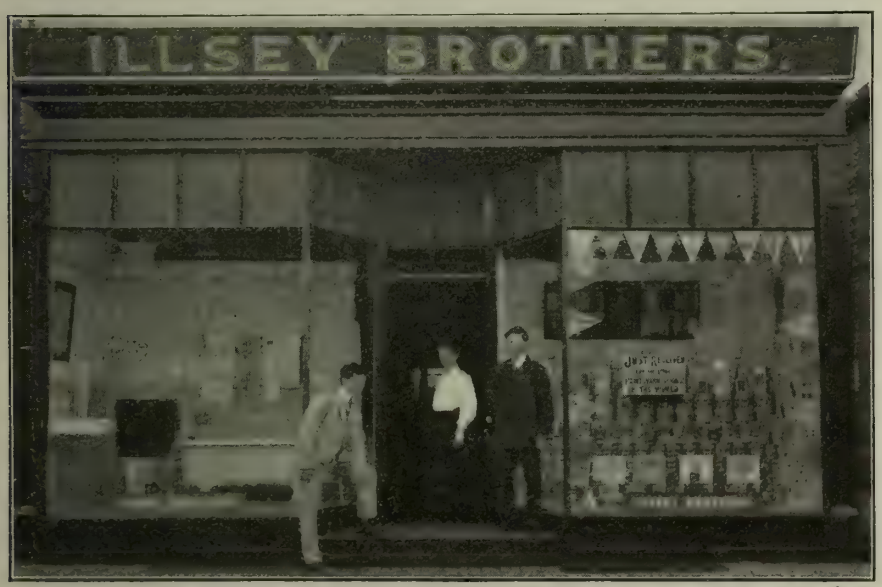
work in a careful and methodical manner, and there can be no doubt but that there is to much laxity in many shops, in this very respect. To keep accurate records in a tinshop has been one of the problems of the modern dealer, he being vitally interested in the adoption of methods which have proven themselves to be practical. The repair tag (Fig. 3) is a splendid means of keeping track of repairs.''

Both members of the firm of Illsey Bros. came from Picton, Ontario, A. H. Illsey associating himself with the business of Stephenson & Illsey in the summer of 1904. In 1907, when the firm name was changed to its present form, it was found necessary to enlarge the accommodation from 22 by 40 feet to 22 by 60, and with a full basement 22x60. The view of the front of their store shows that the firm use their windows to develop plumbing trade, they having had some nice contracts in heating and plumbing, some being the installation of a Pease system of heating and ventilating in the new $50,000 school at Red Deer, plumbing of an extensive type in the same building, and steam heating in the post office block. An extensive business is also done in warm air furnaces and general tinsmithing.



Illsey Brothers' Hardware Store at Red Deer, Alberta.

GIFT SETS OF ENAMELWARE.

A practical idea which has been adopted by a number of firms during the past year is that of advertising as a suitable wedding present a set of kitchen enamelware. Such a gift is ornamental and useful, it is in good taste and its completeness and variety assures its being regarded as a generous gift.

Allan & McKenzie, Galt, are one firm who have made a specialty of pushing this assortment, and Mr. Allan states that it has been a popular gift. The set is made up to sell at about $10, comprising a dish pan, tea kettle, coffee pot, two pie tins, roasting pan, egg turner,

A Gift Set of Enamelware.

several granite spoons, toaster, dipper, triple sauce pans, pudding dishes, bucket, pitcher, basin, etc., varied by omissions or additions to suit the pocket or fancy of the purchaser.

A good plan is to select two or three assortments and arrange them for inspection. Then when the wedding season is on invite gift givers to see your stock and consider the advisability of giving a present which will be both novel and useful.

HOW TO INCREASE FURNACE TRADE.

(By Clarence M. Lyman.)

We must recognize the fact that warm air heating is a field by itself. Just because a tinsmith may know how to lay a tin roof, mend a leaking coffee pot, or hang conductor pipe, does not qualify him as a candidate for a degree in a warm-air university.

To be a good warm-air furnace contractor one must know the underlying principles of warm-air heating. This means something more than ability to measure the cubical contents of a house and to set up a furnace. It means a working knowledge of the circulation of air, a familiarity with the sizes of pipes and registers necessary to heat given spaces, and an intimate acquaintance with the mechanical details of all parts of the apparatus. This is not so easily acquired as some masters think.

How many of you off-hand can tell the details of the grate construction in the line of furnaces you sell, to say nothing of being able to describe clearly the points wherein this particular line of furnaces is superior to those that your competitor across the way is pushing, so that you can point them out, not to his detriment, but to your advantage? How many of us, without committing to memory tables, can tell the cross-section areas of warm-air pipes, with the nearest working sizes of registers, and the velocities of air entering rooms through them? Of course, these are little things, but, nevertheless, part of the necessary equipment required before a dealer should expect to increase his business.

Increasing Trade.

How, then, can a furnace contractor increase his trade?

First—By doing the best work in the community. No other method is so sure to increase permanently one's trade as the deserved reputation for careful workmanship.

Second—By going after the work. A certain amount of trade may come to the store, but the thing worth while, and a furnace contract is worth while, must be gone after. The other day we heard a manufacturer lamenting the fact that he and certain colleagues of his had been unable to persuade another large manufacturer in their line to join their association. A friend of his who sat near said, "Did you go for him the way that life insurance man went for you when he sold you that last policy?" Do you go for your prospects in the same way? Have you facts, figures and data at your fingers' ends, and the convincing logic that will close the contract?

Third—By advertising. How, do you say? Circumstances must govern that, and we are by no means sure what is the best method, and what may be the best in one locality may not be good for anything in another. We have in mind a little half-inch advertisement inserted in a paper with a wide agricultural circulation, which brings results with one master in this line. We know

another that uses the daily paper to good advantage, although he says he cannot trace direct results. We are not just at this time employing the method, but our experience has been that personal letters are one of the potent methods of reaching those interested.

TWO, THREE AND FOUR-PIECE ELBOWS.

By G. L. Gray.

Two-Piece Elbow.—Draw half plan and space same in any convenient number of spaces, erect lines B E and strike mitre line C, draw lines from spacings parallel with lines B E, intersecting mitre line C. Draw stretch-out line D and place on same double the number of spacings shown in half plan as 1-12-1, erect lines from spacings and place T square parallel with line D, draw lines intersecting points in mitre line C to the corresponding numbers in stretch-out. Trace lines through the intersecting points will give the pattern required.

Three-Piece Elbow.—Draw half plan and space same as Fig. 1. If the maker wishes elbow to have a long sweep in the throat of elbow, then set radius point D the required distance from H to give the required curve. If a short curve is required in throat, the radius point should be brought closer to H with the radius point determined as D. Draw lines D F and D G, set compasses at D and strike quarter circles F G and H I. To make an elbow of three pieces or more the quarter circle F G should always be spaced into one less spaces than pieces required in the elbow. In this case a three-piece elbow is required quarter circle should be spaced in two equal spaces as F J G, divide F J in two parts, F K J, draw line from K to D from G. space half space G L, and draw line L D, which forms the mitre lines C and B. Erect lines from spacings in plan intersecting mitre B, draw stretch-out line E and place spacings from plan, placing same on stretch-out line E, and continue as in Fig. 1.

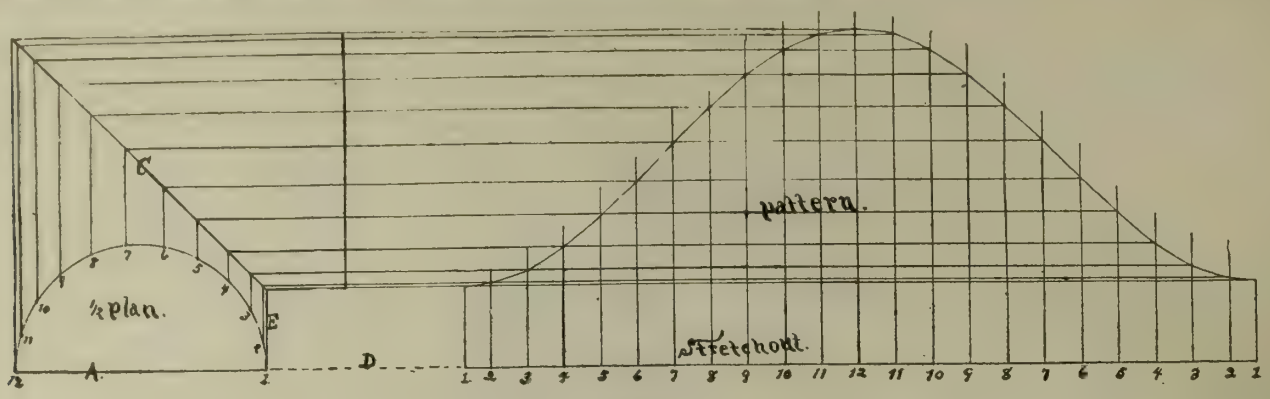


Fig. 1.

Four-Piece Elbow.—Pattern for a four-piece elbow is obtained the same as in Fig. No. 2, with the exception of spacing quarter circle C G in three equal parts, starting from C with half space C D, also half space from G, as G F, F E D. Erect lines from spacings in plan intersecting mitre line D, draw stretch-out line H and lay out stretch-out, and continue as in Figs. No. 1 and No. 2.

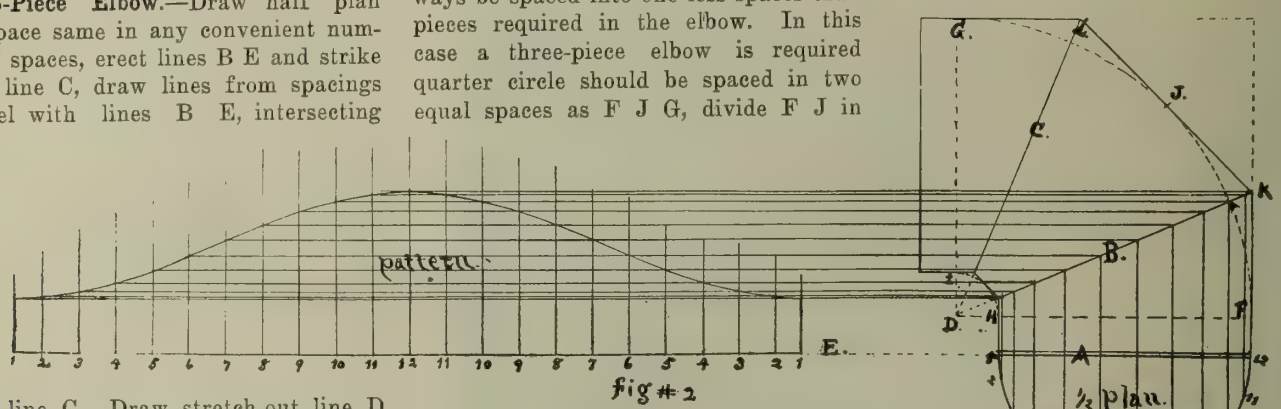

fig # 2

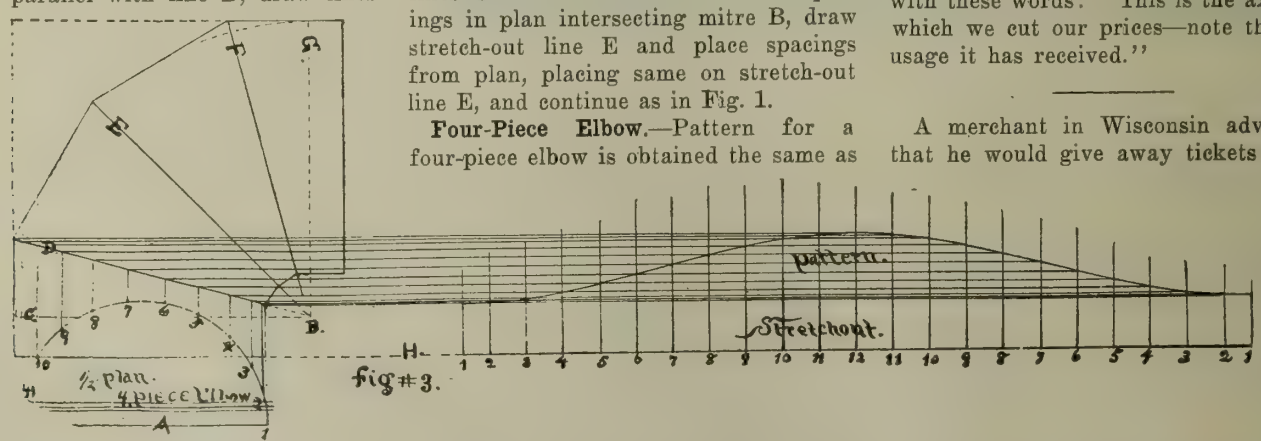

fig # 3.

An enterprising merchant in the southern part of Minnesota has a large axe in his show window which has seen better days. Beneath it is a large card with these words: "This is the axe with which we cut our prices—note the hard usage it has received."

A merchant in Wisconsin advertised that he would give away tickets to the baseball game to all those who made purchases or settled their accounts on a certain day which he specified in the advertisement.

Evolution of Paint and Colors

Pigments Used by Egyptians and Romans—Early Used in Decoration, but Only Recently as a Protection Against the Elements—First Ready Mixed Paint Manufactured Fifty Years Ago.

By G. B. Heckel.

The earliest use of paint was probably heraldic or symbolical, and the colors were applied first to the human body. Remnants of the practice are still seen among savages who, on ceremonious occasions of war, the chase, etc., decorate their faces with conventional signs and colors. The second use of paint in evolution was decorative. The Egyptians, thousands of years ago, used the simple colors both for broad effects and for decorative design. The Greeks are believed to have colored all their marbles, whether statuary or carving, and the Romans, who were imitative in their arts, carried the use of colors in architecture to the extreme, as seen in the wall paintings of Pompeii.

The pigments used in these earlier days were generally of the simplest type —usually natural colors found in the earth and requiring only mechanical treatment to fit them for use. Of these are the iron oxides, such as red haematite, ochres, siennas, umbers, etc., the natural salts of lead, cadmium, arsenic and mercury; the natural whites— lime, gypsum, china clay, etc.; the blue of lapis lazuli; green earths, etc. With the exception of red lead, cadmium and arsenic yellows, and cinnabar, which are now produced artificially, these natural pigments are still in use at the present day, the chief improvement being in the processes of preparation.

Romans Knew White Lead.

A few of our artificial colors were apparently known to the Romans at least, since Vetruvius and Pliny describe processes for the production of several, including white lead and lamp black. According to what can be gathered from these writers and from examination of paints found in Pompeii and Rome, the liquid medium appears to have been some sort of vegetable gum in solution.

It was not until comparatively recent times that paint began to receive attention as a protective or preservative material. All of the earlier allusions to the subject were along decorative lines, and down to nearly the beginning of the last century all information on the subject was directed to the requirements of artists or architects. The dwellings of the more fortunately circumstanced classes were built of stone, brick and hard-woods, on which paint, except for decoration, was but sparingly used; while the shelters of the poorer classes were generally of the flimsiest character on which paint would have been an unthinkable luxury.

As the means of the common people improved and the use of wood for permanent buildings became more common, paint naturally suggested itself as a preservative material, and white lead being the most generally obtainable of the lighter colored pigments, its employment received an impetus which it has scarcely yet lost.

Of all the artificial pigments except lamp black, this is probably the oldest. The natural carbonate of lead was well known to the Greeks and Romans, and it is probable, from some remarks of the writers of the first century, that the preparation of the hydrocarbonate by the use of vinegar was also understood. White lead was at least manufactured for their own use by the Italian artists of the middle ages. It is probable that the Dutch acquired the art of making white lead from Venice; but in Holland the industry received such an impetus that the process still in use, with some modifications, is known to this day as the "Old Dutch Process."

The Dutch corroded lead by exposing it to the fumes of vinegar in porcelain pots buried under fermenting manure in a trench excavated in the earth. The industry was brought from Holland to England where eventually certain improvements brought it finally to its present form, wherein the process is conducted in wooden "stacks" or bins by means of fermenting spent tan-bark.

Lead Dangerous to Health.

For many years white lead remained the only available white base for house paints, and so long as the pigments used with it to produce tints were the stable earth colors and such unalterable artificial products as lamp-black, it answered the general requirements quite satisfactorily. Two defects were, however, noted very early—the first, its tendency to darken from exposure to sulphuretted hydrogen gas, and second, its disastrous effect upon the health of those working with it.

The last-mentioned property led to increasing agitation against its use, as the practice of house-painting spread, and the history of the paint industry from late in the eighteenth century to the middle of the nineteenth is full of attempts to replace it with something else. This agitation led on the one hand to the substitution of white lead ground in oil by the manufacturer for the old form of dry lead ground by the painter himself; and on the other hand resulted in the addition of zinc oxide, sub-limed lead, lithopone, blanc fixe, etc., to the list of available white pigments.

It was also recognized quite early that there are certain colors which cannot be mixed with white lead without obstruction. Artificial ultramarine, for example, which, after its production by Guimet and others about 1828, came into general use, has its beautiful color quickly destroyed by contact with lead pigments. Similarly, Prussian blue, accidentally discovered by Diesbach in 1704, is quickly discolored by white lead, as are the "chrome greens," produced by precipitating together Prussian blue and chrome yellow. This is also the case with all pigments containing sulphur, such as the genuine vernicious, cadmium yellow and some other brilliant colors.

Old painters can still remember the days when not only white lead but all their colors came to them in the dry form, to be laboriously worked up by them with slab and muller into the paste form. But finally the superior economy, uniformity and wholesomeness of the machine-ground lead and colors in oil prevailed over the prejudices of the most conservative painters and dry colors as a practical painters' material fell into desuetude. It was a case of necessity—the demand for paint had outgrown the capacity of the slab and muller as well as of their short-lived successor, the hand-mill. Painters continued, however, to mix tints and to reduce paste paints to consistency for application by manual labor.

First Ready Mixed Paints.

About the time of the Civil War in the United States a certain genius, struck with the growing demand for house paint, conceived the idea that there would be a good market for paints ready for application. He produced and patented an "emulsion" paint. Its success was phenomenal, despite its defects,

and it was the forerunner of a host of so-called "patented" paints which froze in the can; peeled off the surface, and did a multitude of things they should not have done, but nevertheless blazed the way for one of the most rapid industrial developments of modern times.

The first ready-mixed paint appeared on the market some time in 1859 or 1860. It has been calculated that the consumption of ready-for-use paints for all purposes in 1906 approached 100,000,000 gallons, with selling value of not much less than $150,000,000. Such a development indicates, first, the meeting of a well-defined need, and, second, a long step in advance of the earlier products. For, though the prepared paint industry still suffers from the effects of the moral law that visits the sins of parents upon their children to the third and fourth generations, it is still steadily growing. This must mean not only that it meets a need, but that it yields, on the average, satisfactory results.

The rapid multiplication of beautiful chemical colors during the past forty years and the improved taste of the "common people" has created a demand for a great variety of tints and shades, which can be met only by the paint chemist who knows what pigments can and what cannot be safely combined. As noted above, the colors which yield the tints of blue, green, lavender, pink, the delicate grays, etc., cannot be successfully made with a white lead base. Here chemical invention has come forward with three or four other whites which are available for such tints. Again, white lead is apt to darken when used in the interior of buildings where sulphuretted hydrogen is always present. Oxide of zinc or one of the other newer whites forms the base for interior paints. Furthermore, the content of sulphuretted hydrogen in the atmosphere of towns is annually increasing with the growth of manufactories throwing out furnace gases. The sensibility of the white lead is materially reduced by the addition of zinc oxide, sublimed white lead and certain reinforcing inert pigments to the paints for outside use.

Now Part of Hardware Trade.

The growth of the industry and the increased complication of the requirements has, within a quarter of a century, transformed paint making from a hit-and-miss, hap-hazard, rule-of-thumb procedure to a systematized matter of technical science, and in the modern paint factory the practical paint chemist rules supreme. He knows the requirements, he understands the limitations and it is "up to him" to produce practical results.

There is another phase of the problem not generally appreciated. The supply of practical painters—that is of painters who understand the mixing of tints, the adaptation of paint to the requirements of the job is limited, and there is no source from which a fresh supply can be drawn when the present generation has passed away. At the present time those of them that remain are found principally in the large cities, where they cling pretty generally to the old methods of hand-mixing lead, oil and colors. But even they realize that their methods are behind the age, and they are drifting one by one to the use of the prepared paints, which in their view, leave something to be desired. But in the country and in the country town ready-mixed paint has come to stay, and in the majority of cases and in the hands of the average painter, will be found to give better service at less cost than the hand-mixed product.

Hardware dealers throughout the country who handle both ready-mixed paints and lead in oil can easily judge of the justice of this assertion by following up the history of any dozen jobs of each class in their own vicinity. Paint is not yet perfect—even the best of it. If it were it would never be necessary to repaint. But, when it is remembered that the ordinary paint coating is seldom more than one two-hundredth of an inch in thickness, the marvel is how well and at what a small cost it serves its purpose of preserving and beautifying wooden structures.

UPHOLDS FALL PAINTING.

Writing on the question of fall painting, a contributor to an Old Country trade paper says there is no better time for exterior painting than in the fall. It is true that there is usually a "wet spell" along about the equinox, but aside from that there is a long period of good weather during which much outdoor painting may be done. In the spring there is, ordinarily, a plethora of work for the painters, and, when men have more than they can do, there is ever a temptation to rush and slight their work. A hurried, slovenly-painted job is pretty sure to go wrong, and just so surely is the paint blamed when trouble develops.

Many buildings are painted in the early spring before the "weather has settled" and before the surfaces painted have had time to dry out. Paint applied between showers and to surfaces that have become damp through a long period of rain, sleet, snow, frost, and but little sunshine, will peel unless it is applied with more than ordinary care and with more than the usual amount of "elbow grease." We can hardly expect extraordinary care and an unusual expenditure of muscle at a time when the painter is "rushed to death." During the summer, weatherboards, brick and cement surfaces dry out thoroughly, where there is not too much shade, and such surfaces are in better condition to receive paint than they were in the spring. Where a building, surrounded by trees and foliage, has been so shaded as to prevent its drying out during the warm weather, the trees should be trimmed and the foliage cut away, so that the sun may get in and prepare the surface to receive the paint.

And there is still another reason why fall painting is desirable. When paint is applied at a time when the sun is hot, and getting hotter, the very life is baked out of the paint; the drying is unduly hastened, and the paint film is short-lived. In the autumn there is a gradual lessening of the sun's heat, and during the cold weather that follows the paint has a chance to dry naturally. By the time warm weather comes the paint is in the best condition to withstand the sun's rays.

Everything considered, it is rather remarkable that the advantages of fall painting are not more generally appreciated.

ASBESTOS COMPANIES COMBINE.

Various rumors have been floating around for some time as to a big asbestos merger being in progress, and it is now known that certain Canadian, British, and American interests are trying to effect a combination of a majority of the tonnage of the asbestos producing companies. It is stated that ratification is expected to follow upon the preliminary agreements already executed. Thus the recent activity in the shares of a well known asbestos company can be accounted for. This deal, if it is pulled through, will be of the utmost importance to the industry. It carries with it the object lesson that Canada's natural resources are being more highly estimated elsewhere than at home.

Last year was noticeable for its increased output, high prices, and the general utilization in the asbestos fields of electric power from the Shawinigan Power Company, who have run a transmission line to the Thetford mines and neighboring towns. This year may see the establishment of a great merger, and of as strong a control over asbestos in the world as the Standard Oil has over oil. In any case, merger or no merger, there will be greater development this year in asbestos, for the ever-increasing needs of the world demand the stuff.

The crookedness of a river is but a matter of course.

Graft by any other name would produce as many plums.

Want Duty on Tin Plate.

As announced in Hardware and Metal of last week the Canadian Sheet Steel Corporation, the new owners of the Morrisburg tin plate plant, are asking the Dominion Government to establish a duty on tin plate, black and galvanized sheets. Strong opposition is developing, however, and it is unlikely that the request for the duty will be granted, especially as it has been shown that the promoters of the plant have already been given a fair measure of protection and are by no means able to supply the goods required.

The Morrisburg industry has, for instance, been aided by a refund of 99 per cent. of the duty paid on its machinery from the States, besides a "drawback" or rebate, of 99 per cent. on the duty paid on the raw material it imports, and on the coal which it uses for manufacturing the same, and still another advantage it has had is the enforcement of the "dumping clause" on all tin plate entering Canada from the United States, this compelling the payment of a 15 per cent. duty on material sold at prices below those prevailing in the home market. The dumping clause was formerly applied only on articles subject to a duty, but it was made to apply to tin plate, even though it is on the free list.

The Morrisburg plant consists of six mills and the promoters are planning to add two more if they are given protection. About 120 men are employed and it is claimed as much as 30 tons have been made in one day, twenty of this being tin plate.

J. O. Thorn, of the Metallic Roofing Co., Toronto, however, states that the output of the Morrisburg plant is not satisfactory. He says: "This firm has tested fifteen-ton samples of Morrisburg-made stuff, and it has not proved satisfactory for our work. I could show you the letters I wrote them telling them so. Why should we Canadian manufacturers be tied up to buy from only one firm in Canada? If a duty is imposed we might as well go out of business, as we could not sell our product at higher prices in competition with other roofing."

Government Refuses Duty in 1906.

The attitude of the Dominion Government on the subject of a tin plate duty was given in Hon. Mr. Fielding's budget speech on Nov. 29, 1906, and nothing has occurred to make it appear that a different view would now be taken. Mr. Fielding said:

"There are things we cannot manufacture with profit, and we think we would do well to wait until Canada has a much larger population before attempting to force the manufacturing in some lines. Take as an illustration the case of tin plate. . . . Very strong representations have been made to us to put a duty on tin plate. There is certainly no difficulty about manufacturing all the tin plate we want in Canada, if we are prepared to pay the price, and some enterprising gentlemen have already taken steps to establish a factory in a town in eastern Ontario. I do not think they have gone as far as to complete their building, but they have made some progress, and, perhaps, are waiting to hear how the Government may view the enterprise before they invest further money. We say at once that while it would be a desirable thing to have a tin plate factory in Canada or any other factory, that will give employment to the people, what we have to consider is, whether the advantages to be derived from establishing an industry of that character are at all equal to the burdens that would be imposed on the mass of the people by its establishment. Tin is an article which enters into the industries and domestic life of the people to a very large extent. Its price affects the price of home utensils, and of dairying utensils in a very large degree, and the tremendous canning industry we are building up. . . . This canning industry is a vast one, and I think it would be a mistake if, because of this idea of making things in Canada or even for the establishment of a factory important as it might be to the locality in which it is situated, worthy as the enterprise might be, and commendable as might be the spirit of the gentlemen who would undertake it, we should cultivate that industry by putting a heavy burden upon all this varied range of industries which require tin. And therefore we say, as an illustration of our policy, that we are not prepared to put a duty on tin plate."

Importations in Recent Years.

The importations of tin plate and sheets from Great Britain and the United States since June 30, 1904, are as follows:

	Value.
Year ending June 30, 1905—	
Great Britain	$1,206,906
United States	544,601
Year ending June 30, 1906—	
Great Britain	1,134,492
United States	733,167
Nine months ending March 31, 1907—	
Great Britain	1,174,010
United States	342,767
Year ending March 31, 1908—	
Great Britain	1,516,630
United States	919,886
Nine months ending Dec. 31, 1908—	
Great Britain	908,821
United States	467,164

In May, 1908, the Canadian Canners' Association brought in an importation of about $350,000 worth of tin plate and the dumping clause went into force a month later. It will be seen, therefore, that the result has been to practically stop importations from the United States while, considering trade conditions, the importations from Great Britain are increasing.

The Canadian Sheet Steel Corporation's Factory at Morrisburg.

TRADE GOSSIP.

An insane man entered Booth's hardware store at Welland a week ago and asked to be shown a revolver. Securing ammunition also he loaded it and began acting suspiciously. He was overpowered after he had shot three times without injuring anyone.

Announcement has been made that the Page-Hershey Company, which has let the contract to the Berlin Construction Co., of Berlin, Conn., for the erection of large mills at Welland will manufacture there all sizes of water and gas pipe. The work of construction will begin at Welland in two weeks. It is expected that one thousand men will be employed when the works are in full operation.

Going After the Farmers' Trade

Experience of J. W. Fleming & Son, Blenheim, in Endeavoring to Secure Business From the Farmers—They Specialize on One Article and Push it Hard—How the Rural Telephone Helps.

A clean, bright, hustling, attractive little town with a population anywhere between 1,700 and 2,000, situated at the junction of the Walkerville-St. Thomas and Rondeau-Sarnia branches of the Pere Marquette—this is Blenheim. And any hardwareman who has done business in a town that size will realize that in Blenheim, just as in every other town of like proportions, probably 80 per cent. of the hardwareman's business is drawn, not from the town itself, but from the surrounding country, and that, consequently, the great problem which confronts the hardwareman is: "How am I going to reach the farmers?"

"Go right after them," is in effect the answer to this problem furnished, after nearly six years of experience, by the hustling Blenheim hardware firm of J. W. Fleming & Son.

A Delivery of Manure Spreaders Made by J. W. Fleming & Son, Blenheim, Ont.

The firm comprises J. W. Fleming, the senior partner, and his son, J. G. Fleming. Another son, Harry M. Fleming, is also associated with the business, and, in the absence of his father and brother, kindly consented to talk with The Hardware and Metal representative on the problems the firm had met and the successes they had achieved.

The firm started business in Blenheim in February, 1903. They did not acquire an existing business, but set out to build up a clientele of their own. This makes their success all the more noteworthy.

Prior to coming to Blenheim, J. W. Fleming, the head of the firm, was a successful farmer in Dover township. What experience he had had in dealing in hardware and implements was solely from the farmer's point of view. But, if he was not a trained hardwareman, he brought to his business something that was of exceptional value in dealing with a constituency such as he was bound to meet in Blenheim—a practical understanding of the farmer, his requirements and his limitations. He understood the man with whom he was dealing from the simple fact that he had been for the greater part of his life in that very man's place.

A Good Road Man Required.

The hardwareman dealing, as any hardwareman in a town the size of Blenheim must deal, very largely with farmers, must inevitably specialize on farm implements. This J. W. Fleming & Son have done. Moreover, in the implement line they have in turn specialized, their specialty being the "Success" manure spreader, manufactured by the Paris Plow Co., of Paris, Ont.

"We find in our implement business that the first and greatest essential is a good road man," remarked Mr. Fleming. "That is the strong point in dealing with the farming community. We cannot sit and wait for the farmers to come to us; we must go out and reach the farmers. And for that a firm requires a good road man, a man who will get the price. There are road men who will sell goods for the price, and there are road men who will give them away. The latter kind are worse than useless. To get the price, the road man must be able to show the farmer—to impress him with the fact that the implement under discussion is worth the price, and more than the price. And we have found that the possession of a good road man is the one great essential in the implement business. It pays to have a good road man."

Mr. Fleming also emphasized the fact that the village hardwareman couldn't afford to wait for business to come to him.

"We must go after it. Competition has become so keen that the farmer expects the dealer to go after him. Not merely by advertising; but in person, or, at least, in the person of the road man. And the road man must understand how to meet men, how to deal with them. He must be adaptable."

The "Success" Spreader.

As previously mentioned, the "Success" manure spreader is a contrivance on which the firm have specialized, in connection with their implement business. It sells for a good, standard price with a fair margin of profit. It is a new article, hence there is a large field for it absolutely untouched; and it is a good, practical contrivance, and hence one well calculated to fill a "long-felt want."

And yet, despite the fact that there was room for it, and the added fact that it was a machine well qualified to satisfy the public demand, the firm had something like an uphill struggle at the outset. This was due to the innate conservatism of the farming community. With a new implement, as with a new crop, the farmer prefers someone else to experiment. This is characteristic caution; as previously stated, the farmer prefers to be "shown." He is essentially "from Missouri."

The first year J. W. Fleming & Son handled the "Success" spreader, they sold just three. The next year there was an advance, and 11 were sold. The third year the sales took a tremendous jump.

The jump was due to the fact that the farmers had been "shown." A few had experimented; the convenience of the contrivance had been demonstrated by the actual experience of actual farmers. Sales since then have been large and steady. In one year as high as 80 sales were made. Take a machine selling at $127, figure up the incidental margin, and the addition to the hardwareman's income may be roughly estimated and appreciated.

Car Load Orders.

The reader of the local Blenheim paper not infrequently catches sight of an item which reads thusly:

"J. W. Fleming & Son have unloaded a car load of "Success" manure spreaders."

This is advertising: and the essential, important item in that familiar "line" is the fact, not that Fleming & Son have received a consignment of "Success" spreaders, but that they have received a car load of them. For the casual reader, that little, unobtrusive item, perched amid the personals, has a significance inexpressible in mere words. A "consignment" is a mere bagatelle; but a "car load" is an impressive circumstance, telling, more than many columns and many illustrations could tell, of the enterprising firm and the wholesale manner in which they were supplying the community.

From the start, Fleming & Son have made a practice of ordering in car load lots wherever practical. A car will contain from 10 to 13 spreaders—generally 11. Sometimes two car loads are ordered at once. Ordering by the car, the firm can buy cheaper; likewise, they save freight.

Though a car load is rarely sold in advance of its arrival, the risk of being "loaded up" is infinitesimal. The average implement man knows from his canvass pretty well how his "prospects" stand, and what share of them he is likely to get: who of them are likely to purchase at once, who intend putting it off, and who are not going to buy at all. For instance, a car load of spreaders was brought in about February 1. On February 26, all save one or two were sold. The article is an eminently salable one; and even where only a few actual sales have been booked when the car load is ordered, it is not an unusual thing for every spreader to be sold by the time the car comes in.

Push the New Machine.

Unlike many other machines, the spreader has a steady sale all the year round. Those who have clay lands use it in the fall, and those farming in sand use it in the spring. Hence the road man is kept out right along. And, while the spreader is made a specialty, the road man canvasses for everything handled by the firm—hardware, fences, implements. He keeps his eyes peeled as to the farmer's requirements.

The spreader possessed and still possesses a great advantage over other implements in that the field for it is largely untouched. Unlike the binder and the mower, it is a new thing. An implement man would probably think he was doing well if he sold in his section 10 binders in a year. And, when he went to sell a binder, the farmer would have already on hand an old binder, which he would want to "deal in," the incidental "deal" eating up the agent's margin. Here the spreader shows to advantage. The farmer, when approached, can't produce an old spreader and insist, with that hankering after a "trade" so characteristic of him, that it be "traded" on the new implement. There are no old spreaders in the country to gobble up the seller's profits.

"To make a success of the implement business," remarked Mr. Fleming, "one must push a new machine—first making sure that it is a good machine. We have made a success of the spreader. We could make an even greater success of an exactly opposite contrivance, something that would load manure, provided only someone would invent it."

And it may be added that on farms from one end of Canada to the other, such a contrivance would be hailed with infinite delight.

Spectacular Deliveries.

Though emphatically of the opinion that a good road man is the first essential in handling these goods, the firm have developed some little side lines with a view to keeping them before the public.

Car load lots are ordered nearly every month. For a couple of weeks prior to the arrival of a car, "locals" are run in the Blenheim weekly paper, stating that a carload of spreaders has been ordered; and for a couple of weeks subsequently locals with reference to the arrival of the car load are run. These help to keep the business before the public.

A spectacular and effective form of advertising both the spreader and the firm is the "grand delivery." Deliveries customarily take place in the early fall or late summer. At other seasons it would be impracticable to hold back the machines for the sake of advertising; but in the summer farmers are busy harvesting and threshing, and, as a result, the spreaders are not urgently required. Hence, for several years in succession, J. W. Fleming & Son have held a "delivery," when, with not a little show, some 10 or 15 spreaders would be handed over in a bunch.

The accompanying cut shows the delivery which took place in August, 1907, when 15 spreaders were delivered. The firm make arrangements beforehand for the farmers to come in. Preliminary announcements are run in the local paper. The spreaders, handsomely decorated and bearing banners with the firm's name, are handed over to their owners, and a grand parade takes place up and down Main Street. Town and country are both pretty well represented in a crowd of eye-witnesses. The "delivery" is good advertising, and inexpensive, since the only cost involved is that of providing meals for the men and their horses. Of course, at most seasons it is impracticable: but when it does come, it attracts all the more notice. The "delivery" is perpetuated in a large-sized photograph, which, through the medium of the Plow Co.'s catalogue, has gone into a multitude of households.

The Rural Telephone.

Incidentally, a Blenheim hardwareman possesses a marked advantage in the rural telephone. The town has two rural systems, one of which has 250 country subscribers. The cost of a 'phone to the farmer is in the neighborhood of $12 a year, and for that he can talk to Blenheim at any hour of the day. Likewise, it is a convenience to the merchant. Mr. Fleming gave an instance.

"The other day I wanted a load of hay," he said, "and didn't know where to get it. I went to the telephone and in no time found a man who had hay to sell —and he was a farmer in Raleigh, five miles to the other side of Charing Cross."

A twin advantage Blenheim enjoys in the shape of natural gas, though its effect on the stove trade as given by Mr. Fleming is one with which hardwaremen in natural gas towns will be quite familiar.

For the advent of natural gas boomed the stove trade very little. Experience shows that natural gas will burn effectively even in disearded coal and wood stoves; and not infrequently people have brought out these old stoves and fitted them up with burners. Of course, with natural gas, the made-over coal or wood stove consumes probably as much fuel again as the genuine gas stove. A gas stove at $11 would soon save its cost in fuel.

As for gas fitting, the firm did not touch it. "We were too busy," remarked Mr. Fleming.

Hardware and Roofing.

The Fleming store is probably one of the most completely stocked hardware stores in any town of Blenheim's size, and careful attention is given to the regular lines. A good line of stoves is carried. The firm is also giving attention to metallic and prepared roofing.

"The demand seems to be growing steadily," said Mr. Fleming, "and I think it is a trade which is bound to develop. There is plenty of room for it to develop, and the high price of shingles is bound to have an encouraging effect. Metallic roofing is picking up right along, and there is more sold every year."

He added that metallic roofing seemed to have the preference over the prepared lines. "For myself, I think prepared roofing is a good thing," he said, "but there are a great many people who have the impression that it is just paper coated over, and that impression will take a little time, experience and argument to eradicate."

What a Local Association Can Do

Ottawa Hardwaremen Have Things Running so Smoothly That They Spend More Time at Their Meetings Playing Friendly Games of Cards Than in Transacting Business — Have Confidence in Each Other—Seven Years of Progress.

By F. J. Arrowsmith.

No merchant who attended the annual convention of the Ontario Retail Merchants' Association at Hamilton, or who read the reports of the speeches and discussions which appeared in the columns of Hardware and Metal, could fail to be struck with the greatness of its purpose, and the success of its efforts. He was bound to realize in the evident earnestness of these delegates—in the thorough way in which they grappled with questions that not only affected themselves, but the trade as a whole, —that a great and mighty force had been developed to the lasting good of the hardware trade.

R. MULHALL, OTTAWA.

This Year's President of the Ottawa Retail Hardware Association.

Competition gnaws the vitals of the hardware dealer—the unnecessary bitter competition of the merchants in the same or adjoining district; the competition of the many armed mail order house octopus, with its elaborately colored catalogue, and its seductive, and apparently low price list; and the competition of the irresponsible peddler, who pays nothing towards the upkeep of the district in which he peddles. Difficulties crop up every day in the transaction of business which bewilder the young merchant, yes, and the more experienced man, too, until the very life of the firm is threatened. Harassed this way and that, can it be wondered that, standing unsupported, dealers should be led into the grave mistakes of price cutting until like a pack of wolves, they fall upon each other's throats.

Happily, there is no disease without its remedy or alleviation. In time the wise men of the hardware trade realized the dangers that the growth of their industry was bringing down upon them. They saw that in unity alone could peace be brought to troubled waters—not the unity that bind men to hard and fast rules, making them secretly suspicious of each other, but the unity of friendly fellowship for the good of all, that can alone break down the antagonism of rivalry, and make evident the fact that the land is not so crowded but that each one can, without cutting the other's throat, be able to live and let live. So we have the provincial and local organizations creating a more friendly spirit, discouraging reckless price-cutting, fighting the mail order house, interchanging experiences for the benefit of all, deliberating on subjects of national importance which directly or indirectly affect the trade, and slowly but surely strengthening the industry.

Much more work has yet to be done. Association work in Canada, unlike that in the States, is in its infancy; but the growth is sturdy, and district after district, province after province, will, as time goes on, band themselves together in that utilitarian purpose which can alone settle the difficulties that the growth of the industry, and the encroachment of competition, have developed.

Ottawa Sets an Example.

A very fine example of the benefits of association work is shown in the case of Ottawa. Up to within 7 years ago the keenest competition existed among the hardwaremen in this city. The place was not so large that each merchant did not know the profession of the other. In the pursuit of their business, or of their pleasure, they met each other in the street, car ,or place of amusement. But there was no attempt at friendly recognition, and no interchange of business amenities. There was rather an open antagonism that resulted in price-cutting, and an aloofness that forbade one dealer asking or giving any business courtesy to another. This unfortunate state of things was naturally very detrimental to the hardware trade in Ottawa, but it is typical of what is happening in other places today. Suddenly a change came. An endeavor on the part of an association of contractors to secure a rebate from the hardwaremen broke down the barrier of reserve and of antagonism that had grown up. A meeting was called; the request was refused, and the making of that decision was to the lasting betterment of the hardware trade in Ottawa. The meeting brought forth fruits that probably no man anticipated. It was found that the other man was not such a bad fellow after all—in fact, he was congenial company. Friendships were struck up that have been maintained to this day, and it was brought home to all how foolish had been their conduct in the past. From this stage to the formation of the Ottawa Retail Hardware Association was a comparatively easy matter, and as the association grew in years and because the sturdy child it

J. G. COWAN, OTTAWA.

Secretary of the Ottawa Retail Hardware Association for the Past Seven Years.

now is, so a period of calm descended upon Ottawa.

There are no hard and fast rules in the Ottawa association—no binding of the men down to certain policies and lines of action. The object of the association, as simply stated in the constitution, is to bring about a closer relation between the members of the association, to correct commercial abuses, and to promote the mutual interests of the members. And worthily has the association achieved its purpose. The association rests itself upon the honor of each man to maintain its aims and to keep to the spirit of its laws and there has been no backsliding.

Meeting after meeting—one every month—dealt with, and adjusted the knotty points of price-cutting and the other difficulties inseparable from the hardware trade. Erring ones were made to see the error of their ways by gentle persuasion; while the social side to the meetings, a strong point in association work, consolidated friendships as no purely business meeting could do. Under the zealous care of J. G. Cowan, who is now, and has been since its conception, secretary of the association; of the late W. Graham as treasurer, and the other officers, the association has developed until with but one or two exceptions, it comprises all the Ottawa retailers. There is now no covert attack upon another member's trade, no knocking, and no malpractices. The motto of the association is on the lines of "There is room for all, let us all live," and is maintained to the letter. Each merchant is willing to oblige the other, and if any one is seeking information which will help him in his trade then he openly asks it at a meeting, knowing that no underhand advantage will be taken of the fact. Surely there could be no finer example than this of the value of association work.

It can be easily understood from this that no happier or contented family could be found than the hardwaremen of Ottawa, and certainly it would be difficult to find a jollier band of fellows without a long search.

Under such conditions the hardware trade is bound to flourish, and that it does flourish in Ottawa can be seen from the fine stores in the city and the general air of prosperity attending the members. Few cities can show a better average of fine stores. Certainly the Ottawa association owes much of its present-day prosperity to Secretary Cowan, who has shouldered the brunt of the work for so long. The association and Mr. Cowan are inseparable. When you think of the one, you think of the other.

Develops the Social Side.

The writer had the pleasure of attending a recent meeting, and was struck with the comradeship that exists among the members. Beyond the election of officers, little business was done, for the simple reason that there was little to be done. The happy family have brought things to such a state of perfection that there was nothing important to discuss. One incident, however, might be mentioned. A shortage in a particular article was reported, and the merits of a certain other article, which might be used instead, discussed. One or two members having favorably commented on the substitute, it was thereupon decided that the secretary obtain quotations on this article, the understanding being that in case things went satisfactorily a general order should be placed to supply the various stores.

The only point on which emphasis was laid at the meeting was the desirability of keeping up the attendance of the members at the monthly meetings. Things have gone so smoothly, each member has such confidence in the other, that he is quite content to leave his interests in the latter's hands, and the meetings are not so well attended as they might be. This is typical of human nature, but it must be guarded against. As President Mulhall said, however, if anything cropped up that affected the vital interests of the association, the members value it so much that everyone would be at fever-heat again. But at present they were too united to have a discordant note, with the result that the attendance at the meetings suffered. At the suggestion of the president, it was decided that the social end of the meetings should be made stronger, prizes being offered for the highest scores at euchre, and this, with other efforts, should have the desired results.

It is the social side that has helped the association to its present state of perfection, and it is the social side which will keep it there. As Mr. Cowan remarked, there is nothing like a game of cards to make men friends, as few could do an unfriendly act to a man after fraternizing with him the night before. It can be seen from this that the Ottawa asociation has satisfactorily solved the knotty problem of making competitive merchants well disposed towards each other, and one could understand, listening to the good-humored chat and lively sallies which enliven the meetings, that no stress of circumstances, no overcrowding of trade, would even break the friendly ties that the association has developed.

The Ottawa Retail Hardware Association should prove an inspiration to the hardwaremen in other places where conditions are as they were in Ottawa seven years ago. What has been done in Ottawa can be done in dozens of Canadian towns and cities if the trade is alive to its interests.

ONTARIO GOSSIP.

J. G. Hayes, Dryden, Ont., has located in a new store building.

John McArthur & Son have bought McIntyre's hardware at Durham.

M. B. Thorpe, hardware merchant, Glenallan, is succeeded by Warner Huss.

James Purvis and Robert Horne, Sudbury, were visitors in Toronto this week.

W. A. Sylvester, Stouffville, attended the A.O.U.W. convention in Toronto, this week.

The Canadian Potato Machinery Co., Galt, has been granted a license to do business in Ontario.

The McClary Manufacturing Company, London, have obtained a contract for supplying Winnipeg with 640 street name plates.

Tenders are asked by the Department of Public Works, Ottawa, for heating apparatus for the public building at Glencoe.

Congdon & Marshall, hardwaremen, Dunnville and Port Colborne, have sold their Port Colborne branch to J. H. Harrison.

The American Can Co., has been granted a license to manufacture and do business in Ontario. The Canadian headquarters are at Hamilton.

The Aikenhead Hardware Co., Toronto, has the contract for supplying floor tiles in the Fern avenue, Leslie and Morse streets schools, Toronto.

Fred Moore has resumed his position as foreman in the tinsmithing and plumbing department at H. J. Morden & Co's hardware store, Colborne.

W. Bradley, of the Fort William Hardware Co., who has been visiting at Toronto and other eastern cities the past three months has returned home.

Chas. E. Levey, of the Canada Glass, Mantels and Tiles, Limited, Toronto, was taken suddenly ill this week and will probably be absent from the office for several months.

On Saturday last Chas. T. Pearce, who has represented the Pease Foundry Company in Eastern Ontario for a number of years, left for Winnipeg, where he will continue to sell Pease Furnaces and Boilers for the Pease-Waldon Company, Winnipeg.

The B. Greening Wire Co., Hamilton and Montreal, are installing electric welding machinery in their works for the more economical welding of the iron frames for their wire door mats, wire guards, tellers' cages, etc., and for the wire chain fittings, and the welding of wire generally.

H. B. Collier, of the Collier Electric Co., Peterboro, has invented what he calls an electric blanket. It is intended to serve the same purposes as a hot water bottle. The blanket is composed largely of asbestos, is made in convenient sizes, is pliable and can be kept at any temperature desired, by the regulation of the electric current.

A fire completely gutted the brass foundry of William Keating, at the rear of 237 Lansdowne Avenue, Toronto, on March 14. It started from an unknown source, and altogether did about $17,000 damage to the building and contents. There was about $8,000 worth of machinery in the place, which is practically destroyed, and a quantity of brass piping, which will only be good for remelting. The place is insured for $11,000. Although the damage is extensive, Mr. Keating says that there will be but little delay to his business.

BUILDING AND INDUSTRIAL NEWS

For additional items see the correspondence pages. Information is solicited regarding building and industrial news, the incorporation of companies, establishment or enlargement of mills, factories or foundries, municipal waterworks and sewerage systems, railway or mining news, etc.

Industrial Development.

A large shoe factory will be erected at Berlin by C. A. Ahrens.

Ex-Mayor Buscombe will erect a $20,000 warehouse at Vancouver.

The farmers of Shediac, N.B., will erect a co-operative grist mill.

The Anderson chair factory is now an assured new industry for Halifax.

The Canada Paper Co. may rebuild their plant at Windsor Mills, Que.

The B. C. Soap Works, Victoria, contemplate large additions to their factory.

The Gerhard Heintzman Piano Co. are erecting a six-storey warehouse at Toronto.

Carruthers & Company, Saskatoon, Sask., will build a large warehouse this season.

A large saw mill will probably be erected at Jordan Mills, Man., by the Lewis Miller Co.

An addition will be built to the Arrowhead lumber mills at Kamloops, B. C., at a cost of $20,000.

The Parry Sound Furniture Staples Co. will establish a basket and box factory near St. Catharines.

Copp, Clark & Company will erect a printing and bookbinding factory at Toronto, at a cost of $40,000.

Ridout & Co., furniture dealers, Kenora, will shortly commence the erection of a large addition to their premises.

It is understood that the C.P.R. intend building two, and possibly three, fine new steamers for the Pacific coast trade.

The Michigan Pacific Lumber Co. are stated to be planning for the erection of a large mill at Harriston, 30 miles east of Vancouver.

The Vulcan Portland Cement Co. will supply the Dominion Government with 46,000 barrels for use on Lachine and Cornwall canals.

The Dominion Meat Company, Calgary, has been bought out by the Morris Company, who will carry out important extensions.

George Othmer & Sons, West Derry, are building a new sawmill at Buckingham, Que., to replace the one destroyed by fire a year ago.

The Vancouver Engineering Works will expend $100,000 before June 1 in erecting works for casting steel, the first plant of its kind in the West.

The Manitoba Iron Works Co. have purchased six properties adjacent to their works at Winnipeg, for the erection of a large bridge shop.

Robertson Brothers, Toronto, candy manufacturers, will erect a five-storey addition to their factory and boiler house, at a cost of $40,000.

The Security, Storage & Warehouse Company, recently organized at Winnipeg, with a capital of $100,000, will shortly construct two warehouses.

The Welland Stove Company will erect a factory to make all kinds of natural and artificial gas ranges and heaters. They expect to employ about 40 men.

Wortman & Ward, London, Ont., manufacturers of washing machines, pumps, etc., contemplate the erection of a factory at Estevan, Sask., at a cost of $75,000.

The Canadian Pacific Railway is preparing plans for improvements to its property at Sherbrooke, which will cost $100,000, A new station and roundhouse are included.

The American Column Co., Battle Creek, Mich., will build a one-storey factory building at Niagara Falls for their Canadian business. The cost is estimated at $25,000.

Mr. Thomas, an expert, has arrived in Cobourg to superintend the building of the furnace at the new steel works there. The furnace, when completed, will cost $35,000.

A new smelter to treat tin ore will erect works near Nanaimo, to handle the output of Goodwin Tin Group on Seward Peninsula, Alaska. By-products will also be treated.

David Ogilvy will prepare plans and suhervise the construction of the department store to be erected by James A. Ogilvy & Sons, at Montreal. Estimated cost, $400,000.

A million dollar wheat elevator is proposed to be erected on Deadman's Island, near Vancouver, by J. W. Weart, who has interested Vancouver, Winnipeg and San Francisco capital in his scheme.

Samuel Shimer & Sons, Milton, P.A., manufacturers of cutter heads, are about to establish a branch Canadian factory at Galt, Ont. They have purchased the building formerly occupied by St. Clair Bros., and expect to commence operations at once.

J. H. Plummer, president of the Dominion Iron & Steel Company, Sydney, states that the Board is considering important extensions to the plant, the first of which will be the erection of a large merchant mill to enable the company to make considerably more rolled steel.

A new industry known as the Welland Tin Plate & Sheet Company, is being promoted. A two-mill plant, tin plate, polished sheet, tern plate, Canada plate, and steel sheet of every description, will be manufactured. The plant will have a capacity to manufacture 100,000 boxes or 5,000 tons.

It is understood that the Collingwood Shipbuilding Company has given up the idea of leasing the Government dry dock at Kingston and establishing a repair shop in connection therewith. There is a possibility, however, that the Locomotive Works Company may secure the dock and establish necessary shops.

One hundred and forty thousand acres of timber land were disposed of last month by an English syndicate to Vancouver capitalists for a figure in the vicinity of $800,000. The plans are for the erection of pulpwood and sawmills on the property situated on the east coast of Vancouver Island. one hundred miles north of Vancouver.

Forty-three new elevators will be built in Alberta, during the current year. The Alberta Pacific Elevator Co. will build twenty-five, the Alberta Grain and Elevator Company, eight, and private firms ten. The majority will be in the southern part of the province, although a few are as far north as Strathcona.

Large and modernly equipped car building shops which will form a nucleus of a plan that will ultimately turn out finished locomotives, built from British Columbia iron and steel, is said to be the latest project of the Canadian Pacific Railway. The shops will be built on the line of railway at Westminster Junction about 20 miles from Vancouver.

The Canadian Pacific Railway has let the contract for the erection of a new grain elevator at Victoria Harbor, on Georgian Bay, to the John S. Metcalfe Company of Chicago. The capacity of the new elevator will be two million bushels, and the price at which the contract has been let is in the neighborhood of $900,000. The elevator and wharves are to be completed within a year.

A new iron industry is to be started in Toronto shortly, though under what name it will operate is not as yet known. At a recent meeting of the Board of Control the statement was made that the company, which has been formed, had secured options on some factory sites, and the company's representatives stated their intention of building immediately, and asked that they be allowed to build branch lines connecting their buildings witn the Canadian Pacific and the Grand Trunk. As the company was already preparing to build the board granted the request.

HARDWARE TRADE GOSSIP

Ontario.

The Department of Justice, Ottawa, are asking for tenders for the supply of hardware, paints and oils, Portland cement and tinware to be used in the penitentiaries this year.

A. C. Graham is opening a hardware store on Queen St. east, near Reid Ave., his opening order going to the Kennedy Hardware Company, Toronto, for whom Mr. Graham's brother-in-law, W. R. Tait, is city salesman.

The Russill Hardware Company, Toronto, who about ten years ago were the first Toronto store to instal Bowser oil tanks, are now making another addition to their equipment. Beginning with two tanks, they increased to ten and are now installing twenty more, making thirty in all. Frank Russill, the manager, estimates that a saving of $100 per year will be made in fire insurance alone as a result of the equipment, besides which much waste of stock and clerks' time will be eliminated.

Quebec.

J. B. Ouellette, of Ste. Scholastique, Que., has been visiting Montreal.

G. Macdonald of the Algoma stores, Helen Mines, Ont., has been on a visit to Montreal.

O. Chown, of A. Chown & Co., Kingston, passed through Montreal whil? on a holiday trip.

J. P. Band, plumbing and heating contractor, and A. W. Newlands, of the Capital Hardware Co., both of Ottawa, visited the Montreal office of Hardware and Metal this week.

At the annual general meeting of the shareholders of the Dominion Wire Rope Company in Montreal, the following directors were re-elected : F. W. Fairman, F. H. Hopkins, Dr. C. W. Colby, G. P. Butters, E. E. Fairman. Subsequently the following officers were re-elected : President, F. W. Fairman ; vice-president and managing director, F. H. Hopkins ; secretary and treasurer, J. J. Rosevear.

Western Canada.

Neil H. Lightly & Co., hardwaremen, Winnipeg, have assigned.

Paull & Duffy, hardwaremen, Broadview, Sask., are succeeded by John Duffy.

J. Moxley & Co., hardwaremen, Rapid City, Man., are succeeded by Moxley & Forrest.

Evans Bros., hardware merchants, Kinley, Sask., have sold their business to R. D. Hutchinson.

Fred Babb, hardware merchant of Portage La Prairie, Man., was in Winnipeg last week on business.

Jas. W. Grierson, hardwareman and lumber dealer, Whitewood, Sask., is succeeded by Jas. Grierson & Son.

Wm. Manders, Bradwell, Sask., is asking for tenders for the sale of a hardware and tool stock valued at $2,-200.

The annual meeting of the Babb Hardware Company, Portage la Prairie, was held last week, and the reports submitted showed the business to be in a very satisfactory condition.

A. J. Falconer, Deloraine, Man., formerly President of the Retail Hardware Association of Western Canada, was in Winnipeg last week on his return from the south, where he has been for some months. Hardwaremen throughout the west will be delighted to hear that Mr. Falconer's trip in search of good health has resulted successfully. He is returning to his business completely cured.

LAW AGAINST REVOLVERS.

Another case has arisen where members of the Retail Hardware Associations in the various provinces and hardwaremen generally must stand together to prevent injurious legislation from being placed upon the statute books. It has been proposed in Parliament that section 119 of the Criminal Code be amended by adding thereto the following subsection :

"No. 3—No revolver or pistol shall be sold to any person unless he produces to and leaves with the vendor in writing from the chief of police or a police magistrate or justice of the peace allowing him to purchase a revolver or pistol." The offence to be punishable by imprisonment of from one to five years.

Such legislation is uncalled for and more likely to result in the smuggling in of firearms by criminals while preventing householders and others from securing weapons of defence. It is doubtful if the stopping of the sale of firearms would lessen crime. Rather would it tend to make burglars and hold-up artists more fearless in their nefarious doings. Why not pass a law prohibiting the sale of any but safety razors because many have chosen the razor route into the next world?

Every hardwareman, whether a member of any of the retail associations or not, should write his local M.P., asking him to oppose the proposed legislation as dangerous and unnecessary. And it would also be well to urge the hardwaremen in Parliament, including R. Blain, M.P., Brampton; W. W. Rutan, M.P., Melfort, Sask.; George Clare, M.P., Preston; Lloyd Harris, M.P., Brantford; Hon. James Stratton, Peterboro, and Major J. A. Currie, Collingwood, (all of whom should be addressed at Ottawa), to see that the views of the hardware trade are emphasized when the matter comes up for discussion.

CHANGES IN U. S. TARIFF.

The United States Government on March 17, made a cut of 50 per cent. in steel duties, and made provision for reciprocity in bituminous coal, coke and agricultural implements. It is likely the Canadian Government will reciprocate in the matter of coal. At present the duty on both sides is 53 cents a ton. Nova Scotia coal is used as far west as Montreal ; Ontario burns Pennsylvania coal, and west of Winnipeg to the Rockies the Crow's Nest and Vancouver Island are the source of supply. In the United States the coal area is not so scattered—Pennsylvania, and parts of Ohio, Indiana and Virginia, being the location of the coal areas. If reciprocity ensues as a result of this recent legislation the New England States can obtain Nova Scotia coal, and the Western States may obtain their fuel supply from Alberta and British Columbia. It will thus be seen that the United States will be the greater gainer ; but, undoubtedly, one of the greatest features of free coal will be the impetus given to industrial concerns on both sides of the line.

The reduction in steel duties while not altogether unexpected came as a surprise to many who thought the recent cut in iron and steel would offset any tampering with the tariff. Those in charge of the Payne Bill, however, aver that the cut was merely a blind to do away with any idea of changing the steel duties. One of the results of this change in customs duty and in the cut in price will undoubtedly be a lowering of wages among metal workers in the United States.

Toronto metal men did not care to express a definite opinion. They felt, however, that the lower duties might give them a chance to enter certain U. S. markets. As to lower prices the opinion prevailed that rock bottom had been reached. The recent cut in iron and steel prices was a political dodge to offset any change in the customs tariff and now that the tariff had been lowered it was felt prices would remain at the present figure.

The remored cut in wire prices at Pittsburgh would not affect the price in Canada, was the opinion of Toronto hardware jobbers. A number of U. S. representatives had offered wire, pipe and other manufactured lines in Canada at cut prices, but not for quality goods. Later advices from Pittsburgh say wire prices will stand, and that market quotations of last month will be held firm.

CANADIAN METAL MARKETS

See Itemized Market Quotations on Page 146.

METALS DURING THE PAST YEAR.

The course of the metal market during the year 1908 was very disappointing, with the advantage invariably on the side of the buyer. Sellers were loath to accept the new order of things and constantly held off in the expectation that the markets might become firmer and higher prices be obtained. The irregularity which characterized the whole of the year was most unsatisfactory, and had the prices been allowed to recede to correspond with the conditions of trade and without artificial stimulation, the looked for revival in trade would have been considerably nearer. We stated last year that the year 1908 would be the period when adjustment of 1907 accounts would proceed and finish —a statement which has been substantiated. Legitimate trade in Canada has been considerably injured in the past by booms of various kinds. The Rossland Gold Mining Boom in 1906 had a most injurious effect on trade. In 1907 the speculation in land in the North West left the trade there in a crippled condition, although the harvest had been excellent and trade, generally, should have been flourishing. To-day we have a similar danger to face in respect to Cobalt stocks. It is very disappointing, after all the warnings which have been uttered, to find that an immense amount of money is being frittered away in small sums in purchasing worthless mining stock.

During the opening months of 1909 not many large orders for metals were placed, but there has been an abundance of small business which is an evidence that consumers are acting warily and are only purchasing their actual requirements. During the past few weeks there has been considerable forward buying, and while the colossal records of 1907 may not be reached, still we think that 1909 will prove a good year in the metal business.

Copper has been very irregular during the year. As customary, we will take the London prices as a basis. On January 2, 1908, the price for Standard Copper (speculative) was £61.12.6 ; ($13.55) while the present price is about £55 ($12.10), a difference of nearly one cent and a quarter. Newspapers continue to devote a large amount of space to copper with the result that the general public are well informed about the metal. It is quite likely that by the end of the year there will be a considerable advance in the price. It must be remembered that, at the prevailing low prices, aluminum is a serious competitor with copper in electrical work, and further, that 50 per cent. of the copper produced is used in electrical industries. However, low prices stimulate consumption and there is ample room for both copper and aluminum in the industrial world. The estimated world's production of copper in 1908 was 710,000 tons as against 716,000 in 1907, which would indicate that the shrinkage in 1908 was rather in value than in volume.

Tin during the past year has not fluctuated to the same extent as copper, and, unlike copper, has appreciated in price. On January 2, 1908, the London price for tin was £121 ($26.60), while the present price is £128.15s. ($28.35). Tin is at a fair price to-day, and as it is a metal for which there is no substitute at present, there should be a firmer tendency during the balance of the year. This metal is so largely controlled by the London operators that it is difficult to prognosticate the future. The world's production of tin in 1908 was practically the same as 1907, namely, about 72,000 tons.

The returns showing world's production of lead in 1908 are not available, but the result is probably slightly under that of 1907. The highest price for soft Spanish lead in London in 1908, was £15.2s.6d. $3.30) and the lowest £12.7s.6d. ($2.72½) with the present price £13.5s. ($2.92½). The movement in lead (with some fluctuations) has been steadily towards lower values, but producers are confident that the present levels are lowest and any change will be in the nature of an advance.

Zinc. contrary to the other metals, improved in price during the year, opening on January 2, 1908, £19.5s. ($4.25) the present price being about £21.5s. ($4.70). Stocks of this metal are small at any time with the result that producers are easily able to increase the price under a demand.

Antimony wavered a little in price during 1908, and the demand throughout the year was listless and never in large proportions. It is during war time that this metal is interesting and prices are doubled and trebled.

Tinplates, galvanized sheets and black sheets were held at even prices during the year. The highest price for 14 x 20 cokes in South Wales in 1908 was 12.9d. ($3.15) and the lowest 11.9d. ($2.87½). The application of the Dumping Clause to free goods early last year (instigated at the instance of the Morrisburg Tinplate Mill) was instrumental in shutting off American imports and practically giving back the Canadian market to the Welsh makers.

In iron and steel the records of 1907 were not approached in 1908 for the reason that enterprises of great magnitude were not started last year. The production in round figures was probably 15,000,000 tons short of 1907 ; with the United States first in the rank of producers, Germany second and Great Britain third. The figures for Canada show a production slightly under 1907. With few exceptions, the larger interests in Canada producing crude iron steel have not yet reached a position of steady and profitable manufacture. However, there are evidences that renewed attempts are to be made this year to place some of the larger concerns in shape to command a greater volume of business. It will need, however, the best of executive and practical ability to do this as the consuming centres are so far removed from the producing centres—and in iron and steel, freight charges bulk large.

Middlesboro pig iron was selling in January 1908, at 48s.4½d. ($12.00) the present price being 46s. ($11.50). This small fluctuation clearly shows that in Great Britain the trend of values is more even than on this side and that there is no attempt to ignore general trade conditions, advances and declines being in consonance with supply and demand and not interrupted by manipulation to any great extent.

The outlook at the present time is one of increased confidence, and while it is impossible that records in production should be made in 1909, still we look for a good increase in the volume of trade over 1908. Providing that the crops this year prove to be average or above the average, the trade of the country should be immensely accelerated and the great advances of previous years maintain. G. T. P.

MONTREAL METAL MARKETS.

March 19.—Although it is true the condition of things in the primary markets has not tended to stimulate trade locally, business on the whole, since the commencement of the year, has not been at all bad. In fact January was a good month, comparatively speaking, and the steady improvement in orders seemed to promise much better trading in February. This promise was not fulfilled however, so far as a continuance of the rate of improvement was concerned, although the month could not be considered a dull one by any means. March however has picked up the lost ground, and there is no reason why the progress could not be continued right through the spring and summer. There is one point greatly in favor of the metal markets and that is the lightness of stocks in consumers' hands. In fact we might say

that there are no stocks at all. As the metal is bought so is it used. Practically buyers have not come into the market until they have had the customer's order in their possession, and so the metal market stands in this position that the slightest improvement is felt at once right from the user to the first hand. There is no dead weight to the metal trade. Every line is trained down fine and in the best condition for a buying movement.

The hand-to-mouth purchasing, which has characterised trading for so long, is more conducive to under-estimating the volume of trade done than over-estimating. Big orders attract attention where small ones slip by unnoticed, and merchants, unless they have the actual figures before them, are inclined to minimise the trading. As a matter of fact much more metal has been used than many people imagine, and most quarterly returns will prove this. The same thing is noticed in the primary markets. Nothing but reports as to dull jobbing conditions are heard, but it is apparent from the way prices have ruled that much more metal is being consumed than is actually credited. Locally orders have been on the light side but they have been steady, and the fact that the first hands have transacted a lot of business shows how metal has been used. All lines have been moving in good relative proportion.

That strong trade is but waiting a favorable opportunity to break in is evident from the inquiries that are being made. Users have not yet acquired enough confidence in the markets to buy ahead, but there is no doubt that with stronger markets outside consumption would be stimulated here. Users recognise at present that they can command prompt shipment, but with the primary markets stronger the position would be different and booking ahead would be necessary.

It is evident from the development of industrial activity all the way round, and from the improvement in building prospects, that metal will be wanted in increasing quantity as time goes on. Already inquiries are numerous as to structural material. This is partly due, of course, to the cut in the States, but it is also due in a great measure to real improvement in building prospects.

Owing to continued weakness in New York, copper has been cut ¼c this week and jobbing lots are quoted around 14c. From the commencement of the year copper has been steadily falling, and is now 1½c cheaper than on January 1. Tin is unchanged, although the English market has been very weak. Tin also has weakened from the beginning of the year, and at its present price of 31½c is 1½c cheaper. Lead is unchanged this week at $3.65 which is but 5c cheaper than January figures. Spelter has been cut this week 25c and is now marked at 5.25. Imported pig iron has suffered no change.

TORONTO METAL MARKETS.

March 19.—Probably no other trade is regulated so much by the world's situation as are metals, as the conditions affecting trade outside have a bearing on the situation at home, which induces or retards buying according to the prevailing condition of affairs in the larger buying centres.

Across the border the metal markets are unsteady and uncertain. The tariff changes are affecting prices; cutting in steel and iron and their products have kept back big business; and over-production in copper has brought down this metal. Now all these features have affected the Canadian markets generally and the Toronto market in particular. The duty, to some extent, has precluded any radical changes in price taking place; but there is the same uncertainty about buying, and orders are samll.

The great outstanding feature in the metal world, as in the business world generally, during the past year, has been the depression which set in in the fall of 1907, and which during the year 1908 and even to-day, has curtailed and is holding back orders for metals beyond the present absolute need. That depression affected this country, and Toronto metal men felt the lessening of business.

The revival here in Canada is pushing ahead more rapidly than in any other part of America and the return of good times seems nearer at hand than they do in the U. S. Building, industrial and railway construction work is planned on broader lines than a year ago, and if the hope of a good crop in the West is realized this fall, then the "return of prosperity" will be more than a phrase.

Iron and steel prices in Canada during the past year have been fairly well maintained. Canadian and English pigs are practically at the same figures as at this time last year; and this in general applies to manufactured products, though in some cases where any change has taken place they are slightly lower. Production is increasing and the Port Arthur furnace is expected to blow in at the beginning of navigation. The railways are in the field this year for rails and rolling stock, and the three transcontinental lines have already placed splendid orders, at the Soo and at Sydney. The car and locomotive works are rushing rolling stock for the extra traffic anticipated this year. Structural steel for bridges and building is in greater demand just now than for 16 month's past, and before the middle of the summer this demand is expected to be fully 50 per cent. better than at the same time in 1908.

Copper is just now probably the most interesting metal on the market. At present prices are easy, and about a cent lower than at this time last year.

The features of the year were the exports of copper to Great Britain, and the keeping up of output and increasing demand for British Columbia copper. We still quote 14c on casting ingots.

Like the majority of metals, tin shows a decline in price compared with the quotations of last year, we now quoting 13½ cents.

Sheets and plates have been steady all year, and unless the price changes and tariff reductions affect seriously the U.S. market and the export business of houses across the line, no variation is expected here before the opening of navigation in the St. Lawrence in May, and not much then. It is usual for Canadian houses buying large quantities of sheets and plates to import from Great Britain once or twice a year, so the speculative element across the line has almost no bearing on the situation in Canada, and the price once fixed rules for a whole year. The price for 1908-9 is possibly 15 cents easier than the previous year.

Lead showed a decided decline during the year, and prices are fully 50 cents lower than twelve months ago. While there was no tumble in market quotations as was the case with copper, the decline from week to week was noticeable. Since the opening of the year sales are increasing at nearly double the rate of a year ago. A strange anomaly is the comparison between lead and zinc. A year ago the demand was for zinc, and lead remained in the bins. Now the reverse is the case. British Columbia zinc is more active than for many months. The cutting off of customs duties by the U.S. is expected to greatly help the Kootenay zinc ores. Spelter which appeared to weather the year better than any other metal is slightly easier since the more important metals have forged again to the front. The metal kept its price fairly well despite the depression, and for a time showed even a firmer tendency than when the year opened up.

In old materials there were spasmodic fluctuations. In general, they followed the newer metals, though at times when these latter showed firm, scrap iron, copper and brass went frequently out in sales. Old rubber presented a lively feature for a time when some American houses bid for Ontario rubber at prices better than were offered by local concerns.

Tenders are invited for supplying Calgary with sewer and water pipes.

The Sewer Commission of Berlin decided at a recent meeting to call for tenders for sewer pipe, cement and manhole castings.

HARDWARE MARKETS

MONTREAL HARDWARE MARKETS

March 19.—Trade in hardware lines since the commencement of the year has not been as good as jobbers anticipated, yet no dissatisfaction is expressed. Undoubtedly the great difficulty to contend with has been the cautious attitude of the retail dealers. Following out their policy of last year, merchants have refrained from booking ahead to any great extent, with the result that the accumulation of heavy orders for future delivery usually prominent at this time is not in evidence. Even the booking made has been more of sorting-up character than of an augmentation of stock to meet a probable heavy demand. Merchants are not yet sure as to the extent of the spring demand, and they are inclined to wait until they can better judge before they place their orders, the result being that spring lines such as harvest tools, lawn mowers, hose nozzles, lawn sprinklers, garden tools, ice cream freezers, screen doors, are very behind hand so far as booking is concerned. Household cleaning utensils have likewise been slow in moving although within the last two weeks trade has greatly improved. It has been the same in builders' hardware.

Stocks in dealers' hands are undoubtedly light, and apparently merchants mean to keep them so. It is evident, however, that lines will be well sorted, judging the character of the ordering. Of course merchants take a grave risk, if a strong demand breaks in, of being held up in their shipments, but they are prepared, apparently, to stand the chance. At present jobbers are in a position to ship promptly and so long as they can do this, the merchant can keep his stock down safely.

The Eastern trade has been somewhat disappointing. Not that there has been a slump in any way, but jobbers have expected better things. The Maritime Provinces, however, have been very steady buyers, and there is no doubt that this part of the Dominion has been the most staple of any. Within the last month the North-West has made very great strides, and the increasing strength of the orders shows that dealers are anticipating a good spring trade. There has been a good movement in builders' hardware and enamelware all the way along, orders being of a well assorted character. Cobalt and Gowganda have been buying heavily on immediate delivery, not only in miners' supplies but in general hardware. A strong movement in egg crates looks as if a good egg season was anticipated. Wire, if moving slowly at first, is in better request now, and promises to develop at the opening of navigation. Bolts and nuts, owing to the improvement in construction work, are in good demand. Stocks are very light in dealers' hand, and a strong improvement in buying should occur shortly.

Prices on the whole have kept firm and taking everything into consideration the tendency has been to advance rather than to recede. Pure Manilla rope seems to have suffered the most, comparatively speaking, experiencing a cut of 1c altogether. This was owing to the low cost of raw material. Builders' hardware, and enamelware, have kept firm. It is understood that American lock makers at a recent meeting decided to maintain the price of their makes. Tinware is somewhat easier, but on the whole little change has been made in any other line.

As for the outlook it appears very promising. No big rush is expected at the opening of spring, but a steady improvement is anticipated all the way along culminating into a booming fall trade. Another harvest like last year would put on the finishing touch. There is one thing certain : that with dealers' stocks on the light side, a steady shipping movement will be in force all through the summer. Jobbers and manufacturers are confident that the year will close in no uncertain fashion so far as trade is concerned.

TORONTO HARDWARE MARKETS.

March 19.—"Compared with a year ago, the hardware trade," said a prominent Toronto jobber, "is in a much better position. While the good feeling prevailing is due more to anticipated business than to what is actually passing the volume of present trade is satisfactory, and especially is this so since the lesson learned during the year.

Spring goods summer goods, and lumber supplies dropped off quite a bit last year. Household and housecleaning lines held their own, though they did not improve. Stove sales did not come up to expectations. The fall was long and mild, with the result that many retailers were unable to dispose of their stocks. The coming season, however, is expected to be pretty near the record in heating lines, and there is already a better demand for seasonable goods, and a splendid inquiry for builders' hardware.

Prices keep pretty much about the same as they were last year. Building papers are up a little, and so are door bells, heavy straw sheathing is $2.50 a ton dearer; ready roofing is down 10c; refined coal tar is up 50c; Portland cement is about 55c lower; builders' hardware is practically unchanged, with the exception of spring hinges, which show a decided decline. Some sash weights have advanced, but sash cord is off 5c. Except for lower prices in tape lines, which are easier tool quotations are at the same figures as this time last year; and so are farm and garden goods, heavy goods, nails and sporting goods, though in the latter class prices are changing somewhat more or less all the time, and in nails some cutting has been done recently. Cutlery, silverware, housefurnishings, tinware, woodenware and miscellaneous goods, subject pretty much to seasonable demands, are at present about the same quotations as this time last year.

In iron, steel and the other metals, and in the product of these, prices have depended on the metal markets, and nearly all lines show easier figures. The cut in prices and the reduction in the tariff in the U. S. have not yet affected prices here, nor are they expected to cut a serious figure. Prices across the border are believed to be at the bottom of the ladder, and while lower prices were expected to be had on wire and screens, jobbers say as yet there is no indication that such will take place.

WINNIPEG HARDWARE MARKETS.

Winnipeg, March 19.—There has been no change of importance in local market values. Wholesalers are receiving a few large orders, and the trade generally is very hopeful. The demand for builders' supplies is very great all through the West. Some retail stores are being opened in new towns, and local houses are contributing to their stock.

IMPORTATION PRIVILEGES WITHDRAWN.

The importation of Swiss army rifles into Canada for sporting purposes was referred to in Parliament on March 11. Mr. Worthington, M.P., asked if the Government was aware of the uses the imported rifles were put to, the rifles being "small bore, long range rifles selling at about $3 and a danger to life and limb?"

Hon. Wm. Paterson, Minister of Customs, replied that rifles had been imported without restriction for several years but 'the department had not granted permission for the importation of these rifles since January last.

Paint and Oil Markets

MONTREAL.

Looking backward it cannot be said that the spring bookings generally have been altogether satisfactory in varnish, paints and colors, the season so far showing an absence of the snap usual in paint and decorative material at this time of the year. Dealers have been buying very cautiously, and although the orders have been well assorted they have lacked bulk. There is one great encouragement, however, in the fact that although the trade has not been equal to 1907, the orders and the outlook are certainly much better than in the spring of last year. Furthermore, trade in the Northwest is particularly bright. Bookings from the Maritime Provinces may be considered fairly good, but Quebec and Ontario are not so strong as they should be.

The agricultural implement and carriage trades throughout the whole of Canada are showing increasing activity, and are placing good orders. On the other hand, the structural and allied metal trades, which are large consumers of paint of every description, are buying with some caution. The outlook for ready mixed paints promises to be excellent as dealers are preparing to push these lines more thoroughly than ever, and the manufacturer and jobber are ready to back them up.

Of the various lines, turpentine has been keeping very steady with a fair inquiry, and the prospects look very good. The price basis established some time back in linseed oil by the Canadian crushers has undoubtedly done much to steady the market. Orders, while being of a cautious nature, have shown improvement lately, and good trade should open out when the painting season is at hand. All the lead products have been inactive, but with warmer weather it is thought that these articles, together with colors and varnishes, will experience a good spurt in April and May. Bookings in paris green have not had the snap of former years, and the outlook seems more or less speculative. It is thought that the usual quantity, however, will be placed before the warm weather ensues. Broadly speaking, the paint, color and varnish trade, while not generally very busy at the present time, is full of confidence as to the future. An improvement is noted every day, although it may be gradual, and the whole movement should culminate into strong trade during the painting season.

TORONTO.

March 19.—The return to better times is evident among paint lines as well as in other general lines of business. The spring of last year was a very fair season for the selling of paints, and stood out well when compared with the volume of trade done by the selling world generally. Though the figures of 1908 did not reach those of 1907—as was but natural to suppose—yet when placed alongside the building figures for the two years, paints went fifty per cent. better than any other one line usually reckoned when building permits are taken into account. The explanation is simple. While the depression cut down new building, many of the persons who had contemplated erecting new structures and were forced to retrench were all but compelled to buy paints with which to brighten up the old warehouses and homes.

During the summer trade dropped off quite appreciably, and with it prices fell down. The fall brought very little better business and not much change in prices. Glass and putty moved fairly well, but nothing in proportion to what was done the previous year. White lead was interesting several times during the fall while cutting was going on, but prices again righted themselves.

Probably the most interesting of all paint lines last fall was linseed oil. Late in the summer rumors got abroad that jobbers were cutting prices. The rumors spread and were laid at the doors of manufacturers, and soon cutting was on in earnest. The price was lower than English oil could be brought into the country, and not a few hardwaremen placed their orders while the price was advantageous for them so to do. Early in the present year, however, manufacturers got together, settled their differences and put a firmer tone to the market. Oil prices advanced, and in sympathy with them turpentine, too, increased in price. But there were other factors as well. One was that linseed was scarce, and the United States drawing on Canada for crusher supplies made the home manufacturers cautious. Low grade turpentine was put on the market, but not coming up to standard it soon lost favor with the paint trade. An increased demand for Southern turpentine and reported lowering supplies soon had the effect of boosting prices. The supplies, however, were better than reported and so the price decli@ned though not to the figure prevalent earlier in the season.

Paris green is another line which figured in the cutting process. Large quantities were sold for future delivery before cutting became general, however, and so the market was not disturbed so much as in other lines. Stains and varnishes have been rather slow sellers for almost a year now; but petroleum, as was to be expected, was active.

January opened up with inquiries pretty plentiful, but the month had almost gone by before booking was at all generous. February was a fair month, and since the opening of March a decidedly advanced step has been taken, and the indications are that steady and fairly rapid improvement is opening up the way. In fact, as one jobber expressed it, "if we had but ten days of continued sunshine the paint trade would be back almost to the position it occupied in 1907."

A comparison of prices to-day with those prevailing a year ago may be interesting.

UNITED STATES METAL MARKETS

New York, March 18.—The Iron Age says: The reduction in the price of tin plate to $3.40 per box, Pittsburg, came rather earlier than expected. It is understood that it was the result of the fact that canners were declining to take the goods contracted for unless a reduction were made. In the wire trade new business is light, as is only natural since it is the general impression in the trade that a considerable reduction in the price will be made later on.

The pig iron markets generally are weaker, and it looks as though a reduction in the active capacity will soon become a necessity. There has been a fair amount of business in foundry irons in New England, where northern New York, Virginia and Alabama furnaces are competing closely, until $16.50 delivered, for No. 2 foundry has been done in at least one conspicuous instance. In some sections of the country stocks are accumulating and eastern steel makers notably are holding up shipments, because their plants are running very slowly.

The copper trade has had another spasm this week, from which it has recovered slightly during the last day. It si authoritatively stated that 12⅛ was done for electrolitic. It looks like a flght to the finish between the large producing interests, none of whom seem to be disposed to curtail output. The sooner the weaker mines submit to the inevitable closing down the better for all. From the consumers' point of view the metal will need close watching, although 11½c does not seem further off now than 12c did six weeks ago.

CURRENT MARKET QUOTATIONS.

March 20, 1909

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for larger quantities and prompt pay. Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate.

Write for booklet

J.M.T. Pat. Cushion-disc Bibbs, made for durability. Last for years without attention.

J.M.T. Valves. Noted for their excellence. Look for trade mark on the body of all valves offered you as J.M.T. Goods.

There will always be two grades of goods made. The kind sold at price consideration only and those sold on merit, of quality and utility.

The buyer of experience knows that reputation for reliable supplies is not made on "cheap" goods—quality and endurance must be the foundation.

In PLUMBING and ENGINEERING BRASS GOODS, J.M.T. lines are known for their excellence in quality, and they last. Prices reasonable.

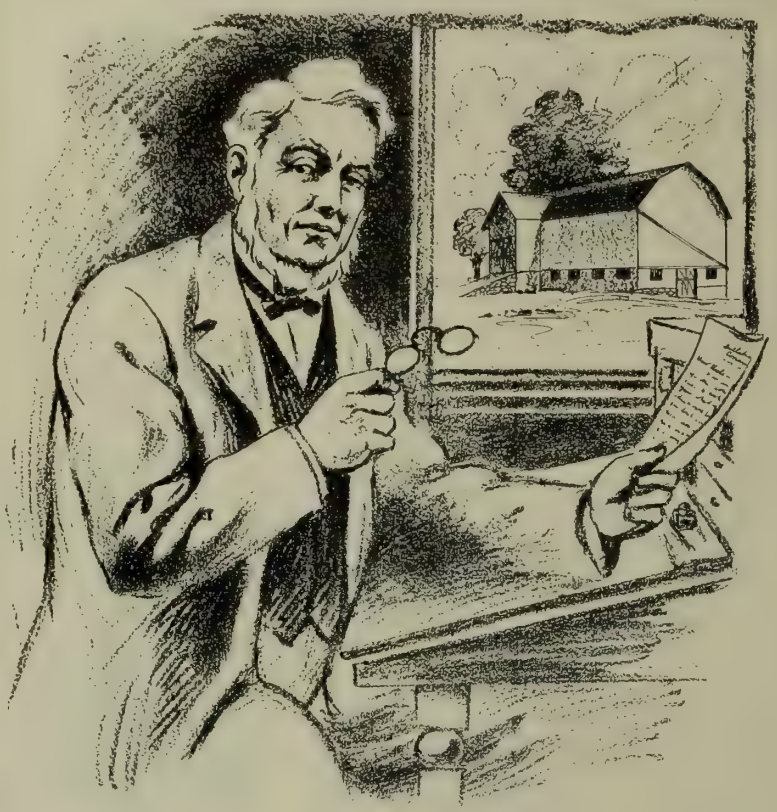
THE PHIL of Metal



The keen, kindly, shrewd represents hundreds of mended our metallic build twenty-five years. He will users of architectural sheet letters from wide-spread dis understand the merits of our them perfect in service for

We HAVE pro for twenty-five

Extract from the "Philosopher of Metal Town":--

"I always believe in dealing with the oldest and largest manufacturer in ANY line. You share in the merit of the goods which MADE them the largest."

Agents wanted in some sections. Write for details or write us for complete estimate on any metallic problem you may have on hand, mentioning this paper.

One Proof of Our Shingles

This Simcoe letter reports the Usual Success

The Metallic Roofiug Co. Limited,
Toronto

Simcoe, Ont., April 9th, 1908.

Dear Sirs:—"We have handled your "Eastlake" Shingles for nearly a quarter of a century. They have been on the Court House, Free Library and other public buildings in this town for 18 years. We have used very large quantities during the past 25 years, and they have always given first-class satisfaction, and have never required any repairs."

(Signed)
MADDEN BROS.,
Tinsmiths and Hardware Merchants.

We Manufacture

"Eastlake" and "Empire" Metallic Shingles, Rockfaced Brick and Stone Sidings, Sheet Steel Pressed Brick, Metallic Cornices and Sky Lights, Ventilators and Finials, Pressed Zinc Ornaments : : : :

THE METALLIC

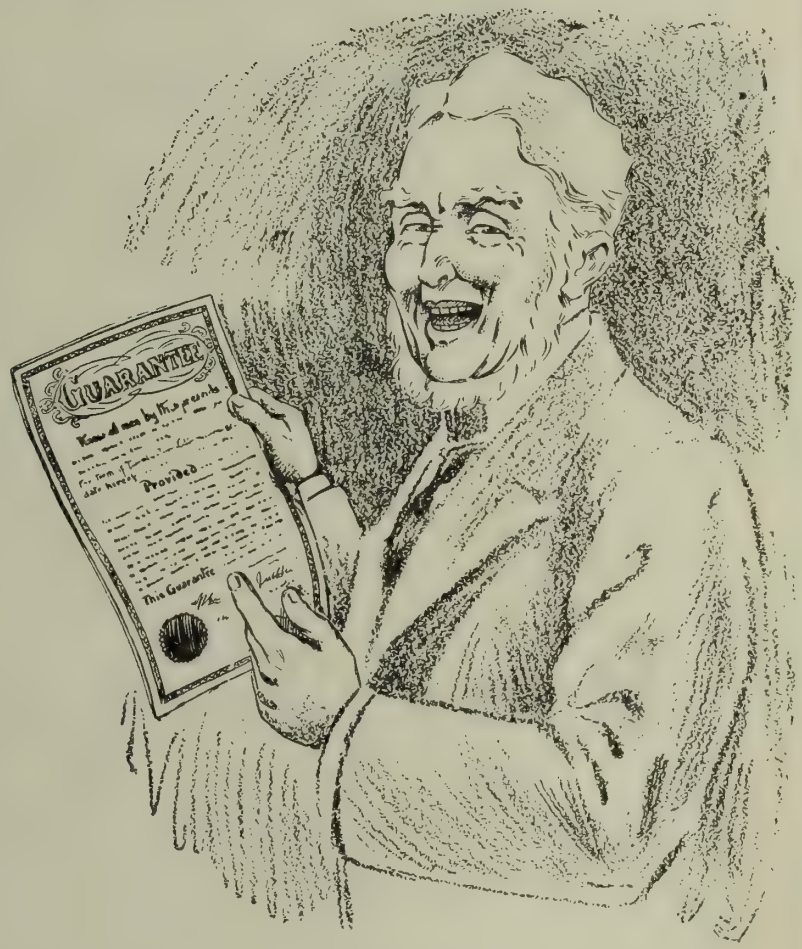
OSOPHER

Town

"Philosopher of Metal Town" customers who have recoming materials for the past soon become familiar to all metal goods as a publisher of tricts, written by those who goods, and who have found a quarter century past : :

tected the trade years : : : :



The much discussed question of who was the original manufacturer of sheet metal shingles in Canada is easily proven by referring to the records of the Canadian Patent Office : : : : : :

Extract from the "Philosopher of Metal Town":

"I am more impressed with the goods which have been TESTED for the PAST twenty-five years than with those which may be GUARANTEED for the NEXT twenty-five years."

We Manufacture

Fire Proof Glass Windows and Doors, Hayes Patent Steel Lath, Corrugated Iron, galvanized or painted, straight or curved ; Eave-troughs and Conductor Pipes

ROOFING CO.

and WINNIPEG Limited

A letter from Lucknow

"Eastlake" Shingles Used in 1885

Lucknow, Ont., April 9th, 1908.

Dear Sirs:—"I take great pleasure in testifying to the good qualities of your "Eastlake" Shingles. We put your painted shingles on our Town Hall here in 1885, 23 years ago, and although they have only been painted twice since that time they are in good condition yet. I consider the lock on the "Eastlake" the very best, and believe that a roof covered with the galvanized "Eastlake" will last forever."

(Signed)
THOS. LAWRENCE,
Hardware Merchant.

Ginger Up Your Paint Department

Cut out the deadwood and stock up with lines which have "made good" and are still on the boom.

MURESCO is "Making Good" Every Day.

It has the approval of the best painters and decorators because they can get results from it that cannot be obtained from any "cold water kalsomine" or any other material. Many painters will use nothing but Muresco for water color wall finishing. They know by experience that it will not rub off, crack or peel; that one coat of it will give better results than several coats of cold water kalsomine. Muresco is a hot water finish and we herald the fact. Experience shows that kalsomine particles will only dissolve ***right*** in boiling water. You can corner the painters' trade by handling Muresco.

Moore's Pure Linseed Oil H. C. Paint

is made to satisfy customers. Though its price is moderate, its quality is second to none. It is better in quality than many paints of a higher price. You can prove it. Paint a clean board with one coat of any other paint, then compare results. The board painted with Moore's will be better covered and truer in color than the others. That's because Moore's Paint is made of pure colors, thoroughly ground and re-ground in Pure Linseed Oil. Moore's Paint is always a seller, never a "sticker." It's quality is good enough to get talked about and recommended by one user to another.

Make a start in the gingering up process by writing us for color cards and prices.

Benjamin Moore & Company, Ltd.

Distinct Trading Advantages

¶ Your orders for paints, oils, glass, etc., are not placed on sentiment. When we tell you of the length of time we have been in business and of our recognized reliability we are appealing to your business acumen — not to your sentiment.

¶ Our long experience gives us thorough market knowledge. We know the goods that move and what makes them move. We have seen new lines come and disappear in rapid succession. We know the lines that possess staying power. Experience has taught us what the trade wants and when they want it. We have learned where and how to buy to get the best that's going in price and quality.

¶ Our goods have been tried out by **TIME**—and have stood the test. These things create confidence in our reliability.

¶ Just try us with a sample order.

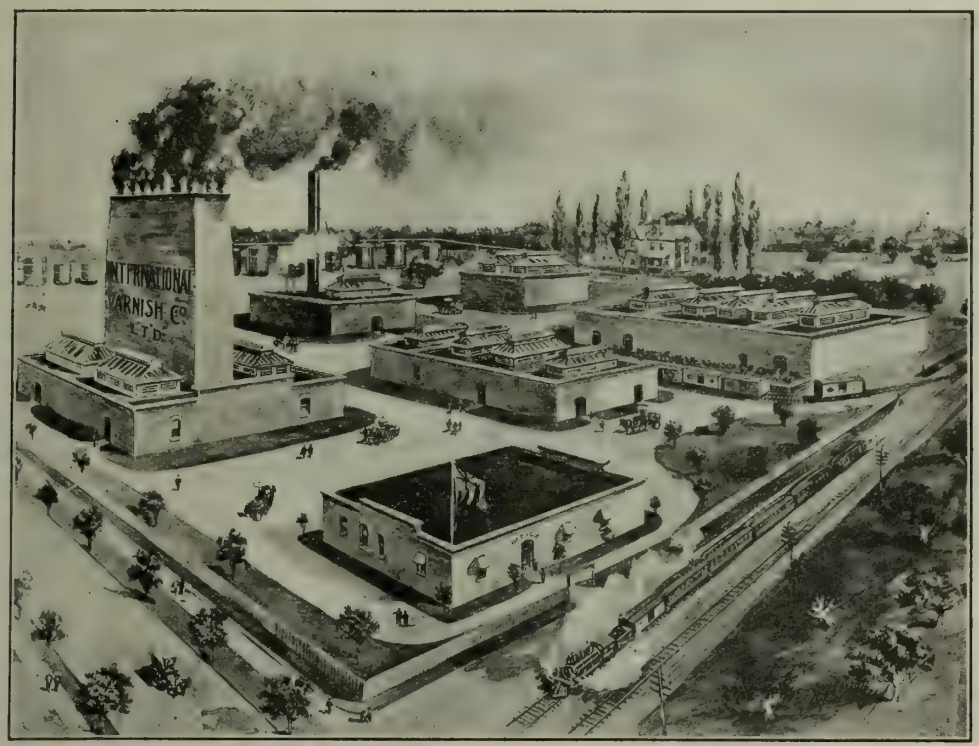
Hammering Home Some Facts



Most progressive hardwaremen are more or less familiar with the reputation of our products for sterling merit and reliability. Are you? If you are not selling our lines you are neglecting an important source of profit and the opportunity to expand your business and strengthen your reputation.

Lacqueret

A translucent lacquer in various colors for home use. It gives new life and beauty to any kind of worn woodwork and attains great popularity with housekeepers wherever introduced.

Elastica Floor Finish

An exceptionally quick and hard-drying preservative that retains its lustre and preserves the wood under the severest wear and washing. Works easily, is extremely elastic and does not mar, scratch, white or spot.

Elastica No. 2

An interior finish of great durability especially adapted for such exposed woodwork as hallways, bathrooms, dining-rooms, kitchens, window-sills, bar fixtures, etc. Very elastic and will not scratch or mar white.

Flattine Cabinet Finish

Produces an even flat finish without rubbing. Dries bone hard over night, and is extremely tough and durable. Contains no wax. Two coats produce a rubbed finish effect on new work; one coat is sufficient on old work, or over a gloss varnish.

Sold in Sealed Cans Only.

THE TORONTO
Plate Glass Importing Co., Ltd.

(HILL & RUTHERFORD, Managing Directors.)

TORONTO

SURE-ENOUGH quality inside the tins; sure-enough selling-help to move those tins off your shelves; there's the solid reasons for stocking up now with

Floorglaze

It's the floor enamel that dries hard over night; that covers perfectly; that will not flour nor check; that is proof against shoe-heels and scraping chairs; that, being waterproof, is good for places exposed to the weather (verandahs, summer-houses, etc.), and that your customers will frankly admit is ahead of anything of the kind they've used or heard about.

Get Floorglaze in your stock before the Spring-cleaning sets in—that's almost due now. You will find it a seller for sure, because there is the selling-aid behind it that moves good goods off the dealer's shelves. You will find us helping you right straight along—filling your orders double-quick, backing the goods up with publicity, and making it easy and profitable for you to hitch up with this live concern. Send for sample (free) of Floorglaze, and color card showing the ten attractive colors in which it comes. Get your Floorglaze orders in early—the profits will come right along.

While you are about it, tell us to send you also a free sample can of the one varnish that does equal best coach varnish and sells for a good deal less. It's called

Elastilite Varnish

It has a brushing quality that satisfies every painter who tries it—get the free sample can and test it yourself. Fine for any work, indoors or out; grains beautifully; made of specially selected gums; thoroughly ripened oils, and aged perfectly before it leaves the factory. Try Elastilite—it will certainly suit you. Write about it to place nearest you.

Old Home Week.

Messrs. Barry & Butler,

Allentown, P. Q.

Gentlemen:-

Your letter containing the information that Allentown is to have an Old Home Week and parade is of especial interest to me, as we have just the material to help you make one of the best exhibits in the celebration.

I am having our Advertising Department design a special float for you, and they will send you blue prints together with full instructions for its erection. We will also send you a liberal supply of our ''Little Paint Man'' transfers for general distribution. We will also select some Brighten Up Triangles, some ''Little Paint Man'' Window Cards and other features which we think will aid you in this celebration.

I want you to feel that we are back of you in pushing S-W. Products, and will be only too glad to give you any further assistance possible. With best wishes for the success of your celebration, I remain

Yours very truly,

C. C. BALLANTYNE.

The FOUNTAIN Sprinkler

NOT merely a round box with holes punched in it to let the water out —BUT a perfect Lawn Sprinkler.

NOT merely a group of straight round streams working with mathematical precision—BUT a natural shower of spray.

The Sprinkler with the "MIST LIKE SPRAY."

No other Lawn Sprinkler can produce the beautiful—The perfect results like the "FOUNTAIN."

The name "FOUNTAIN" is plainly marked in raised letters on the bottom of every Genuine, Original FOUNTAIN Sprinkler.

When you think of Lawn Sprinklers — Think FOUNTAIN
When you buy Lawn Sprinklers — Buy FOUNTAIN
And insist on getting the FOUNTAIN
Stick to the Sprinkler you KNOW is right.

Do you want a sample for comparative test.
Post paid to any dealer at the wholesale price.

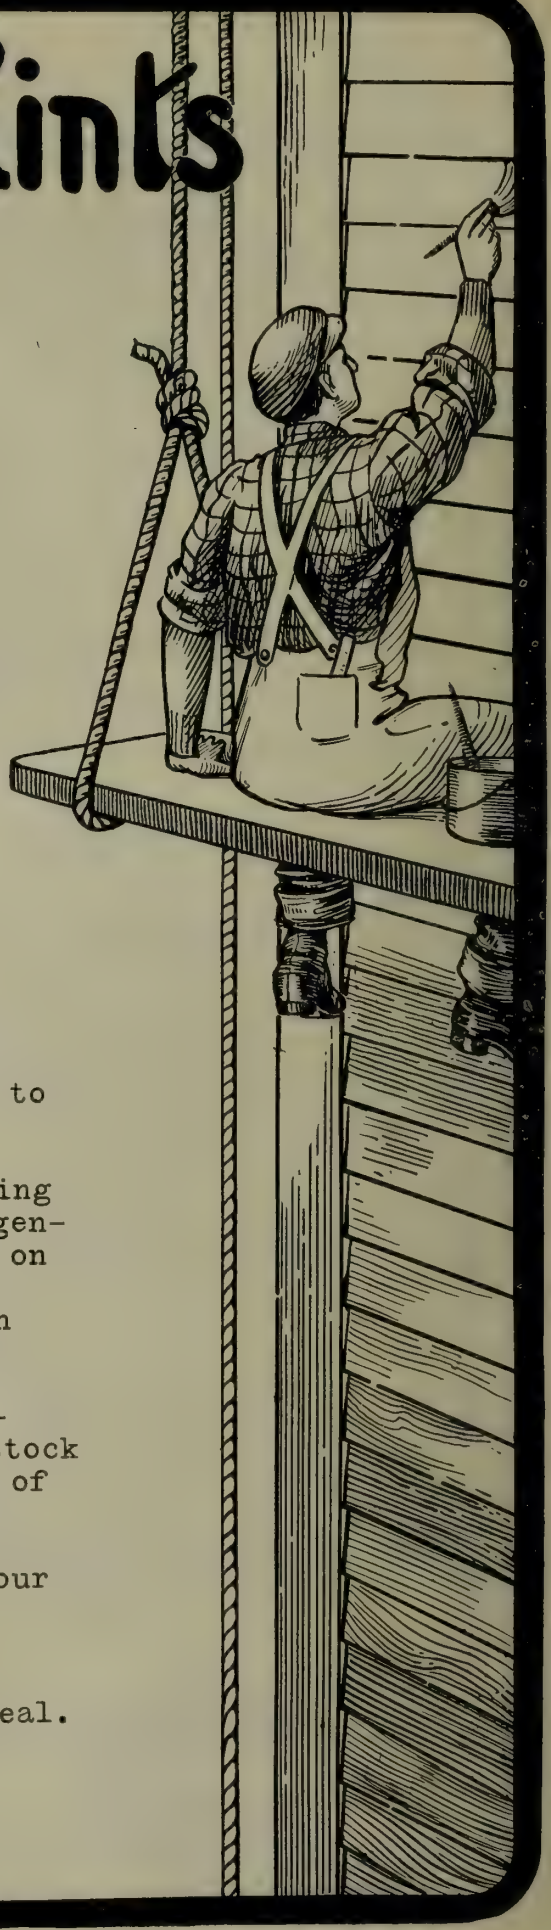
Ramsay's Paints



DEALERS AND FRIENDS.

Once again it is our greeting--a greeting for Spring, when the sun comes out reminding us forcibly of paint and business.

Paint and business--that is it. From January to this date we have called you to prepare for its coming.

Through these columns we have been continually proving to you the overstopping qualities of Ramsay's Paints, known all over Canada, and the far reaching benefits of a Ramsay Paint agency.

Many have heard and are now ready to reap results.

Our newspaper campaign, bill-posting campaign, letter campaign, card and general advertising system will soon be on in full strength to draw for you the business which you will always retain with the quality of Ramsay's Paints.

Be sure you write us--agents all--stating fully your requirements for stock and helps for the big Spring opening of the Ramsay Paint trade.

You can have our help as well as our quality. Get ready!

THE MARTIN SENOUR CO'S. POPULAR SPECIALTIES

PIONEERS PURE PAINTS.

A Paint for Every Purpose

MR. DEALER

The advantages of handling a line of goods that *is complete* and of good quality are *all* in your favor.

When you can turn to your shelves and supply any need in the paint line that your customer demands, whether for painting the house on the outside, to enameling the bath tub on the inside—you not only ensure getting *all* his paint patronage, but incidentally win his trade on the other lines you carry.

People *"come back"* to the store where they can get what they want. Thus you *"hold"* their trade not only on paint, but on other lines, too.

With a complete line of paint like

MARTIN-SENOUR PAINT VARNISHES ENAMELS STAINS, ETC.

you avoid the risk of losing *immediate* sales and also of losing your customer's entire trade. You avoid carrying a miscellaneous stock which means many *"left overs."*

You avoid tying up more capital in stock than is necessary.

Every good painter who has used these goods will tell you they are unequalled. They are trade-builders, because they give the buyer perfect satisfaction. If you are looking for a line of paints that will give you both pleasure and profit, *your wants* will be completely supplied in Martin-Senour Paints.

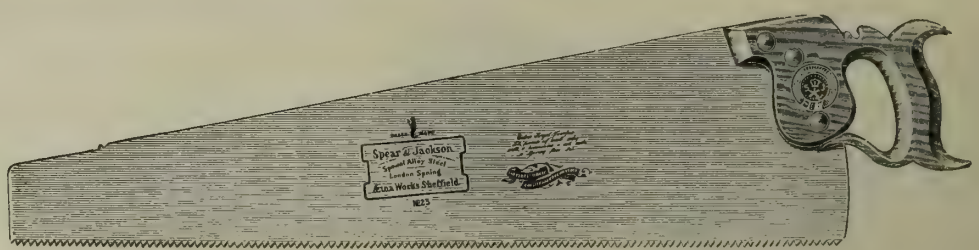
LOOK OUT!



¶ Live business men should always be on the look-out for new lines which are going to take on, because by not carrying them they lose trade and reputation.

¶ We recommend them, therefore, to be quickly on the trail of our new No. 23 Handsaw, which has already met with great favour, partly because men wanted a straight back to compare in quality with our 87 and 87A, and partly because we have hit on a mighty good thing in our new alloy saw steel.

¶ There's "just a little something" in it which makes the difference your customers will notice.

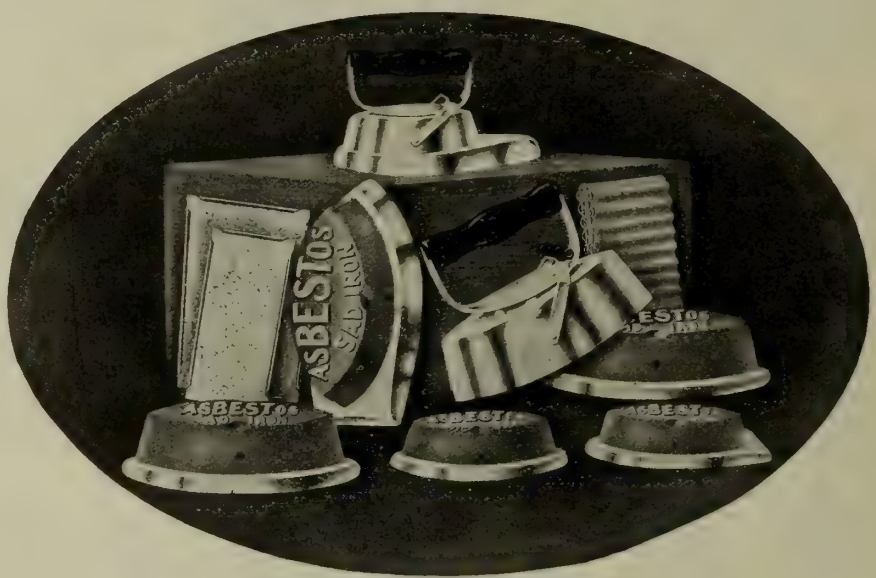
A License to Exist

Every article ought to have some excuse for being on the market. There ought to be something original, something different, about an article to entitle it to a place in the mercantile world.

It is a mighty small business to make an imitation of a standard article and market the imitation on the strength of the reputation of the original. A license to exist means something created, an advanced step in methods of manufacture and distribution.

The excuse for putting Asbestos Sad Irons on the market is two-fold: An improvement over earlier sad irons; increased profits for the dealer.



No. 196 HOUSEHOLD SET

Another way Asbestos Sad irons are an uplift to trade is by getting away from the three-piece set. When all irons were alike it required only three to make a set, because the same iron had to be used for all kinds of ironing. The line of Asbestos Sad Irons contains special designs for all different kinds of ironing so that the logical set is made up of six irons.

In the Asbestos Household Set a woman secures an iron for each laundry need, from pressing heavy goods to "doing up" the daintiest linens and lingerie. At the same time the dealer makes twice as big a sale as when he sells a three-piece set—doubles his profit.

That is the license for the existence of Asbestos Sad Irons. The dealer who "gets in right" with this line is bound to enjoy larger sales and better profits.

Your stock is not complete without the No. 196 Household Set. Order to-day from your jobber, and write to us for special display cards, circulars and newspaper cut to boost the "New Unit."

SAFE LOCK

There are many good reasons why you should sell SAFE LOCK Shingles. ***They allow a good margin of profit. They have the best reputation among your customers. They are the only shingles really locking on four sides. They are the easiest to lay on a roof.*** Safe Lock shingles fit together without trouble because the locks are made on improved automatic machinery, and are absolutely uniform.

Every SAFE LOCK shingle is made to meet the rigid requirements of the British Government for Admiralty and other public service. This fact guarantees durability.

Our Free Lighting Insurance Guarantee is something that makes a direct and winning appeal to intending buyers. Ask us for full particulars of this clinching ***"Reason Why."***

If your are not already pushing the sale of SAFE LOCK shingles, now is the time to begin. Write us at once for an outline of our agency plan.

Every Little Bit Helps!!

Mr. Hardware Man,—Don't you often find that the "little sales" of the day are a big feature in the day's receipts and are often the lever to larger sales?

The Kaiser Wax Pad and Iron Cleaner

is a "little thing"—retails at 10 cent—but it is a household necessity, something entirely new on the market, a quick and big seller, with a good profit.

Every housekeeper dreads ironing day, especially so when she has a lot of shirt-waists, men's shirts, collars, cuffs, etc. to iron, she always wants to obtain a high grade finish, equal to first-class laundries. She of course asks the dealer for advice—in return he offers her the common wax—She knows it is impossible to do good work with the common wax—So she walks away—one customer lost.

Now where she can procure an article of this merit—that reduces ironing time by half—reduces labor to a minimum—adds to the finish of clothes—and makes ironing a day of pleasure—THERE SHE IS SURE TO DO HER BUYING—AND LEAVE HER ORDER FOR OTHER THINGS.

A post card to any of our Canadian agents or direct will bring a sample of this great little business getter.

Facts That Make High Quality

Every Butt and Hinge turned out by our plant is perfect in every particular, because we make it from beginning to end. We build our own machinery, and every sheet of steel used in our product is rolled in our own plant. As a result, the gauges are uniform and the product positively perfect.

Nearly every Jobber in Canada handles our goods because they are always satisfactory to retailers and their customers.

If your Jobber can't supply our lines, write us and we will quote you some very close prices.

We make a specialty of manufacturing Butts and Hinges from blue prints supplied.

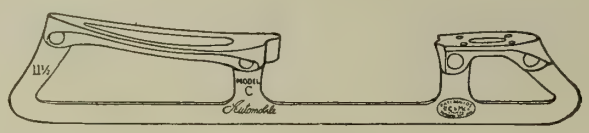
They've Made Good

Our line of skates have turned out to be the largest sellers of the season, and justly so, for we believe there are no skates on the market so good in appearance, strong in wearing qualities or fine in finish.



We have advertised heavily our aluminum top "Automobile" Skate, Model "C." It is a unique and an exclusive line that has caught on. Our Model "B" steel top "Automobile" Skate takes the first rank in its particular class—Positively the very best on the market.

The other lines are equally good and as far ahead of their competitors as Model "C" and Model "A."

Stock up for next year to-day—we will guarantee a strenuous advertising campaign.

The C. C. & M. Skate Line

These are the retail prices of the skates :

"Automobile," Model "C"
Aluminum tops, nickel steel blades, both round and pointed toes $5 00

"Automobile," Model "B"
Steel tops, plated and polished, nickel steel blades, round toes 4 00

"Automobile," Model "A"
Steel tops, plated and polished, nickel steel blades, made with and without puck stops .. 3 50

Ladies' Auto
A very light and dainty model made specially for ladies, in sizes 9, 9½ and 10 only .. 2 50

Cycle 25
A high-grade double-end skate, with whitened steel tops and laminated and tempered steel blades, highly polished and plated 2 50

Cycle 5
Whitened steel tops, flanged, curved runners of laminated and tempered steel, highly plated and polished 2 00

Cycle 15
A high-grade single-end skate, with laminated and tempered blade, whitened steel tops 1 50

Arctic Special
This is a new double-end model, with blade of high-grade untempered steel, same design as Cycle 25, divided foot and heel plated of whitened steel, strong and of fine appearance 1 50

Yukon
Whitened tops, single-end, blades of high-grade untempered steel, well finished 1 25

Klondike
Curved blades of high-grade untempered steel, highly plated and polished, whitened steel tops..... 1 25

Model 20B
Same blade and top as "Yukon" and same material, but not nickel-plated 75

Earl Automatic Carbide Feed Generator

has been pronounced the best on the market. Because it feeds the smallest amount of carbide. Because the pressure of gas remains the same at all times. —Two mighty good points—all the operating parts are right at hand (easy to learn). Simple, safety locking devices, built right, perfect agitator—will not clog pipes or burner tips, sold under a positive guarantee.

Permitted by fire underwriters—no extra insurance—cooking with gas ranges and hot plates. Is perfect for hot Kitchens, Hotels, Hospitals, Camps and Cottages. Perhaps you think such a superior generator is expensive, but it isn't. Made in sizes from 5 to 500 lights.

Write for prices and catalogue—It will appeal to you.

Three Reasons Why You Should Not Give Shelf Room to Imitations

Reason No. 1. Because they are not made from gypsum rock, as is Alabastine. They are whiting and glue—kalsomine—and other out-of-date preparations that nobody wants.

Reason No. 2. Because they are not advertised one-tenth as largely to the public as is Alabastine. We help the dealer sell Alabastine—don't expect him to do the whole thing.

Reason No. 3. Because we have REAL sales plans to help the dealer.

ORDER ALABASTINE

The Faculty of Making Friends

It's fine business brother, when you can make a friend of everybody that comes into your store. And it isn't so hard to do, either.

Take for instance the paint proposition. If a man comes into your store and you make a lot of promises that the paint don't fulfil—that man is going to find it out some day. And when he does—well—you'll lose more than one customer. But on the contrary, if the paint **"makes good"** you make a fast friend and gain a lot more customers—he'll tell his friends. You can't recommend Martin-Senour paint too highly. Say almost anything you want—make almost any kind of a guarantee. We'll stand back of you—and the paint will stand back of us.

MARTIN-SENOUR PAINT
100 Percent Pure

pleases everybody. Dealer, painter, house-owner and passers-by.

It pleases the dealer because he sells so much of it, and because it **pleases** his trade.

It **pleases** painters because it spreads so evenly and easily.

It **pleases** the house-owner because it does not crack, peel or wear off and lasts well, and it **pleases** the passers-by because its rich colors are a delight to the eye.

That's the kind of paint for you to sell Mr. Dealer. Just drop us a postal with your name and address on it. We'll tell you a few things you'll be **glad** to hear about. Won't you send it now while it's on your mind?

The Best Fence for you to Sell
Is the
DILLON HINGE STAY FENCE

We adhere to the policy of "small profits on a large business" rather than "large profits on a small business" and the dealer thus reaps the benefit of high grade quality and low prices. In addition our fence posseses the exclusive feature—the hinge stay—which removes alll strain from the laterals, making it the best and cheapest fence on the market.

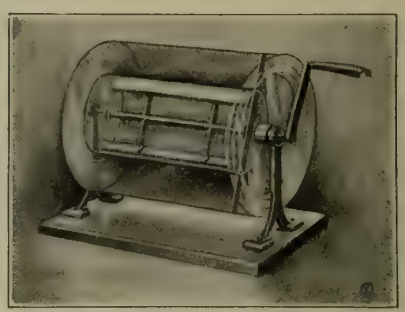
Newest, Cleanest and Quickest

The Mace Freezer

as used by the leading Cooking Schools for demonstration.

In the Mace New Departure Freezer we have taken a big stride in advance of all other Machines, in as much as we have at last perfected a Freezer which works in a Horizontal Position.

Good Profits. Made in Three Sizes.



Quick Sales. Same Price as old Styles.

Patented in Canada, Nov. 7th, 1905. Patented in U.S.A., Dec. 18th, 1906

This shows the small quantity of ice required, being about one-third as much as any other freezer on the market to-day, and as the ice and cream do not come in contact with the air, the mixture retains all of its original flavor.

The dainty freezer that requires only one packing of ice and does not make any dirt; can be made on your dining table without any leakage whatsoever. Salt or ice can not possibly get into cream as the openings are at opposite ends. One trial will convince you that MACE'S Ice Cream Freezer is superior to all others, the simplicity of construction, the large freezing surface, the even distribution of the contents, giving a perfect smoothness to the cream; and as the ice and cream do not come in contact with the air the mixture retains all of its original flavor, and it takes one-third of the ice that is necessary for all other freezers.

The New Way

See Here, Hardwaremen !

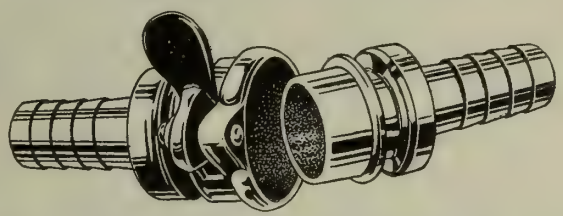
The cut on the left shows a tap connection made with the

TIME-SAVER HOSE COUPLER

On the right is a picture of what eventually occurs where a tap connection is made with ordinary couplers

The Old Way

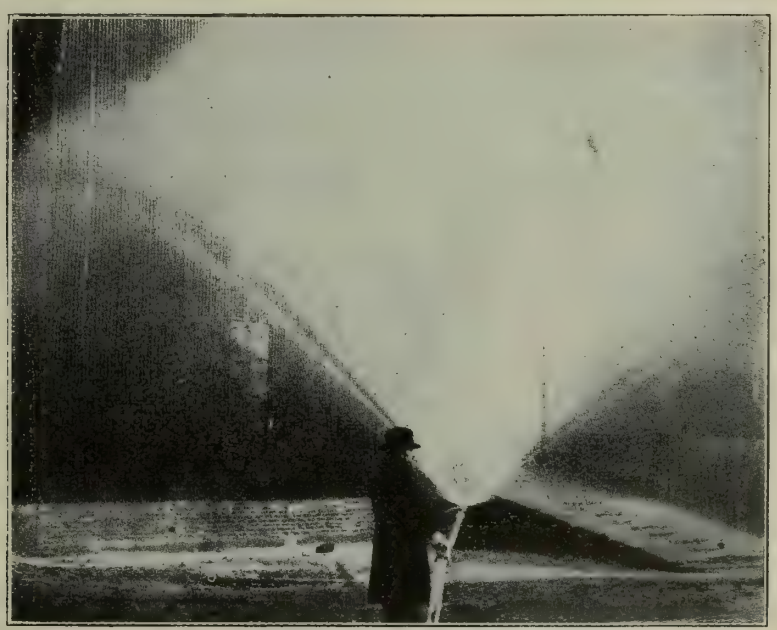
Your talking points are : The Time-Saver has no threads and the washer is placed where it cannot get out. To make a connection, insert coupler on tap, then press the latch with the



thumb, and an absolutely water-tight connection is obtained INSTANTANEOUSLY. Ten connections can be made with the Time Saver in the time required to make one connection with an ordinary coupler.

The two pictures immediately below show the new "T.-S."

NIAGARA SPRAY NOZZLE



With this nozzle a solid stream may be instantly turned into spray, thus doubling the fire-fighting efficiency of a stream of water, as the spray entering a burning apartment is at once converted into steam which will extinguish a fire more rapidly than water. The Niagara Nozzle can be shoved into the burning room and left there until its work is completed, as it will not shift its position, and works just as well as if a man were holding it. The "T.-S." garden nozzle throws a fourteen foot spray.

Are you selling these splendid lines ? Better sit down and write us for our complete price list and trade discounts.

SURETY BOND

INSIDE EACH ROLL OF

CONGO ROOFING

With the 3-ply Congo Roofing sold hereafter there will accompany each roll a Guarantee Bond, issued by the National Surety Company, insuring to the purchaser a good roof for TEN YEARS AT LEAST. The bond covers that space of time—but we are very confident that with the ordinary care and attention called for Congo will last much longer.

Congo is so thoroughly durable, reliable and altogether satisfactory that we have no hesitancy in offering our customers this security.

Congo has achieved for itself a reputation as the "never-leak" roof, which it sustains through all vicissitudes of weathers and climates.

This bond is issued as a proof of our belief in Congo and the National Surety Company stands BACK OF IT and back of every roll of Congo made. We know its worth and usefulness and want everyone who has a building to roof over to know the satisfaction of a Congo Roof.

To-day is the time to write for a sample and full information regarding this special offer.

The Most Reliable Razor In The World

is

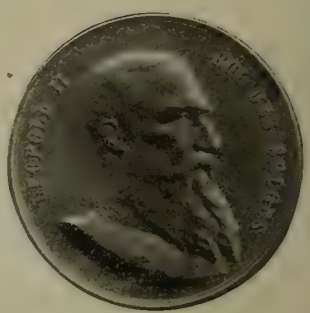
The AutoStrop Safety Razor

We can prove it. You can prove it. Our customers are daily proving it.

The AutoStrop Razor is the only self-stropping razor in existence. It is therefore the only perfected safety razor.

With *The AutoStrop Safety Razor* you have a freshly stropped, new, sharp edge each time you shave, and never know a dull blade. You can shave with ease and comfort in a steamboat or a moving train without fear of cutting your face. The stropping is done in half the time it takes to put a new blade into other razors.

The cleaning is simplicity itself, a second under the tap and a quick wipe with a cloth—no unscrewing or taking apart.



AutoStrop blades last many times longer than those of other safety razors.

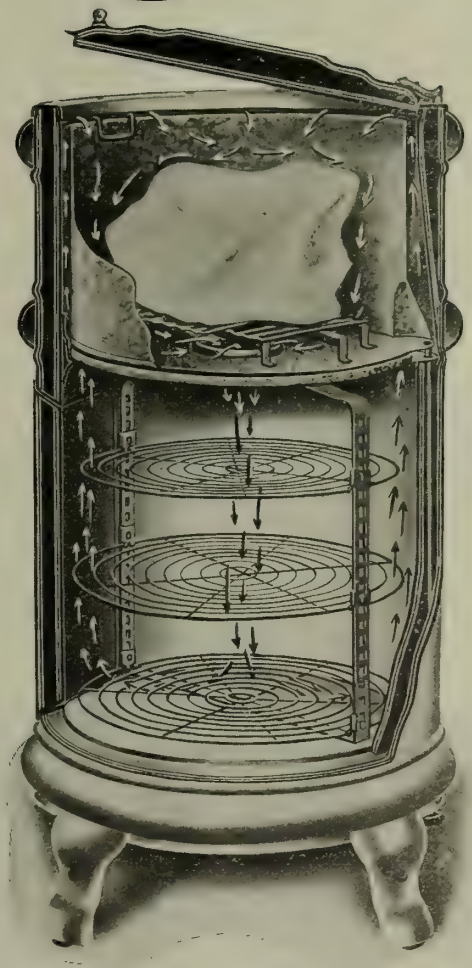
White Frost Refrigerators

The **"White Frost"** is the absolutely sanitary Refrigerator. There are no nasty corners to "dig out," there are no cracks or seams wherein germs and dirt can lodge.

The inside, as well as the outside, is enamelled spotless, snowy white, and the enamel is **baked on.**

The insulation is perfect, the space between the steel walls being filled with **Aerofelt** and **Maltha,** the best, as well as the most expensive, non-conductors known. Because of this perfect insulation, the **"White Frost"** is most economical of ice.

The hinges, locks and trimmings are of solid brass. The castors are of the latest type of ball-bearing.



The shelves revolve—save all "reaching over"—and are easily removable and as easily replaced, making it an easy task to keep clean and sweet.

The refrigeration is in harmony with natural law. The cool air drops down through the provision chamber, forcing the warmer up to the ice chamber, where it is again cooled and again drops down, maintaining a constant circulation of cold, dry air, keeping contents sweet, pure and natural.

The whole interior may be quickly removed and replaced.

No other Refrigerator compares in certain sanitation, perfect refrigeration, economy in ice, handsomeness of appearance, durability, convenience and all-round excellence, with the **"White Frost."**

Every housewife wants the **"White Frost"** as soon as she sees it. Every woman who has a **"White Frost"** is a continuous advertisement for it. The dealer who sells **"White Frost"** has the refrigerator trade of his town and will hold it as long as he sells the **"White Frost."**

Get your orders in without delay, as the demand is big and growing.

Get Your Share

There is big profitable business in Genasco Ready Roofing for wide-awake dealers.

We have created a steadily increasing demand by our campaign of national publicity. It has cost us thousands of dollars, but it is keeping dealers busy—the dealers who realize what a big help we are giving them.

Genasco
Ready Roofing

is a great seller. We tell everybody what it is made of—Trinidad Lake Asphalt. They know this is a natural and everlasting waterproofer. That inspires confidence, which is turned to complete satisfaction in the use of Genasco.

No wonder we have had to work overtime to fill dealers' orders.

They are get ing their share of the Genasco business because they are clinching the stirred-up sales in their own territory. It is just as easy for you to do that, too. Get your share of this business now.

Mineral and smooth surface Genasco Roofing. Guaranteed by our thirty-two-million dollar organization.

Martin's Store Ladder
Low Down High

For all merchants that carry merchandise on shelves enquire of E. R. CASE, Toronto

A Few Testimonials

Rockford, Ill., May 27, 1908.

Mr. S. B. Martin, Dalton, Ohio,

Dear Sir,—Ladder is very satisfactory—the new track holds up and were we fitting a "string of stores" we should place your ladder in each one of them.

Very truly,
Hunter Hardware Co.

Toronto, Ont., Sept. 28, 1908.

Mr. S. B. Martin, Dalton, O.

Dear Sir,—We are well pleased with the "Low-Down-High" Ladder you installed in our warehouse some weeks ago. We find same works very easily and smoothly and makes the work of filling orders from the shelves a very easy matter compared with the old style of ladders. We will be glad to receive quotations for Ladders for other parts of the Warehouse.

Yours truly, T. Woodbridge & Co.

Star Safety Razor

(The Pioneer)

is conceded by practical cutlers, and millions of users to be the **best Safety Shaving device in the world.** It is in a class by itself, being the **only Safety Razor** having an extremely keen **blade** that is made from double refined Sheffield steel that will **last for years** with practically no expense. It will pay dealers to stock **Star Safety Razors,** for with every sale they make a friend and customer. Why? Because they are giving value for money invested and selling an article that will positively give satisfactory results. (Over seven million have been sold in the past thirty years.)

A Man Who Can Earn $72,000 a Year

in a big establishment must know pretty nearly all that is worth while about "Salesmanship." Hugh Chalmers, of Detroit, is the man who climbed the $72,000 ladder. He knows how to "hire, manage and supervise men," and when he talks, it is in a racy style.

His views—snappy, bright and terse—appear in the April number of Busy Man's Magaziue. The article is thus written by one who knows—one, who at 29 years of age, was vice-president and general manager of a plant employing 5,000 persons, and directed a selling force of 500 men.

Business men—young men especially—should read this article. It is inspirational. It will incite them to greater things, assist them to realize what constitutes true salesmanship, and practice the basic principles on which it rests.

Capitalized Himself At $1,000,000

annually was what Chalmers did when working as a salesman, and he declares that "Salesmanship is nothing more or less than making the other fellow feel as you do about what you have to sell."

There is no greater art in the commercial world to-day than Salesmanship. You can learn a lot about it—about progressive business systems and methods—by reading Busy Man's Magazine each month. It is a publication full of ginger, alive with personal precept, direct in daily application.

It reproduces the latest and best contributions on business, industry, commerce and politics, from the current magazines of the world, and has much bright, original Canadian matter as well. Annually, it is a big $2 worth; monthly, it is worth a great deal more than the price of a single copy—which is 20c.

Use Hardware and Metal Want Ads.

There are a hundred little services that a "want ad." in HARDWARE AND METAL can perform for you.

It can get a customer for you for any show cases, counters, or any other fixtures you are anxious to dispose of; it can secure for you a set of tinsmith's tools, a typewriter, a silent salesman or any other article which you are anxious to buy cheaply.

The wider your market the better the bargain you will be able to make.

Our "want ad." page will put you in touch with practically every Hardware Merchant in Canada, and out of our thousands of readers it seems reasonable to suppose that there will be some man who is looking for just such an opportunity as you have to offer.

CONDENSED OR "WANT" ADVERTISEMENTS.

RATES.

Two cents per word first insertion; one cent per word subsequent insertions.

Five cents additional each insertion where box number is desired.

Contractions count as one word, but five figures (as $1,000) are allowed as one word.

Cash remittances to cover cost **must** accompany all advertisements. **In no case** can this rule be overlooked. Advertisements received without remittance cannot be acknowledged.

RULES FOR COPY.

In addressing replies care of HARDWARE AND METAL don't fail to give box number.

Replies addressed to HARDWARE AND METAL boxes are re-mailed to advertisers every Monday, Wednesday and Friday.

Requests for classification will be followed where they do not conflict with established classified rules.

Orders should always clearly specify the number of times the advertisement is to run.

All "Want" advertisements are payable in advance.

AGENTS WANTED.

This is the problem of many manufacturers who are anxious to get a foothold in Western Canada. It will be easily solved if HARDWARE AND METAL is given the opportunity to solve it.

MANUFACTURER, hardware specialty wants agents for Ontario, New Brunswick, Nova Scotia, on commission. Selling wholesale and retail hardware trade. Box 802, HARDWARE AND METAL, Toronto. [12]

UNITED STATES firm manufacturing a fine line of sheet metals and sheet metal products, such as corrugated sheets, corrugated roofing, roll roofing, metal shingles, also complete line of galvanized buckets, pails, wash-tubs, etc., are anxious to secure good Canadian agents for Montreal, Toronto and Winnipeg. State lines already carried and address Box 814, HARDWARE AND METAL, Toronto. (13)

WANTED—Second-hand set tinsmith tools. J. W. Scott, Streetsville, Ont. (14)

ARTICLES FOR SALE.

Don't keep any fixtures or tools around your store for which you have no further use. They are worth more to-day than they will a year hence. Don't keep money tied up which you could use to secure discounts from your wholesaler.

ELLIOTT-FISHER STANDARD Writing-Adding Machines make toil easier. Elliott-Fisher Limited, 513, No. 83, Craig St. W., Montreal, and 129 Bay Street, Toronto.

SECOND-HAND tinners' tools. For list apply to Box 807, HARDWARE AND METAL, Toronto. (12)

BUSINESSES FOR SALE.

Somewhere in Canada is a man who is looking for just such a proposition as you have to offer. Our "For Sale" department brings together buyer and seller, and enables them to do business although they may be thousands of miles apart.

HARDWARE BUSINESS FOR SALE in one of the finest farming sections of Ontario. Two railways. Stock about $4,500. Good reasons for selling. Address Box 782, HARDWARE AND METAL, Toronto. (11)

WELL established general hardware business in prosperous eastern Ontario town surrounded by excellent farming district. A good opportunity. Good reasons for selling. Box 812, HARDWARE AND METAL, Toronto. (12)

BUSINESS CHANCES.

WANTED—Partner wanted with hardware experience to join good tinsmith with established business in important town on the G.T.P railway. References furnished and required. State what capital. Complete particulars furnished on request. Apply Box 4, HARDWARE AND METAL, Winnipeg, Man. (13)

MISCELLANEOUS

ADDING TYPEWRITERS write, add or subtract in one operation. Elliott Fisher, Limited, 129 Bay Street, Toronto.

A MARKET OF BUYERS, backed up by money to spend, is open to you in the Busy Man's Magazine. Every territory in Canada is represented. If you have something to sell, something you want to buy, a condensed advertisement in the Busy Man's Magazine will put you in touch with the classes you want to reach. Four cents per word will carry your message from Atlantic to Pacific. Send copy of your advertisement along with order to cover cost of insertion. Your announcement will appear under a special heading. BUSY MAN'S MAGAZINE, Montreal, Toronto, Winnipeg.

HIGH CLASS COLOR WORK; Commercial Stationery, Posters. The Hough Lithographing Co. Limited, Office—No. 3 Jarvis St., Toronto, Telephone, Main 1576. Art, Good Workmanship; Business Methods.

IF INTERESTED in a Duplicating Machine for getting out circular letters, reports, price-lists, etc., or for printing various office forms, write for booklet and samples of work. The "POLYGRAPH" is the newest, latest, and best, and sells for a lower price than the others. Is unexcelled by any similar device on the market. F. W. Tenney, Canadian Sales Agent, 123 Bay Street, Room 116 Stair Building, Toronto, Can. (tf)

IF YOU are looking for a side line to add to your business there is none better than COLUMBIA GRAPHOPHONES. Double Disc Records (which means two records for a single price) and Indestructible Records (that will not break or wear out no matter how much you abuse them). The Columbia Phonograph Company is the only firm that manufactures both Disc and Cylinder Machines and Records, therefore, a Columbia dealer has the advantage over all others, as he can furnish his customers with what they want, while his competitor has to sell them what he has or lose the sale, which he generally does where there is a Columbia dealer. Are Columbia goods sold in your town? If not, why not? Do you want the exclusive agency? (remember exclusive). You had better write to-day or someone else in your town will read this advertisement and beat you to it. A postal will bring catalogues and full information free. Write to-day. Do it now. Toronto Phonograph Company, Limited, Exclusive Columbia Jobbers, 40 Melinda St., Toronto, Canada.

7,217—National Cash Registers were sold during May, 1908. That's more than were sold during May, 1907. The National Cash Register Company, F. E. Mutton, Canadian Manager, corner Yonge street and Wilton avenue, Toronto.

NOTICE—Users of Pitner Gasoline Lamps are warned against being induced to purchase parts of other makes of lamps to be used on the Pitner. The most vital part of any lamp is its generator, and the Pitner generator has been granted a patent in Canada, the United States and other countries, on the principle of its improved method of generating gasoline vapour. Supplies and parts for the Pitner lamps can be received by return mail by applying to our representatives or direct to THE PITNER LIGHTING CO., Limited, 36-38 Lombard St., Toronto, Ontario.

NOTICE—The Village of Langenburg, Sask., is installing a system of Fire Protection and the Secretary is open to receive quotations from manufacturers as to the prices of Chemical Engines and Manual Pumps. Write to The Secretary, Village of Langenburg, Langenburg, Sask. (12)

THE RELIABLE LIGHT will light your store 100% better than gas, electricity or acetylene. 600 candle power light costs 1 cent per hour to operate. Thousands in use. A safe, reliable, pure white light of intense brilliancy. Write for booklet M. The Rice, Knight Mfg. Co., Limited, 40 Lombard Street, Toronto.

SITUATIONS WANTED.

Travellers, clerks, or tinsmiths, wishing to secure new positions, can engage the attention of the largest number of employers in their respective lines, by giving full particulars as to qualifications, etc., under "Situations Vacant."

AS TRAVELER for hardware, stove, furnace, or plumbers' supplies, wishes to better position. Box 816, HARDWARE AND METAL, Toronto. (14)

TRAVELER open for new position. Has been calling on retail hardware trade in Ontario for fifteen years. Box 815, HARDWARE AND METAL, Toronto. (14)

STORE FOR RENT

NEW STORE to rent in Galt, Ont., opposite the Post Office. One of the best locations in town. It is now under construction, will be completed the first of April, 1909. Size, 40 ft. front, 100 ft. deep. Fine basement under whole building. For particulars address J. C. Deitrich, Box 915, Galt, Ont. [12]

WINNIPEG, MAN.

Manufacturers of Furnaces, Combination Heaters, Round and Sectional Boilers for Hot Water or Steam, Registers, &c.

We maintain an engineering department. Ask for our assistance when you have an out-of-the-way heating or ventilating problem to solve.

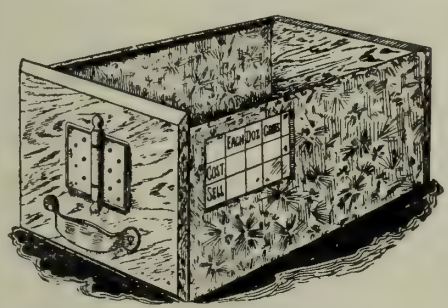
The Best Laid Out Store

IS THE ONE WHICH DISPLAYS THE MOST GOODS.

There are very few men who can describe just what they want, but if they see it sampled on a shelf box, they can point it out. Which is easier, for a man to point out the article he wants or for you to untie half a dozen packages to show him what you have in stock?

Your salesmen should be employed in SELLING GOODS not in looking for goods, untying packages and tying them up again.

Shelf boxes will improve the appearance of your store 100 per cent.



The Bennett Steel Shelf Box is the best box on the market, in Canada or the United States.

It has galvanized steel sides and bottom and thus saves at least 20 per cent shelf room. The steel is not nailed to the wood front but is locked in by our own patented process.

The Bennett Box is more durable than a wooden box. It has been tested for over seventeen years and we have never heard of one man who was dissatisfied.

GREAT SELLERS

Royal Oak Refrigerators

This line represents perfection in refrigerator construction. The walls consist of light, tightly packed layers. First, the outside case of thoroughly kiln-dried oak or ash, then a layer of insulating sheathing, an air space, another layer of insulating sheathing, a packed layer of mineral wool, another layer of insulating paper, then lumber seven eighths of an inch thick, then the inside lining of Galvanized Sheet Steel or Porcelain or Opalite as the case may be. Couldn't be more honestly constructed, could they? Result—proper refrigeration, ice economy. It'll pay you to handle such an excellent line. Catalogue on request.

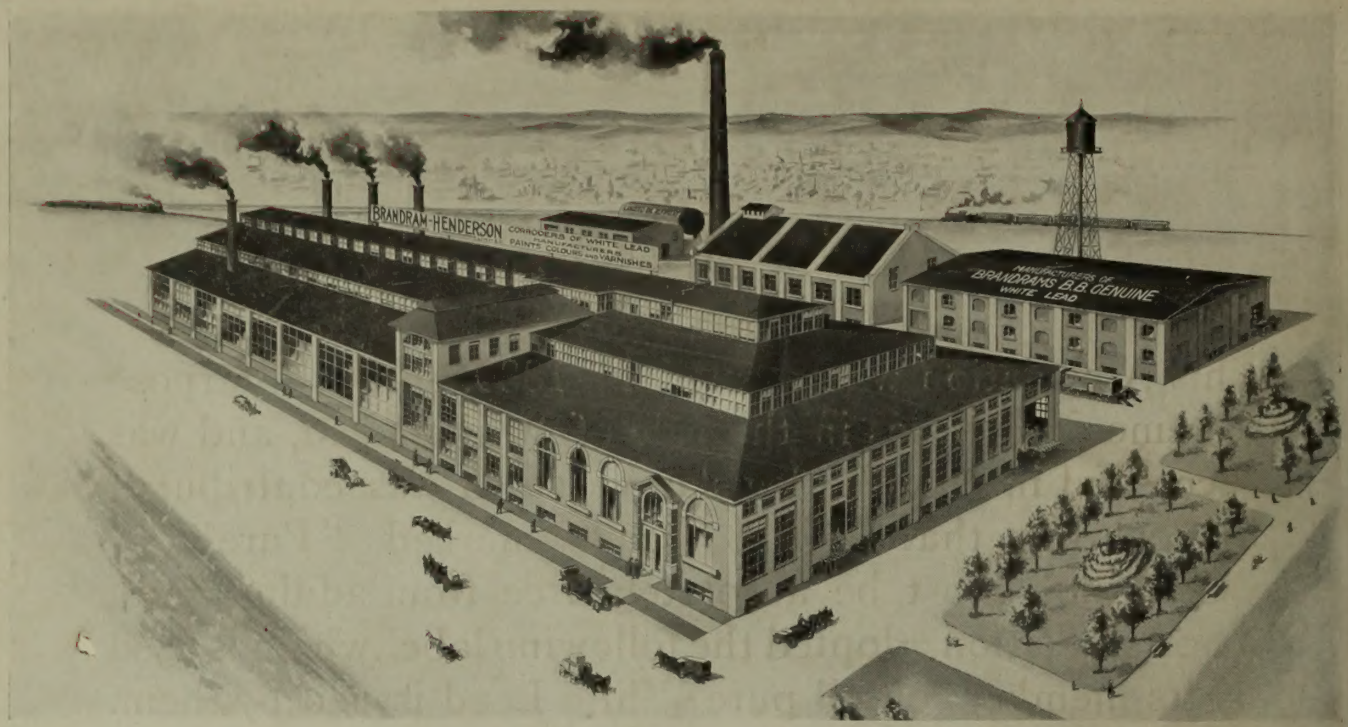
The White Lead Association of Canada

This Association was formed in 1889, for the purpose of removing abuses in the sale of White Lead, and was successful in securing legislation which has contributed to securing that White Lead, marked "Pure" or "Genuine" must be absolutely free from adulteration. The Association adopted the following label, which is used by its members on all pure White Lead issued by them.

This label, the Association believes, is being imitated in several quarters, and the copy label is here shown in order that dealers may be careful to avoid imitations and secure White Lead bearing the guarantee of the Association.

This label is registered at Ottawa and action will be taken against all parties using any imitation thereof.

All enquiries will be answered by the Secretary, JOHN HYDE, Chartered Accountant, 304 Merchants Bank Chambers, Montreal



New plant of Brandram-Henderson Limited at Montreal, covering about five acres, and including Lead Corroding Works, Paint Factory, Dry Color Factory, Linseed Oil Refinery, Power House, Warehouse and Offices.

The Factory Behind "English" Liquid Paint.

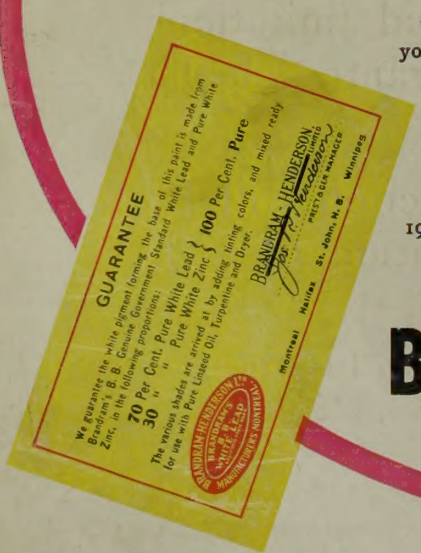
When You Stock "English" Liquid Paint

you know you are handling a product that is backed by a paint manufacturing plant acknowledged to be one of the most up-to-date and extensive in British North America.

This plant includes a lead corroding works where all the White Lead (70%) used in "ENGLISH" LIQUID PAINT is made and this is the reason why we can make pure paint at a moderate cost.

70% Pure White Lead—30% Pure White Zinc Guaranteed Pure—Formula on the Can.



You are told in the guarantee formula exactly what is in "English" Liquid Paint, and you should know how the paint is made that you recommend and sell to your customers.

"ENGLISH" LIQUID PAINT is pure paint.

The white base is 70% BRANDRAM'S B.B. GENUINE White Lead, 30% pure White Zinc, mixed ready for use with Pure Linseed Oil, Pure Turpentine and Dryer.

Our price to you is moderate—You make good profits. Attractive selling plans for 1909, one of the special features being extensive newspaper advertising all over Canada.

Send us a post card for full particulars.
